*Public Debt.*—The public debt of the United States during the administration of President Jackson stood as follows:

January 1, 1830...	\$48,565,406.50
January 1, 1831...	39,103,191.68
January 1, 1832...	24,322,235.18
January 1, 1833...	7,001,698.83
January 1, 1834...	4,760,082.08
January 1, 1835...	37,513.05
January 1, 1837...	336,957.83
January 1, 1838...	3,308,124.07

In his Seventh Annual Message (page 1379) President Jackson said: "Since my last annual communication all the remains of the public debt have been redeemed, or money has been placed in deposit for this purpose whenever the creditors choose to receive it."

**Jackson, Andrew—Continued.**

*Finance.*—President Jackson as a strict constructionist was opposed to national banks. In his First Annual Message (page 1025) he began his attack upon the United States Bank, and followed it up most persistently, even to the length of vetoing the bill renewing its charter in 1832. He said: "Both the constitutionality and the expediency of the law creating this bank are well questioned by a large portion of our fellow-citizens, and it must be admitted by all that it has failed in the great end of establishing a uniform and sound currency." The matter was drawn into politics by Clay and it formed an important issue in the election of 1832. In his Fifth Annual Message, the President (page 1250) casts doubts upon the solvency of the bank and suggests the appointment of a committee to investigate. Congress investigated and reported favorably to the bank as a safe repository for Government funds. The President made up his mind that the deposits should be withdrawn. Secretary McLane, of the Treasury, was unwilling to give the order, and he was transferred to the State Department and his place was filled by William J. Duane, who was satisfied that the removal of the funds was neither wise nor necessary, and refused either to give the order or to resign. Duane was removed in September and his place was filled during recess by Roger B. Taney, who ordered that after Oct. 1, deposits should be made in certain State banks and not in the United States Bank. A resolution of censure of the President was, after long debate, carried by Clay in the Senate; but a few weeks before Jackson's retirement from office the resolution was expunged. In the President's Farewell Address (page 1511) he devotes a great deal of attention to the currency, condemning the use of paper money. He says: "The Constitution of the United States unquestionably intended to secure to the people a circulating medium of gold and silver. But the establishment of a national bank by Congress, with the privilege of issuing paper money receivable in the payment of public dues, and the unfortunate course of legislation in the several States upon the same subject, drove from general circulation the constitutional currency and substituted one of paper in its place."

*Foreign Policy.*—The President expresses the policy of his administration in his Fourth Annual Message (page 1159) in these words: "Our best wishes on all occasions, our good offices when required, will be afforded to promote the domestic tranquillity and foreign peace of all nations with whom we have any intercourse. Any intervention in their affairs further than this, even by the expression of an official opinion, is contrary to our principles of international policy, and will always be avoided." In his Second Inaugural Address (page 1222) he says: "To do justice to all and to submit to wrong from none has been during my administration its governing maxim, and so happy have been its results that we are not only at peace with all the world, but have few cases of controversy, and these of minor importance remaining unadjusted." Great credit was given to the Jackson administration for the enforcement of the French spoliation claims, an account of which is given in the President's Seventh Annual Message (page 1371). European nations found no difficulty in settling their claims against France soon after the peace of 1815; but the claims of the United States were treated with supercilious silence. A treaty was made with France in settlement of these in 1831, by which France obligated herself to pay \$5,000,000 in six annual instalments, beginning Feb. 2, 1833. A draft was presented but payment was refused, on the plea that no appropriation had been made. President Jackson, in a message to Congress in December, 1834, advised Congress to direct that French vessels to the value of the amount be captured. The French government threatened war should the President not apologize. Great Britain interposed and advised France to settle quickly, which she did. The moral effect of the course taken by President Jackson was very great in demonstrating that the time had passed when the United States could be insulted with impunity.

- Jackson, Fred S.**, b. Stanton, Miami County, Kans., April 19, 1868; educated at Madison and other public schools of Kansas; was a teacher in the schools of the State for five years, and was admitted to practice law in Greenwood County in 1891; attended the State University and graduated from that institution in the school of law with the degree of LL. B., in 1892; elected county attorney of Greenwood County in the same year and served two terms, from 1893 to 1897; married in 1905 to Inez S. Wood, of Brown County, Kans.; appointed assistant attorney-general of Kansas by Attorney-General C. C. Coleman in 1906, and in the same year was elected attorney-general of Kansas, serving two terms, from 1907 to 1911; was nominated for Congress, 1910, at the primary election as a progressive Republican, and elected to the Sixty-second Congress from Kansas.
- Jackson, Henry R.**, minister to Mexico, resignation of, 5123.
- Jackson (Miss.), Battle of.**—After the engagement at Raymond, McPherson's column proceeded toward Jackson by way of Clinton, where it destroyed a portion of the railroad to

prevent the sending of supplies from the east to Vicksburg. Sherman moved along the Raymond road. May 14, 1863, when within 2 miles of Jackson, both columns met the Confederates whom Gen. Joseph E. Johnston had been collecting in order to reenforce Pemberton at Vicksburg. The combined corps of Sherman and McPherson attacked the small force of Johnston and drove it through Jackson and toward Canton, taking some prisoners. The Union loss was 300. The Confederate loss was 845.

**Jamestown (Va.), Battle of.**—Early in 1781 Virginia became the chief theater of the operations of the British and American armies. Benedict Arnold, having turned traitor to his country, was sent by Clinton, with 1,600 men, to the James River with orders to lay waste the country and

**Jamestown (Va.), Battle of—Continued.** destroy the stores at Richmond. Washington ordered Lafayette, with 1,200 light infantry, to capture Arnold. Lafayette arrived at Richmond April 29, just in time to witness the burning of the extensive tobacco warehouses at Manchester, on the opposite side of the river, by Gen. Phillips, who had succeeded Arnold. Phillips had 2,000 men. Cornwallis abandoned his unprofitable campaign in the Carolinas and reached Petersburg, Va., May 20, 1781, having nearly 8,000 men. Lafayette, realizing his inability to hold Richmond against this large force, returned northward to the Rappahannock. Here he was joined June 7 by Gen. Wayne with about 800 Continentals. Returning, Lafayette formed a junction with Steuben June 18, augmenting his force to about 4,000 men. Eluding Tarleton's command, he pursued Cornwallis back toward Richmond, which place the latter evacuated June 20, retiring toward Jamestown. July 6 Lafayette attacked Cornwallis near Green Springs, within a few miles of Jamestown. Lafayette distinguished himself for personal bravery in the fight, but was forced to retire to Malvern Hill. The American casualties were reported as 118 killed, wounded and missing. The British lost 75.

**Japan.**—"Land of the Rising Sun." An empire of Asia lying in the Pacific Ocean, east of China, Korea, and Siberia. It consists of 4 principal islands—the main island of Hondo or Nippon, Yezo, Shikoku, Kiushiu—and about 4,000 smaller islands, including the Loochoo and Kurile groups and the island of Formosa, which was acquired from China in 1895, comprising a total area of 147,655 sq. miles.

The Japanese people are chiefly engaged in agriculture, but with growing industries of various kinds, Japan exporting largely silk, tea, rice, coal, copper, fish, lacquer, etc. The Government is a limited monarchy, with an Emperor, cabinet, and privy council and an Imperial Parliament consisting of 2 houses. Buddhism and Shintoism are the prevailing religions. The Emperor is called the Mikado, an enlightened sovereign, under whom Japan has made unexampled progress in the arts of Western civilization. Japan, like China, remained isolated from the rest of the world for many centuries. The dynasty of the Mikados, Japanese history informs us, has

had a continuous existence since 660 B. C. Authentic history begins about 500 A. D. The Portuguese traded some with Japan between 1540 and 1638. With the exception of a limited trade with the Dutch, Japan held no commercial relations with the rest of the world till an American expedition under Perry, in 1853, forced a treaty upon her. This was followed by treaties with other countries. In 1867-68 a revolution transferred the power from the Shogun, the hereditary commander-in-chief of the army, who had held it for 500 years, to the titular Emperor, the Mikado. In 1894, in a war with China, the latter was completely defeated on land and sea. The war ended in 1895 with the payment of indemnity by China, the cession of Formosa, and the independence of Korea.

By the constitution of Feb. 11, 1889, the Emperor combines in himself the rights of sovereignty and exercises all the executive powers, with the advice of the Cabinet Ministers, who are appointed by him and responsible to him only. There is also a Privy Council, which is consulted by the Emperor on matters of importance. The Emperor can declare war, make peace and conclude treaties. He exercises the legislative power with the consent of the Imperial Diet. The Imperial Diet consists of the House of Peers and the House of Representatives. The Peers are male members of the Imperial Family, princes, marquises, counts, viscounts, barons, as well as persons designated (for life) by the Emperor for meritorious service or great learning. The fifteen highest taxpayers of a prefecture may also select one of their number to be a Peer for a term of seven years, with the consent of the Emperor. The House of Representatives consists of 379 members elected from districts having a population of 127,000.

Emperor Mutsuhito died Aug. 13, 1912, and was succeeded by Yoshihito.

The Japanese army is modeled after the German, and consists of about 220,000 men on a peace footing. Under the operation of the present laws the field army (first and second line together) will amount to 800,000 men, with ample reserve. Japan builds and equips her own warships, and has a navy of effective vessels, consisting of 11 modern battleships, including several captured from Russia, 2 dreadnoughts built and 2 building;

**Japan—Continued.**

2 coast defense vessels, 68 old, or small battleships, 15 armored cruisers, 19 protected cruisers, 6 torpedo gunboats, 58 destroyers, 59 torpedo boats, and 13 submarines. There are now building or projected 7 submarines, 45 torpedo boats, 8 destroyers, 2 protected cruisers, 5 armored cruisers, and 6 modern battleships, a total tonnage of 590,119 built and building.

Rice is the most important agricultural crop, followed by barley. In 1911, 2,937,000 hectares were sown to rice, yielding 75,451,000 quintals, or 227 quintals per hectare. Roughly calculating a hectare as  $2\frac{1}{2}$  acres and a quintal as 100 pounds, the rice crop averaged about 1,200 pounds to the acre. The tea production in 1908 was about sixty million pounds and of sugar more than a billion and a half pounds. About 60 per cent of the population is engaged in agriculture. The production of silk cocoons is an important industry. Gold, silver, copper, lead, iron, manganese, sulphur, and coal are mined. Manufactures, especially of textiles, and iron and steel have developed rapidly. In 1908 there were 86 cotton mills, with 75,225 employees, 1,403,034 spindles, and a yarn output of 42,864,262 kwan (the Japanese kwan is equal to about  $8\frac{1}{2}$  pounds avoirdupois). Other manufactures for the same year are given as: Silk goods, 94,799,152 yen; mixed silk and cotton, 21,632,156; cotton, 100,654,814; matches, 10,741,886; earthenware, 10,733,983; paper, 13,690,983; oil, 10,019,007. (The Japanese yen is equal to about 50 cents.)

The population at the beginning of 1909 was 49,319,166, increasing annually at the rate of 1.13 per cent.

**Japan Exposition:**

Tokyo, 1912, generous provision for, recommended, 7501.

Postponed to, 1917, 7614.

**Japan, Treaties with.**—Diplomatic relations began with the treaty of 1854, which, with several later ones, was superseded by more comprehensive conventions now in force. The convention for reimbursing shipwreck expenses, concluded in 1880, provided that all expenses incurred by the government of the United States in connection with rescue, clothing, and assisting needy Japanese subjects in cases of shipwreck should be paid by the Japanese government, if the assisted persons be unable to pay them; and reciprocally, the United States government shall be responsible for debts and expenses incurred by Japan in rendering like assistance to United States citizens. This provision shall not extend to expenses incurred in the salvage of the vessels or cargo, which must be a charge against the vessel and goods or the owners. In such claims for reimbursement, the expenses of government, police, and other officials, and the expense of official correspondence is not to be included. (For the extradition provisions of 1886, see Extradition Treaties.)

**Japanese Treaty of Commerce and Navigation, 8046.**

The treaty of commerce and navigation of 1894 provides for mutual freedom of trade, travel and residence; free access to the courts in pursuit and defense of rights; possession and disposal as well as the succession to property, and the equitable imposition of taxes upon the subjects or citizens of the one country while in the dominions of the other. No discriminating, higher, or other taxes shall be levied upon aliens than upon citizens; nor shall military, naval or other service be imposed upon them. Importation and exportation of goods shall be free from prohibitory or embarrassing restrictions, regardless of the place whence the goods arrive or the nationality of the vessels carrying them; but the usual restrictions of coastwise trade obtain in all cases. The privileges of loading and unloading, and all other privileges of navigation which are enjoyed by national vessels shall be granted without restriction or discrimination to the vessel of the other country. The privileges of visiting two or more ports for the purpose of delivering parts of a cargo are extended to vessels, and in such cases there shall be but one imposition of legitimate charges upon the vessel. Humane treatment is to be extended to vessels of all sorts in distress, and means of assistance and alleviation are to be freely accorded by both nations to the sufferers on vessels of the other. Salvage shall in all cases be conducted and governed according to the laws of the country in which the salvage is made. Goods and merchandise saved from a wreck shall not be liable to customs duties unless cleared for consumption. The usual terms of consular convention are included in this treaty. The treaty endures for a period of twelve years from date of conclusion, with twelve months' privilege of notice of intention to terminate. (For Trade-mark regulations, see Trade-Marks, Conventions.)

**Jarvis, Charles**, correspondence regarding northeastern boundary. (See Northeastern Boundary.)

**Java, The**, capture and destruction of, by the *Constitution*, 507.

**Jay, John** (1745-1829); jurist and statesman; b. New York City; represented the State of New York in Congress, 1774-77, and drew up the constitution of New York, 1777; United States minister to Spain, 1780-82; peace commissioner with Adams and

**Jay, John—Continued.**

Franklin at Paris, 1783; secretary for foreign affairs, 1784-89; first chief justice of the Supreme Court of the United States, 1789-95; concluded with England the treaty of 1794, known as Jay's Treaty, which conveyed to the United States the military posts of the northwest, erected the eastern boundary, provided for the payment of English debts and the settlement of American claims, restricted the United States trade with the West Indies, and defined the conditions of neutrality at sea; Jay was an unsuccessful candidate for governor of New York, 1792; was special minister to Great Britain, 1794-95; and governor of New York, 1795-1801.

**Jay, John**, minister to Great Britain, nomination of, 146.

**Jay Treaty.**—A treaty of peace and friendship between the United States and Great Britain, negotiated in 1794 by John Jay, on the part of the United States, and Lord Grenville, representing Great Britain. It provided for an evacuation of the British posts to the United States, free commercial intercourse on the American continent, unrestricted navigation of the Mississippi River, indemnity to citizens of each country for damages at the hands of privateers of the other, and a limited trade between this country and the British West Indies. The last-mentioned clause caused the treaty to be very unpopular in America.

**Jayhawkers.**—A name applied to bands of marauders who kept up a guerrilla warfare in eastern Kansas about the beginning of the Civil War. The Jayhawkers were so called because of the alleged similarity of their practices to those of a bird with this appellation.

**Jefferson, Thomas** (third President United States):

The close race for the Presidency which Jefferson gave Adams in 1796, marked the affection of the people for

the man who drew up the Declaration of Independence. The election of Adams in that year, despite his unpopular doctrines, marked the esteem and love which the people had for Washington—for Washington preferred Adams. Jefferson, while Vice-President, was not consulted by Adams in affairs of the administration. His election as the third President of the United States, in 1800, is attributed to the unskillful politics of Hamilton and the political adroitness of Aaron Burr, in New York. There were no conventions or platforms, but the candidates were nominated by a caucus of members of Congress. The Federalists renominated John Adams, and the Democratic-Republicans chose Thomas Jefferson. The electoral vote was counted Feb. 11, 1801, and showed Jefferson, 73; Burr, 73; Adams, 65; C. C. Pinckney, 64; and John Jay, 1. As no one had received a majority of the votes, the House, on the same day, proceeded to elect a President and a Vice-President. The balloting continued until Tuesday, Feb. 17, 1801, when, on the thirty-sixth ballot, Jefferson was elected President, and Burr, Vice-President. Some of the Federalists, not including Hamilton, tried to elect Burr over Jefferson, and Burr did not discountenance their action.

In the election of 1804, candidates were chosen by Congressional caucus for the positions of President and Vice-President, specifically in order to prevent a repetition of the conditions of 1800, when the struggle for President occurred between Jefferson and Burr, and also of the anomalous condition in 1796 when Adams was a Federalist President and Jefferson a Republican Vice-President. Jefferson and George Clinton were the nominees of the Democratic-Republicans. It does not appear, however, that Charles C. Pinckney and Rufus King, the Federalist candidates for these offices, were nominated in a Federal caucus. The strongest party contests occurred in Massachusetts and Connecticut. Jefferson carried Massachusetts against the Federalists led by Adams, but failed to win in Connecticut. The electoral vote was counted Feb. 13, 1805, and was conducted in accordance with the Twelfth Amendment to the Constitution, which went into force Sept. 25, 1804. Jefferson had 162 votes against 14 for Pinckney. The apportionment following the census of 1800, and the

**Jefferson, Thomas—Continued.**

admission of Ohio in 1802, increased the electoral vote to 176 and the number of States participating to 17. Jefferson was victorious in all of the States except Connecticut and Delaware, and in Maryland, where the vote was split 9 to 2.

*Party Affiliation.*—Prior to his residence in France as United States minister (1784-1789), Jefferson was a Whig of the Revolution. On his return, he was a Republican-Democrat, in deepest sympathy with the French Revolution. He advocated "the will of the majority to be the natural law of every society, and the only sure guardian of the rights of man." The Constitution had been drawn and adopted in his absence, and although on his return he expressed himself against it, he later modified his views regarding it and came to think more favorably of it. His associates in Washington's Cabinet, notably Hamilton and Knox, often expressed themselves in favor of aristocratic or monarchical forms of government, and regarded the Republican form as only a temporary expedient. This was so hateful to Jefferson that he vehemently expressed his grief and astonishment, and ultimately resigned his Cabinet office. He found himself opposed to the whole Federalist policy and, upon his retirement from office in 1796, he and his friends took the name of Republicans. Thus the Democratic party was formed, which in 1800 became the majority party in the United States. It was known as the Republican party until Jackson, in 1824, changed its name to the Democratic party.

*Political Complexion of Congress.*—In the Seventh Congress (1801-1803) the Senate, of 32 members, was made up of 13 Federalists and 19 Democrats; and the House, of 105 members, was made up of 34 Federalists and 71 Democrats. In the Eighth Congress (1803-1805) the Senate, of 34 members, was made up of 10 Federalists and 24 Democrats; and the House, of 141 members, was made up of 38 Federalists and 103 Democrats. During the second Jefferson administration, in the Ninth Congress (1805-1807) the Senate, of 34 members, was made up of 17 Federalists and 17 Democrats; and the House, of 141 members, was made up of 29 Federalists and 112 Democrats. In the Tenth Congress (1807-1809) the Senate, of 34 members, was made up of

7 Federalists and 27 Democrats; and the House, of 141 members, was made up of 31 Federalists and 110 Democrats.

*Acquisition of Territory.*—The Louisiana Purchase, consummated in 1803, by James Monroe as minister plenipotentiary, increased the area of the United States, in 1810, to a total of 1,999,775 sq. miles. Jefferson was fully alive to the importance of this addition. In his Third Annual Message (page 346) he says: "Whilst the property and sovereignty of the Mississippi and its waters secure an independent outlet for the produce of the Western States and an uncontrolled navigation through their whole course, free from collision with other powers and the dangers to our peace from that source, the fertility of the country, its climate and extent, promise in due season important aids to our Treasury, and ample provision for our posterity, and a wide spread for the blessings of freedom and equal laws." Napoleon, in speaking of the sale of the territory, said: "This accession strengthens forever the power of the United States, and I have just given to England a maritime rival that will sooner or later humble her pride." The Lewis and Clark expedition, which formed the basis of the claim of the United States to the Northwestern territory, is described in detail by Jefferson in a special message (page 398) and in his Sixth Annual Message (page 396) he says: "It is but justice to say that Messrs. Lewis and Clark and their brave companions have by this arduous service deserved well of their country."

*Slavery.*—Jefferson's sentiments on this subject are well expressed in his Sixth Annual Message (page 396) in these words: "I congratulate you, fellow-citizens, on the approach of the period at which you may interpose your authority constitutionally to withdraw the citizens of the United States from all further participation in these violations of human rights which have so long continued on the unoffending inhabitants of Africa, and which the morality, the reputation, and the best interests of our country have long been eager to proscribe. Although no law you may pass can take prohibitory effect till the first of the year 1808, yet the intervening period is not too long to prevent by timely notice expeditions

**Jefferson, Thomas—Continued.**

which can not be completed before that day."

*Tariff.*—In his Sixth Annual Message, Jefferson recommended that the duty on salt, a necessary of life, be suppressed. He looks forward to the accumulation of a surplus of revenue, if peace continues, and in discussing the advisability of further reduction of tariff in the future, says (page 397): "Shall we suppress the impost and give the advantage to foreign over domestic manufactures? On a few articles of more general and necessary use the suppression in due season will doubtless be right, but the great mass of the articles on which impost is paid are foreign luxuries, purchased by those only who are rich enough to afford themselves the use of them. Their patriotism would certainly prefer its continuance and application to the great purposes of the public education, roads, rivers, canals, and such other objects of public improvement as it may be thought proper to add to the constitutional enumeration of Federal powers." A tariff act of May 13, 1800, made slight increases in some duties, especially those upon wines. March 27, 1804, there was passed an act "for imposing more specific duties on the importation of certain articles; and also for levying and collecting light money on foreign ships or vessels, and for other purposes." While some duties were increased by this act, it placed upon the free list rags from cotton, linen, wool, and hemp cloth, regulus of antimony, unwrought clay, unwrought burr stones, and the bark of the cork tree. The act of March 4, 1808, allowed free importation of old copper, saltpeter, and sulphur.

*Internal Improvements.*—Jefferson was strongly in favor of the application of revenue surplus to internal improvements; but he did not recognize that the Constitution conferred the right of making such upon the Federal Government. In his Sixth Annual Message (page 398) he says, in speaking of such improvements: "I suppose an amendment to the Constitution, by consent of the States, necessary, because the objects now recommended are not among those enumerated by the Constitution, and to which it permits the public money to be applied." In his Eighth Annual Message (page 444) he says: "Shall it (the revenue surplus), lie unproductive in the Public

vaults? Shall the revenue be reduced? Or shall it not rather be appropriated to the improvement of roads, canals, rivers, education, and other great foundations of prosperity and union under the powers which Congress may already possess or such amendment of the Constitution as may be approved by the States?"

*Navy.*—The navy which had been created during the previous administration for operations against France, was reduced by Jefferson, who put all but six of the vessels out of commission. In his First Annual Message (page 318) he explains that these vessels were laid up in navy yards to reduce expenses. "Whatever annual sum," he says, "beyond that you may think proper to appropriate to naval preparations would perhaps be better employed in providing those articles which may be kept without waste or consumption, and be in readiness when any exigency calls them into use." In his several messages he lays especial stress upon the advisability of preserving the vessels of the navy from decay and injury when not in active use. In a special message of Feb. 10, 1807 (page 407), Jefferson goes fully into the plans for the increase of the navy by the addition of a flotilla of gunboats for the protection of the harbors. Two hundred of these are expected to afford the desired protection, of which number he reports that 73 are built or are building, and that the remaining 127 would cost from \$500,000 to \$600,000. In his Eighth Annual Message (page 442) he reports that: "Of the gunboats authorized by the act of December last, it has been thought necessary to build only 103 in the present year."

*Foreign Policy.*—Of the six vessels which Jefferson retained in commission, he sent four to the Mediterranean to overawe the Barbary pirates who were attacking the merchant vessels of the United States. The brilliance and efficacy of the efforts of Decatur and his brave comrades on that occasion are yet remembered by the American people. In his First Inaugural Address (page 311) he speaks of the country as: "Kindly separated by nature and a wide ocean from the exterminating havoc of one quarter of the globe; too high-minded to endure the degradations of the other." In speaking of the proper attitude of the United States in the long struggle between Napoleon and the allied powers, he says

**Jefferson, Thomas—Continued.**

in his Third Annual Message (page 349): "In the course of this conflict let it be our endeavor, as it is our interest and our desire, to cultivate the friendship of the belligerent nations by every act of justice and of innocent kindness; to receive their armed vessels with hospitality from the distresses of the sea, but to administer the means of annoyance to none; to establish in our harbors such a police as may maintain law and order; to restrain our citizens from embarking individually in a war in which their country takes no part; to punish severely those persons, citizen or alien, who shall usurp the cover of our flag for vessels not entitled to it, infecting thereby with suspicion those of real Americans and committing us into controversies for the redress of wrongs not our own; to exact from every nation the observance toward our vessels and citizens of those principles and practices which all civilized people acknowledge; to merit the character of a just nation, and maintain that of an independent one, preferring every consequence to insult and habitual wrong." Speaking of the attack of the *Leopard* on the American frigate *Chesapeake*, Jefferson wrote in later years: "I had only to open my hand, and let havoc loose." To protect the United States from similar attacks, he issued the embargo of 1807, which continued until the end of his administration; but the conditions were too severe for American commerce to observe, and its frequent violation defeated its purpose. Jefferson always maintained that had the patriotism of the people risen to proper heights, this course would have obviated the War of 1812, and have secured a recognition of neutral rights. Jefferson himself suffered from the conditions of the embargo which forbade the exportation of tobacco, by the loss of fully two-thirds of his income.

**Commerce.**—Jefferson did not believe in the paternal fostering of commerce and industries by the Federal Government. In his First Annual Message (page 318) he says: "Agriculture, manufactures, commerce, and navigation, the four pillars of our prosperity, are the most thriving when left most free to individual enterprise. Protection from casual embarrassments, however, may sometimes be seasonably interposed." In speaking of the rapid growth of the country, he says in his First An-

nual Message (page 314): "I lay before you the result of the census lately taken of our inhabitants, to a conformity with which we are now to reduce the ensuing ratio of representation and taxation. You will perceive that the increase of numbers during the last ten years, proceeding in geometrical ratio, promises a duplication in little more than twenty-two years." The number was 5,308,483 in 1800.

**Finance.**—Jefferson outlined the financial policy of his administration in his First Annual Message (page 328) in these words: "... there is reasonable ground of confidence that we may now safely dispense with all the internal taxes, comprehending excise, stamps, auctions, licenses, carriages, and refined sugars, to which the postage on newspapers may be added, to facilitate the progress of information, and that the remaining sources of revenue will be sufficient to provide for the support of Government, to pay the interest on the public debts, and to discharge the principals within shorter periods than the laws or the general expectation had contemplated. War, indeed, and untoward events may change this prospect of things and call for expenses which the imposts could not meet; but sound principles will not justify our taxing the industry of our fellow-citizens to accumulate treasure for wars to happen we know not when, and which might not perhaps happen, but from the temptations offered by that treasure."

**Public Debt.**—The debt of the United States during the administration of Jefferson stood as follows:

January 1, 1802...	\$86,712,632.25
January 1, 1803...	77,054,686.30
January 1, 1804...	86,427,120.88
January 1, 1805...	82,312,150.50
January 1, 1806...	75,743,270.66
January 1, 1807...	69,218,398.64
January 1, 1808...	65,196,317.97
January 1, 1809...	57,023,192.09

- Jewett, Milo A.**, consul of United States at Sivas, Turkey, directed to investigate Armenian atrocities, 5991.

**Jicarilla Agency, N. Mex.**, appropriation for Apaches on, recommended, 4692.

**Jicarilla Apache Reservation, N. Mex.**, appropriations to settlers for improvements on, recommended, 4696.

**Jingoism.**—A political term borrowed from the English and applied to that style of writing or oratory usually known as spread-eagle or braggadocio. The mild oath "by jingo" is a corruption of "by Gingou," i. e., by St. Gingoulph. During the war in Bulgaria between Russia and Turkey in 1877 the British Conservatives under Lord Beaconsfield, the premier, strongly advocated English intervention in behalf of Turkey. The Liberals, under Gladstone, were equally determined to avoid trouble and urged that Turkey be left to herself. Popular interest in the discussion grew to the point where it found expression in the music halls. "Jingo" was soon derisively applied to the war party, and they proudly accepted it. The term has since been commonly applied both in England and America to parties extravagantly enthusiastic in defense of the national honor.

**Johanna Island:**

**John S. Bryan, The**, claim of, against Brazil adjusted, 2116.

**Johnson, Andrew** (seventeenth President United States):

Johnson became President on the death of Lincoln, April 14, 1865. He was Lincoln's choice for Vice-President in the latter's second term, for strong political reasons. It was felt that Johnson's election would bring to the support of the party a large body of War Democrats, but especially would it prevent the recognition of the Confederacy by Great Britain and France if a candidate were elected from a reorganized rebellious State (Tennessee) in the heart of the Confederacy.

**Party Affiliation.**—Johnson's earliest political activity was directed against the aristocratic government by the large land-holders of Tennessee; he opposed the so-called "internal improvement" policies, and for a time suffered defeat by reason of this opposition. He was the only ardent supporter of Bell who did not

**Johnson, Andrew—Continued.**

go over to the Whig party. In Congress (1843-1853) he supported Jackson, the annexation of Texas, Polk's administration; and opposed internal improvements. He defended the veto power of the President and supported the compromise measures of 1850. He advocated then and later the home-stead bill which the slave-holding power of the South did not favor. He occupied an intermediate position in politics by holding pronounced Union ideas which slave-holders did not appreciate, and by recognizing slavery as an institution guaranteed by the Constitution which made him unpopular with the Republicans. He never believed that any attempt at disruption of the Union would be made; but in 1860 he took positive ground against secession and declared in his speech in Congress on the joint resolution amending the Constitution that he would stand by and act in and under the Constitution. In March, 1861, when speaking of the secessionists, he declared: "I would have them arrested and tried for treason, and, if convicted, by the eternal God, they should suffer the penalty of the law at the hands of the executioner."

**Tariff.**—The chief revenue acts in the administration of President Johnson were those of July 28, 1866, "to protect the revenue, and for other purposes"; of March 2, 1867, "to provide revenue from imported wool, and for other purposes"; and that of Feb. 3, 1863, "to provide for the exemption of cotton from internal tax." The latter act provided that cotton imported from foreign countries after Nov. 1, 1868, should be exempt from duty. In his Third Annual Message, President Johnson (page 3773) urged a thorough revision of the revenue system. "Our internal revenue laws and impost system," he said, "should be so adjusted as to bear most heavily on articles of luxury, leaving the necessities of life as free from taxation as may be consistent with the real wants of the Government, economically administered." He advocated a large reduction in the number of articles subject to tax as a means of simplifying and reducing the cost of revenue collection.

**Public Debt.**—The public debt of the United States during the administration of President Johnson stood as follows:

July 1, 1866.....\$2,636,036,163.84

July 1, 1867..... 2,508,151,211.69

July 1, 1868..... 2,480,853,413.23

In his First Annual Message (page 3563) President Johnson says: "Our debt is doubly secure—first, in the actual wealth and the still greater undeveloped resources of the country, and, next, in the character of our institutions. The most intelligent observers among political economists have not failed to remark that the public debt of a country is safe in proportion as a people are free; that the debt of a republic is safest of all."

**Civil Service.**—In his Third Annual Message (page 3769) President Johnson says: "It is not the theory of this Government that public offices are the property of those who hold them. They are given merely as a trust for the public benefit, sometimes for a fixed period, sometimes during good behavior, but generally they are liable to be terminated at the pleasure of the appointing power, which represents the collective majesty and speaks the will of the people. The forced retention in office of a single dishonest person may work great injury to the public interests."

**Jones, Wesley L.**, b. near Bethany, Ill., Oct. 9, 1863, three days after the death of his father, a private in the Civil War; his mother maintained herself and children by her own labor; he did all kinds of farm work, hiring out by the month when 10 years of age; attended public schools in winter; worked during the summer until he was 16, when he entered Southern Illinois College, teaching to pay his way; working in the harvest fields during the summer; admitted to the bar on examination in 1886; elected to the 56th, 57th, 58th, 59th, and 60th Congresses as one of the Representatives-at-large from the State of Washington; the legislature of 1907 for Washington enacted a direct primary law in which provision was made for

expressing the party choice for United States Senator by popular vote; he became a candidate and was successful by a large majority, and was duly elected to the United States Senate.

**Jones, William**, Secretary of Navy:

Duties of Secretary of Treasury discharged by, during the absence of Albert Gallatin, one of the commissioned envoys to treat with Great Britain and Russia in 1813.

**Jones, William Atkinson**; b. Warsaw, Va., March 21, 1849; elected to the 52d, 53d, 54th, 55th, 56th, 57th, 58th, 59th, 60th, 61st, and 62d Congresses from Virginia.

**Jones, The**, sum accruing from sale of, to be paid owners of, 2111.

**Jonesboro (Ga.), Battle of.**—On the night of Aug. 25, 1864, Gen. Sherman gave up the direct siege of Atlanta and attempted to gain possession of the Macon railroad to the southward. A part of his forces was moved back to the Chattahoochee to the northwest and others pushed southwest. The Army of the Tennessee, under Howard, having destroyed the roads southwest of Atlanta, moved east toward Jonesboro, 20 miles south of Atlanta. Hood, learning of this movement, sent Hardee's corps to defend Jonesboro. When Howard reached the town on the evening of Aug. 30 he found Hardee in possession. The latter attacked Howard on the 31st. After an engagement of 2 hours the Confederates retired with a loss of 1,400 killed and wounded. During the night Hardee retired to Lovejoy. Seeing his position in Atlanta indefensible, Hood, on Sept. 1, blew up his magazines and evacuated the city, which was occupied by Gen. Slocum with the Twentieth Army Corps.

**Jorgen Lorentzen, The**, appropriation for seizure of, recommended, 3271.

**Josephine, The**, referred to, 1030.

**Journals of Congress.**—The proceedings of Congress from 1774 to 1788 were first published at Philadelphia. They comprised 13 octavo volumes and were completed in 1788. This is the only record of the Continental Congress and that of the Confederation (except the "Secret Journals"), but contains no debates nor laws, that body being without legislative powers, although it adopted many resolutions, ordinances, and recommendations to the States. These journals were reprinted in Washington in 1823 in 4 octavo volumes. "The Journal Acts, and proceedings of the Con-

**Journals of Congress—Continued.**

vention Assembled at Philadelphia which framed the Constitution of the United States" was published at Boston in 1819. There were also published in Boston, in 1821, 4 volumes of the "Secret Journals of the Acts and Proceedings of Congress from the First meeting thereof to the Dissolution of the Confederation by the adoption of the Constitution of the United States." According to the requirements of the Constitution, the Journals of Congress have been printed each session since its adoption. (See Annals of Congress; Cong., etc.)

**Juilliard vs. Greenman.**—One of several important legal-tender cases. Juilliard having contracted a sale of cotton for \$5,122.90 to Greenman, the latter paid \$22.90 in coin (which was accepted) and offered payment of the residue in United States notes. Juilliard refused to accept the notes, demanding gold or silver. The case came before the circuit court for the southern district of New York, which found a verdict for Greenman on the ground that notes issued by the United States are legal tender for payment of any debt. The Supreme Court, March 3, 1884, the case having been appealed to that tribunal on a writ of error, affirmed this judgment, thus establishing the constitutionality of the legal-tender act of March 31, 1862. George F. Edmunds and Benjamin F. Butler appeared as counsel in this case, the former for plaintiff in error, the latter for defendant. Justice Gray, in delivering the opinion, stated that the prohibition in the Constitution of the United States to the several States to coin money, emit bills of credit, or make anything but gold and silver coin a legal tender for debts does not deny to Congress either of these powers. These are powers incident to sovereignty, and the impressing upon Treasury notes the quality of being legal tender in payment of private debts is an appropriate means, conducive and plainly adapted to the execution of the undoubted powers of Congress, consistent with the letter and spirit, and therefore within the meaning, of the Constitution. The wisdom and expediency of such meaning is a political question to be determined by Congress, and not a judicial question to be afterwards passed upon by the courts. Justice Field filed a dissenting opinion.

**Jules et Marie, The**, collision with United States Steamer *San Jacinto*, appropriation to former recommended, 3343.

**Junket.**—A word applied to any feast or merry-making, convivial entertainment, or picnic. Politically, any trip, excursion, or entertainment by an official at public expense under the guise of public service. The form of a junket is usually a legislative investigation requiring travel to various points and large hotel bills.

**Jurors**, fees of, referred to, 4730, 4770, 4836.

**Jury.**—A certain number of men selected according to law and sworn to inquire into or to determine facts concerning a cause or an accusation submitted to them and to declare the truth according to the evidence adduced. The custom of trying accused persons before a jury as practiced in this country and England is the natural outgrowth of rudimentary forms of trials in vogue among our Anglo-Saxon ancestors. The ancient Romans also had a form of trial before a presiding judge and a body of *judices*. The right of trial by jury is guaranteed by the Constitution in all criminal cases and at common law in cases where the amount in dispute exceeds \$20. A petit or trial jury consists of 12 men selected by lot from among all the citizens residing within the jurisdiction of the court. Their duty is to determine questions of fact in accordance with the weight of testimony presented and report their finding to the presiding judge. An impartial jury is assured by the practice of drawing by lot and then giving the accused the right to dismiss a certain number without reason and certain others for good cause. Each of the jurymen must meet certain legal requirements as to capacity in general and fitness for the particular case upon which he is to sit, and must take an oath to decide without prejudice and according to testimony presented. A coroner's jury or jury of inquest is usually composed of from 7 to 15 persons summoned to inquire into the cause of sudden or unexplained deaths. (See also *Grand Jury*.)

**Jury System** discussed, 319.

**Jussen, Edmund**, act for relief of, vetoed, 4168.

**Justice, The Department of.**—*History.*—

One of the nine Executive Departments of the Government, created by an act of Congress July 22, 1870. The separate colonies, however, in imitation of England, had had their attorneys-general from early times. By the Judiciary Act of Sept. 24, 1789, the first Congress under the Constitution directed the appointment of an Attorney-General who should act as legal adviser to the President and heads of Departments and conduct cases in the Supreme Court in which the United States was concerned. The small salary of \$1,500 a year which Congress voted was fixed on the supposition that the Attorney-General would devote only a part of his time to his official duties. Ed-

mund Randolph, however, the first occupant of the office, devoted his entire time to questions which arose in connection with the organization of the courts and their procedure. The salary was gradually increased until, in 1853, it was made \$8,000, equal to those of the other members of the Cabinet. No clerical force was provided, however, and not until 1818, during the attorney-generalship of William Wirt, was any appropriation made for clerical hire or office expenses. The clerical force was gradually increased until, in 1855, it consisted of nine employees, but the First Assistant Attorney-General was not appointed until 1859.

A very important step was taken in the organization of the Department in 1861, when the Attorney-General was given control over the various district attorneys. By an act of Congress of 1870 what had been the Attorney-General's office was formally organized as the Department of Justice. Under this act the office of Solicitor-General was created; two Assistant Attorneys-General (since increased to eight) were provided for, and the law officers of the other Departments were placed under the Attorney-General's control. Since its organization the work of the Department and the number of its employees have steadily increased until, at the present time (1909), about two hundred and sixty officers and employees in Washington and nearly thirteen hundred in various parts of the United States are under the control of the Department. The Attorney-General, the head of the Department, is the chief legal officer of the country. He is and has been from the beginning, a member of the President's Cabinet, and gives his advice and opinion when consulted by the President or heads of Departments. He also supervises the work of the district attorneys and United States marshals. Opinions on Constitutional questions must come from the Attorney-General himself; opinions on other matters may be given by his assistants. Trials in which the Government is interested may be conducted by the Attorney-General or the Solicitor-General, who acts as his assistant and assumes his duties in his absence. The Assistant to the Attorney-General, an office distinct from those of Assistant Attorneys-General, has special charge of matters arising out of the anti-trust and interstate commerce laws (q. v.). Eight Assist-

**Justice, The Department of—Continued.** ant Attorneys-General and one Special Assistant aid the Attorney-General and Solicitor-General, some having charge of special lines of business, such as the defense of cases in the Court of Claims (q. v.) and before the Spanish Treaty Claims Commission. The Special Assistant Attorney-General is at the head of the Bureau of Insular and Territorial Affairs. Special attorneys may be appointed when necessary. The Attorney-General also has supervision and control of the law officers connected with the various Departments, that is to say, the Assistant Attorneys-General for the Interior and Post Office Departments, the Solicitors of the Departments of State and the Treasury, and the Solicitor of Internal Revenue in the Treasury Department. These act as chief law officers of the Department or office with which they are connected. A General Agent of the Department has charge of United States jails and prisons, and an Accounting Division examines the accounts of United States district attorneys and marshals.

The Federal judiciary system was modeled after that of Great Britain. In the early history of England and of the American colonies the legislative bodies had judicial powers, and the English Parliament is still known as the High Court of Parliament, and the Legislature of Massachusetts as the General Court. Most of these powers, however, were soon transferred to more compact bodies having exclusively judicial functions. Almost the only judicial function retained by legislative bodies is the power of impeachment of high officers. The first step toward a Federal judiciary were the commissions which decided land cases between the States. Commissioners of appeal decided prize cases, and in 1781, under the Articles of Confederation, these were erected into a court. The Constitution of 1787 provided for a Supreme Court (q. v.) and such inferior courts as Congress might establish. By the judiciary act of 1789 circuit and district courts were established. In 1891 the circuit court (q. v.) of appeals was added to this system. The Court of Claims (q. v.), the Court of Private Land Claims, and a system of Territorial courts have also been established by Congress. The Judiciary system of the several States is similar in a general way

to that of the United States. (See also Courts.)

**Official Duties.**—The Attorney-General is the head of the Department of Justice and the chief law officer of the Government. He represents the United States in matters involving legal questions; he gives his advice and opinion, when they are required by the President or by the heads of the other executive departments, on questions of law arising in the administration of their respective departments; he appears in the Supreme Court of the United States in cases of especial gravity and importance; he exercises a general superintendence and direction over United States attorneys and marshals in all judicial districts in the States and Territories; and he provides special counsel for the United States whenever required by any department of the Government.

**Solicitor-General.**—The Solicitor-General assists the Attorney-General in the performance of his general duties, and by special provision of law, in case of a vacancy in the Office of Attorney-General, or of his absence or disability, exercises all those duties. Under the direction of the Attorney-General, he has general charge of the business of the Government in the Supreme Court of the United States, and is assisted in the conduct and argument of cases therein by the Assistant Attorneys-General. He also, with the approval of the Attorney-General, prepares opinions rendered to the President and the heads of the executive departments, and confers with and directs the law officers of the Government throughout the country in the performance of their duties. When the Attorney-General so directs, any case in which the United States is interested, in any court of the United States, may be conducted and argued by the Solicitor-General; and he may be sent by the Attorney-General to attend to the interests of the United States in any State court, or elsewhere.

**The Assistant to the Attorney-General.**—The Assistant to the Attorney-General has special charge of all suits and other matters arising under the Federal anti-trust and interstate commerce laws, and performs such other duties as may be required of him by the Attorney-General.

**Assistant Attorneys-General.**—The several Assistant Attorneys-General assist the Attorney-General in the

**Justice, The Department of—Continued.** performance of his duties. They assist in the argument of cases in the Supreme Court and in the preparation of legal opinions.

Three Assistant Attorneys-General are located in the main department building at 1435 K Street, and, in addition to their general duties, particular subjects are assigned to them by the Attorney-General for the transaction of business arising thereunder with United States attorneys, other departments, and private parties in interest.

The office of the Assistant Attorney-General, including a number of assistant attorneys and clerks charged with defending suits in the Court of Claims, is located at 8 Jackson Square.

The Assistant Attorney-General charged with the defense of Indian depredation claims is located in the Bond Building, at the corner of Fourteenth Street and New York Avenue.

The Assistant Attorney-General in charge of the interests of the Government in all matters of reappraisement and classification of imported goods in litigation before the several boards of United States General Appraisers and the Court of Customs Appeals is located at 641 Washington Street, New York.

The Assistant Attorneys-General and the solicitors for the several executive departments, under the provisions of sections 349-350, Revised Statutes, exercise their functions under the supervision and control of the Attorney-General. They are the Assistant Attorney-General for the Department of the Interior, the Solicitor for the Department of State, the Solicitor of the Treasury, the Solicitor of Internal Revenue, and the Solicitor of the Department of Commerce and Labor.

Assistant Attorney-General for the Interior Department.—This Assistant Attorney-General is the chief law officer of that department. When requested he advises the Secretary and Assistant Secretaries upon questions of law arising in the administration of the department. All appeals from the General Land Office are sent to his office for consideration. Oral arguments are heard by him in the more important cases, or by brief; and decisions are prepared under his supervision for the signature of the Secretary or First Assistant Secretary, as the case may be. The As-

sistant Attorney-General is aided in this and his other work by a number of assistant attorneys.

Solicitor for the Department of State.—The solicitor is the chief law officer of that department. He advises the Secretary and Assistant Secretaries upon questions of municipal and international law referred to him, passes upon claims of citizens of the United States against foreign Governments, claims of subjects or citizens of foreign Governments against the United States, and upon applications for the extradition of criminals. The assistant solicitor acts as solicitor in the absence of the latter, and in the division of the work of the office has general charge of extradition and citizenship matters.

Solicitor of the Treasury.—The Solicitor of the Treasury is charged with the supervision of much of the litigation of the Government, and it is his duty to give necessary instructions to United States attorneys, marshals, and clerks of courts in matters and proceedings appertaining to the suits under his superintendence, and to require reports from such officers; to take cognizance of all frauds or attempted frauds upon the revenue (customs) and to exercise a general supervision over the measures for their prevention and detection and for the prosecution of persons charged with the commissions thereof; to have charge of lands acquired by the United States in payment of debts (except internal revenue); to make recommendations on offers of compromise (except in post-office cases and in internal-revenue cases before judgment); to effect the release of property owned or held by the United States where it has been attached; to approve the bonds of United States assistant treasurers, collectors of internal revenue, and department disbursing clerks, and to examine all contracts of, and official bonds filed in, the Treasury Department; to issue distress warrants against delinquent collectors and other officers receiving public money, and disbursing officers and their sureties; to examine titles to life-saving station sites; and as the law officer of the Treasury Department to give legal advice to the Secretary and other officers of that department on matters arising therein.

Solicitor of Internal Revenue.—A Solicitor of Internal Revenue was added to the Internal-Revenue Office

**Justice, The Department of—Continued.**

corps by the act of July 13, 1866 (14 Stat., 170), but by the act of June 22, 1870 (16 Stat., 162), organizing the Department of Justice, the solicitor was formally transferred to that department. He is the law officer and legal adviser of the commissioner. The only duties of his of which mention is made by law are in connection with internal-revenue compromise cases, section 3229, Revised Statutes.

**Solicitor of the Department of Commerce and Labor.**—The solicitor is the chief law officer of that department. His duties are to act as legal adviser for the Secretary of Commerce and Labor and the chiefs of the various bureaus of said department; to prepare and examine all contracts and bonds entered into or required by the said department; and to render such legal services in connection with matters arising in the administrative work of the Department of Commerce and Labor as may be required of him by the Attorney-General.

**The Public Lands Division.**—This division was created by the Attorney-General, Nov. 16, 1909. To it are assigned all suits and proceedings concerning the enforcement of the public-land law, including suits or proceedings to set aside conveyances of allotted lands.

**Chief Clerk.**—The chief clerk, under the direction of the Attorney-General, has general supervision of the clerks and employees; the consideration of applications for leave of absence; the direction of the force of laborers, charwomen, and watchmen; superintends all buildings occupied by the department in Washington; has charge of the horses, wagons, and carriages employed; has supervision of the Division of Mails and Files; the purchase and distribution of supplies for the department and the United States courts; the expenditure of the appropriations for contingent expenses and rents; supervision of the library; the consideration of requisitions upon the Public Printer for printing and binding, and supervision of the preparation of the annual report and the estimates of the department.

**Disbursing Clerk.**—The disbursing clerk disburses funds from more than 40 appropriations under the direction of the Attorney-General, including the salaries of the justices of the Supreme Court of the United States,

the judges of the other United States courts throughout the country, including the Territories; of the United States attorneys, marshals, and other court officials, and of the officials of the department proper; the contingent expenses of the department and other miscellaneous appropriations.

**Superintendent of Prisons.**—The superintendent of prisons has charge, under the direction of the Attorney-General, of all matters relating to United States prisons and prisoners, including the support of such prisoners in both State and Federal penitentiaries, in reform schools, and in county jails. He has supervision over the construction work in progress at United States penal institutions.

The superintendent of prisons is *ex officio* the president of the boards of parole for the United States penitentiaries and the president of the board of parole for United States prisoners in each State or county institution used for the confinement of United States prisoners.

**Appointment Clerk.**—The appointment clerk has charge of all matters relating to applications, recommendations, and appointments, including certifications by the Civil Service Commission; conducts correspondence pertaining thereto; prepares nominations sent to the Senate; prepares commissions and appointments for the officers and employees of the department in Washington, and for United States judges, attorneys, and marshals and other officers under the department. He also compiles the Register of the Department of Justice and matter relating to that department for the Official Register of the United States.

**Attorney in Charge of Pardons.**—The attorney in charge of pardons takes charge of all applications for Executive clemency, except those in Army and Navy cases, these being referred to the Secretary of War and the Secretary of the Navy, respectively; of the briefing of the cases and the correspondence in relation to them.

**Attorney in Charge of Titles.**—The attorney in charge of titles prepares opinions upon the title to lands belonging to or sought to be acquired by the Government for public purposes and opinions upon all legal matters growing out of the same. He has charge of all proceedings to acquire land under eminent domain,

**Justice, The Department of—Continued.**  
and conducts all the correspondence relating to the above matters.

Division of Accounts.—The Division of Accounts examines accounts payable from judiciary appropriations, including accounts of United States marshals, attorneys, clerks, and commissioners; conducts the correspondence relating thereto; authorizes certain court expenses; supervises the advancing of funds to United States marshals; prepares certain data for the annual report, and compiles the estimates of appropriations.

Chief of the Division of Investigation.—The chief of the Division of Investigation has general supervision of the examination of the offices and records of the Federal court officials throughout the United States, and directs the work of all the examiners, special agents, and accountants of the department, whose compensation or expenses are paid from the appropriation "Detection and prosecution of crimes," and who are employed for the purpose of collecting evidence or of making investigations or examinations of any kind for this department or the officers thereof.

Following is a list of Attorneys-General in the order of their appointment from 1789 to date: Edmund Randolph, Virginia; William Bradford, Pennsylvania; Charles Lee, Virginia; Levi Lincoln, Massachusetts; Robert Smith, Maryland; John Breckenridge, Kentucky; C. A. Rodney, Pennsylvania; William Pinkney, Maryland; Richard Rush, Pennsylvania; William Wirt, Virginia; John M. Berrien, Georgia; R. B. Taney, Maryland; B. F. Butler, New York; Felix Grundy, Tennessee; Henry D. Gilpin, Pennsylvania; J. J. Crittenden, Kentucky; Hugh S. Legaré, South Carolina; John Nelson, Maryland; John Y. Mason, Virginia; Na-

than Clifford, Maine; Isaac Toucey, Connecticut; Reverdy Johnson, Maryland; J. J. Crittenden, Kentucky; Caleb Cushing, Massachusetts; J. S. Black, Pennsylvania; E. M. Stanton, Pennsylvania; Edward Bates, Missouri; James Speed, Kentucky; Henry Stanbery, Ohio; W. M. Everts, New York; E. Rockwood Hoar, Massachusetts; Amos T. Ackerman, Georgia; G. H. Williams, Oregon; Edwards Pierrepont, New York; Alphonso Taft, Ohio; Charles Devans, Massachusetts; Wayne MacVeagh, Pennsylvania; B. H. Brewster, Pennsylvania; A. H. Garland, Arkansas; W. H. H. Miller, Indiana; Richard Olney, Massachusetts; Judson Harmon, Ohio; Joseph McKenna, California; John W. Griggs, New Jersey; Philander Chase Knox, Pennsylvania; William Henry Moody, Massachusetts; George Woodward Wickersham, New York.

Transfer of Patent Office from State Department to, recommended, 2265.

**Kahn, Julius**, b. Feb. 28, 1861, at Kuppenheim, Grand Duchy of Baden, Germany; immigrated to California with his parents in 1866; in 1892 was elected to the legislature of the State of California; in January, 1894, was admitted to the bar by the supreme court of California; was elected to the 56th, 57th, 59th, 60th, 61st, and 62d Congresses from California.

**Kalakaua, David**, King of Hawaiian Islands:

Coronation of, discussed, 4761.

Death of, in United States, discussed, 5623.

Visit of, to United States, 4630.

**Kalaniana'ole, J. Kuhio**; b. March 26, 1871, at Koloa, island of Kauai, Hawaii; was educated in Honolulu, the United States, and England; is a capitalist; was employed in the office of minister of the interior and in the custom-house under the monarchy; cousin to the late King Kalakaua and Queen Liliuokalani, monarchs of the then Kingdom of Hawaii, and nephew of Queen Kapiolani, consort of Kalakaua; created prince by royal proclamation in 1884; married Elizabeth Kahanu Kaaui, daughter of a chief of the island of Maui, Oct. 8, 1896; elected Delegate to the 58th, 59th, 60th, 61st, and 62d Congresses from Waikiki, district of Honolulu, island of Oahu.

**Kansas**.—One of the United States; nicknames, "The Garden State," "The Sunflower State," etc.; motto, "Ad astra per aspera" ("To the stars through difficulties"). It is situated in the central part of the Union and extends from lat. 37° to 40° north and from long. 94° 38' to 102° west. Kansas is bounded on the north by Nebraska, on the east by Missouri (separated in part by the Missouri River), on the south by Oklahoma and on the west by Colorado, and has an area of 82,080 sq. miles. It was a part of the Louisiana Purchase and was made a territory in 1854.

The Topeka constitution, prohibiting slavery, was framed in 1855 and the Lecompton constitution, which sanctioned slavery, in 1857. A civil war broke out between the adherents of these two constitutions. Finally, in 1859, the Wyandotte constitution, forbidding slavery, was adopted. The State was admitted to the Union Jan. 29, 1861.

Statistics of agriculture reported to the Federal Census Bureau under date of April 15, 1910, place the number of farms in the State at 177,841,

comprising 43,384,799 acres, valued, with stock and improvements, at \$2,039,389,910, an increase of \$1,175,289,624 over the 1900 report. The average value of farm land per acre was \$25.45, as compared with \$12.77 in 1900. The value of domestic animals, poultry, etc., was \$253,528,577, including 3,079,403 cattle, valued at \$80,557,443; 1,147,056 horses, \$112,758,108; 208,409 mules, \$25,629,418; 3,050,157 swine, \$24,708,885; 272,475 sheep, \$1,209,931. The yield and value of field crops for 1911 is given as follows: Corn, 8,700,000 acres, 126,150,000 bushels, \$79,474,000; wheat, 4,810,000 acres, 51,387,000 bushels, \$46,762,000; oats, 2,000,000 acres, 30,000,000 bushels, \$13,500,000; rye, 18,000 acres, 198,000 bushels, \$160,000; potatoes, 80,000 acres, 1,760,000 bushels, \$1,866,000; hay, 1,649,000 acres, 1,402,000 tons, \$13,880,000.

The mineral products of the State for 1910 were valued at \$28,304,191, consisting of coal, zinc, lead, clay products, petroleum, natural gas, sand, gravel, and stone. The coal production for 1910 was 4,921,451 short tons, valued at \$7,914,709, a decrease of more than two million tons from the amount produced the previous year, on account of a strike among the mine-workers. The number of men employed in the mines of the State during 1910 was 12,870, of whom 10,346 were idle more than half time.

Kansas has 8,900 miles of steam railway and 268 miles of electric lines. The population in 1910 was 1,690,949.

- Kansas Aid Society.**—An organization to aid immigration into Kansas. Under the provisions of the Kansas-Nebraska Act, passed by Congress in May, 1854, the question of slavery in Kansas was left to the residents of the State for settlement, on the principle of local option or "squatter sovereignty." An immigrant aid association, which had been already formed in Massachusetts for the purpose, began sending anti-slavery settlers into the new Territory to forestall its settlement by slaveholders. Similar societies were organized in July, 1854, in New York and Connecticut. The settlers were provided with ample funds and means of defense against the settlers from the slaveholding States of the South. Meantime slavery advocates from Missouri were passing over the line and preempting large tracts of fertile lands. For 4 years the conflict for supremacy raged between the two parties, the anti-slavery party finally prevailing.
- Kansas City, Fort Scott and Gulf Railway Co.,** act to authorize construction of railway through Indian Territory by, returned, 4986.
- Kansas City, Oklahoma and Pacific Railway Co.,** act authorizing construction and operation of railway by, through Indian reservations vetoed, 6008.
- Kansas Indians.** (See Indian Tribes.)
- Kansas-Nebraska Act.**—By the Missouri Compromise of 1820 slavery was prohibited in all the region lying north of lat. 36° 30' with the exception of that lying in the State of Missouri. As a result of the Mexican War the limits of the United States were extended from the one hundredth meridian westward to the Pacific and southward to lat. 32° 30' north. By the Kansas-Nebraska Act passed by Congress in May, 1854, Kansas and Nebraska were separated and organized into 2 distinct Territories, and the question of slavery was left to the people for settlement. As both these States lie north of the line above which slavery was prohibited by the Missouri Compromise, the passage of the bill practically repealed that measure. The status of Nebraska as a free State was soon determined, but the struggle in Kansas was long and bitter. It disrupted the Whig party and led to the establishment of the Republican party, and was an important link in the chain of events that brought on the Civil War.

**Keliher, John A.**; member of the Massachusetts house of representatives, 1896-97, and of the Massachusetts senate, 1899-1900; was elected to the 58th, 59th, 60th, and 61st Congresses from Massachusetts.

**Kelley, Mr.**, commissioner to investigate affairs of New York custom-house, 2005.

**Kellogg, William P.:**

Candidate for governor of Louisiana, election disturbances discussed. (See Louisiana, elections in.) Mentioned, 4177.

**Kendall, Nathan E.**; lawyer; b. Greenville, Lucas Co., Iowa, March 17, 1868; has no education except that acquired in the rural schools of that county; served five terms in the general assembly of Iowa, the last term as speaker of the house; was elected to the 61st and 62d Congresses from Iowa.

**Kenesaw Mountain (Ga.), Battle of.—**

Between the 1st and 6th of June, 1864, Sherman gradually moved his army so as to envelop Allatoona Pass. This compelled Johnston to withdraw his army from its strongly intrenched positions at New Hope Church and Acworth. Allatoona Pass was then made a depot of supplies, and June 8 Gen. Blair joined Sherman with 2 divisions of the Seventh Corps and a brigade of cavalry, raising his effective force to its original strength of 98,000. Johnston's force was 62,000. Sherman then advanced toward Kenesaw Mountain, and on June 14 an artillery duel took place in which the Confederate General Polk was killed. On the 15th and 17th of June the Confederates retired from Pine Mountain and Lost Mountain, and thoroughly intrenched themselves on Kenesaw Mountain. June 27 two assaults on the Confederate position were simultaneously made, one by Thomas and the other by McPherson. Both were repulsed. Nothing now remained for Sherman but to turn the position. July 2 the whole army was put in motion toward the Chatahoochee. The Confederates immediately abandoned their position on the mountain and retired to the river. Sherman's loss at the attack on Kenesaw Mountain aggregated 3,000 men, including Generals Harker and McCook. The Confederate loss was 630.

**Kennebec Purchase.**—In 1628 the council for New England granted to William Bradford and other Plymouth colonists a tract of territory along the Kennebec and Cobbisecontee rivers for fishing purposes. This was sold in 1661 to Tyng and others, and has since been known as the Kennebec Purchase.

**Kennedy, Charles A.**; b. Montrose, Iowa, March 24, 1869: mayor of his native town for four years; in 1903 he was elected to the Iowa legislature, serving two terms; elected to the 60th, 61st, and 62d Congresses from Iowa.

**Kennon, Beverly**, court-martial of, referred to, 811.

**Kent, William**, b. Chicago, Ill., March 29, 1864, and is the son of Albert E. and Adaline Elizabeth (Dutton) Kent; his parents moved to California in 1871 and settled in Marin County; preliminary education received in private schools in California and at Hopkin's Grammar School, New

**Kent, William—Continued.**

Haven, Conn.; entered Yale in 1883 and graduated in 1887, with the degree of A. B.; M. A. (honorary), Yale, 1908; located in Chicago to look after his father's business interests; in 1890 entered into partnership with his father, under the firm name of A. E. Kent & Son; was married to Elizabeth Thacher, of Ojai Valley, Cal., Feb. 26, 1890; owner of real estate and business interests in Chicago, as well as in California; member of the firm of Kent & Burke, cattle dealers, Genoa, Nebr.; active in civic affairs; member of the Chicago City Council from 1895 to 1897; president of the Municipal Voters' League of Chicago, 1899-1900, and a member of its executive committee from 1897 to 1904; member of the Illinois Civil Service Association and of the Civil Service Reform League of Chicago; member of the following clubs: Union League; University; City (Chicago); Yale (New York) University; Bohemian (San Francisco); Graduates (Yale); sought the Republican nomination for Congress as a Progressive against Duncan E. McKinlay, and defeated the latter under the direct primary law of California; was elected to the Sixty-second Congress.

**Kentucky.**—One of the United States; nickname, "The Corn Cracker State"; motto, "United we stand, divided we fall." The name is said to mean in the language of the Indians "Dark and bloody ground." It lies between lat. 36° 30' and 39° 6' north and long. 82° and 89° 38' west. It is bounded on the north by Ohio, Indiana, and Illinois (separated by the Ohio River), on the east by West Virginia (separated by the Big Sandy River) and Virginia, on the south by Tennessee, and on the west by Missouri (separated by the Mississippi River). Area, 40,400 sq. miles. A vast tract of land, including what is now Kentucky, was ceded to Great Britain by the Iroquois Indians in 1684. Kentucky was explored by Daniel Boone in 1769, and the first settlement was made at Harrodsburg in 1774. It was made a county of Virginia in 1776 and admitted to the Union June 1, 1792. It took a distinguished part in the War of 1812, the Mexican War, and the Civil War. Although a slave State, Kentucky wished to preserve neutrality in the latter war. Kentucky has abundant natural resources in the shape of coal and iron mines,

hard wood forests, fertile soil and great water power facilities. Tobacco, corn and wheat are the chief agricultural products, Louisville being the largest leaf tobacco market in the world.

Statistics of agriculture reported to the Federal Census Bureau under date of April 15, 1910, place the number of farms in the State at 259,185, comprising 22,189,127 acres, valued, with stock and improvements, at \$773,797,880. The average value of farm land was \$21.83, as compared with \$13.24 in 1900. The value of domestic animals, poultry, etc., was \$117,486,662, including 1,000,937 cattle, valued at \$25,971,571; 443,034 horses, \$44,796,120; 225,043 mules, \$26,402,090; 1,491,806 swine, \$8,951,692; 1,363,013 sheep, \$5,573,998. The yield and value of field crops for 1911 is given as follows: Corn, 3,600,000 acres, 93,600,000 bushels, \$59,968,000; wheat, 780,000 acres, 9,906,000 bushels, \$9,114,000; oats, 170,000 acres, 3,128,000 bushels, \$1,564,000; rye, 22,000 acres, 204,000 bushels, \$243,000; potatoes, 52,000 acres, 2,028,000 bushels, \$2,170,000; hay, 450,000 acres, 428,000 tons, \$7,404,000; tobacco, 345,000 acres, 303,600,000 pounds, \$23,377,200.

The mineral products of the State for 1910 were valued at \$21,512,982, consisting of coal, lead, lime, asphalt, and natural gas. The coal production of the State in 1910 was 14,623,319 short tons, valued at \$14,405,887, as against 10,079,917 in 1909. The stoppage of work in the mines of neighboring States on account of the striking mineworkers was of material benefit to the western Kentucky mine owners and operators who found no difficulty in keeping 20,316 men at work an average of 221 days. Kentucky is one of the leading States in mining coal by the use of machines.

The receipts for the financial year ending June 30, 1911, were \$7,676,588; the disbursements for the same period, \$7,013,330; treasury balance, \$356,289. The bonded debt of the State at the end of the fiscal year was \$2,315,627.

The Ohio and Mississippi rivers and their tributaries afford natural means of transit, and 3,432 miles of steam railway and 337 miles of electric lines traverse the State. The population for 1910 was 2,289,905.

Ratification of amendment to Federal Constitution by, referred to, 249, 250.

**Kentucky Resolutions.**—Nine resolutions prepared by Thomas Jefferson and passed by the Kentucky legislature in 1798. These and the Virginia Resolutions were the outgrowth of a feeling that the Federal party, in passing the alien and sedition laws, was making an illegitimate use of the power granted to the Government by the Constitution. The resolutions declared that the Union was not based on the "principle of unlimited submission to the General Government"; that the Constitution was a compact to which each State was a party as related to its fellow States, and that in all cases not specified in the compact each party had a right to judge for itself, as well of infractions as of the mode and measure of redress. They then proceeded to set forth the unconstitutionality of the alien and sedition laws and invited other States to join in declaring them void. A tenth resolution was passed the following year declaring that nullification of a Federal law by a State was the rightful remedy for Federal usurpation of authority. Upon these resolutions were based in part the doctrines of nullification and secession.

**Kenyon, William S.,** b. Elyria, Ohio, June 10, 1869; educated at Iowa College, Grinnell, Iowa, and law school of the State University of Iowa; was prosecuting attorney for Webster County, Iowa, for five years; district judge for two years; general attorney Illinois Central Railroad Co. for three years; Assistant to the Attorney-General of the United States one year; elected to the United States Senate

April 12, 1911, to succeed the Hon. Lafayette Young, who was appointed United States Senator Nov. 12, 1910, to fill the vacancy caused by the death of Hon. Jonathan P. Dolliver, and took his seat April 24, 1911.

**Kernan, John D.,** member of Strike Commission, 5983.

**Kern, John Worth,** b. Dec. 20, 1849, in Howard County, Ind.; educated in the common schools, Normal College at Kokomo, Ind., and graduated from the law department of the University of Michigan with degree of bachelor of laws, class of 1869; by profession, a lawyer, practicing at Kokomo, Ind., until 1885, since that time at Indianapolis; member of bar of Supreme Court of the United States and member of American Bar Association; was reporter of the Indiana Supreme Court from 1885 to 1889, and edited and published 17 volumes of Indiana Reports—volumes 100 to 116, inclusive; member of Indiana State Senate 1893-1897; city solicitor of Indianapolis, 1897-1901; special assistant United States district attorney 1893-4; Democratic candidate for governor in 1900 and 1904; Democratic candidate for Vice-President in 1908; married and has three children; was nominated as the party's candidate for United States Senator by a unanimous vote of the Democratic State convention in 1910, and elected Jan. 18, 1911.

**Kilbourn vs. Thompson.**—A case decided by the Supreme Court in 1880 denying the right of the Senate or House of Representatives to punish anyone except their own members for contempt of their orders. Kilbourn was summoned as a witness before the House in 1876 and required to answer questions as to his private business and to produce certain papers. He refused, whereupon Sergeant-at-Arms Thompson was ordered to imprison him in the jail of the District of Columbia. He remained in prison 45 days. He was then released on a writ of *habeas corpus*. He brought suit for false imprisonment against Thompson and the members of the committee who caused his arrest. The court decided that the House might punish its own members for disorderly conduct, but that the Constitution did not give either branch of Congress general authority to punish for contempt. It was held, Justice Miller delivering the opinion, that neither House of Congress is a part of any court of general jurisdiction. Judgment was given Kilbourn, which was paid by an appropriation by Congress.

**Kimball, James P.**, Director of Mint, nomination of, and reasons therefor, 4952.

**Kimberly, Lewis A.**, dispatched to Samoa, 5390.

**Kindred, John J.**, b. Southampton County, Va., July 15, 1864; educated in the Suffolk Military Academy (Va.), at Randolph-Macon College, and at the University of Virginia; completed his medical studies at the Hospital College of Medicine in Louisville, Ky., graduating as an M. D. in 1889; removing to New York in 1889, he served as physician in many hospitals and institutions for mental and nervous diseases, including Bloomingdale Asylum, Hudson River State Hospital, having previously served as resident physician of the Maryland General Hospital, Baltimore, Md., etc.; also took post-graduate courses in medicine in New York and spent some time abroad in study; graduated in the department of mental diseases in the University of Edinburgh, Scotland, in 1892, and served as extra assistant physician in the Royal Asylum, Morningside, Edinburgh, Scotland; established the River Crest Sanitarium at Astoria, Borough of Queens, New York City, for mental and nervous diseases, one of the largest private institutions of the kind in the country; established the Farm Colony Sanitarium, Bellemead, N. J., for mental and nervous diseases; is recognized as an authority in the treatment of mental and nervous diseases and has lectured and published many articles on these subjects; has always taken an active interest in public affairs, devoting all possible time to effect the betterment of conditions and the higher efficiency of public officials, keeping posted on State and national issues; is also extensively engaged in agriculture; his nomination and election to Congress came without any solicitation on his part; is an active and liberal member of many civic, beneficent, and business organizations, and largely interested in real estate; married in 1902 Ella W. Cramer (A. B., Vassar, 1892); elected to the Sixty-second Congress from New York.

C.; member of Congress, 1811-16; United States Senator from Alabama, 1819-40; an ardent supporter of Gen. Jackson in his several Presidential campaigns; appointed minister to France, 1844-46, by President Tyler; United States Senator from Alabama, 1846-53; president of the Senate, 1850; Vice-President, 1852, taking the oath of office in Havana.

**King, William R.**, Vice-President, death of, announced and honors to be paid memory of, 2738.

Referred to, 2758.

**King Philip's War.**—Philip, son of Massasoit, sachem of the Wampanoag Indians and a friend to the early settlers of Plymouth, determined to drive away or kill all the European settlers in his territory. His camp was at Mount Hope, R. I., and his first blow was struck at Swansea, Mass., July 4, 1675. The settlers took up arms in defense and drove the Indians to the more remote settlements. Philip was reenforced by other tribes, but the Indians suffered many defeats and were finally subdued. Philip was shot in a swamp by a treacherous Indian and his head was carried in triumph to Plymouth. His son, the last of the line, was sold into slavery and sent to Bermuda.

**Kings Mountain (S. C.), Battle of.**—Early in October, 1780, Cornwallis sent Colonels Tarleton and Ferguson from Charleston to invade North Carolina, enroll local militia, and compel the allegiance of the people. On the 6th Ferguson, finding himself hotly pursued by the Americans, took up a strong position on Kings Mountain, near the boundary line between North and South Carolina. The next day his army, about 1,500 strong, was attacked by about the same number of American militia under command of Colonels Shelby, Campbell, Cleveland, McDowell, Sevier, and Williams. After a desperate struggle lasting an hour, in which Ferguson was killed, the British force surrendered. The casualties on the British side were 387 killed or so badly wounded as to be left upon the field and about 1,200 taken pris-

oners. The Americans lost 28 men and 60 wounded. Fifteen hundred muskets and other arms fell into the hands of the Americans.

**Kinkaid, Moses P.**; lawyer; b. West Virginia; a resident of the State of Nebraska since 1881; graduate of the law department, University of Michigan; state senator in Nebraska in 1883; district judge for three terms; elected to the 58th, 59th, 60th, 61st, and 62d Congresses from Nebraska.

**Kinkead, Eugene F.**; b. March 27, 1876; elected alderman in Jersey City, 1898, serving as president of the board; was elected to the 61st and 62d Congresses from New Jersey.

**Kiowa Indians.** (See Indian Tribes.)

**Kirkwood, Samuel Jordan** (1813-1894); politician and Cabinet officer; b. in Harford Co., Me., but settled in Iowa in 1855; sat in the State senate, 1856; governor of Iowa, 1859, 1861, and 1875; succeeded James Harlan as United States Senator, 1866, and 1877-1881; Secretary of the Interior under Garfield, 1881-82.

**Kishinef Massacres** discussed, 7055.

**Kitchen Cabinet.**—A name applied to a group of intimate political friends of Andrew Jackson who, it was charged, had more influence over his official actions than his constitutional advisers. They were Gen. Duff Green, editor of the *United States Telegraph*, published at Washington as the organ of the Administration; Maj. William B. Lewis, of Nashville, Tenn., Second Auditor of the Treasury; Isaac Hill, editor of the *New Hampshire Patriot*, and Amos Kendall, of Kentucky, Fourth Auditor of the Treasury.

**Kitchin, Claude**; b. Halifax Co., N. C., near Scotland Neck, March 24, 1869; graduated from Wake Forest College, 1888; admitted to the bar September, 1890, elected to the 57th, 58th, 59th, 60th, 61st, and 62d Congresses from North Carolina.

**Kittery, Me.**, dry dock at, 2414.

**Klamath Forest Reserve**, proclaimed, 7104.

**Klamath Indians.** (See Indian Tribes.)

**Knights of Labor.**—A secret order of workmen, founded by Uriah S. Stevens in Philadelphia in 1869, and formally organized as a national body, with district and local assemblies, in 1871. It was not until 1881 that the name of the order was made public. At that time nearly all the trades were represented. Each trade formed a district, as nearly as possible. The knights are governed by a general executive board, presided

**Knights of Labor—Continued.**

over by a general master workman, which has power to order strikes and boycotts. The membership is about 220,000. They have ordered many strikes among coal miners and railroad operatives. Perhaps the greatest strike ever undertaken by the general assembly of the order was that on the Missouri Pacific system, which failed. A general strike of the district composed of telegraphers also failed. The object of the order is the amelioration of the condition of workmen.

**Know-Nothings or Know-Nothing Party.**

—A name applied to the American party, which advocated the control of the Government by native citizens. Its members received the name of "Know-Nothings" because from the time of the organization of the party, in 1853, till 1855 it was a secret fraternity, and when questioned as to its objects or workings its members professed to know nothing about it. The party was powerful for several years. In 1856 it nominated Millard Fillmore for the Presidency. In 1855 a society called the "Know-Somethings" was formed to oppose the Know-Nothings.

**Knowland, Joseph Russell**, b. in the city of Alameda, Cal., Aug. 5, 1873; served in the State legislature and was elected to the 58th, 59th, 60th, and 61st Congresses from California.

**Knox, Henry**; soldier; b. Boston, Mass., July 25, 1750; joined the Boston Grenadiers in 1770, and was on duty during the Boston massacre; joined the Continental army at Cambridge, Mass., April 19, 1775, and rendered efficient service in the early days of the Revolution; during the winter of 1775-76, he transported fifty-five pieces of ordnance and 2,300 pounds of lead from Ticonderoga to Cambridge; made brigadier-general of artillery in 1776; after the war he founded the Society of Cincinnati; appointed Secretary of War by Congress, 1785, and on the inauguration of Washington as President was retained in the Cabinet; resigned Jan. 2, 1795, the compensation of the office not being sufficient to support his family; removed to Maine and engaged in farming; died at Thomaston, Me., Oct. 25, 1802.

**Knox, Henry:**

Commissioner appointed by United States under treaty with Great Britain, 188.

Commissioner to treat with Indians, 70.

Proceedings of Cabinet were signed by him as attendant adviser of President Jefferson.

**Knox, Philander Chase**, Secretary of State in President Taft's Cabinet; b. Brownsville, Pa., May 6, 1853; admitted to the bar in 1875; assistant United States district attorney for the western district of Pennsylvania in 1876; made Attorney-General in the Cabinet of President McKinley in 1901 and of President Roosevelt Dec. 16, 1901; resigned that office June 30, 1904, to accept appointment as United States Senator from Pennsylvania, to fill a vacancy caused by the death of Hon. M. S. Quay, and took his seat Dec. 6; elected by the legislature January, 1905, for the term ending March 3, 1911; resigned as Senator March 4, 1909, to accept the position of Secretary of State.

**Knoxville (Tenn.), Siege of.**—Sept. 3, 1863, Gen. Burnside, with the Army of the Ohio, occupied Knoxville, Tenn. Upon his advance the Confederate General Buckner evacuated eastern Tennessee and joined Bragg at Chattanooga. Early in November Longstreet, with 16,000 men, was detached from Bragg's army and sent to regain possession of Knoxville. Burnside, with a force of 12,000, met Longstreet at Campbells Station, Tenn., Nov. 16, and retarded his advance long enough to enable him to concentrate his forces at Knoxville. Longstreet then besieged that town. Nov. 18 and 20 he unsuccessfully assaulted the Federal works. Meantime Grant had defeated Bragg at Chattanooga, and Sherman, with 25,000 men, was sent to the relief of Burnside. Dec. 5, 1863, Longstreet, hearing of the approach of Sherman, raised the siege and retreated toward Virginia. Sherman thereupon returned to the line of the Hiwassee, leaving 2 divisions under Gen. Granger to sustain Burnside.

**Kock, Bernard**, agreement with, for emigration of negroes canceled, 3368.

**Konig, George**, b. at North Point, Baltimore County, Md., Jan. 26, 1856. Being compelled at a very early age to work to earn his livelihood, was denied the opportunity of acquiring a school education, and it was not until quite advanced in years that he taught himself, under great difficulties, reading and writing; learned the trade of ship calker and worked at it for 10 years; took an active part in organized-labor movements; was president of the Ship Calkers' Union, and prominent in the councils of the

**Konig, George—Continued.**

Knights of Labor and of the Federation of Labor. He is now the superintendent and general manager of one of Baltimore's leading manufacturing enterprises; served two terms in the first branch of the City Council of Baltimore, and was closing out his first term in the second branch of the City Council when elected to the Sixty-second Congress from Maryland.

**Konop, Thomas F.;** b. Franklin, Kewaunee County, Wis., Aug. 17, 1879; attended a country school and high school, Two Rivers, Wis.; and the State Normal School at Oshkosh; studied law at the Northern Illinois College of Law and at the State University of Nebraska, from which last-named institution he received his degree of LL. B. in 1904; admitted to the bar in Wisconsin; served three terms as district attorney of his county. Mr. Konop was nominated for Congress in September, 1910, on the Democratic ticket in a district safely Republican by 5,000; after a hard campaign of two months, during which he visited every corner of his district, he was elected by a plurality of 5 votes, the Republican State ticket carrying the district at the same time; elected to the Sixty-second Congress from Wisconsin.

**Kootenay Indians.** (See Indian Tribes.)

**Kopp, Arthur W.;** b. Feb. 28, 1874, at Big Patch, Grant Co., Wis.; grad. State Normal School at Platteville in 1895 and law department of the Univ. of Wisconsin in 1900; served as alderman of the city of Platteville; city attorney for two terms, and four years as district attorney of Grant County; elected to the 61st and 62d Congresses from Wisconsin.

**Korbly, Charles Alexander;** b. March 24, 1871, in Madison, Ind.; elected to the 61st and 62d Congresses from Indiana.

**Korea.**—A kingdom of eastern Asia, over which Japan exercises a protectorate. The greater part of the country occupies a peninsula stretching south from the eastern portion of the Chinese empire. It lies between about 34° and 42° 25' north latitude and between 124° 35' and 130° 50' east longitude. It is bounded on the north by the elevated plains of Manchuria, on the east by the Sea of Japan, on the south by the Strait of Korea, and on the west by the Yellow Sea. It has an area of 71,000 sq. miles. The existing dynasty was founded in 1392. The present King is the thirty-

first in the regular succession. Until 1895 China claimed Korea as part of the empire. By the treaty of Shimonoseki, in May, 1905, terminating the war between China and Japan, the independence of Korea was acknowledged. Under Japanese influence many reforms were introduced, and a struggle began with Russia for the trade of Korea. Feb. 23, 1904, an agreement was signed at Seoul on behalf of Japan and Korea, the Japanese guaranteeing to insure the independence and territorial integrity of Korea and the safety of the Korean imperial house, while the Korean government agreed to adopt Japanese advice with respect to administrative improvements. By the treaty of peace of Sept. 5, 1905, which ended the Russo-Japanese war, Russia acknowledged Japan's paramount interests in Korea. The Anglo-Japanese agreement of Aug. 12, 1905, contains similar recognition on the part of Great Britain. Nov. 17, 1905, an agreement between Korea and Japan placed control and direction of the foreign relations of Korea in Japanese hands. By this agreement it was provided that a Japanese Resident-General should be stationed at Seoul, and the Marquis Ito assumed the post on March 2, 1906. This protectorate lasted until Aug. 29, 1910, when Korea was annexed to Japan and placed under the administration of a governor-general, Count Terauchi Masakata.

Korea is a purely agricultural country, but the methods of cultivation are primitive and the means of transportation meagre. In the south, rice, wheat, beans, and grain of all kinds are grown; in the north, barley, millet and oats. The cotton crop of 1905 was 101,200,000 pounds.

An American company is working a gold mine at Wunsan, under a concession. Several other gold mining concessions have been granted to foreigners, but work is in the preliminary stage. Copper, iron, and coal are abundant, but undeveloped.

In 1882 Korea concluded a treaty with the United States. The open ports are Chemulpo, Fusan, Wonsan, Chinnampoo; Mokpo, Kunsan, Masampo, Sougechin, Ping Yang (inland city), Wiju, Yong-Am-Po, and Chungjin. The imports for 1907 were 41,436,249 yen; exports, 16,394,712 yen. (One yen equals 49c.) Of steamers entering the open ports in 1906, 4,594 were Japanese, 520 Korean, 272 American, 53 Norwegian, 69 German, and British 20. The sailing vessels were

**Korea—Continued.**

almost entirely under the Japanese, Chinese, and Korean flags.

There is a railway from Seoul to Fusan, 286 miles, with a branch 26 miles long to Chemulpo. The Seoul-Wiju line is 310 miles long, and all will eventually connect with the Siberian and Chinese lines. The railways all belong to the Japanese government. The population of Korea is estimated at from 10,000,000 to 12,000,000. Korea has 2,170 miles of telegraph and the telephone has been introduced. The kingdom is a member of the International Postal Union.

**Korea:**

Chemulpo, agreement respecting foreign settlement at, 5391.

Treaty with, 4698.

Referred to, 4715, 4757, 4761.

War between China and Japan regarding. (See Wars, Foreign.)

**Korea, Treaties with.**—A treaty of amity, commerce, and navigation was concluded in 1882. It provides for perpetual peace and friendship between the rulers and citizens of both countries. Consular representatives are to be appointed and accredited according to the regulations commonly governing such matters. Humane treatment is to be extended to all vessels in distress, and the customary provisions are made for their relief. United States vessels conducting clandestine trade at a port not open to foreign commerce shall be confiscated. Citizens are to be protected within the dominions of the other country. In cases of controversy between citizens of the one country and subjects of the other, the trial is to be made before a judge of the nationality of the defendant, and all facilities shall extend to the counsel of the plaintiff. This condition shall obtain in Chosen until such time as in the opinion of the United States the judicial conditions and adminis-

tration of justice in that country shall conform to the standard of the United States; at which time citizens of the United States in Korea shall become subject to the native authorities.

The tariff on all articles of daily use imported into Korea shall never exceed ten per cent of the value of such goods; articles of luxury, as foreign wines and tobacco, watches and clocks shall be subject to an import duty not to exceed thirty per cent of the value, and articles of native produce, five per cent, *ad valorem*. The tonnage duties on ships entering harbors or ports in Chosen shall be five mace per ton, payable once every three months. The holding of land, construction of buildings, while freely permitted in any of the ports open to foreigners, is restricted, that the property shall always be under the jurisdiction of the authorities of Chosen, and that the only extra-territorial rights in connection with these matters shall be those conferred by this treaty. The trade in Chosen shall be restricted to the open ports and coastwise trade by the citizens of the United States is prohibited. Trade in opium between the two countries is absolutely forbidden. In times of threatened famine in Chosen, the emperor may, at discretion, forbid the export of foodstuffs; the exportation of rice and bread-stuffs from the open port of Yin-Chuen is at all times forbidden. Ginseng may not be exported from any port of Chosen. Only the government officials of Chosen may purchase and bring in arms and munitions of war.

Free emigration and immigration between the two countries is permitted to students. A fuller treaty shall be made between the two countries within five years from the date of conclusion of this tentative agreement, the later treaty to be based upon the experience of the two nations on existing conditions. Any privileges which may hereafter be accorded by Chosen to other foreign nations shall accrue to the government of the United States.

**Kosciusko**, statue of, at Washington, D. C., 6934.

**Kossuth, Louis**; an eminent Hungarian patriot, orator and statesman; born of a noble family at Monok, county of Zemplin, 1802; studied law and joined the popular party in opposing the despotic rule of Austria; imprisoned in 1837-40 for having offended the government by his writings;

**Kossuth, Louis**—*Continued.*

elected to the Diet in 1847, and acquired a high reputation as an orator; he induced the Diet to vote the perfect equality of civil rights and public burdens for all classes, and to extend the right of suffrage; became minister of finance in the cabinet formed in April, 1848; in April, 1849, the Hungarians renounced allegiance to Austria and chose Kossuth dictator; Russian intervention on behalf of Austria prevented the establishment of a Hungarian republic; Kossuth went to Turkey, where he was imprisoned, but later liberated through the intervention of the United States and England; visited England and the United States in 1857, where he was greeted with enthusiasm; died Turin, Italy, March 20, 1894.

**Kossuth, Louis:**

Liberation of, and companions referred to, 2647, 2655.

**Kosztz, Martin**, seizure and imprisonment of, by Austrian brig of war and subsequent release of, discussed, 2742.

Referred to, 2764, 2770, 2771.

**Krebs, Ind. T.**, miners killed at, 5663.

**Kühner, Jacob**, land claims of, 6708, 6709.

**Kuin Island**, referred to, 6835.

**Ku-Klux Klan**.—A secret organization in several of the Southern States soon after the Civil War. Its exact origin was never given. It was claimed that a copy of the constitution (prescript, as it was termed) of the order was obtained, from which it was learned that their lodges were called dens; the masters, cyclops; the members, ghouls. A county was called a province and was governed by a grand giant and 4 goblins. A Congressional district was a dominion, governed by a grand titan and 6 furies.

A State was a realm, governed by a grand dragon and 8 hydras. The whole country was the empire, governed by a grand wizard and 10 genii. They appeared only at night and carried banners. Their dress was a covering for the head, descending over the body, holes being cut for eyes and mouth, the covering being decorated in any startling or fantastic manner. Its object was to suppress the negro as a factor in politics, by means of intimidation and terrorization and, for a time, many of the most prominent and respectable citizens of the Southern States belonged to it; but later the more respectable element withdrew and the organization outran its original purpose. In many localities gross disorders and crimes were committed by persons in disguise, who were either members of the Klan or who were using the disguise and methods of the order for evil purposes. A Congressional investigation followed, and President Grant in a message asked for legislation to suppress the order, etc. The Ku-Klux act (see Force Bill) was passed in 1871. The same year the President issued proclamations on the subject, and soon thereafter the Klans dispersed and ceased to exist.

**Ku-Klux Klan** (see also Rifle Clubs; White Leagues):

Discussed, 4104, 4117.

Proclamations against, 4086, 4088, 4089, 4090, 4093.

Principle of arbitration referred to, 7416, 7469.

Strikes and lockouts, 7468.

**Labor Statistics, Bureaus of.**—In response to demands of working people in various parts of the country, many States and the United States have established bureaus of labor statistics. The first office of the kind was established in Massachusetts by an act of June 23, 1869. Others were established as follows: In Pennsylvania in 1872; Connecticut in 1873 (abolished in 1875 and reestablished in 1885); Ohio in 1877; New Jersey in 1878; Indiana, Missouri and Illinois in 1879; California, Wisconsin, New York, and Michigan in 1883; Maryland and Iowa in 1884. By an act of Congress of June 27, 1884, the United States Bureau of Labor was established, and by an act of June 13, 1888, it was succeeded by the Department of Labor; to be succeeded in turn by the Department of Commerce and Labor (q. v.), which was established by an act of Jan. 17, 1903. Thirteen States other than those named have organized labor bureaus.

**Laborers, Alien**, discussed, 6065, 6348, 6455.

**Laborers, Government,** appointment of, 6747, 6851, 6878.

**Labrador.**—The most easterly portion of North America, usually described as the entire peninsula bounded by Hudson and James bays, Hudson Strait, the Atlantic Ocean and the Gulf and River St. Lawrence; on the southwest it is bounded by Rupert's River and the Mistassini. It extends approximately from 50° to 63° north latitude and from 55° to 80° west longitude, and comprises an area of 511,000 square miles. The peninsula was divided in 1895 into three provinces: the entire north-eastern coast draining into the Atlantic was named Labrador and placed under the political jurisdiction of Newfoundland; the remainder of the peninsula westward to Hudson Bay and lying north of the East Main and Hamilton rivers comprises the unorganized territory of Ungava, and the country south of those rivers was added to the province of Quebec. Recent explorations have disclosed many valuable resources in the way of forests, fur-bearing animals, minerals, and fisheries in what was long described as a "land of awful desolation." The population is estimated at about 14,500, mostly Eskimos.

**Ladd, Edward H.,** claim of, against Colombia, 4804.

**Lady Franklin Bay Expedition,** expedition fitted out for relief of, 4835. Board to consider expedition to be sent, 4813.

Offer of rewards for rescuers of, discussed, 4795.

Recommended, 4693, 4787.

Vessel presented by Great Britain to United States to aid in, 4791.

Return of, to Great Britain, 4917. Recommended, 4855.

**Lafayette, Ind.,** act for erection of public buildings at, vetoed, 5154.

**Lafean, Daniel Franklin;** b. York, Pa., Feb. 7, 1861; actively engaged in the manufacturing business and banking; elected to the 58th, 59th, 60th, 61st and 62d Congresses from Pennsylvania.

**Lafferty, A. W.;** b. Audrain County, Mo., June 10, 1875; attended the law department of the Missouri State University, admitted to the bar of the Supreme Court of Missouri, and practiced law at Montgomery City, Mo.; served three years with the

**Lafferty, A. W.—Continued.**

rank of captain in the Missouri National Guard and one term as prosecuting attorney; in 1909 he was given the degree of LL. B. by the law department of the Missouri University; appointed special agent of the General Land Office, and was sent to Oregon, arriving at Portland the 1st of March, 1905; resigned as special agent of the Land Office and reentered the private practice of law; instituted litigation in the Federal court in Oregon to compel the Oregon and California Railroad Company to sell 2,300,000 acres of lands granted to it by act of Congress in accordance with the terms of the grant, which require that the lands shall be sold by the railroad company to actual settlers only in quantities not greater than a quarter section to any one settler, and at prices not exceeding \$2.50 per acre; became a candidate for Congress in 1910 as a progressive Republican, favoring greater liberality to homesteaders and the giving to Oregon the benefit of her own natural resources; was elected to the 62d Congress from Oregon.

**Lafitte, Jean.** (See Barrataria, Island of.)

**Lafitte & Co.,** memorial from trustees of, presented, 1648.

**La Follette, Robert Marion;** b. at Primrose, Dane Co., Wis., June 14, 1855; graduated from the State University of Wisconsin, 1879; admitted to the bar in 1880; elected a member of the 49th, 50th, and 51st Congresses; elected governor of Wisconsin in 1900, 1902, and 1904; elected to the United States Senate from Wisconsin, Jan. 25, 1905.

**La Follette, William L.;** b. Boone Co., Ind., Nov. 30, 1860, and went West at the age of 16 years, settling in eastern Washington; engaged in fruit, grain, and stock raising for 30 years, and served one term in the Washington legislature and on various appointive commissions; elected to the 62d Congress from Washington.

**Lake Borgne (La.), Battle of.**—The British army, repulsed at Baltimore, retired to the island of Jamaica. Being there reinforced by a sufficient number to make a total of above 7,000 men, it sailed from Jamaica Nov. 26, 1814, in Admiral Cochrane's ships, with the intention of capturing New Orleans, and thus securing possession of the Mississippi River

and the Territory of Louisiana. Early in December Daniel T. Patterson, commanding the naval station at New Orleans, sent Lieut. Thomas A. C. Jones with 7 small vessels, mounting 23 guns and carrying 182 men, to intercept the British fleet. The British, Dec. 14, 1814, manned 60 barges with 1,200 volunteers from the fleet, under Capt. Lockyer, and sent them out to destroy the American gunboats. The battle took place on Lake Borgne, and lasted almost an hour. Several of the British barges were shattered and sunk and about 300 men killed and wounded. The Americans lost only 6 men killed and 35 wounded. The American gunboats were captured, which gave the British control of Lake Borgne.

**Lake Champlain:**

Act to authorize construction of bridge across portion of, vetoed, 5060.

Insurgents on, proclamation against authorizing militia officers to disperse by force, 438.

Victory of American squadron on, 534.

**Lake Champlain, Battle of.**—After arriving at the head of Lake Champlain, Sept. 6, 1814, Governor-General Prevost awaited the cooperation of the British fleet on the lake. Sept. 11 Capt. Downie's squadron rounded Cumberland Head. It consisted of the frigate *Confidence*, brig *Linnet*, sloops *Chub* and *Finch*, and 12 gunboats—in all, 16 vessels, of about 2,402 tons, with 937 men and a total of 92 guns, throwing a broadside of 1,192 pounds. In Cumberland or Plattsburg Bay, awaiting the attack, lay the American squadron, under Capt. Thomas Macdonough, then only 28 years of age. It consisted of the ship *Saratoga*, brig *Eagle*, schooner *Ticonderoga*, sloop *Preble*, and 10 gunboats—in all, 14 vessels, of 2,244 tons and 882 men, with 86 guns, throwing a broadside of 1,194 pounds. Kneeling beside his heaviest gun, surrounded by his men, the young captain invoked divine protection and guidance. The first shot from the *Saratoga* was aimed by Macdonough and went entirely through the flagship of the British squadron, demolishing her wheel. The battle raged 2 hours and 20 minutes, when every British vessel struck her colors. Both squadrons were badly crippled. The British loss was more than 200, including Captain Downie. The American loss was 110, of whom 52 were killed.

**Lake Erie:**

Rise of waters of, referred to, 1563.  
Victory of American squadron on, 519.

**Lake Erie, Battle of.**—In 1813 the Americans, under great difficulties, constructed a fleet of war vessels at Presque Isle, now Erie, Pa., for service on the Lakes. Aug. 12, 1813, the American squadron, consisting of the *Lawrence*, *Niagara*, *Caledonia*, *Ariel*, *Somers*, *Tigress*, *Scorpion*, *Porcupine*, *Ohio*, and *Trippe*, manned by less than 400 officers and men, under Capt. Oliver H. Perry, set forth in search of Barclay's British squadron of 6 vessels, manned by more than 500 men. Sept. 10 Perry's lookout sighted the enemy. At 10 o'clock in the morning the signal for action was run up to the masthead of the *Lawrence*. It bore the words of the dying Capt. Lawrence, of the *Chesapeake*: "Don't give up the ship." During the action the *Lawrence* was disabled and Perry transferred his flag to the *Niagara*. At 3 o'clock in the afternoon the flag of the British flagship was struck. The firing ceased. It was the first time an American fleet had met a British fleet in regular line of battle. The engagement was fairly fought, with the Americans at a disadvantage, and the British fleet surrendered. Perry sent word to Gen. Harrison: "We have met the enemy and they are ours." The British loss in the action was 135, 41 of whom were killed. The Americans lost 123, 27 of whom were killed.

**Lake Memphremagog**, practicability of connecting Connecticut River with, 873.

**Lake Michigan**, improvement of harbors and rivers on, 2764.

**Lake of the Woods**, boundary with Great Britain regarding, referred to, 4141, 4191, 4213, 4356.

**Lands, Mineral** (see also California; New Mexico):

Congressional committees to visit, recommended, 4309.

Referred to, 1809, 2218, 2558, 2663, 3330, 3383.

Sale of, recommended, 2304, 2354.

Separation of, from farming lands, commended, 2493.

System of leasing, unsatisfactory, 2260, 2623.

**Lands, Public.**—By the treaty of 1783

England relinquished all her lands east of the Mississippi River north of 31° north latitude. So much of this territory as lay east of the Alleghany Mountains was claimed by the original States; and certain of the States claimed lands beyond the Alleghanies based on their crown grants, which extended to the "South Sea" or Pacific Ocean. These grants were indefinite and conflicting and the source of much contention between the States, and the lands were finally (with certain reservations) ceded to the Federal government. The acquisition of more territory from Spain, France, Mexico and Great Britain (through the determination of boundaries) added vast tracts to the public domain, from which States were afterward formed, but with the reservation that the unoccupied lands therein should remain the property of the general government. Only eighteen States thus retained control of the land within their boundaries, and were able to dispose of it as the local governments saw fit. When Texas was admitted to the Union, it retained jurisdiction over its public domain and is administering the same to-day independent of the Fed-

eral Land Office. In the other States (formed from the Louisiana Purchase, the Mexican Cession, etc.) there yet remain unreserved and unappropriated 495,306,529 acres of public land.

*Lands, Arid.*—The great North American desert possesses all the climatic, geologic, and physiographic features of the Desert of Sahara, in Africa, though only about one-third as large. It embraces the vast stretches of country lying between the Sierra Nevada Mountains of California and the eastern ranges of the Rocky Mountains in the United States, and between the Pacific Ocean and the Sierra Madre Mountains, in Mexico, an area of 1,050,000 square miles, of which about half lies in Mexico and the other half in the United States, including Nevada, Utah, eastern and southern California, Arizona, New Mexico, and all of Texas west of the Pecos. In general this desert is one of barren, stony mountain ranges, separated by equally barren stretches of desert plain, an aggregation of elongated arid plains and lower mountain ranges. The individual deserts have separate names and each differs from the others in some notable feature. Like the Sahara, the American desert is without water on its surface. Upon its area the average annual rainfall is less than 10 inches—less than falls in two months in the fertile States of the east.

With the aid of the railroad and the mechanical drill American genius and energy have conquered the arid plains of the west, and made them yield double the wealth per capita of any other portion of the United States. Like Sahara, the arid plains of America have an underground supply of water. By the use of the mechanical drill the deep wells on the mesa at El Paso supply 700,000 gallons of water per day, and the flowing well at Benson and those of the Salton Desert afford ample supplies to localities which were formerly hopelessly dry. The sterile soil of the desert is apparently more fertile, when artificially watered, than many regions where rainfall is abundant. In the desert may be seen some of the most skillful and profitable agriculture in the world. Striking examples of this are seen in the wheat fields of Utah and Sonora, the great cotton plantations of Coahuila, Mexico, the alfalfa valleys of the Rio Grande and the orchards

**Lands, Public—Continued.**

of California. The marvelous transformation wrought by irrigation is shown in Southern California, where communities of great wealth and culture have sprung up and where the ideal of perfect conditions of existence seem to have been attained. To the reclamation of these arid lands the attention of Congress has been directed in recent years, and Federal appropriations for irrigation are bringing them more and more each year into a state of productiveness. (See Irrigation.)

**Lands, Bounty.**—A term applied to the lands in the Northwest Territory belonging to the eastern commonwealths. Sept. 16, 1776, Congress offered bounty lands to volunteers in the Revolution, assessing the money to buy them against the several States. The term Bounty Lands was also applied to the Crown Lands before the Revolution. Lord Dunmore, Governor of Virginia, was empowered to offer bounties in land to all officers and soldiers who served in the French and Indian wars—5,000 acres to each field officer, 3,000 to captains, 200 to subalterns or staff officers, and 50 to private soldiers—up to 200,000 acres, in the King's domain. This was understood by the Americans to refer to the lands of the Northwest Territory, and many of them selected choice tracts west of the Alleghanies. Washington and his land agent, Crawford, had surveyed 70,000 acres and secured patents in his own and other officers' names for 63,000 acres, of which his own share was 32,000.

**Lands, Crown.**—After the treaty of Paris in 1763, by which Great Britain acquired Canada and all the country west of the Mississippi River, a royal proclamation was issued setting aside all the lands west of the Colonies and extending to the western limits of the British possessions as Crown lands. These lands were reserved for the use of the Indians, and the colonists were forbidden to make settlements in or purchases of them without permission of the home Government. After the Revolution each State laid claim to a portion of the Crown lands.

**Lands, Desert.**—March 3, 1877, Congress passed the Desert Land law, which it supplemented in 1891, by further legislation, to encourage irrigation by private individuals and associations. It provides that any citizen or any person who declares

his intention of becoming a citizen, by paying a registration fee of 25 cents, and declaring his intent to irrigate within three years, may occupy desert land to the extent of one section (640 acres) in any one of a number of specified western States and Territories, and if he reclaims it within that time may receive a patent for it upon payment of \$1 per acre. He must spend at least \$3 per acre in irrigation or securing water rights, and must have secured the rights before making application. Associations may file joint declarations.

Under a recent amendment the settler may take up 320 acres of arid land upon payment of 25 cents per acre; after spending \$1 per year in improvements for three years, and proving the ownership of sufficient water to irrigate the entire tract, he may secure full title by payment of \$1 per acre to the government. Land so acquired costs about \$10 per acre.

**Lands, Indian.**—To quiet the apprehensions of the Indians in the Ohio regions that their lands were to be granted to settlers, a royal proclamation was issued Oct. 7, 1763, forbidding colonial governors from making land grants west of the sources of the rivers flowing into the Atlantic. As the result of treaties, purchase and war, the Indians were eventually transplanted to the country west of the Mississippi, the first territorial reservation set apart for them being June 30, 1834, known as the Indian Territory. Other reservations were subsequently set aside for the exclusive occupation of the Indians, but as the number of Indians decreased and the covetousness of the whites increased these reservations were either bought outright by the Government or exchanged for other territory.

**Lands, Homestead.**—The Federal Homestead laws begin with the act of Congress passed in 1862, now sections 2289-2317, United States Revised Statutes. The object of these homestead land laws is to give portions of the public lands to those who will settle, cultivate, and make permanent homes upon them. Any person who is the head of a family or who is a citizen of the United States, or who has filed his declaration of becoming such, may acquire a tract of unappropriated public land not exceeding 160 acres, on condition of settlement, cultivation and continuous occupancy as a home for him-

**Lands, Public—Continued.**

self for a period of five years, and the payment of certain moderate fees. Under the provisions of this law more than 85,000,000 acres of unoccupied lands have been transferred to homeseekers. During the year 1901 alone the original homestead entries, final, and commuted entries, aggregated 111,390, and covered 15,455,057 acres. Time of service in the United States army, navy, marine corps, during the Rebellion, the Spanish War, or the Philippine Insurrection may be deducted from the term of continuous occupancy of a homestead.

The homestead law gives the settler two options: he can settle upon, enter and acquire title to 160 acres of land practically free of cost by maintaining residence thereon for five years; or he may at the end of fourteen months of such continuous residence secure a patent from the government by paying \$1.25 per acre.

**Lands, Mineral.**—Among the classifications of public lands made by the General Land Office is that of Mineral Lands. These vary from placer locations, at \$2.50 an acre, to mining rights at \$5, not to exceed 1,500 by 600 feet, nor less than 1,500 by 50 feet.

**Lands, Timber and Stone.**—Lands which are unfit for cultivation, but are of value for their standing timber or stone, may be had from the Government by individuals to the extent of 160 acres, on payment of \$2.50 an acre.

**Lands, Swamp.**—In 1849 and 1850 Congress passed resolutions granting large tracts of land to the various States for their disposal. Agents of the States selected such lands as were unfit for cultivation, and title to the same was confirmed in the States by an act approved March 3, 1857. At the time of the grant it was estimated from Government surveys that the swamp land would not exceed 21,000,000 acres. Millions of acres, however, were listed as swamp lands. This led to an investigation, and gross frauds were unearthed. Under the various acts lands have been granted to Alabama, Arkansas, California, Florida, Illinois, Indiana, Iowa, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Ohio, Oregon, and Wisconsin. Florida has received the largest share—22,500,000 acres—and Ohio the least—117,000 acres. In many instances the

States have sold the lands to railroad companies.

**Lane, Henry S.**, member of Indian commission, 3977.

**Lane, James H.**, brigadier-general, United States Army, appointment of, referred to, 3236.

**Langdon, John**; statesman; b. Portsmouth, N. H., June 25, 1741; chosen delegate to Congress from New Hampshire, 1775-76; captain of volunteers in Vermont and Rhode Island; speaker of the house of representatives of New Hampshire, 1776-77, and judge of the court of common pleas; again appointed delegate to Congress in 1783, and repeatedly a member of the legislature, and speaker; elected governor in 1788; United States Senator, 1789-91; again from 1805 to 1808 and in 1810 and 1811, he was governor; died at Portsmouth, N. H., Sept. 18, 1819.

**Langdon, John:**

Appointed on committee to meet President Washington, 36.

Washington's election certified by, as President of Senate, 35.

**Langham, Jonathan Nicholas**; b. in Indiana Co., Pa., Aug. 4, 1861; entered the State Normal School at Indiana, graduating in 1882; admitted to the bar in 1888; was appointed postmaster at Indiana, Pa., under President Harrison; served six years as assistant United States attorney for the western district of Pennsylvania; elected to the 61st and 62d Congresses from Pennsylvania.

**Langley, John Wesley**; b. Floyd Co., Ky.; attended the law departments of the National, Georgetown, and Columbian (now George Washington) universities for an aggregate period of eight years and was awarded the first prize in two of them; had conferred on him the degrees of bachelor of laws, master of laws, doctor of the civil law, and master of diplomacy; served two terms in the Kentucky legislature; elected to the 60th, 61st and 62d Congresses from Kentucky.

**Lardner, James L.**, thanks of Congress to, recommended, 3284.

**Larkin, T. O.**, dispatch forwarded to, and destroyed by Capt. Gillespie, 2428.

**Larned, Samuel**, treaty with Peru-Bolivian Confederation concluded by, 1563.

**Larrabee, Charles F.**, member of Indian commission, 5579.

**Larrinaga, Tulio;** of San Juan; b. Trujillo Alto, Jan. 15, 1847; educated in the Seminario Consiliar of San Ildefonso, at San Juan, where he received the degree of bachelor of arts, with the highest honors; studied the profession of civil engineer at the Polytechnic Institute at Troy and at the University of Pennsylvania, where he graduated in 1871; practiced the profession for some time in the United States, taking part in the preparation of the topographical map of Kings County (Brooklyn), and in the technical department of Badger & Co., of New York, in the construction of the Grand Central Depot in that city; returned to Porto Rico in 1872 and was appointed architect for the city of San Juan; built the first railroad in Porto Rico in 1880, and introduced for the first time American rolling stock in the island; was for ten years chief engineer of the provincial works, and built most of the important structures (especially bridges) in the island; was one of the founders of the Atheneum of San Juan in 1876, and of the society for the education of intelligent young men of the poor classes, and took a prominent part in the intellectual uprising that marked that period in Porto Rico; established and taught a class for the teaching of the English language in the Atheneum, in which all of the best classes of society of San Juan assisted; is an honorary member of the Club de Engenharia (Engineers' Club) of Rio de Janeiro, Brazil; in 1898 he was appointed assistant secretary of the interior under the autonomic government, serving in that capacity until some time after the American occupation of the island; resigned the office to resume his position as chief engineer of the harbor works of San Juan; he is an ardent advocate of home rule for his country, and in 1900 was sent by the Federal party of Porto Rico to Washington as a delegate at the time the organic act for Porto Rico was being framed by Congress; in 1902 was elected member of the house of delegates of Porto Rico from the district of Arecibo; is president of the Society of Civil Engineers of Porto Rico; appointed by the President one of the delegates to represent the United States at the Third Pan-American Congress held at Rio de Janeiro, July, 1906; was also appointed an American delegate to the

Fifteenth Interparliamentary Congress held at Berlin September, 1908, and also to the Sixteenth National Irrigation Conference at Albuquerque, N. Mex., Sept. 29, 1909, by the legislative assembly of Porto Rico; elected Commissioner to the 59th, 60th, and 61st Congresses from Porto Rico.

**Las Guasimas (Cuba), Battle of.** (See Santiago (Cuba), Battle of.)

**Lasker, Edward,** death of, referred to, 4794.

**Lassen Peak Forest Reserve,** proclaimed, 7191.

**Lassiter, Francis Rives;** b. Petersburg, Va., Feb. 18, 1866; grad. LL. B. from the Univ. of Virginia, 1886; was admitted to the Suffolk bar, Boston, Mass., 1887, and to the Virginia bar 1888; elected to the 56th Congress to fill a vacancy, and reelected to the 57th, 60th, and 61st Congresses from Virginia.

**Latimer, Henry,** district supervisor, nomination of, 91.

**Latimer Case.**—The first of a series of fugitive-slave trials which took place in Boston. George Latimer was seized in 1842 without a warrant, and kept in the custody of the city jailer awaiting evidence against him. A writ of *habeas corpus* was denied. A writ of personal replevin, asked for under the act of 1837, securing trial by jury, was also denied, this act being declared void. As a consequence of the indignation aroused by this case the legislature in 1843 passed an act forbidding State officers to aid in the capture of fugitive slaves and forbidding the use of State jails for their imprisonment. The sum forfeited for violation was not exceeding \$1,000 or imprisonment not exceeding one year.

**Latin-American Library,** establishment of, at Washington recommended by International American Conference, 5506.

**Latin-American Republics,** discussed by President Roosevelt, 7611.

**Latin Union.**—The name given the monetary alliance of Belgium, France, Italy, and Switzerland formed by convention Dec. 23, 1865. Greece joined the union in 1868. The object was the maintenance and regulation of a uniform interchangeable gold and silver coinage based on the French franc. Belgium withdrew from the union in 1885 and adopted the single gold standard.

**Latin Union.** (See Monetary Convention of Latin Union.)

**Latta, James P.**; b. near Ashland, Ohio, Oct. 31, 1844; two years later his parents moved to eastern Iowa, where they engaged in farming; before the overland railroads had been constructed, he walked across the State of Iowa, crossed the Missouri, and took up a homestead in the Territory of Nebraska, locating in Burt County, and engaged in farming and stock raising; in 1887 represented his district in the lower house of the State legislature and at the time of his election to Congress was a member of the State senate; elected to the 61st Congress from Nebraska.

**Latter-Day Saints.** (See Mormon Church; Polygamy.)

**Lattimer, Pa.**, claims of Austria-Hungary arising out of conflict between miners and sheriff at, discussed, 6324, 6363.

**Laurason, George C.**, collector of customs for the district of New Orleans, pending a dispute over the legality of same. The case of *Marbury vs. Madison* (q. v.) is cited in the discussion. Appointment of, discussed, 2684.

**Law, Charles Blakeslee**; b. Hannibal, N. Y., Feb. 5, 1872; grad. Colgate Acad. at Hamilton, 1891; from Amherst, Col., Amherst, Mass., in 1895; began the study of law at Rome, N. Y., and Cornell Law School; admitted to the bar in November, 1897, and moved to Brooklyn; elected to the 59th, 60th, and 61st Congresses from New York.

- Leavenworth, Henry:**  
Attack upon Indians led by, 781.  
Death of, referred to, 1332.
- Lecompte, Samuel D.,** judicial conduct of, referred to, 2598.
- Lecompton Constitution.**—During the struggle in Kansas over the question of entering the Union as a free or a slave State, the pro-slavery party held a convention at Lecompton Sept. 5, 1857, and adopted a constitution sanctioning slavery and forbidding the enactment of emancipation laws. It was provided that the constitution as a whole should not be submitted to the people of the Territory, the vote being taken only on the main question of a constitution with slavery or a constitution without slavery. Free-State advocates refused to vote, and the constitution sanctioning slavery was adopted. Later the Territorial legislature ordered a vote on the constitution as a whole, and, the Slave-State settlers abstaining from voting, it failed of adoption. (See also Kansas; Topeka Constitution; Wyandotte Constitution.)
- Lecompton Constitution.** (See Kansas, government of.)
- Lee, Col.,** commissioner, United States, 781.
- Lee, Gordon;** b. May 29, 1859, near Ringgold, Catoosa Co., Ga.; served in State legislature in 1894, 1895, 1902, 1903, and 1904; elected to the 59th, 60th, 61st, and 62d Congresses from Georgia.
- Lee, Richard H.,** appointed on committee to conduct ceremonies of administration of oath to President Washington, 40.
- Lee, Robert Edward,** soldier, son of General Henry Lee (Light Horse Harry), b. Jan. 19, 1807, at Stratford House, Westmoreland County, Va.; grad. United States Military Academy, West Point, 1829; served in the Mexican War as chief engineer on the staff of Gen. Winfield Scott; superintendent of West Point Military Academy (1852-1855); in command military department of Texas 1860; resigned from the army April 25, 1861, after Virginia had seceded from the Union; and became major-general of the State forces, later a general in the Confederate army, and finally Commander-in-chief of all the forces of the Southern States. Throughout the entire war he maintained with skill and valor the cause he believed to be just, and at last, when overcome by the Federal army, he surrendered to General Grant at Appomattox, Va., April 9, 1865, thus ending the Civil War. He advised his soldiers to accept the proffered parole, return to their homes and be good citizens. After the war he was made President of Washington College at Lexington, Va., where he died Oct. 12, 1870. A beautiful mausoleum was erected over his tomb at Lexington, and an equestrian statue commemorates his name in Richmond, Va.
- Lee, Robert E.;** b. Schuylkill County, Pa., and educated in the common schools of Pottsville; elected to the 62d Congress from Pennsylvania.
- Lee, Samuel P.,** thanks of Congress to, recommended as a naval officer commanding one of the vessels engaged in the operations under Flag-Officer Farragut at Forts Jackson and St. Philip, at New Orleans, 1862, 3277.
- Lee, The,** demand of Great Britain for surrender of mutineer in, referred to, 1808.
- Legal-Tender Acts,** modifications in, recommended, 4302.
- Legal-Tender Cases.**—During the financial emergency caused by the Civil War Congress in 1862 issued \$150,000,000 of Treasury notes, the law authorizing their issue making them legal tender for all private debts

**Legal-Tender Cases—Continued.**

and public dues except duties on imports and interest on the public debt. The constitutionality of the act authorizing these notes was frequently disputed, especially as to its application to debts contracted prior to its passage, and the Supreme Court was called upon in several cases to decide the question. State courts generally maintained the constitutionality of the law. The Supreme Court in 1869 (*Hepburn vs. Griswold*, q. v.) maintained the validity of the law only in so far as it did not affect contracts made prior to its passage. A year later this decision was overruled, and the constitutionality of the law in its application to preexisting debts was maintained. The court in the meantime had undergone a change in its membership, 2 new judges having been appointed. (See also *Juilliard vs. Greenman*.)

**Legal-Tender Notes, redemption of, recommended by President—**

Grant, 4303, 4379.

Hayes, 4511, 4567.

**Legare, George S.**; b. Rockville, Charleston Co., S. C., 1870; graduated Georgetown University Law School, Washington, D. C., 1893, LL. B.; elected to the 58th, 59th, 60th, and 61st Congresses from South Carolina.

**Legarda, Benito**; b. Manila, Sept. 27, 1853; was educated in the Jesuits' College and St. Thomas University of Manila, from the latter of which he received the degree of LL. B.; held some honorific positions during the Spanish régime; joined Aguinaldo when he landed in Cavite shortly after Admiral Dewey had destroyed the Spanish fleet, 1898; member of Aguinaldo's cabinet at Malolos and vice-president of the Filipino congress; resigned these positions to return to Manila in December, 1898; cooperated with live interest in the establishment of peace during and after the war between the Filipinos and Americans; Feb. 1, 1901, appointed by President McKinley a member of the Philippine Commission; elected by the Philippine legislature to be a Resident Commissioner of the Philippine Islands in the United States, November, 1907.

**Legation Asylum**, action of American minister to Chile in harboring criminals discussed, 5867.

**Legations:**

Military and naval attachés at, recommended, 4923.

Official residences for ambassadors and ministers recommended, 6072, 6155.

Premises for, discussed, 4823, 4825, 4862, 4923.

Appropriation for erection of buildings on, recommended, 5494.

Public documents or libraries in, referred to, 4070.

Secretaries at large, appointment of, recommended, 4923.

**Leggett, Mortimer D.**, Commissioner of Patents, recommendation of, referred to, 4115.

**Legislature.**—The body of men in a state or kingdom invested with power to make and repeal laws. Colonial legislatures were generally modeled after the British Parliament, the Kings, Lords, and Commons having their counterparts in the governor, the council appointed by him, and the representatives of the people. Parliamentary procedure was also followed closely. The first representative legislature in America met at Jamestown, Va., in 1619. The first representatives were elected by voters having a property qualification. In 1776 Virginia substituted a senate for its upper council, and other States followed.

**Leib, R. J.**, consul at Tangier, disposition of presents given by Emperor of Morocco discussed, 1256.

**Lemhi Reservation, Idaho**, agreement with Indians for sale of lands on, 4779.

**Lenox, David**, attacked while discharging duties of marshal, 151.

**Lenroot, Irvine L.**; b. Superior Co., Wis., Jan. 31, 1869; became court reporter, studied law, and was admitted to the bar in 1897; elected to the Wisconsin legislature in 1900, 1902, and 1904; elected speaker of the assembly in 1903 and 1905; elected to the 61st and 62d Congresses from Wisconsin.

**Leopard, The**, attack of, on the *Chesapeake*. (See *Chesapeake*, The.)

**Letcher, John**, official acts of, in Virginia declared null and void, 3535.

**Letters Rogatory**, report regarding execution of, transmitted, 5570.

**Levees of Mississippi River**, preservation of, recommendations regarding, 3652, 4682, 4797.

**Lever, Asbury Francis**; b. Jan. 5, 1875, near Springhill, Lexington Co., S. C.; graduated in law at the Georgetown University in 1899, and admitted to practice in his State by the supreme court; elected to the State legislature from Lexington County; elected

**Lever, Asbury Francis**—*Continued.*

to the 58th, 59th, 60th, and 61st Congresses from South Carolina.

**Levy, Jefferson M.**; b. in his district, son of Capt. Jonas P. Levy, and nephew of Commodore Uriah P. Levy, a distinguished naval officer of the last generation, who was mainly instrumental in the abolition of flogging in the United States Navy; graduated from the University of New York; studied law; one of the founders of the Democratic Club of New York; member of the Chamber of Commerce and Board of Trade and Transportation of New York; Commodore Levy, in 1830, at the suggestion of President Jackson, became the owner of Monticello, the home of Thomas Jefferson, and at his uncle's death Mr. Levy became, and still remains, the owner; the homestead is maintained by Mr. Levy in keeping with its distinguished traditions. Mr. Levy was elected to the 56th and 62d Congresses from New York.

**Lew-Chew Islands:**

Compact with, for securing certain privileges to American vessels, 2826.

Good offices of United States tendered China and Japan for settlement of controversy regarding, 4521.

**Lew-Chew, Treaties with.**—A compact of friendship and commerce was concluded by Commodore Perry for the United States in 1854. Citizens of the United States, seamen, and others are permitted to go ashore on the islands to purchase or sell articles; ships may obtain wood and water on purchase anywhere, but other articles may be bought for them only at Napa. Sailors may go ashore and move freely about without molestation or espionage, so long as their acts are peaceful and legal; for illegal and wrongful acts they are to be arrested by the local authorities and handed over to the captain of the ship to which they belong, for punishment by him. A burial ground for citizens of the United States is established at Tumai. Pilots, appointed by the government of Lew-Chew shall conduct vessels in and out of Napa for a pilotage fee of five dollars. Wood is to be supplied to ships at Napa at a selling price of three thousand six hundred copper cash for a thousand catties, and water at the rate of six hundred copper cash (forty-three cents) for a thousand

catties (six barrels of thirty United States gallons each).

**Lewis, David J.**; b. May 1, 1869, at Nuttals Bank, Center County, Pa., near Osceola, Clearfield County; began coal mining at 9 years of age and learned to read at Sunday school; continued at mining until 1892, when he was admitted to the bar of Alleghany County, having pursued his occupation as a miner and his studies in law and Latin at the same time; elected to the Maryland senate in 1901, and to the 62d Congress from Maryland.

**Lewis and Clark Expedition.**—A party of citizens and soldiers sent under command of Captains Meriwether Lewis and William Clark, by order of President Jefferson, to explore the country from the Missouri River to the Pacific Ocean. They ascended the Missouri River to its sources, crossed the Rocky Mountains, and, finding the source of the Columbia River, floated down that stream to its mouth. They explored nearly all the territory lying south of the forty-ninth parallel. This expedition is important as forming the basis of our claim to Oregon.

**Lewis and Clark Expedition** discussed, 386, 396.

**Lewis and Clark Centennial Exposition** at Portland, Ore., 6872.

**Lewis and Clark Forest Reserve**, proclaimed, 6833.

**Lewiston, N. Y.**—Proclamation granting privileges of other ports to, 2319.

**Lexington (Mass.), Battle of.**—On the night of April 18, 1775, a detachment of 800 British soldiers under Col. Smith left Boston to capture or destroy some military stores which the Americans had collected and stored at Concord. Maj. Pitcairn, who led the advance, was opposed at daybreak at Lexington Green, 11 miles northwest of Boston, by about 50 minute-men under Capt. Parker, who had been summoned by Paul Revere in his midnight ride. Pitcairn's men opened fire and 7 Americans were killed and 9 wounded. This was the first blood shed in the Revolutionary War. The Americans returned the fire and retreated, but rallied and pursued the British toward Concord, capturing 7 prisoners, the first taken in the war. On their return from Concord the British were reenforced at Lexington by 1,200 men under Lord Percy. The Americans had also been reenforced, and kept up a guerrilla fire upon the

**Lexington (Mass.), Battle of—Continued.**

British, who fled to Boston in disorder. The loss for the day was 93 Americans killed, wounded, and missing, and 273 British. (See also Concord (Mass.), Battle of.)

**Lexington (Mo.), Battle of.**—Sept. 1, 1861, Col. Mulligan, in command of the "Irish Brigade," stationed at Jefferson City, Mo., was ordered by General Frémont, who had recently been appointed to the command of the Western Department, to proceed up the Missouri River to Lexington, Mo., 160 miles to the northwest, and reenforce the garrison there. Mulligan's brigade reached Lexington Sept. 9, swelling the force to 2,780 men. After the battle of Wilson's Creek (q. v.) the Confederate General Price marched toward the northern part of the State with a constantly increasing force. He arrived in the vicinity of Lexington Sept. 11 with 28,000 men and 13 pieces of artillery. Mulligan's force was well intrenched and was constantly expecting reenforcements from St. Louis. Several unsuccessful efforts were made to dislodge them. The garrison suffered terribly from thirst and many of the horses and cattle perished. On the 20th Price advanced his artillery behind the shelter of bales of hemp, which the men rolled slowly before them as they approached Mulligan's redoubt. When this hempen breastwork was within 50 yards of his lines, no reenforcements having arrived, Mulligan surrendered unconditionally, after a loss of 39 killed and 120 wounded. Two thousand six hundred men, including 500 home guards, laid down their arms. The Confederates lost 1,400 in killed and wounded. Col. Mulligan was twice wounded.

**Libby Prison.**—A famous Confederate military prison in Richmond, Va., during the War between the States. It was originally a tobacco warehouse and a ship chandlery and was named for its owner. It was taken down in 1888 and carried to Chicago and there set up as a war museum.

**Libby Prison,** rent for use of building known as, referred to, 3895.

**Liberal Republican Party.**—A defection from the regular Republican organization in 1870-1872. This party was opposed to the strict measures of coercion adopted by the Administration to maintain the newly granted rights of the freedmen, recon-

struct the Southern States, and stamp out disorder in the South. Uniting with the Democrats in Missouri in 1870-71, it advocated universal suffrage, universal amnesty, a reform of the tariff, and a "cessation of unconstitutional laws to cure Ku-Klux disorders." At a national convention held in Cincinnati in May, 1872, the Liberal Republicans nominated Horace Greeley for President and B. Gratz Brown, of Missouri, for Vice-President. The ticket was defeated.

**Liberia.**—A Republic on the west coast of Africa, extending from about 6° 40' west about 500 miles along the coast to the northwest. The Republic was founded by the American Colonization Society in 1822 and had for its object the settling in Africa of freedmen and recaptured slaves. The society sent some 18,000 persons to this colony. Liberia remained under the rule of the directors of the society until 1847, when the Republic was established under a constitution similar to that of this country. Its area is estimated at 35,000 square miles. The total population in 1902 was 2,060,000, mostly natives.

After prolonged negotiations it was announced in October, 1910, that a scheme for American financial control had been approved by the United States, Germany, Great Britain and France, whereby the United States assumed responsibility for the internal administration of the country. An American receiver-general was placed in control of the finances, assisted by French, German and British advisers; a frontier police designated by Americans, was established to secure the revenues. The first financial measure was the loan of £500,000, secured by a first lien on all import and export customs, or rubber tax and head money. The external debt in 1908 was £178,250. The imports in 1910 were £122,300; exports, £188,500; customs revenue, £84,475.

**Liberia:**

Boundary dispute with Great Britain, 4716, 4762.

French encroachments upon territory of, action of United States regarding, discussed, 5751, 5870.

Independence of, recognition of, by United States, recommended, 3248.

Loan to ameliorate conditions in, found by American commission, 8049.

Referred to, 2133.

**Liberia—Continued.**

Removal of negroes captured on coast of Cuba to, recommended, 3058.

Treaty with, 3329, 3346.

Vessel to, presentation of, recommended, 3445, 5086.

Weakness of, discussed, 5086.

**Liberia, Treaty with.**—A treaty of commerce and navigation, was concluded in 1862, which provides for freedom of commerce and navigation in the usual terms of such conventions. Trade is permitted without unusual restrictions; taxes are to be equitable and uniform; importation and exportation are in no wise restricted by discrimination; and regardless of the nationality of the carrying vessel; humane treatment of shipwrecked mariners is provided for; disputes arising regarding salvage are to be settled by arbitration; privileges granted hereafter by treaty to other powers are to be accorded to the United States; consuls for the protection of trade are to be appointed to reside within the dominions of the contracting parties; the United States is not to interfere in affairs of administration in Liberia, but if the Liberian government at any time is unable to control the aboriginal inhabitants within its own dominions and makes requisition for assistance from the United States, that power pledges to render the necessary aid.

**Liberto, Salvatore,** compensation to, 6771.

**Liberty Bell.**—The bell on the Pennsylvania statehouse at Philadelphia, which, according to tradition, was rung on July 4, 1776, to announce the adoption of the Declaration of Independence. It was cast in London and sent to Philadelphia in 1752. The bell was broken up and recast in April, and again in June, of the following year. It was cracked July 8, 1835, while being tolled in memory of Chief Justice Marshall. The Liberty bell was placed on exhibition at the Centennial at Philadelphia in 1876, and at the Columbia Exposition in Chicago in 1893. It bears the motto, "Proclaim liberty throughout the land unto all the inhabitants thereof." It is now in Independence Hall, Philadelphia.

**Liberty Enlightening the World,** statue of, erected in New York Harbor, by citizens of France, 4381, 4824, 5083.

Ceremonies of inauguration discussed and recommendations regarding, 4982.

To be placed under superintendence of Light-House Board, 5080.

**Libraries.** (See Interior Department; Library of Congress; State Department.)

**Library, Latin American,** establishment of, at Washington, recommended by International American Conference, 5506.

**Library of Congress.**—When the seat of Government was removed to Washington in 1800, the idea of a Congressional Library was conceived. In December, 1801, John Randolph made a report which formed the basis of an act of Congress of 1802 organizing the library. Some 3,000 books of reference were accumulated, when, in August, 1814, the British army burned the Capitol and the Library was consumed. In 1815 Congress purchased the private library of Thomas Jefferson, consisting of 6,700 volumes, for \$23,950. An annual appropriation being made for the purchase of books, the Library continued to grow until in 1851 it numbered 55,000 volumes. Dec. 24 of that year a second conflagration destroyed 35,000 of these volumes. An appropriation of \$72,000 was made for repairs, and the Library grew apace. In 1866, 40,000 volumes were transferred from the Smithsonian Institution. The following year Congress purchased for \$100,000 the historical collection of Peter Force, very rich in Americana. This library contained nearly 60,000 books, pamphlets and manuscripts. In 1864 President Lincoln appointed Ainsworth R. Spofford to be Librarian, and he was succeeded in 1897 by John Russell Young, who died in 1899, and Herbert Putnam was appointed his successor.

The collection is now the largest on the Western Hemisphere and the third in the world. It comprised at the end of the fiscal year (June 30, 1908) about 1,535,008 printed books and pamphlets (including the law library of 126,816 volumes, which, while a division of the Library of Congress, still remains at the Capitol), 105,118 maps and charts, 483,411 pieces of music, and 279,567 photographs, prints, engravings and lithographs. Of the printed books, probably one-sixth are duplicates not in use.

The building containing the Library is an enormous structure in the

**Library of Congress—Continued.**

Italian Renaissance style of architecture, most impressive in its lines and beautiful in its detail. It is in the form of a quadrangle enclosing a central rotunda surmounted by a low gilded dome. The building was begun in 1886 and completed in 1897, at the cost of \$6,180,000. It is probably the most ornate and beautiful library building in the world. The public reading room occupies the rotunda. It consists of an octagonal hall 100 feet in diameter, sumptuously built of soft-tinted Numidian, Sienna, and Tennessee marble in variegated hues. In the decorations, some forty painters and sculptors are represented—all American citizens. The floor space is 326,195 square feet, or nearly eight acres. The book stacks contain about 56 miles of shelving, affording space for 2,600,000 octavo volumes. The reading desks are arranged in concentric circles about the Librarian's desk in the center, from which easy communication is had to all parts of the fire-proof iron book stacks. The Library of Congress has been since 1870 the only office of record for copyrights, and its accessions from that source are very large.

**Library of Congress:**

Arundel manuscripts, copy of, to be placed in, 1445.

Building for, recommended by President—

Arthur, 4651.

Cleveland, 4949.

**Licenses for Vessels**, prohibitory laws in regard to, 480, 504, 508.

**Lieutenant-General.**—In the United States Army the rank next below that of general and next above that of major-general. It was first authorized by Congress in 1798 and bestowed upon George Washington. It was abolished in 1799, and was not revived until 1855, when Winfield Scott was brevetted lieutenant-general. At his death it again lapsed. In 1864 it was revived by special act of Congress and conferred upon Ulysses S. Grant, on whose promotion to the grade of general, July 25, 1866, created in his behalf, William T. Sherman became lieutenant-general; and on his succession to the rank of general, March 4, 1869, Philip H. Sheridan was promoted to be lieutenant-general. On the retirement of

Sherman, in 1884, the grade of lieutenant-general was discontinued and merged with that of general. By an act of Feb. 5, 1895, it was revived and John M. Schofield appointed, who held it until his retirement, Sept. 29, of that year. On June 6, 1900, Congress provided that the senior major-general commanding the army should have the rank and pay of the lieutenant-general, the act affecting Major-General Nelson A. Miles, who retired Aug. 8, 1903. On that date Samuel B. M. Young received the commission of lieutenant-general, and on Jan. 9, 1904, it was given to Adna R. Chaffee. He was succeeded by Major-General Arthur MacArthur, and with his retirement June 2, 1909, the rank became extinct.

**Life-Saving Medals**, government grant of, 7026.

**Life-Saving Service:**

Discussed, 4931, 6158.

Pensions in, 7393.

**Light-House Board:**

Soil and jurisdiction for, complete cession of, required, 142.

System of improvement in, 1683.

Treaty with Morocco concerning maintenance of, on Cape Spartel, 3582.

**Light-House Service.**—Formerly the management of the light-houses was intrusted to a light-house board, organized in conformity to the act of Congress of Aug. 31, 1852. It consisted of the head of the Treasury

**Light-House Service—Continued.**

Department (later of the Department of Commerce and Labor), three officers of the army, two naval and a civilian member. The head of the department was ex-officio president of the board, and the ranking naval officer was chairman. There were two secretaries, one a naval officer and one an engineer officer of the army. That system involved divided responsibility, and resulted in much friction in administration. Congress therefore, by an act approved June 17, 1910, reorganized the service and abolished the board and created a Bureau of Light-Houses in the Department of Commerce and Labor, with a commissioner in charge directly responsible to the Secretary of Commerce and Labor.

The Bureau is charged with the establishment and maintenance of light-houses, light-vessels, buoys, and other aids to navigation on the coasts and rivers of the United States, as authorized by Congress, and with the direction of the officers, depots and tenders required in this work.

Under the old system there were sixteen light-house districts, each in charge of an army or navy officer. The law of 1910 provided that nineteen districts should be created, each in charge of a civilian inspector, but the President was authorized for a period of three years, from July 1, 1910, to assign army and navy officers to act as district inspectors.

In the fiscal year 1910-11 the light-house establishment maintained 2,200 lighted aids to navigation, including sixty-three light vessels, and about 12,000 unlighted aids and post lights.

For the care and maintenance of these aids there were employed 3,137 keepers, assistant keepers, and laborers attending lights, 1,693 officers and seamen on board vessels, 318 employees for construction and repair, also fifty-one light-house tenders.

The amount expended to maintain the light-house establishment in 1910-11 was \$5,058,800.

Commissioner, George R. Putnam; Deputy Commissioner, Arthur V. Conover; Chief Constructing Engineer, John S. Conway; Superintendent of Naval Construction, George Warrington.

**Light-House Service**, transfer of, from Treasury to Navy Department recommended, 4727.

Restoration of, to throne discussed, 5783.

Surrender of sovereignty of, discussed, 5903.

**Lincoln, Abraham** (sixteenth President United States):

Lincoln was elected by the Republican party Nov. 6, 1860. The Republican National Convention met at Chicago, May 16, 1860, and on the third ballot nominated Lincoln over Seward, Cameron, and Chase. The platform condemned disunion; insisted on States Rights; denounced the Democratic administration; censured the reckless extravagance of the Democratic Government; proclaimed the dogma that the Constitution carries slavery into any or all of the territories to be a dangerous heresy; asserted that the Constitution does not countenance slavery nor should Congress give a legal existence to it; insisted upon the admission of Kansas to statehood; recommended tariff for revenue, with encouragement of the industries; protested against selling public lands already occupied by settlers; opposed any change in the naturalization laws; declared river and harbor appropriations to be both desirable and constitutional; and made imperative demand for a transcontinental railroad.

The Democratic National Convention met, for the first time in the far South, at Charleston, S. C. After many days of fruitless balloting, the convention divided into two sections. Eventually, the Northern half nominated Douglas and the Southern half declared for Breckinridge. The Constitutional Union Party met in national convention at Baltimore, May 19, 1860, and nominated John Bell, on a platform the basis of which was the recognition of no other political principles than the Constitution, Union, and the enforcement of laws.

The popular vote as cast by thirty-three States gave Lincoln, 1,865,913; Breckinridge, 848,404; Douglas, 1,374,664, and Bell, 591,900. The electoral vote, counted Feb. 13, 1861, gave Lincoln, 180; Breckinridge, 72; Bell, 39, and Douglas, 12.

In the election of 1864, Lincoln was renominated by the (Regular) Republican National Convention, which met in Baltimore on June 7, 1864. The platform of 1864 pledged

**Lincoln, Abraham—Continued.**

the party to preserve the Union; opposed compromise with the rebels; demanded the utter and complete extirpation of slavery; gratefully acknowledged the services of the Army and the Navy in the war; commended the administration of Lincoln; advocated full and ample protection of the members of the Army and the Navy; encouraged immigration; urged speedy construction of the transcontinental railroad; urged the practice of rigid economy in the expenditure of Government funds; and deprecated European interference or offensive sympathy.

The Radical Republican Party, or the opponents of Lincoln, met at Cleveland on May 31 and nominated John C. Fremont; but, before the election, Fremont urged the support of Lincoln and withdrew. The Democratic National Convention at Chicago, Aug. 29, 1864, nominated George B. McClellan on a platform declaring that the Constitution had been violated during the Lincoln administration and urged the cessation of hostilities and the compromise of difficulties; condemned the military interference in some State elections; sympathized with prisoners of war; condemned the exercise of martial law; and expressed sympathy for the suffering soldiers and sailors, to whom future aid and reward was promised.

The popular vote cast by twenty-four States gave Lincoln 2,216,067, and McClellan 1,808,725. The electoral vote, counted on Feb. 8, 1865, gave Lincoln 212 and McClellan 21.

**Party Affiliation.**—After Lincoln's service in the State legislature and his single term in Congress (1846-1848), he became one of the most influential of the Whig leaders in Illinois. The repeal of the Missouri Compromise (1854) brought him back into politics with intense anti-slavery ardor. When the Republican party was formed, Lincoln took his place as the head of that party in his State. Before the Republican Convention in 1858 he said: "A house divided against itself cannot stand. I believe this Government cannot endure half slave and half free. I do not expect the Union to be dissolved; I do not expect the house to fall; but I do expect that it will cease to be divided. It will become all the one thing or all the other. Either the opponents of slavery will arrest the further spread

of it and place it where the public mind shall rest in the belief that it is in course of ultimate extinction, or its advocates will push it forward until it shall become alike lawful in all the States, old as well as new, North as well as South."

**Political Complexion of Congress.**—In the Thirty-seventh Congress (1861-1863), the Senate of 50 members was composed of 11 Democrats, 31 Republicans, 7 Americans, and 1 vacancy, and the House of 178 members was made up of 42 Democrats, 106 Republicans, 28 Americans, and 2 vacancies. In the Thirty-eighth Congress (1863-1865), the Senate of 51 members was composed of 12 Democrats and 39 Republicans; and the House of 183 members was made up of 80 Democrats and 103 Republicans. In the Thirty-ninth Congress (1865-1867), the Senate of 52 members was composed of 10 Democrats and 42 Republicans; and the House of 191 members was made up of 46 Democrats and 145 Republicans. In the Fortieth Congress (1867-1869), the Senate of 53 members was composed of 11 Democrats and 42 Republicans; and the House of 193 members was made up of 49 Democrats, 143 Republicans, and 1 vacancy.

**Foreign Policy.**—In speaking of the attitude of foreign nations towards the United States during the war, President Lincoln said in his Second Annual Message (page 3327) that the commercial and social conditions of other nations with whom we have had relations have been disturbed by the war, and adds: "We have attempted no propagandism and acknowledged no revolution. But we have left to every nation the exclusive conduct and management of its own affairs." Our struggle has been, of course, contemplated by foreign nations with reference less to its own merits than to its supposed and often exaggerated effects and consequences resulting to those nations themselves. Nevertheless, complaint on the part of this Government, even if it were just, would certainly be unwise."

**Public Debt.**—The public debt of the United States during the administration of President Lincoln stood as follows:—

July 1, 1861....	\$90,580,873.72
July 1, 1862....	524,176,412.13
July 1, 1863....	1,119,772,138.63
July 1, 1864....	1,815,784,370.57
July 1, 1865....	2,680,647,869.74

**Lincoln, Abraham—Continued.**

*Tariff.*—The principal tariff changes in President Lincoln's administration were made by the act of Aug. 5, 1861, "to provide increased revenue from imports, to pay interest on the public debt, and for other purposes." This levied a direct tax on both States and Territories and provided for what is believed to be the first income tax ever levied by the general government of the United States. This income tax amounted to three per cent. per annum on all income in excess of eight hundred dollars. The act of Dec. 24, 1861, imposed increased duties on tea, coffee, and sugar. That of July 14, 1862, was an act "increasing, temporarily, the duties on imports and for other purposes." The act of March 13, 1863, "to modify existing laws imposing duties on imports, and for other purposes," made slight increases. Duties were further increased by the act of June 30, 1864, and that of March 3, 1865.

*Slavery.*—In his Inaugural Address (page 3206), President Lincoln sought to assure the people of the Southern States that they had nothing to fear from a Republican administration. He quotes from one of his former speeches: "I have no purpose, directly or indirectly, to interfere with the institution of slavery in the States where it exists. I believe I have no lawful right to do so, and I have no inclination to do so." He holds the Constitution to be clear on the question of surrendering fugitive slaves and states that the difference of opinion rests only on whose authority and how the surrender shall be made. He insists upon the integrity of the Union; that no State has the power to secede lawfully and that the Union is not broken by such declaration of secession on the part of any one State. In urging upon the people not to plunge the country into civil war, he said: "You can have no conflict without being yourselves the aggressors. You have no oath registered in Heaven to destroy the Government, while I shall have the most solemn one to 'preserve, protect, and defend it.'" In the earlier stages of the war, the President was besought by both great parties in the country on the one hand to adopt radical measures to stop slavery and on the other to pursue conservative paths. It was well known that he entertained a deep-rooted hatred of domestic servitude; but so great

was his reverence for the law, so careful was he of vested rights and interests, and so desirous of retaining the support and confidence of the people, as an aid for the solution of the great problem, that he followed thus far a moderate course between the two extremes. In August, 1861, Congress passed the act confiscating the rights of slave-owners in slaves employed in hostile acts against the Union. Fremont followed with his order to emancipate the slaves in Missouri. Lincoln ordered this declaration to be modified to conform to the orders of Congress and by so doing angered the anti-slavery advocates in Missouri and displeased the more conservative advisers. On March 6, 1862, the President sent a special message to Congress (page 3269) recommending the passage of a joint resolution bringing about the gradual emancipation of slaves by States, in return for which the States should receive pecuniary aid from the Government. Congress passed the resolution, but public opinion in the States was not ready to grasp this means. In April, Congress freed the slaves in the District of Columbia with compensation to owners,—a measure which Lincoln had years before earnestly advocated. The events of the war during 1862 forced upon Lincoln the conclusion that emancipation was the only means at his command. As early as July, 1862, he began to prepare the proclamation, and though urged by delegations to take the step, he waited until it would be possible to make the order effective and easily operative. Late in August, 1862, the President said: "My paramount object is to save the Union, and not either to save or destroy slavery. If I could save the Union without freeing any slave, I would do it; if I could save it by freeing all the slaves, I would do it; and if I could do it by freeing some and leaving others alone, I would also do that." The defeat of Lee at Antietam and his retreat into Maryland seemed to the President an opportune time to issue his proclamation of emancipation, and his preliminary proclamation was accordingly issued on Sept. 22, 1862 (page 3358). In his Second Annual Message (page 3335), the President recommended to Congress the passage of a resolution offering "compensated emancipation." But Congress did not act promptly, and Jan. 1, 1863, saw the Proclamation of Emancipation issued

**Lincoln, Abraham—Continued.**

(page 3358). There was much speculation as to the President's firmness of anti-slavery convictions, and some suggestions that under some circumstances he might withdraw this proclamation. But in his Fourth Annual Message (page 3456) he repeated his declaration of the previous year: "While I remain in my present position I shall not attempt to retract or modify the emancipation proclamation, nor shall I return to slavery any person who is free by the terms of that proclamation or by any of the acts of Congress," and he adds: "If the people should, by whatever mode or means, make it an Executive duty to reenslave such persons, another, and not I, must be their instrument to perform it." He concludes the message with the terse paragraph: "In stating a single condition of peace I mean simply to say that the war will cease on the part of the Government whenever it shall have ceased on the part of those who began it." Congress acted promptly on the President's suggestion and on Jan. 31, 1865, prepared and proposed to the States the 13th amendment to the Constitution abolishing slavery, and this, before the end of the year, was ratified by twenty-seven of the thirty-six States.

Additional medical officers of volunteer service, 3289.

Circulating bank notes in District of Columbia, 3288.

Correction of clerical errors in internal-revenue act, reasons for applying pocket veto to, 3471.

War between the States discussed by, 3221, 3245, 3255, 3278, 3303, 3389, 3452, 3478.

**Lincoln, Benjamin**, commissioner to treat with Indians, nomination of, 52.  
**Lincoln Forest Reserve**, proclaimed, 6727, 7312.

**Lincoln, Levi**, commissioner to settle boundary question with Georgia, 329.

**Lindbergh, Charles A.**; b. in Sweden and brought by his parents to Melrose, Minn., in his first year; an extensive writer for magazines and newspapers on political economy; has always taken great interest in farming; elected to the 60th, 61st, and 62d Congresses from Minnesota.

**Lindesfarne, The**, claim by owners of, 7064.

**Lindsay, George Henry**; b. in New York City and removed to Brooklyn with his parents in 1843; elected to the State assembly in 1882, 1883, 1884, 1885, and 1886; elected to the 57th, 58th, 59th, 60th, 61st, and 62d Congresses from New York.

**Lindsay & Co. vs. Montana Federation of Labor et al.**—Lindsay & Co., wholesale dealers in fruits and vegetables, had been declared "unfair" by the Miners' Union and the Trades Assembly. This action was indorsed by the defendant, the Montana Federation, and a circular issued in which "all laboring men and those in sympathy with organized labor are requested not to patronize Lindsay & Co." The company secured an injunction forbidding this boycott, but the Supreme Court of the State vacated the injunction. It was shown that the plaintiff company's trade had suffered as a result of the boycott. The means of boycott in this case was the publication of the circular as quoted above. The court held that such publication by one person or by an association was perfectly legal, being an exercise of the right of free speech and free press.

**Lindsay & Co. vs. Montana Federation of Labor et al.—Continued.**

The court defined the boycott as "the act of combination, in refusing to have business dealings with another, until he removes or ameliorates conditions which are deemed inimical to the welfare of the members of the combination, or some of them, or grants concessions which are deemed to make for that purpose." A conspiracy was defined as "a combination of two or more persons by some concerted action to accomplish a criminal or unlawful purpose, or to accomplish a purpose, not in itself criminal or unlawful, by criminal or unlawful means." The court held that the company did not have a property right in the trade of any particular person; hence any one person may rightfully withdraw his patronage. The court rejects the doctrine that an act perfectly lawful when done by one person becomes criminal when done by two or more persons acting in concert, and that this concerted action amounts to a conspiracy. If an individual is clothed with a right when acting alone, he does not lose such right merely by acting with others. Hence, if the defendants did not violate any legal right of the plaintiff in withdrawing their patronage, they cannot be enjoined from continuing the boycott in force, so long as the means to make it effective are not illegal.

**Linthicum, John C.**; b. Linthicum, Anne Arundel County, Md., Nov. 26, 1867; received his early education in the public schools of that county and of Baltimore city, later entering the State Normal School, from which he graduated in 1886, when he became principal of Braddock School, Frederick County, and later taught school in his native county of Anne Arundel; returning to Baltimore he took a special course in the historical and political department of Johns Hopkins University, after which he entered the University of Maryland school of law, from which he obtained his degree of LL. B. in 1890; practiced law in the city of Baltimore; elected to the house of delegates from Baltimore; chairman of the city delegation, chairman of the elections committee, a member of the judiciary committee and of the printing committee, and performed valuable service for the State and city; elected to the State senate; appointed in 1908 by Governor Crothers, as

judge-advocate-general; elected to the 62d Congress from Maryland.

**Lippitt, Henry F.**; b. Providence, Oct. 12, 1856; received an academical education, graduating from Brown University, with the degree of A. B.; entered the cotton manufacturing business, in which he has served in various capacities from day operative to general manager; he has been a director in the Mechanics' National Bank, of Providence, in several of the mill mutual insurance companies, and vice-president of the People's Savings Bank, of Providence; colonel on the staff of Royal C. Taft, governor of Rhode Island in 1888-89; was elected, 1911, to the United States Senate from Rhode Island.

**Loans and Sinking Fund, Commissioner of**, office of, should be abolished, 1382.

**Lobeck, C. O.;** b. Andover, Ill., April 6, 1852; educated at Andover, at high school, Geneseo, Ill., and one year at German Wallace College, Berea, Ohio, and later a term at Dyhrenfurth Commercial College, Chicago; from 1875 to 1892 was a commercial traveler, selling dry goods and hardware; member of the Travelers' Protective Association; entered political life in 1892, being elected State senator (Omaha district), Nebraska; became a Silver Republican, supporting Mr. Bryan; in 1897 elected a councilman of Omaha, city comptroller of Omaha; was Democratic presidential elector for Nebraska in 1900; nominated at the primary election Aug. 16, 1910, over four competitors and was elected to the 62d Congress from Nebraska.

**Lobos Islands:**

Controversy regarding, referred to, 2696, 2837, 2900.

Sovereignty of Peru over, acknowledged, 2703.

**Lobsiger, Rudolph**, claim of, against United States, 5199.

**Local Government.**—Sometimes written local self-government. The regulation and administration of the local affairs of a city or district by the people of it, as distinguished from such regulation and administration by authority of the State or nation at large. The State was an institution of the Roman Empire, but the Teutonic tribes or nations developed a local government of their own, and gave the name "town" to language and the idea of "township" to constitutional law. As to whether the first English colonists in America de-

**Local Government—Continued.**

rived the subdivision of the county known in England as town or township from the mother country there was no question until recently, when respectable authority was adduced for the statement that the Plymouth and Massachusetts Bay colonists, especially the former, who came directly from Holland, borrowed their local government system and several other institutions of high value from the Dutch Republic. Certain it is, nevertheless, that when the first settlements were made in this country England had well-developed forms of local government which served as a pattern, beyond doubt, for the Jamestown Colony, Va., and for some other colonies as well. The colony was subdivided into counties, the counties in some cases into hundreds, and the hundreds into parishes or townships. At the time of the colonization the parish of England had generally superseded the township. In the Southern Colonies, where the plantation system prevailed and the people were scattered over a large area, the colonists, on their separation from England, retained the county system as being best suited to their population. In the New England Colonies, where population was more compact, the township government was retained. Thus two distinct types of local government prevailed in the United States—the township system in New England and the county system in the South. In the middle Colonies a system of local government was instituted which combined the county and township system. This is now generally in use in the Western States.

**Local Offices,** elimination of, from politics, 8078.

**Local Option.**—A principle of law established in some of the United States by which the determination as to whether or not any licenses to sell intoxicating liquors shall be granted is submitted to a vote of the people of a town or other minor political community. If the people of any locality decide upon prohibition, it becomes a part of the State law for that community. Local option by States was suggested as a solution of the slavery question, and the Kansas-Nebraska law contained a provision to this effect.

**Loco-Focos.**—The radical faction of the Democratic party in New York in 1835-1837. The Equal Rights faction

was opposed to the granting of bank charters and special privileges to favorites of the Government, and the Tammany men supported the Administration. At a meeting held in Tammany Hall, New York, Oct. 29, 1835, the regular Tammany Democrats tried to gain control, but finding themselves outnumbered they turned out the lights and left the hall. The Equal Rights men produced candles and lighted them by the aid of "loco-foco" matches and continued the meeting. The word, at first used in derision of this faction, was later adopted by the Democratic party as an emblem of promptitude in an emergency, and it was also applied to the party sometimes in derision by their opponents.

**Lodge, Henry Cabot;** b. Boston, Mass., May 12, 1850; graduated from Harvard College in 1871, receiving the degree of LL. B., and Ph. D. from Harvard University for his thesis on "The Land Law of the Anglo-Saxons;" has published "Short History of the English Colonies in America;" "Life of Alexander Hamilton;" "Life of Daniel Webster;" edited the works of Alexander Hamilton in 9 volumes; published "Studies in History;" "Life of Washington," 2 volumes; member of the Massachusetts Historical Society, the Virginia Historical Society, the American Academy of Arts and Science, the New England Historic and Genealogical Society; has received the degree of doctor of laws from Williams College, Clark University, Yale University, and Harvard University; Regent of the Smithsonian Institution; served in house of representatives of Massachusetts; elected to the 50th, 51st, 52d, and 53d Congresses; took his seat in the Senate March 4, 1893; reelected 1899 and 1905 to represent Massachusetts.

**Lodges, Secret.** (See Secret Lodges.)

**Loewe vs. Lawlor et al.**—Loewe & Co., hat manufacturers, of Danbury, Conn., brought suit against the United Hatters of North America to restrain the latter from prosecuting a boycott against the plaintiff's hats. The manufacturers had declared an open shop and discarded the use of the union label, whereupon their employees, belonging to the Hatters' Union, induced the latter to institute a boycott throughout the United States. The Supreme Court of the United States, overruling two lower courts, unanimously found in favor of the plaintiff company.

**Loewe vs. Lawlor et al.—Continued.**

The contention was that the boycott, so called, constituted a combination in restraint of trade, and was, therefore, a violation of the Sherman Anti-Trust Law of 1890. The decision was based on Sec. 1 of that act, which declares "every contract combination in the form of a trust or otherwise, or conspiracy, in restraint of trade" to be illegal, and fixes punishment for violation at not more than \$5,000 fine, or imprisonment for one year, or both; and on Sec. 2, which forbids monopoly and fixes similar punishments; and Sec. 7, which provides that any person who is injured in his business through any act forbidden by this law may sue to recover threefold damages.

The court held that the trade union boycott was a "combination in restraint of trade among the several States" in that it obstructed the free flow of commerce and restricted the right of the plaintiff to engage in business, by trying to compel him to do business only in the way the union imposed. As the plaintiff company was able to show losses aggregating \$80,000, as the result of the boycott, it was authorized to sue for \$240,000.

**Logan Forest Reserve, proclaimed, 6829.****London, England:**

Exhibition in, works illustrative of, referred to, 2761.

B. from Harvard University, 1891; graduated Cincinnati Law School, 1894; admitted to the bar, 1894; elected to the Ohio house of representatives, 1899, and to State senate, 1901; elected to the 58th, 59th, 60th, 61st, and 62d Congresses from Ohio.

**Lookout Mountain (Tenn.), Battle of.**

—The arrival of the two corps under Hooker and the army of Sherman at Chattanooga increased the strength of Grant's command to 80,000 men. At this critical time Longstreet, with 16,000 men, was detached from the Confederate army and sent to besiege Burnside at Knoxville, leaving Bragg with only about 5,000 men to hold the position. Nov. 24, 1863, to cover Sherman's crossing the Tennessee River and securing a position, Hooker, with 10,000 men, made an attack on the western slope of Lookout Mountain. During a heavy mist he pressed up the mountain side and attacked the position in front and rear, capturing about 1,000 prisoners. The Confederates retired from the mountain to Missionary Ridge.

**Loomis, F. B.**, reports of, during Panama revolution, 6787-6795.

**Lopez Expedition**, pardon and release of, referred to, 6182.

**Lopez Expedition**, pardon and release of members of, by Spain, 2678.

**Lord Nelson, The**, claim of James Crooks against the United States for seizure of, 4975, 5662.

**Lorimer, William**; b. Manchester, England, in 1861; his father was a Presbyterian minister and migrated to America with his family when William was five years of age; he died five years later, leaving a widow and six children, of whom the Senator was the eldest; earned a living for himself and family and picked up an education with the assistance of his mother; was elected to the 54th, 55th, 56th, 58th, 59th, 60th and 61st Congresses from Illinois and in 1909 was elected to the United States Senate.

**Lorimer Case.**—The right of William Lorimer, Republican, of Chicago, to hold his seat in the United States Senate, to which he was elected May 26, 1909, by a combination of Democrats and Republicans in the Illinois legislature was challenged Jan. 9, 1911. Two resolutions were introduced, one by Senator Beveridge, of Indiana, and the other by Senator Owen, of Oklahoma. The Committee on Privileges and Elections to which the resolutions were referred, reported that the charges were not sustained. Senator Beveridge of the committee made a minority report contending that if only one case of bribery were established it invalidated the whole election. "The testimony is overwhelming," he declared, "not only that four members of the general assembly were bribed, but

**Lorimer Case—Continued.**

that three of their fellow members paid them their money. But these seven were not all of the tainted votes cast in the putrid transaction. The testimony shows that at least three additional corrupt votes were cast." After a long debate the Beveridge resolution was lost, March, 1911. The action of the Senate in affirming the legality of Lorimer's election was followed by official protest and public and private criticism from all parts of the country. The Illinois State Senate then made an investigation and found that Lorimer would not have been elected had it not been for bribery and corruption. Senator La Follette, of Wisconsin, reopened the case in the United States Senate April 6, 1911, and another investigation was carried on, both in Washington and Chicago, and Lorimer was expelled from the Senate in the spring of 1912.

**Lottery.**—The Continental Congress recommendations regarding, 5479, 5515.

Passage of act regarding, discussed, 5551.

**Lottery.**—The Continental Congress tried to raise money by lottery in 1777. As early as 1612 the Virginia Company was authorized by its charter to hold lotteries for the benefit of its colonization schemes. In the eighteenth century lotteries were extremely popular in America. Legislatures authorized them for building churches, schools, and all sorts of public improvements. Faneuil Hall, in Boston, having been destroyed by fire in 1761, was rebuilt by lottery. The Louisiana State Lottery was the last authorized institution of the kind in the United States. Popular opinion has undergone a change regarding lotteries. They were forbidden in 1890 by act of Congress to use the mails. This act resulted in closing the Louisiana Lottery.

**Loud, George Alvin**, lumberman of Au Sable; b. June 18, 1852, in Bracebridge, Geauga Co., Ohio; engaged in the lumber business; during the Spanish-American War, while making a trip around the world on the revenue cutter *McCulloch*, under commission of six months as paymaster, was present and participated in the battle of Manila. Later was sent by the governor in charge of the hospital train, through the southern camps and hospitals, to bring home the sick soldiers of Michigan regiments; elect-

ed to the 58th, 59th, 60th, 61st and 62d Congresses from Michigan.

**Loughery, Ardavan S.**, treaty with Indians concluded by, 2602.

**Louisa, The**, proceedings of court regarding, 895.

**Louisiana.**—One of the United States; nickname, "The Pelican State"; motto, "Union, Justice and Confidence." It extends from the Gulf of Mexico northward to the thirty-third parallel or north latitude and from the eighty-ninth to the ninety-fourth meridian west longitude. It is bounded on the north by Arkansas and Mississippi, on the east by Mississippi (separated by the Mississippi River) and the Gulf of Mexico, on the south by the Gulf of Mexico, and on the west by Texas (separated in part by the Sabine River). The area of the State is 48,720 square miles. Louisiana is the leading sugar State of the Union, besides which are exported cotton, rice, and corn. It was explored by De Soto in 1541, by Marquette in 1673, and by La Salle in 1682. It was settled by the French under Iberville and Bienville about 1700, was ceded by France to Spain in 1763, retroceded to France in 1800, was purchased by the United States in 1803, and was made the Territory of New Orleans in 1804. The portion east of the Mississippi River was annexed in 1810. The State was admitted to the Union in 1812. Jan. 26, 1861, it seceded and joined the Southern Confederacy. It was readmitted by act of Congress June 25, 1868 (3856). See also Louisiana Purchase.)

Statistics of agriculture reported to the Federal Census Bureau, under date of April 15, 1910, place the number of farms in the State at 120,546, comprising 10,439,481 acres, valued, with stock and improvements, at \$301,220,988. The average value of farm land per acre was \$17.99, as compared with \$17.74 in 1900. The value of domestic animals, poultry, etc., was \$44,699,485, including 804,795 cattle, valued at \$11,605,354; 181,286 horses, \$11,789,695; 131,554 mules, \$15,624,962; 1,327,605 swine, \$3,824,046; 178,287 sheep, \$343,046. The yield and value of field crops for 1911 is given as follows: Corn, 1,800,000 acres, 33,300,000 bushels, \$23,310,000; oats, 40,000 acres, 840,000 bushels, \$546,000; rice, 371,200 acres, 11,693,000 bushels, \$9,237,000; potatoes, 22,000 acres, 1,518,000 bushels, \$1,518,000; hay, 24,000 acres, 31,000 tons, \$372,000; tobacco, 500 acres,

**Louisiana—Continued.**

225,000 pounds, \$69,750, and 395,000 bales of cotton.

The mineral production of the State in 1910 was valued at \$10,119,993, of which petroleum represented \$3,574,069, nearly double that of the preceding year, and the production of petroleum for 1911 was near 10,000,000 barrels, exceeding the product of 1910 by three million barrels. New oil wells are frequently being opened.

The industries of the State which give employment to the greatest number of persons are those connected with the lumber and timber products. These industries employ 46,072 persons, and represent an investment of \$62,838,000. The business in which the most capital is invested, however, is the manufacture and refinement of sugar and molasses, which employs \$63,775,000. Industries connected with cotton seed oil and cake have \$13,085,000 invested; the rice industry, \$12,529,000; bags other than paper, \$5,352,000. There are 86,563 persons engaged in industry, and the total capital invested in 1909 was \$221,816,000. The value of finished products was \$223,949,000, of which \$89,084,000 was added by manufacture. The population in 1910 was 1,656,388.

**Louisiana, District of.**—That part of the Louisiana Purchase which is not included in the present State of Louisiana. It was erected into a district and the capital was established at St. Louis in 1804. In 1805 it was given a separate government as the Territory of Louisiana. In 1812 the name of the Territory was changed to Missouri.

**Louisiana Lottery Co.** discussed, 5515.

**Louisiana, Province of.** (See Louisiana.)

**Louisiana Purchase.**—A name applied to the territory west of the Missis-

**Louisiana Purchase—Continued.**

Mississippi River purchased from France in 1803. It was the most important sale of territory ever executed in favor of the United States. President Jefferson desired the acquisition of New Orleans in order to obtain control of the mouth of the Mississippi and offered to guarantee to Napoleon the territory to the west of the river in exchange. Napoleon, being at that time at war with Great Britain and greatly in need of funds, and being desirous moreover to foil England's aspirations for more territory in the United States, consented to the transfer of the so-called province of Louisiana to the United States for the sum of \$15,000,000. The territory thus acquired embraced all the present State of Louisiana lying west of the Mississippi River, together with New Orleans and the adjacent district east, comprising Mississippi and Alabama below the thirty-first parallel; Arkansas, Missouri, Iowa, a portion of Idaho and Minnesota, all of the Dakotas, most of Kansas, all of Nebraska and Indian Territory, part of Colorado, most of Wyoming, and the whole of Montana. It is claimed by some that Oregon and Washington were included. In 1904, the Louisiana Purchase Exposition (q. v.) was held at St. Louis, Mo., to commemorate the acquisition of this important territory.

**Louisiana Purchase:**

Discussed and referred to, 346, 348, 350, 669, 853, 929, 957, 3255.

Effects of, discussed, 2878.

**Louisiana Purchase Exposition**, was held at St. Louis, Mo., between April 30 and Dec. 1, 1904, to celebrate the centennial of the Louisiana Purchase. It was the largest World's Fair ever held, and the third of its kind in America; its grounds covered 1,240 acres, of which 250 acres were roofed over. The total amount expended upon the Exposition by the Exposition Company, the various States, foreign governments, and the concessionaries, amounted to about \$44,500,000; while the total receipts came to about \$25,000,000; and the Exposition closed free from debt. In point of attendance it fell below the Paris Exposition of 1900 with its 50,000,000 entrances and the World's Fair at Chicago with 27,500,000 entrances, as its attendance only totalled 18,700,000.

**Louisiana Purchase Exposition:**

Opened by proclamation of President Roosevelt, 6715.

Relations of United States Government to, 6673, 6682, 6769, 6772, 6776, 6780, 6811, 6872, 6899, 6931, 6936, 6939, 6940, 7062.

**Louisiana vs. Jumel.**—An important Supreme Court case defining the liability of State officers. Jumel held bonds issued under an act of the Louisiana legislature of 1874 and the constitutional amendment adopted in that year. He demanded payment of these bonds in 1880. Payment was refused solely on the ground of obedience to the Louisiana State debt ordinance of the new constitution adopted July 23, 1879, and the law of 1880, carrying out provisions contained in this new constitution. This act, in the language and spirit of the ordinance, recited that coupons of consolidated bonds falling due in January, 1880, were remitted. Suit was brought against officers of the State. The Circuit Court of the State decided for the defendant, and its decision was affirmed by the United States Supreme Court on the ground that relief could not be awarded against officers obeying the supreme power of the State; that the money is the State's property, not held in trust by the officers except in the capacity of her servants. "The political power of the State," said Chief Justice Waite in the opinion of the court, "can not be ousted of its jurisdiction and the judiciary set in its place." Dissenting opinions were rendered by Justices Field and Harlan.

**Louisville and Portland Canal Co.**, act for subscription of stock in, reasons for applying pocket veto to, 1071.

**Louisville, Ky.**, Southern Exposition at, discussed, 4773.

**Lower Brulé Indians.** (See Indian Tribes.)

**Loyalists.**—Those of the American colonists who opposed the Revolutionary War and in some instances took up arms against their countrymen in the struggle for independence. They were also called Tories. As early as 1688 parties favorable to the Crown were exerting an influence in all the Colonies. As the revolutionary movement grew their opposition to it increased. In no Colony was there an overwhelming desire for independence, and in some the advocates of revolution were in the minority. Many of the most respected and eminent men of the mid-

**Loyalists—Continued.**

dle Colonies were loyal to the Crown. During the progress of the war they were treated with great harshness. Their property was confiscated or destroyed; they suffered social ostracism, and some were tarred and feathered. Legislative assemblies banished them from some of the Colonies. When the British troops withdrew at the close of the war the Tories found life in the States unendurable and thousands retired to Canada, Nova Scotia, New Brunswick, the Bahamas, and other West Indies. In the treaty of peace in 1783 the British asked to have provision made for recompensating the dispossessed Loyalists, but all they received was a promise to submit the matter to the States, and they refused relief.

**Loyal Legion, Military Order of.**—The Military Order of the Loyal Legion of the United States was organized by officers and ex-officers of the army, navy, and marine corps of the United States who took part in the War of 1861-65. Membership descends to the eldest direct male lineal descendant, according to the rules of primogeniture. There are 21 commanderies, each representing a State, and one commandery representing the District of Columbia. The total membership of the Loyal Legion is 8,880.

**Lubeck:**

Minister of, received by United States, 949.

Treaty with, 988, 991, 2686, 6294.

**Luce, J. H. D.,** wharfage concession to, 6673.

**Luckett and Tyler** (assignees of William T. Cheatham), act for relief of, vetoed and reasons assigned, 4334.

**Lundy's Lane (Canada), Battle of.**—After his defeat at Chippewa in 1814 Gen. Riall retired by way of Queenston toward the head of Lake Ontario. He was soon reenforced, and returned to attack the Americans under Brown, who had pursued him as far as Queenston. Hearing of the British reenforcements, Brown retreated to the Chippewa River, and on July 24, 1814, encamped on the south bank, where he had defeated Riall on the 5th. On the 25th Gen. Scott, with about 1,200 men, went forward to reconnoiter and came upon the British army, 4,500 strong, near Niagara Falls, on Lundy's Lane,

a road leading from the Falls to the end of Lake Ontario. Soon the entire American force was engaged, the battle lasting from sunset till midnight. The American forces numbered about 2,500 men. During the engagement Gen. Scott and Lieut.-Col. Miller distinguished themselves for daring and efficiency. The British were finally driven back and forced to abandon their artillery, ammunition, and baggage. Both armies claimed the victory, though both left the field. The American loss was 171 killed, 571 wounded, and 110 missing—a total of 852 out of an army of 2,500. The British lost 84 killed, 559 wounded, 193 missing, and 42 prisoners—a total of 878 out of an army of 4,500. Generals Brown and Scott were among the wounded.

**Lüneburg, convention with,** for acquiring and inheriting property, 2826.

**Luquillo Forest Reserve,** proclaimed, 6819.

**Lusk, Albert M. D. C.,** trial of, by military commission referred to, 3792.

**Luther vs. Borden.**—In 1841 a portion of the people of Rhode Island framed a new government and elected Thomas W. Dorr governor in opposition to the charter government. (See *Dorr's Rebellion.*) Governor King declared the State under martial law and Luther's house was searched, he being implicated in the armed conspiracy against the established government. Luther pleaded the constitutionality of the new government. The circuit court gave judgment against him, and the Supreme Court of the United States affirmed this decision in 1842. It was decided that under martial law suspected persons might legally be subjected to search and arrest by State authority, and that the question of the constitutionality of a State government was one with which Congress rather than the courts should deal.

**Luxemburg.**—An independent neutral grand duchy in central Europe. It is bounded by the Rhine province of Prussia on the northeast and east, Lorraine on the south, France on the southwest, and Belgium on the west. It lies mainly in the basin of the Moselle, which is on its eastern border. The leading occupation is agriculture. Iron ore is abundant and forms one of the main resources of the principality. The government is a constitutional monarchy administered by a grand duke and a chamber of forty-five deputies. It belongs to the German Zollverein, hav-

**Luxemburg—Continued.**

ing ceased to be part of Germany in 1866. Its neutrality was guaranteed by the treaty of London in 1867. The area is 998 square miles, and the population 245,888. The government receipts in 1910 amounted to \$3,568,300, and the expenditures to \$3,716,650. At the close of 1909 the public debt was \$2,049,750.

**Luxemburg**, fugitive criminals, convention with, for surrender of, 4782.

**Luxemburg, Treaty with** (see Extradition Treaties.)

**Lynch, Robert B.**, arrest and trial of, by Great Britain, 3827.

**Lynch Law.** The practice of punishing alleged offenders, generally with-

out trial, by unauthorized persons and without due process of law. Lynch law, it is said, takes its name from Charles Lynch, a Virginia planter and Quaker, and his associates, who during Revolutionary days seized British sympathizers and hanged them by the thumbs till they shouted "Liberty forever."

**Lynchings** discussed and indemnities voluntarily provided, recommended, 5767, 6248, 6277, 6371, 6430, 6459, 6461, 7409.

- McCreary, George Deardorff**; b. York Springs village, Adams Co., Pa., Sept. 28, 1846; entered the University of Pennsylvania, remaining until his junior year, 1867; engaged in the coal business; interested in municipal affairs of the city of Philadelphia, and was an original member of the committee of one hundred; elected treasurer of the city and county of Philadelphia, 1891, and during his term of office reorganized the finances of the city, introducing and carrying out many measures, which have resulted in financial gains to the city and safety in the transaction of its finances; elected to the 58th, 59th, 60th, and 61st Congresses from Pennsylvania.
- McCulloch, Ben.**, sent to Utah during troubles with Mormons, 3036.
- McCulloch, Hugh**, correspondence of, transmitted, 3804.
- McCulloch vs. Maryland.**—A case brought before the Supreme Court of the United States in 1819, in which the right of a State to interfere with the execution of Federal laws was denied. McCulloch was cashier of the Baltimore branch of the Bank of the United States, which had been incorporated by an act of Congress in 1816 and had headquarters in Philadelphia. The action brought by the State of Maryland against McCulloch was one of debt, he, it was averred, having refused to comply with an act

**McCulloch vs. Maryland—Continued.**

of the Maryland general assembly of 1818 which imposed a tax upon all banks or branches of banks doing business in Maryland and not chartered by the State legislature. The court of appeals of Maryland decided against the plaintiff. The Supreme Court reversed this decision, declaring that the act under which the bank was chartered was constitutional, and that therefore the act of the Maryland legislature of 1818 was contrary to the Constitution of the United States, and therefore void, because States have no power, by taxation or otherwise, to impede or control the operations of constitutional laws enacted by Congress to carry into execution any of the powers of the Federal Government.

**McCumber, Porter James**, b. Illinois, Feb. 3, 1858; removed to Rochester, Minn., the same year; removed to Wahpeton, N. Dak., in 1881, where he has since practiced law; member of the Territorial legislature in 1895 and 1897; elected to the United States Senate from North Dakota, Jan. 20, 1899; reelected in 1905.

**McDaniel, James**, treaty with Indians concluded by, 3592.

**McDermott, James Thomas**; b. Grand Rapids, Mich., Feb. 13, 1872; in 1893 he moved to Chicago, where he followed his vocation as a telegraph operator until 1906, when he was elected to the 60th Congress; was re-elected to the 61st and 62d Congresses from Illinois.

**Macdonald, Allan**, abduction of, from Canada, referred to, 3826.

**Macdonough, Thomas**, British ships captured on Lake Champlain by vessels under, 534.

Monroe, La., May 28, 1837; educated at Spring Hill College, Mobile, Ala., the United States Naval Academy, and the University of Virginia; graduated from State and National Law School, Poughkeepsie, N. Y.; served in the Confederate Army, in the war between the States; elected lieutenant-governor in 1879, and on the death of Governor Wiltz, October, 1881, succeeded him in the executive office; elected in 1884; defeated by Gen. Francis T. Nicholls in 1888, who appointed his opponent, S. D. McEnery, to be associate justice of the

Supreme Court in 1888 for the term of twelve years; elected to the United States Senate from Louisiana for the term beginning March 4, 1897; reelected in 1902 and again for the term commencing March 4, 1909.

**McEnery, Samuel D.**, candidate for governor of Louisiana, election disturbances discussed, 4261.

**McGarrahan, William**, act to submit title of, to lands to Court of Private Land Claims, vetoed, 5680.

**McGillicuddy, Daniel J.**, b. Aug. 27, 1859, in Lewiston, Me.; graduate of Bowdoin College, 1881; member of Maine Legislature, 1884-85; mayor of Lewiston, 1887, 1890, and 1902; elected to the 62d Congress from Maine.

**McGregor, Gen.**, commission to, discussed, 601.

**McGrew, John F.**, member of legislative council for Mississippi Territory, nomination of, 445.

**McGuire, Bird**; b. Belleville, Ill., in 1864; taken to Kansas in childhood, and there educated; in 1895, moved to Pawnee Co., Okla., and practiced law; in 1897 was appointed assistant United States attorney for Oklahoma Territory, in which capacity he served until his nomination for Congress as Delegate from the Territory of Oklahoma; served as such in the 58th and 59th Congresses; elected to the 60th Congress, 1907, his term of service beginning upon the admission of Oklahoma as a State, and re-elected to the 61st Congress from Oklahoma.

**McHenry, John Geiser**; b. Benton Township, Columbia Co., Pa., April 26, 1868; educated at Orangeville Academy; banker, manufacturer and farmer; elected to the 60th, 61st and 62d Congresses from Pennsylvania.

**McIntosh, Lachlan**, naval officer at Savannah, Ga., nomination of, and reasons therefor, 50.

**McKee, John**:  
Instructions to, regarding possession of Florida, 491.  
Mentioned, 473.

**McKeever, Isaac**, captain in navy, nomination of, and reasons therefor, 1745.

**McKenney, Thomas L.**, treaty with Indians concluded by, 931, 960, 961, 996.

**McKenzie, John C.**, b. Woodbine Township, Jo Daviess County, Ill., Feb. 18, 1860; educated in the common schools; taught school, farmed, then read law; admitted to the bar and practised his profession; served four years as member Illinois State Claims Commission under Gov. John R. Tanner; two terms in the House and

**McKenzie, John C.**—*Continued.*

three terms in the Senate of the Illinois General Assembly; one term as president pro tem of the senate, and elected to the 62d Congress from Illinois.

**Mackenzie, Ranald S.**, directed to assume command of Department of Texas, 4754.

**McKinley, William** (twenty-fifth and twenty-sixth President of the United States):

McKinley was elected by the Republican party at the elections of 1896 and 1900. At the Republican National Convention at St. Louis, June 16, 1896, he was nominated on the first ballot, overwhelmingly defeating Reed and Quay, his closest rivals. The platform on this occasion caused much discussion over the money plank, and Senator Teller's resolution seeking to commit the party to an endorsement of gold and silver, with free coinage on a basis of 16 to 1, was defeated. The platform as adopted severely arraigned the Democratic administration; blamed it for the period of financial depression through which the country had just passed; confirmed the party's allegiance to the doctrine of protection; advocated a continuance and revival of reciprocity; favored the restoration of discriminating duties; stood unreservedly for sound money; opposed the debasing of currency by free coinage; pledged ample provision for veterans; urged the control of Hawaii by the United States, the building of the trans-Isthmian canal, and the purchase of the Danish West Indies; condemned the Armenian massacres; reasserted the Monroe Doctrine; urged the restoration of peace to, and the securing of independence for, Cuba, by the United States; insisted upon rigid enforcement of immigration laws; supported civil service reform; condemned lynching; recommended a Board of Arbitration to adjudicate between labor and capital; urged free-homestead laws upon Congress; favored the extension of statehood to the remaining territories, and proper recognition of Alaska; sympathized with temperance; and recognized the rights of women.

The Democratic National Convention at Chicago, July 7, 1896, nominated William J. Bryan on the fifth ballot, over Bland and Pattison. The People's party, or Populists, in convention at St. Louis on July 22, 1896, agreed to support Bryan, and nomi-

nated Watson as Vice-President. The National Silver party, at the same place and time, agreed to support Bryan for President and nominated Sewall for Vice-President. The sound-money Democrats in convention at Indianapolis, on Sept. 2, 1896, nominated General John W. Palmer and General Simon B. Buckner as their candidates. The National Prohibition party was split over the money question into "Narrow Gaugers," who wanted the platform confined to Prohibition, and the "Broad Gaugers," who wanted free coinage and other national issues incorporated. The Narrow Gaugers nominated Joshua Levering and Hale Johnson as candidates. The Broad Gaugers nominated Rev. Charles E. Bentley and James A. Southgate. The Socialist Labor party, at New York, on July 4, 1896, nominated Charles H. Matchett and Matthew Maguire as their candidates.

The popular vote gave McKinley 7,111,607; Bryan, 6,509,052; Palmer, 222,583; Levering, 134,645; Bentley, 13,968, and Matchett, 36,373. The electoral vote gave McKinley 271; Bryan, 176.

The Republican National Convention held at Philadelphia in June, 1900, nominated President McKinley for a second term. The Democratic National Convention at Kansas City, Mo., nominated William J. Bryan. The People's party, or Fusionists, at Sioux Falls, S. D., endorsed Bryan's candidacy; while the "Middle-of-the-Road" Anti-Fusionist faction of the People's party, at Cincinnati, nominated Wharton Barker. The Prohibitionists, at Chicago, nominated John G. Woolley. The Socialist Labor party, in New York City, nominated Joseph F. Malloney. The Social Democratic party, at Indianapolis, nominated Eugene Debs. The United Christian party, at Rock Island, Ill., nominated Silas C. Swallow. The Silver Republican Convention, at Kansas City, endorsed Bryan. The National party, in New York City, nominated Donelson Caffrey of Louisiana, but he declined the nomination.

The popular vote ran: McKinley, 7,207,923; Bryan, 6,358,133; Woolley, 208,914; Barker, 50,373; Debs, 87,814; Malloney, 39,379. The electoral vote stood: McKinley, 292; Bryan, 155.

*Party Affiliation.*—From his youth William McKinley was an ardent Republican. After his return from the

**McKinley, William—Continued.**

war, he was admitted to the bar and settled in Canton, Ohio, then an opposition county, where his political ability had abundant scope and where he quickly attained considerable political prominence. In 1867, he favored negro suffrage, a most unpopular topic in his neighborhood; in 1875, at the height of the greenback craze, he spoke for sound money and the resumption of specie payment. In Congress, in 1878, he opposed the Wood Tariff Bill; in 1879 and 1880, he opposed the repeal of the Federal election laws; in 1882, he advocated the protective policy in Congress and the tariff commission; in 1884, he opposed the Morrison Tariff Bill; in 1884, he supported Blaine for the Presidency; in 1886, he favored arbitration between labor and capital; in 1887, he conducted a brilliant campaign against the Mills Bill, which was supposed to embody Cleveland's policy and ideas on the tariff; his final address in Congress on this bill has been characterized as "the most effective and eloquent tariff speech ever heard in Congress." This speech served as a text-book of the campaign. On April 16, 1890, Major McKinley introduced the tariff bill since known by his name, which became a law on Oct. 6, 1890. Defeated for Congress in 1890, he was elected Governor of Ohio. His inauguration as Governor took place shortly before the commencement of the Presidential campaign.

**Public Debt.**—The public debt of the United States for the years to which President McKinley was elected to serve stood as follows:

July 1, 1897....	\$986,656,086.14
July 1, 1898....	1,627,085,492.14
July 1, 1899....	1,155,320,235.19
July 1, 1900....	1,107,711,257.89
July 1, 1901....	1,044,739,119.97
July 1, 1902....	969,457,241.04
July 1, 1903....	925,011,637.31
July 1, 1904....	967,231,773.75

**Tariff.**—In his Inaugural Address (page 6238) President McKinley took up the tariff question. He said: "Nothing was ever made plainer at a general election than that the controlling principle in the raising of revenues from duties on imports is zealous care for American interests and American labor. The people have declared that such legislation should be had as will give ample protection and encouragement to the industries and development of our country. . . . To this policy we are

all, of whatever party, firmly bound by the voice of the people—a power vastly more potential than the expression of any political platform." Further, he says: "In the revision of the tariff especial attention should be given to the re-enactment and extension of the reciprocity principle of the law of 1890, under which so great a stimulus was given to our foreign trade in new and advantageous markets for the surplus of our agricultural and manufactured products." In his message at the special session (page 6246) he said: "The necessity of the passage of a tariff law which shall provide ample revenue, need not be further urged. The imperative demand of the hour is the prompt enactment of such a measure." In his Third Annual Message (page 6439) the President said: "I recommend that the Congress at its present session reduce the internal revenue taxes imposed to meet the expenses of the war with Spain in the sum of thirty millions of dollars. This reduction should be secured by the remission of these taxes which experience has shown to be the most burdensome to the industries of the people." In his Second Inaugural Address (page 6465) the President said: "Now I have the satisfaction to announce that the Congress just closed has reduced taxation in the sum of \$41,000,000."

**Foreign Policy.**—In his First Inaugural Address (page 6241) President McKinley summed up the foreign policy of his administration in these words: "We want no wars of conquest; we must avoid the temptation of territorial aggression. War should never be entered upon until every agency of peace has failed; peace is preferable to war in almost every contingency. Arbitration is the true method of settlement of international as well as local or individual differences." In a special message to Congress (page 6277) the President announces the destruction of the battleship *Maine* in Havana waters and the conclusion of the court of inquiry. His special message (page 6281) deals with the revolution in Cuba and its effects upon the United States. In it he says: "The issue is now with Congress. It is a solemn responsibility. I have exhausted every effort to relieve the intolerable condition of affairs which is at our doors. Prepared to execute every obligation imposed upon me by the Constitution and the law, I await

**McKinley, William—Continued.**

your action." By act of Congress, April 25, 1898, a state of war was declared to exist between the United States of America and the Kingdom of Spain. President McKinley's proclamation of war (page 6474) followed on April 26, 1898. The President discussed the future relations which should exist between the United States and Cuba in his Second Inaugural Address (page 6467). As to the war in the Philippines, the President said: "Our countrymen should not be deceived. We are not waging war against the Philippine Islands. A portion of them are making war against the United States. . . . We will not leave the destiny of the loyal millions in the islands to the disloyal thousands who are in rebellion against the United States."

*Civil Service.*—In his Inaugural Address (page 6241) the President said: "Reforms in the civil service must go on; but the changes should be real and genuine, not perfunctory, or prompted by a zeal in behalf of any party simply because it happens to be in power." Among the reforms instituted, the President lays especial stress upon dismissals, and says: ". . . a distinct advance has been made in giving a hearing before dismissals upon all cases where incompetency is charged or demand made for the removal of officials in any of the Departments." In his Fourth Annual Message (page 6455) the President recommends the extension of such parts of the Civil Service regulation as may be practicable to the Philippines.

**McLeod Case.**—In 1840 Alexander McLeod, a Canadian sojourning in New York, boasted of having taken part in the seizure of the steamer *Caroline* during a rebellion in Canada a few years previously. He was arrested and indicted for murder in Lockport, N. Y. The British minister demanded his release on the ground that McLeod had acted under orders and that the New York State courts

**McLeod Case—Continued.**

had no jurisdiction in a case that lay only between the two Governments of Great Britain and the United States. The Federal Government admitted the justice of the British contention, but held that McLeod could only be released by operation of the law. The Attorney-General instituted *habeas corpus* proceedings, but the court held that there was no ground for releasing him. McLeod finally proved an alibi in October, 1841, and was acquitted.

**McMahon, John**, arrest and trial of, 3827.

**McMinn, Joseph**, treaty with Indians, 589.

**McMorran, Henry**; b. Port Huron, Mich., June 11, 1844; engaged in the grocery business, milling, grain, and elevator trade, and with numerous commercial, manufacturing, and transportation companies; general manager of the Port Huron and Northwestern Railway from 1878 to 1889; has been alderman and city treasurer of Port Huron, and member of the canal commission; elected to the 58th, 59th, 60th, 61st, and 62d Congresses from Michigan.

**McNeil, John**, treaty with Indians, 1029.

**McSweeney, Daniel**, imprisonment of, by Great Britain, 4674.

**MacVeagh, Franklin**, of Chicago, Ill., Secretary of the Treasury in President Taft's Cabinet; b. Chester Co., Pa.; graduated at Yale, 1862; Columbia Law School, New York, 1864; nominated by the Democrats of Illinois, 1894, for United States Senator and made a canvass of the State, but was defeated in the legislature; member of the executive committee, National Civic Federation.

**Madison Forest Reserve**, Montana, proclaimed, 6734, 7093, 7334.

**Madison, James** (fourth President United States):

Madison was elected by the Democratic-Republicans in 1808 and 1812. Virginia, in separate caucuses, nominated James Madison and James

**Madison, James—Continued.**

Monroe as Presidential candidates to succeed Jefferson. But the Congressional Republican caucus, by an almost unanimous vote, chose Madison for President and George Clinton for Vice-President. Monroe had many supporters, but reconciled them to the choice of Madison by the suggestion that Monroe should succeed Madison. The Federalists held no caucus and made no formal nomination; but they accepted C. C. Pinckney and Rufus King. The election was held Nov. 8, 1808, and seventeen States took part in it. The electoral vote, counted Feb. 8, 1809, gave Madison 122 votes and Clinton 113 votes, against 47 each for Pinckney and King. The New England Federalists, by a determined effort, redeemed some of their lost States. The votes of New York, North Carolina, and Maryland were divided.

In the election of 1812, Madison was nominated by the Republican Congressional caucus, at which New York State was represented by only one member. The other New York members formed a faction which nominated DeWitt Clinton. The Federalists, at a caucus held in New York City, agreed to support DeWitt Clinton for President and Jared Ingersoll for Vice-President. The election was held Nov. 3, 1812, and the electoral vote, counted Feb. 13, 1813, gave Madison 128, against 89 for Clinton; and Gerry 131, against 86 for Ingersoll. Eighteen States took part, for Louisiana was admitted in 1812. Maryland's was the only divided vote, and it was cast 6 to 5.

**Party Affiliation.**—In the early construction of the Government, Madison was a pronounced Federalist. He played a most important part in carrying the Constitution through the Virginia Assembly, despite the well-organized opposition of such leaders as Patrick Henry and Lee. His work in the First National Congress included tariff resolutions, creation of executive departments, and the proposal of amendments to the Constitution. He did not support Hamilton's financial measures and it was not long before he became one of the leaders of the new Republican party. Especially did he oppose the assumption of State debts and the institution of a national bank. While he sympathized with the French Revolutionists he did not go so far in this direction as did Jefferson. He led the debates in opposition to Jay's

treaty with Great Britain. In 1798 he drew up the resolutions passed by the Virginia Assembly denouncing the Alien and Sedition Acts.

**Political Complexion of Congress.**—The Eleventh Congress (1809-1811) was made up of a Senate of 34 members, of whom 10 were Federalists and 24 Democrats; and the House, of 141 members, of whom 46 were Federalists and 95 Democrats. In the Twelfth Congress (1811-1813) the Senate, of 36 members, was made up of 6 Federalists and 30 Democrats; the House, of 141 members, was made up of 36 Federalists and 105 Democrats. In the Thirteenth Congress (1813-1815) the Senate, of 36 members, was made up of 9 Federalists and 27 Democrats, and the House, of 182 members, was made up of 67 Federalists and 115 Democrats. In the Fourteenth Congress (1815-1817) the Senate, of 38 members, was made up of 12 Federalists and 26 Democrats; and the House, of 183 members, was made up of 61 Federalists and 122 Democrats.

**Foreign Policy.**—In his First Inaugural Address, Madison outlines his foreign policy (page 451): "To cherish peace and friendly intercourse with all nations having corresponding dispositions; to maintain strict neutrality toward belligerent nations; to prefer in all cases amicable discussion and reasonable accommodation of differences to a decision of them by an appeal to arms; to exclude foreign intrigues and foreign partialities, so degrading to all countries and so baneful to free ones; to foster a spirit of independence too just to invade the rights of others, too proud to surrender our own, too liberal to indulge unworthy prejudices ourselves, and too elevated not to look down upon them in others; to hold the union of the States as the basis of their peace and happiness. . . ." The embargo act of 1807 was repealed and the non-intercourse act substituted in 1809. This proved ineffectual and was repealed in 1810, but was revived against Great Britain in 1811. Great Britain conceded the rights of neutrals, but refused to accommodate the impressment of sailors, to the satisfaction of the United States. During 1811, hostilities began on land and sea. By proclamation of June 19, 1812, Madison (page 497) declared war against Great Britain, and this followed closely upon his special message of June 1, 1812 (page

**Madison, James—Continued.**

484), in which he reviewed the acts of hostility and offense of which Great Britain had been guilty. Throughout the several messages the progress of the war is discussed. It is generally conceded that the conduct of the war was feeble on the part of the United States. So far as Madison's connection with it is concerned, it may be remembered that he was essentially a man of peace and that the war, so important in the annals of the country and in the life history of those who bore themselves valiantly in defense of their country, becomes a mere incident in Madison's life. Eventful as his administration was, the part which he contributed was slight in comparison with his preeminently brilliant record before he reached the highest office.

**Public Debt.**—The public debt of the United States during the Madison administration stood as follows:

Jan. 1, 1810.....	\$53,173,217.50
Jan. 1, 1811.....	48,005,587.76
Jan. 1, 1812.....	45,209,737.90
Jan. 1, 1813.....	55,962,827.57
Jan. 1, 1814.....	81,487,846.24
Jan. 1, 1815.....	90,833,660.15
Jan. 1, 1816.....	127,334,933.74
Jan. 1, 1817.....	123,491,965.16

**Tariff.**—July 1, 1812, there was passed a tariff act for imposing "additional duties upon all goods, wares, and merchandise, imported from any foreign port or place, and for other purposes." By this act, the duties were increased 100 per cent., and an additional tax of 10 per cent. was levied on all goods imported in foreign vessels. Feb. 25, 1813, a duty was imposed on the importation of iron wire; and July 29 of the same year the duty was imposed on imported salt, a bounty was granted on pickled fish exported, and certain vessels employed in the fisheries were entitled to allowances. In his Seventh Annual Message (page 552) Madison brings up the question of tariff for protection: "In adjusting the duties on imports to the object of revenue, the influence of the tariff on manufactures will necessarily present itself for consideration. However wise the theory may be which leaves to the sagacity and interest of individuals the application of their industry and resources, there are in this as in other cases exceptions to the general rule. Besides the condition which the theory itself im-

plies of a reciprocal adoption by other nations, experience teaches that so many circumstances must concur in introducing and maturing manufacturing establishments, especially of the more complicated kinds, that a country will remain long without them, although sufficiently advanced and in some respects even peculiarly fitted for carrying them on with success."

**Slavery.**—In his Second Annual Message (page 470) President Madison says: "Among the commercial abuses still committed under the American flag, and leaving in force my former reference to that subject, it appears that American citizens are instrumental in carrying on a traffic in enslaved Africans, equally in violation of the laws of humanity and in defiance of those of their own country. The same just and benevolent motives which produced the interdiction in force against this criminal conduct will doubtless be felt by Congress in devising further means of suppressing the evil."

**Commerce.**—The commercial status of the United States in the year 1810 was as follows: Area, 1,999,775 square miles; population, 7,239,881; population per square mile, 3.62; gold coined, \$501,435; silver coined, \$638,774; money in circulation, \$26,500,000; imports, \$85,400,000; exports, \$66,757,970; vessels built, 127,575 tons; vessels in foreign trade, 984,269 tons; vessels in coastwise trade, 440,175 tons; post-offices, 2,300.

**Madison, James:**

Report of United States commissioners to, transmitted, 5988.

**Mafia**.—A Sicilian secret order which aims to substitute its own authority for that legally constituted by the State. It first became prominent in 1860. It depends upon community of sentiment rather than thorough organization for its strength, and its members are bound neither to seek redress at law nor give evidence in court. The boycott and blackmail are the usual means of offense, but violence is often resorted to. Members of the society emigrating to the United States have established branches in New York, New Orleans and elsewhere. On the night of Oct. 15, 1890, David C. Hennessy, chief of police of New Orleans, was assassinated before his own house by members of the Mafia to whose band he had traced a number of crimes. The officer received 6 wounds. Eleven Italians were arrested charged with the murder. By the 15th of the following March several of the prisoners had been acquitted, and, despairing of convicting any of them, on account of their disregard of oaths, a mob of enraged citizens, headed by a lawyer named Parker, broke into the jail and put to death the 11 prisoners, including those who had been acquitted. In consequence of the delay in bringing to justice the perpetrators of this deed the Italian Government made a protest against this violation of the rights of Italian citizens, and the United States arranged the matter amicably by paying an indemnity to the families of the murdered Italians.

**Maine.**—One of the United States; nickname, "The Pine Tree State"; motto, "Dirigo" ('I direct'). The most northeasterly State of the Union. It extends from lat. 43° 4' to 47° 28' north and from long. 66° 57' to 71° 7' west. It is bounded on the north by the Province of Quebec, on the east by New Brunswick, on the southeast and south by the Atlantic, and on the west by New Hampshire and Quebec. The area of the State is 33,040 square miles. Settlements were made by the French under Du Monts in 1604 and by the English in 1607. The first permanent settlement dates from 1623. Maine was a part of the province of Massachusetts Bay in 1691 and became a sep-

arate State in 1820. The Webster-Ashburton treaty of 1842 settled the long-standing dispute regarding its northeastern boundary.

The products of Maine are chiefly those derived from forestry, fishing, farming and quarrying. The most fertile portion, the Aroostook Valley, is well adapted for the growing of fruits and vegetables.

Statistics of agriculture reported to the Federal Census Bureau, under date of April 15, 1910, place the number of farms in the State at 60,016, comprising 6,296,859 acres, valued, with stock and improvements, at \$199,271,998. The average value of farm land advanced from about \$8 an acre in 1900 to \$14 an acre in 1910. The value of domestic animals, poultry, etc., was \$25,161,889, including 256,523 cattle, valued at \$7,784,384; 107,574 horses, \$14,364,756; 358 mules, \$72,446; 87,156 swine, \$948,094; 206,430 sheep, \$813,976. The yield and value of field crops for 1911 is given as follows: Corn, 18,000 acres, 792,000 bushels, \$713,000; wheat, 3,000 acres, 63,000 bushels, \$69,000; oats, 135,000 acres, 5,198,000 bushels, \$2,807,000; potatoes, 118,000 acres, 21,240,000 bushels, \$16,355,000; hay, 1,400,000 acres, 1,540,000 tons, \$22,176,000.

The mineral products for 1910 were valued at \$4,713,123. Of this amount, stone, of which Maine was one of the largest producers, brought \$2,315,730.

The valuation of property in 1910 was \$428,252,465, and the assessed tax was \$2,143,156, at the rate of five mills. The State Treasurer reported receipts for the fiscal year as \$4,030,356, and expenditures of \$3,970,457, net cash balance, \$135,722.

There are 2,144 miles of steam railway and 383 miles of electric line in the State. The population was 742,371 in 1910.

**Maine, The.**—One of the second-class battleships of the United States

**Maine, The—Continued.**

Navy. This vessel was sent to Havana, Cuba, in January, 1898, on a peaceful mission. She was received by the Spanish forts and naval vessels in the harbor with the courtesies usually extended to visiting war ships of a friendly power. Her anchorage was selected by the Spanish authorities. On the night of Feb. 15, 1898, the *Maine* was destroyed by a submarine mine (6277). It was believed that the Spaniards, who at the time were very much incensed at the interest Americans were taking in the Cuban insurrection, had maliciously destroyed the vessel and crew. Two officers and 258 sailors and marines lost their lives by the explosion (6296). An investigation failed to place the responsibility for the catastrophe, and Spain hastened to send a message of regret at what she called an "incident." The blowing up of the *Maine* was among the causes of the war with Spain, begun soon afterwards.

**Maine, The**, destruction of, in Havana Harbor, Cuba, 6277, 6290, 6308.

**Malay Archipelago**.—The largest and most important island group or congeries of groups in the world, stretching from lat. 25° north to 12° south and from long. 93° to 105° east. It is bounded on the north by the China Sea, on the east by the Pacific Ocean, and on the south and west by Australia and the Indian Ocean. The principal groups are the Sunda Islands, including Sumatra, Java, Bali, Sumbawa, Flores, Sandalwood, Timor, and several smaller ones; the Philippines in the north; Celebes and the Salayer Islands, north of Flores; the Moluccas and others east of Celebes. The chief islands for trade are Java, Sumatra, Borneo, and the Moluccas. The Dutch division of Papua is considered a part of the Malay Archipelago. The Philippines were taken by the United States from Spain in 1898. Great Britain is in possession of Singapore, Penang, Malacca, and La-

buan. Native rajas rule most of the islands. The Dutch East Indies, including Sumatra, Borneo, Java, and the Celebes, comprise the greater and richer portion of the archipelago, having rights of suzerainty over the native princes.

**Malby, George B.**; lawyer; b. at Canton, St. Lawrence Co., N. Y., Sept. 16, 1857; elected to the New York State assembly in 1890, and served in that body continuously for five years; elected to the New York State senate in 1895, and served continuously until 1907; elected to the 60th, 61st, and 62d Congresses from New York.

**Malvern Hill (Va.)**, Battle of.—The last of the Seven Days' Battles before Richmond. On the morning of July 1, 1862, the Second, Third, and Sixth corps of McClellan's army, under command of Keyes, Franklin, Sumner, Heintzelman, and Porter, were united on Malvern Hill, a plateau near the James River. The approaches to the position were commanded by about 70 guns, several of them heavy siege cannon. The Confederate attack, under D. H. Hill and Magruder, was made about 3 p. m., and it continued until 9 p. m. The assailants were repulsed. During the night McClellan continued his retreat to Harrison's Landing.

**Manassas (Va.)**, or Bull Run, Second Battle of.—On the morning of Aug. 30, 1862, the day after the battle of Groveton, the conflict between the forces under Pope and those under Jackson was renewed. The latter, having been reinforced, massed his forces on the left of the Federal army with the intention of turning Pope's flank and securing a position on the road to Centerville, in Pope's rear. The fiercest fighting of the day took place about 5 o'clock in the af-

**Manassas (Va.), or Bull Run, Second Battle of—Continued.**

ternoon on the ground where the battle of Bull Run had been fought July 21, 1861. By night the left wing of the Union army had been driven back about half a mile, the right not so far. Pope, being defeated, retreated to Centerville. Federal loss, about 15,000; Confederate, 8,400. (See also Groveton (Va.), Battle of.)

**Mandan Indians.** (See Indian Tribes.)

**Manila Harbor (Philippine Islands), Battle of.**—Prior to the beginning

of the war with Spain the Asiatic Squadron of the United States had been lying for several weeks at Hongkong, under the command of Commodore (now Admiral) George Dewey. Upon the issuance of the colonial proclamation of neutrality, the usual 24 hours' notice having been given, Dewey repaired to Mirs Bay, near Hongkong. From there he proceeded, under telegraphic orders, to capture or destroy the Spanish fleet then assembled at Manila, capital of the Philippine Islands, a Spanish possession off the southeast coast of Asia. At daybreak May 1, 1898, the American fleet entered Manila Bay and before noon effected the total destruction of the Spanish fleet, consisting of 10 warships and a transport, besides capturing the naval station and forts at Cavite. Thus at one blow, in a few hours, was annihilated Spain's naval power in the Pacific. Nor was this all. The victory secured to the American commander complete control of the bay of Manila, with the ability to take the city at will. Not a life was lost on the American ships. The wounded numbered only 7. The Spanish loss was 412 officers and men killed and wounded. Aug. 15, after a brief assault upon the works of Manila by the land forces under Gen. Merritt, in which the squadron assisted, the last scene of the war was enacted at its starting place, resulting in the unconditional surrender of the city.

**Marblehead, The**, mentioned, 6317, 6806, 6808, 6809.

**Marbury vs. Madison.**—The first important case wherein the Supreme Court set aside an act of Congress because of conflict with the Constitution. William Marbury and others had been appointed justices of the peace in the District of Columbia by President John Adams, with the consent of the Senate. Before their commissions were issued Adams was succeeded by Thomas Jefferson and James Madison was appointed Secretary of State. Failing to receive his commission, Marbury moved the Supreme Court to issue a mandamus to Madison commanding him to issue it. The court decided that Marbury was legally entitled to his commission, but that the court had no constitutional authority to issue a mandamus in such a case, thus declaring unconstitutional a portion of the judiciary act of 1789, which purported to grant such authority.

**Marine Corps.**—The United States Marine Corps is an independent branch of the military service of the United States, serving generally under the direction of the Secretary of the Navy. The corps may be detached by order of the President for service with the army, and on various occasions parts of the corps have so served.

Marines served on shore and on board vessels of the navy throughout the Revolutionary war, two battalions having been authorized by the Continental Congress Nov. 10, 1775, but the present organization dates from July 11, 1798, when an act of Congress was approved for establishing and organizing a marine corps to consist of 1 major, 4 captains, 16 first lieutenants, 12 second lieutenants, 48 sergeants, 48 corporals, 32 drums and fifes and 720 privates.

The authorized strength of the corps (November, 1911) was 333 officers and 9,521 enlisted men, as follows: 1 major-general commandant, 11 colonels, 12 lieutenant-colonels, 28 majors, 103 captains, 92 first lieutenants, 86 second lieutenants, 8 sergeant ma-

**Martial Law—Continued.**

diate constitutional or legislative sanction. It is only justified by necessity and supersedes all civil government. Sir Matthew Hale said: "Martial law is built on no settled principle, but is arbitrary, and, in truth, no law, but sometimes indulged, rather than allowed, as law." Suspension of the writ of *habeas corpus* is essentially a declaration of martial law. "In this case," says Blackstone, "the nation parts with a portion of liberty to secure its permanent welfare, and suspected persons may then be arrested without cause assigned."

**Martin, Alexander**, legislative act of North Carolina received from, transmitted, 64.

**Martin, Eben Wever**; b. at Maquoketa, Jackson Co., Iowa, April 12, 1855; graduated Cornell College in 1879, of B. A.; attended the law school of the University of Michigan; admitted to the bar in the spring of 1880; moved to Deadwood in 1880; member of the Territorial legislature of Dakota in 1884 and 1885; elected to the 57th, 58th, 59th, 60th, 61st, and 62d Congresses from South Dakota.

**Martin, John A.**, lawyer; b. Cincinnati, Ohio, April 10, 1868; served one term in the Colorado general assembly; elected to the 61st and 62d Congresses from Colorado.

**Martin, Henry W.**, treaty with Indians concluded by, 3395.

**Martin, Morgan L.**, treaty with Indians concluded by, 2529.

**Martin, Thomas Staples**; b. Scottsville, Albemarle Co., Va., July 29, 1847; soon after leaving the University of Virginia he commenced the study of law by a course of private reading at home, and was licensed to practice in 1869; Dec. 19, 1893, was elected Senator from Virginia for the term commencing March 4, 1895; reelected in 1899 and 1905.

**Martin vs. Hunter's Lessee.**—In 1791 Martin brought suit of ejectment against the defendant in the district court of Virginia for the recovery of certain lands. The court decided for the defendant. The court of appeals of Virginia reversed this decision, and their judgment was reversed by the United States Supreme Court in 1816. The court of appeals of Virginia refused to execute this judgment, declaring that the "appellate power of the Supreme Court of the United States does not extend to this court under a sound construction of the Constitution of the United

States," and that the "act of Congress to that effect is not in pursuance of said Constitution." The Supreme Court overruled this decision and thus established its jurisdiction upon such points.

**Martine, James E.**; b. in the city of New York, August, 1850; attended the public schools, but owing to the death of his father was compelled to leave school at the age of 13 years; never held public office; at the primary election for United States Senator he was chosen to represent New Jersey.

**Mary, The**, capture and sequestration of, by Netherlands, 1612.

Claims arising out of, 1693.

**Martinez, F. P.**, Mexican Minister, mentioned, 1790.

**Martinique, Island of**, Lesser Antilles; French; 381 square miles; population, 203, 781.

Volcanic eruption on, destroying St. Pierre, formerly populated by 26,000, 6679.

Tonnage on American vessels at, referred to, 1123.

**Mary Lowell, The**, seizure of, by Spanish authorities, referred to, 3986.

**Marty, Martin**, member of Chippewa Commission, 5500.

**Marvin, William**, provisional governor of Florida, appointed, 3527.

**Maryland.**—One of the thirteen original States of the Union. Motto: "Fatti maschii; parole femine" ("Deeds are men; words are women"). It was founded by Lord Baltimore in 1634 and named in honor of Henrietta Maria, wife of Charles I. Maryland extends from lat. 37° 53' to 39° 43' north and from long. 75° 4' to 79° 33' west. It is bounded on the north by Pennsylvania, on the east by Delaware and the Atlantic Ocean, on the south by the Chesapeake Bay, on the southwest by Virginia and West Virginia (separated by the Potomac), and on the west by West Virginia. It is divided into two parts by the Chesapeake Bay, and has an area of 12,210 square miles. It was first settled at St. Marys in 1634 as a proprietary colony of the Calvert family, but was governed as a royal province from 1691 to 1716. The Mason and Dixon line was established as the boundary between Maryland and Pennsylvania about 1766.

The fisheries of the State are important, the oysters of Chesapeake Bay being widely famous. Other fishery products are shad, bass, perch, and shell fish. Agriculture is an im-

**Maryland—Continued.**

portant industry, about 82 per cent. of the area being in farms, and these mostly worked by their owners.

Statistics of agriculture reported to the Federal Census Bureau, under date of April 15, 1910, place the number of farms in the State at 49,923, comprising 5,057,140 acres, valued, with stock and improvements, at \$286,167,028. Native white farmers operated 40,669 farms, about one-eighth of the farmers being negroes. The value of domestic animals, poultry, etc., was \$32,570,134, including 287,751 cattle, valued at \$7,869,526; 155,438 horses, \$16,787,467; 22,667 mules, \$3,043,581; 301,583 swine, \$1,765,857; 237,137 sheep, \$1,142,965. The yield and value of field crops for 1911 is given as follows: Corn, 670,000 acres, 24,455,000 bushels, \$15,407,000; wheat, 605,000 acres, 9,378,000 bushels, \$8,534,000; oats, 46,000 acres, 1,242,000 bushels, \$609,000; rye, 28,000 acres, 406,000 bushels, \$349,000; potatoes, 30,000 acres, 1,755,000 bushels, \$1,597,000; hay, 276,000 acres, 199,000 tons, \$4,458,000; tobacco, 26,000 acres, 19,110,000 pounds.

The mineral products of the State for 1910 were valued at \$15,440,207, of which \$5,835,058 was coal, and \$5,230,824 pig iron. The coal business of the State benefited indirectly from the six months' strike of mine workers in the middle western States, and as a result 1,193,884 tons more were mined than during the previous year, giving employment to 5,889 men, who worked an average of 270 days.

There were 4,837 manufacturing establishments in the State in 1909, employing 125,489 persons, and capitalized at \$251,227,000. The value of the products was \$315,669,000, of which \$116,620,000 was added by manufacture. The business in which the greatest amount of capital was invested and in which the largest number of persons were employed was the manufacture of men's clothing. The capital was reported as \$36,921,000, and the persons employed 19,784.

The receipts of the State Treasurer for the fiscal year ended Sept. 30, 1911, were \$5,875,598, and disbursements \$6,328,557; balance, \$875,111. The State debt was \$7,529,926, an increase of \$811,000 during the year.

There are 1,469 miles of steam railway and 538 miles of electric line. The population in 1910 was 1,295,346.

**Maryland** (see also Baltimore):

Act of general assembly of, relating to Chesapeake and Delaware Canal Co., 870.

Census of, referred to, 321.

Cession of Government interest in Chesapeake and Ohio Canal to, considered, 1776.

Claims of, against United States for expenditures during War of 1812, 894.

Combinations, unlawful in, discussed and proclamations against, 4400, 4424.

Constitutional amendments received from governor, 63.

District of Columbia, portion of, ceded to Congress by, 92.

Referred to, 86.

Legislature of, arrest and dispersion of members of, would not be justifiable, 3218.

Loan of, to Washington City, payment of, guaranteed by United States, 321.

Ratification of amendment to Federal Constitution by, referred to, 63, 249.

Unlawful combinations in, discussed, and proclamations against, 4400, 4424.

**Maryland in Liberia.**—A negro colony to the eastward of Cape Palmas, in what is now the Republic of Liberia, Africa, founded by the Maryland State Colonization Society in 1834. Expeditions sent to Monrovia in 1831 and 1832 proved unsuccessful. John Russworm, a citizen of Monrovia, was chosen the first governor in 1836. In 1857 it became part of Liberia.

**Mason and Slidell**, Confederate envoys to Great Britain and France, removal of, from British steamer *Trent*, 3262, 3263, 3264, 3267, 3268.

**Mason, Otis T.**, member of Board on Geographic Names, 5647.

**Mason and Dixon's Line.**—The boundary line between Pennsylvania and Maryland. It is coincident with the parallel of 39° 43', beginning at the Delaware River and running 244 miles to the westward, and was laid out by two eminent English mathematicians and astronomers, Charles Mason and Jeremiah Dixon, about 1766. Lord Baltimore and William Penn having disputed the boundary between their adjoining grants, the case was taken to London for adjudication and the parties to the suit were ordered to have the line run. The surveyors marked the line with boundary posts, having on one side the arms of Penn and on the other

**Mason and Dixon's Line—Continued.**

those of Lord Baltimore. The line became famous in later days as marking in part the boundary between free and slave States. During the discussion in Congress on the Missouri compromise John Randolph of Roanoke made free use of this phrase, which contributed to its more popular use as such dividing line.

**Masonic, The**, confiscation of, attempted by Spain, discussed, 4626, 4759. Indemnity for, awarded, 4919.

**Massachusetts.**—One of the thirteen original States of the Union; nickname, "The Old Bay State"; motto, "Ense petit placidam sub libertate quietem" ("With the sword she seeks quiet peace and liberty"). It was named from the Massachusetts Indians, who occupied the eastern part of the territory. The name means "At the Great Hills." Massachusetts extends from lat. 41° 14' to 42° 53' north and from long. 69° 53' to 73° 32' west. It is bounded on the north by Vermont and New Hampshire, on the east by the Atlantic Ocean, on the south by the Atlantic Ocean, Rhode Island and Connecticut, and on the west by New York, and has an area of 8,315 square miles.

Massachusetts chartered the first college in America. It has produced more eminent literary men than any other State in the Union. It is the leading State in the manufacture of boots and shoes and cotton and woolen goods. It was visited by Gosnold in 1602 and settled at Plymouth in 1620. This was the third in the order of settlement of the British Colonies in America. Later settlements were made at Salem and Boston in 1628 and 1630. A Confederate union of the Massachusetts, Plymouth, New Haven, and the Connecticut Colonies existed from 1643 to 1684 for defensive purposes. Massachusetts took an important part in the Revolutionary War and the organization of the Government. It was the scene of Shays's Rebellion in 1786-87.

Statistics of agriculture reported to the Federal Census Bureau, under date of April 15, 1910, place the number of farms in the State at 36,917, comprising 2,875,941 acres, valued, with stock and improvements, at \$226,474,025. The average value of land per acre was \$36.69, as compared with \$27.62 in 1900. The value of domestic animals, poultry, etc., was \$20,741,366, including 252,416 cattle, valued at \$9,348,076; 64,283

horses, \$8,671,997; 268 mules, \$43,385; 103,108 swine, \$978,989; 32,708 sheep, \$156,498. The yield and value of field crops for 1911 is given as follows: Corn, 47,000 acres, 2,068,000 bushels, \$1,716,000; oats, 8,000 acres, 280,000 bushels, \$162,000; rye, 3,000 acres, 48,000 bushels, \$46,000; potatoes, 25,000 acres, 2,325,000 bushels, \$2,232,000; hay, 584,000 acres, 631,000 tons, \$14,513,000; tobacco, 5,600 acres, 9,240,000 pounds, \$1,848,000. The mineral products of the State in 1910 were \$6,077,370. Of this, stone, of which Massachusetts is one of the largest producers, was valued at \$3,539,794. The total bonded debt of the State at the end of the fiscal year ending Nov. 30, 1910, was \$81,077,452. The net receipts during the year amounted to \$11,992,395, and the expenditures were \$13,481,137; cash balance, \$2,186,431.

The salt-water fisheries of the State for 1905 produced \$8,986,186.

The first mercantile census ever taken in the United States was taken in Massachusetts in 1905. It showed that the value of goods sold by the establishments of the State was \$1,384,241,383, of which \$967,009,354 was credited to Boston. In 1907 there were 181 National banks in the State, of which 20 were in Boston; 189 savings banks, 135 co-operative banks and 45 trust companies. The population in 1910 was 3,366,416.

**Massachusetts** (see also Boston; Lynn): Claims of, for services rendered by militia in War of 1812 discussed, 795, 854.

Constitution of United States, ratification of certain articles of, evidences of, 166.

Governor of—

Referred to, 65.

Refusal of, to furnish militia for defense of frontier, 501.

Prisoners in, provision for, recommended, 183.

**Massachusetts, The** (battleship), mentioned, 6396.

**Massachusetts Bay Company.**—A colonizing company chartered in England, March 19, 1628, by John Humphrey, John Endicott, and others. The company grew out of the preexisting Dorchester Company, and was the result of imperiled political and religious rights in England under Charles I. The patentees received a grant of land extending from the At-

**Massachusetts Bay Company**—*Continued.*

lantic to the "Western Ocean," in width from a line running 3 miles north of the Merrimac to one running 3 miles south of the Charles. Endicott headed a colony which settled at Salem in September, 1628. March 4, 1629, a new charter was granted to the governor and company of Massachusetts Bay, and the old officers of the company were succeeded by John Winthrop as governor, with a deputy and 18 assistants. In 1630 Winthrop, at the head of a large body of settlers, transferred the company headquarters to America and founded Boston. Under this charter Massachusetts carried on her government for 55 years.

**Massacre of Christians.** (See Armenians.)

**Mataafa,** insurrection in Samoan Islands under, 5871, 5963.

Arrangements for return of, and other exiles, 6336.

**Matanzas, Cuba,** harbor and forts at, shelled by American squadron, 6315.

**Mather, Thomas,** treaty with Indians concluded by, 889.

**Mathews, John,** district supervisor, nomination of, 91.

**Matlock, Gideon C.,** treaty with Indians concluded by, 2304.

**Matthews, Charles;** b. New Castle, Lawrence County, Pa., Oct. 15, 1856; attended public schools until 14 years of age; on leaving school was employed in rolling mills and attended night school; served in both branches of city councils; elected sheriff of Lawrence County in 1897; engaged in manufacturing and banking; elected to the 62d Congress from Pennsylvania.

**Matthews, Edmund O.,** member of Gun Foundry Board, 4748.

**Matthews, George,** instructions to, regarding possessions of Florida, 491. Unauthorized conduct of, discussed and powers given, revoked, 492.

**Matthews, James C.,** recorder of deeds, District of Columbia, nomination of, and reasons therefor, 5116.

**Maury, Matthew F.:** Immigration plans of, referred to, 3571.

Improvement in science of nautical affairs by, 2670.

**Maury Mountain Forest Reserve,** Oregon, proclaimed, 7186.

**Maximilian (Ferdinand Maximilian Joseph):**

Capture and execution of, referred to, 3725.

Decrees of—

Declaring blockade of ports proclaimed void, 3631.

Reestablishing slavery in Mexico referred to, 3569.

Organization for purpose of avenging death of, referred to, 3780.

**Maxwell, Hugh,** authority issued to, to arrest unlawful expeditions, 2697.

**Mayaguez, Puerto Rico,** land at, reserved for custom house, 6840.

**Maybrick, Florence E.,** imprisonment of, in Great Britain, 6101.

**Mayflower Descendants.**—Organized in the City of New York Dec. 22, 1894, by lineal descendants of the Mayflower pilgrims, "to preserve their memory, their records, their history, and all facts relating to them, their ancestors, and their posterity." Every lineal descendant over eighteen years of age, male or female, or any passenger of the voyage of the *Mayflower* which terminated at Plymouth, Mass., December, 1620, including all signers of "The Compact," are eligible to membership. The initiation fee is \$10 and the annual dues are \$5. The Triennial Congress is held in September at Plymouth, Mass. Societies have been organized in New York, Connecticut, Massachusetts, Pennsylvania, Illinois, District of Columbia, Ohio, New Jersey, Wisconsin, Rhode Island, Michigan, Minnesota, Maine, Colorado, and California.

**Mayflower Compact.**—Before the landing of the Pilgrim Fathers the company gathered in the cabin of the *Mayflower*, in Provincetown Harbor, Nov. 11, 1620, and there bound themselves into a body politic and pledged themselves to abide individually and collectively by the laws they should make.

**Mays, Dannitte Hill;** b. Madison Co., Fla., April 28, 1852; served three terms in the Florida legislature, and one term as speaker of the house of representatives; was elected to the 61st and 62d Congresses from Florida.

**Mayson, F. G.,** lieutenant in Marine Corps, appointment of, referred to, 2273.

**Maysville, Washington, Paris and Lexington Turnpike Road Co.,** act authorizing subscription of stock in, vetoed, 1046.

**Mazzei Letter.**—A private letter written by Thomas Jefferson to an Italian named Mazzei in 1796. The letter was translated and published in an English paper. It aroused much animosity against Jefferson by its supposed allusion to Washington and

**Mazzei Letter—Continued.**

others as those "Samsons in the field and Solomons in the council" who had formed an Anglican monarchical aristocratic party in America whose avowed object was "to draw over us the substance, as they had already done the forms, of the British Government."

**Mead, Cowles;** elected representative in Congress from Georgia in 1805, but his seat was successfully contested by Thomas Spalding; appointed secretary of Mississippi Territory in 1806.

**Mead, Cowles:**

Arrival of Aaron Burr in Mississippi announced by, 407.

Surrender of Aaron Burr announced by, 409.

**Meade, George Gordon;** soldier; b. Cadiz, Spain, Dec. 31, 1815; graduated U. S. Military Academy, 1835; served in the Seminole War; resigned from the army and engaged in surveying and engineering; 1845-47 served in the Mexican War; made surveys of lakes, rivers and harbors as lieutenant of engineers in government service; commissioned brigadier-general of volunteers, Aug. 31, 1861; served through the Civil War; but his name will ever be connected with the battle of Gettysburg, where he commanded on the 1st, 2d, and 3d days of July, 1863, and the victory which produced such decided results; promoted to major-general in 1864, and as a special honor was given command of the grand review which took place in Washington at the close of the war; died Philadelphia, Pa., Nov. 6, 1872.

**Meade, George G.:**

Instructions to, referred to, 3826.

Order to, regarding suppression of military expedition, 3631.

**Meade, Richard W.,** imprisonment of, by Spain and claim arising out of, 594.

Agreement with great chief of Tutuila concluded by, 4122.

Mentioned, 5833.

**Measure.** (See Weights and Measures.)

**Meat Products.** (See Animals and Animal Products.)

**Mechanicsville (Va.), Battle of.**—One of the Seven Days' Battles before Richmond. On June 26, 1862, Lee massed his troops on his left, A. P. Hill crossing to the north side of the Chickahominy and being supported by Longstreet and D. H. Hill, Jackson joined the Confederate

forces later. The Confederate attack on Fitz-John Porter at dawn was repulsed, but the Federal army subsequently retired. According to Federal accounts, the Confederate loss was 1,500, the Union 361. This battle is also called the battle of Beaver Dam Creek.

**Mecklenburg Declaration.**—A series of resolutions purporting to have been adopted by the citizens of Mecklenburg County, N. C., May 20, 1775, declaring their independence of Great Britain, followed by a second series of resolutions, adopted on the 31st of May, providing for a local government. The independence resolutions were first published in 1819 and created much discussion as to their genuineness. They contained several phrases almost or quite identical with portions of the document adopted at Philadelphia, July 4, 1776. Thomas Jefferson immediately declared them fraudulent. It was admitted that the original Mecklenburg resolutions were burned in 1800 and that those published in 1819 were reproduced from memory by a son of one of the secretaries of the meeting. The North Carolina legislature investigated the matter and secured enough evidence to warrant them in making May 20 a State holiday. The historians are divided in opinion. Hildreth, one of the most critical, admits the validity of the Declaration, but, curiously enough, says it was made May 31. Bancroft contends that only a provisional government was formed, and that on the date of the 31st. There is no dispute as to the fact that a government was organized. In North Carolina, among the Scotch-Irish people, there exists little doubt that the Mecklenburgers declared their independence on May 20, 1775. William A. Graham, Secretary of the Navy from 1850 to 1852 and candidate of the Whigs for Vice-President in 1852, was the son of Joseph Graham, who was present at the meeting in Charlotte which declared independence, and testified to the fact.

**Melbourne, Australia:**

International exhibition at, to celebrate centenary of founding of New South Wales, 5176.

International Exhibition of Arts and Industries at, discussed, 4519, 4559, 4625.

**Melton, Miss,** assailants of, in Turkey, conviction of, discussed, 5962.

**Members of Congress.** (See Congress.)

**Memphis (Tenn.), Capture of.**—After the evacuation of Corinth, Miss., by Beauregard, Fort Pillow, 40 miles above Memphis, was useless, as the Union army could take it from the rear. The Confederates therefore spiked the guns, burned the barracks, and what supplies they could not take away, and in their gunboats dropped down the river to Memphis. The Confederate fleet consisted of 8 vessels, mounting 28 guns, commanded by Commodore Montgomery. On June 6, 1862, Commodore Davis, with 5 Union gunboats and 2 rams, appeared before the city, and Montgomery went forth to give him battle. After one hour and twenty minutes of fierce fighting the Confederate fleet was defeated. Col. Ellet, who built the rams, was the only person injured on the Federal side. The number of killed and wounded on the Confederate side is not known, but was probably between 80 and 100.

**Memphis, Tenn.,** navy-yard to be established at, 2202.

Proposition of city authorities of, relative to, 2829.

**Menard, Pierre,** treaty with Indians concluded by, 988, 989, 991, 1029.

**Mercantile Marines** of France, Germany, Great Britain, and Italy, referred to, 4978.

**Merchant Marine.**—The British navigation acts, beginning in 1645, prohibited importations into the Colonies except in English or colonial built ships. Though seriously restricting commerce, these acts served to stimulate the shipbuilding interest. Between 1789 and 1797 the registered tonnage increased 384 per cent. From 1837 to 1857 the tonnage increased from 810,000 to 2,268,000, and in 1861 the aggregate tonnage of American registered vessels reached the highest point—5,539,813. This nearly equaled the combined tonnage of all other nations except-

**Merchant Marine—Continued.**

ing Great Britain, which alone was slightly in excess of it. For various reasons American shipping fell off since the Civil War, until it became quite insignificant. During recent years, however, a revival has taken place, more especially in the coastwise trade, the number of vessels (1905) engaged in it being 21,788, with a tonnage of 5,441,688.

The total tonnage of vessels entered at and cleared from American ports in 1908 was 76,820,891, of which 16,908,434 tons, or 21 per cent., represented American vessels, and 79 per cent. foreign bottoms. The total number of vessels engaged in river, lake, canal, coastwise, and ocean trade was, in 1908, 26,368.

**Merchant Marine.** (See Commerce discussed.)

Need for, discussed by Taft, 8054.

**Merchant Vessels:**

Claims resulting from destruction of United States vessels by Confederate vessels, referred to, 3964.

**Merrimac, The.** (See Hampton Roads (Va.), Battle of.)

**Merrimac, The** (Confederate ram), engagement of, with—

*Cumberland*, 3345.

*Monitor*, 3313.

**Merrimac, The.**—This vessel, a two-masted iron steamship of 5,000 tons, was used by the United States in the Spanish-American War as a collier. During the month of May, 1898, the Spanish fleet under Admiral Cervera took refuge in the harbor of Santiago. The city of Santiago is well located within the harbor, about 5 miles from the ocean proper. The channel leading from the harbor out to the ocean is at certain points quite narrow and comparatively easy to obstruct. This channel was well covered by Spanish batteries on shore, so that it was deemed unwise on the part of the American officers to attempt to enter the harbor with war ships. The American

commander decided to attempt to block the channel, and for this purpose concluded to sink the *Merrimac* at a narrow point. It follows necessarily that such an undertaking would be exceedingly dangerous to those who were to steer the unarmed vessel within the channel, and then at the proper moment sink it and endeavor to escape by swimming ashore or attempting to reach a life-boat.

Assistant Naval Constructor Richmond P. Hobson was chosen at his own request to execute the hazardous undertaking. Volunteers were called for to accompany and assist him. Fifteen hundred officers and men responded, gallantly tendering services, and begged that they be accepted. Six only were accepted, whose names are Daniel Montague, chief master-at-arms of the *New York*; George Charrette, gunner's mate of the *New York*; John Murphy, cockswain of the *Iowa*; Francis Kelly, water tender; George F. Phillips, machinist, and Cockswain O. W. Deignan, the last three of the *Merrimac*. Randolph Clousen, cockswain of the *New York*, was during the delay of one day added to the company. On the morning of June 3, 1898, at about half past 3 o'clock, Hobson steered straight into the channel under a heavy fire from Spanish guns on both sides. As the *Merrimac* reached the spot that had been picked out for her sinking he gave orders to explode the torpedoes. Two of them only exploded. Amid the tremendous fire from the shore batteries, the firing of 8 electric mines in the channel, and torpedoes from 2 Spanish vessels, the collier sank, her masts and smokestack showing above the water, obstructing but not blocking the fairway. As the ship went down the Spaniards sent up a cheer, believing they had sunk some large war vessel. Hobson and his men held on to a catamaran belonging to their sunken ship for about an hour. Just after sunrise a steam launch came down the harbor with Admiral Cervera on board. Hobson and his men were taken on board the launch, were courteously treated by their captors, and placed in prison. They were all exchanged July 6.

The sinking of the *Merrimac* was an act of heroism which challenged the admiration of the world. The President, in a message to Congress, speaking of the incident, said: "This enterprise, demanding coolness, judg-

**Merrimac, The—Continued.**

ment, and bravery amounting to heroism, was carried into successful execution in the face of a persistent fire from the hostile fleet as well as from the fortifications on shore" (6305). Rear-Admiral Sampson said: "I cannot myself too earnestly express my appreciation of the conduct of Mr. Hobson and his gallant crew. I venture to say that a more brave and daring thing has not been done since Cushing blew up the *Albatross*" (6306). The President recommended that a vote of thanks be given Hobson by Congress. He and his crew were subsequently promoted.

**Merrimac, The** (United States collier), sinking of, in Santiago Harbor, Cuba, by Lieut. Richmond P. Hobson, 6305, 6316.

Naval Cadet Powell to be made ensign for attempting to rescue force of, 6306.

Thanks of Congress to Lieut. Hobson and promotion of, recommended, 6306.

**Merritt, Wesley**; soldier; b. New York City, June 16, 1836; graduated U. S. Military Academy, 1860; brevetted major for gallant and meritorious services at Gettysburg; promoted to major-general, 1895, and appointed to command in the Philippines and made military governor in 1898; retired, 1900.

**Merritt, Wesley:**

Directed to aid in executing laws in Indian Territory, 5483.

Expeditions to Philippine Islands under command of, 6315.

Attack upon and surrender of Manila, 6319.

Thanks of President tendered, 6579.

Instructions of President regarding military occupation of islands, 6569, 6571, 6572.

Joint occupancy with insurgents not to be permitted, 6579.

**Mesa Verde National Park.** (See Parks, National.)

**Messages and Papers of the Presidents**, resolution authorizing compilation of, and requesting Hon. James D. Richardson to take charge of the work of preparing the same. (See Prefatory note to first volume.)

**Messages, Presidential.**—A written communication by the President to Congress. At the beginning of each session an annual message is transmitted going into details of our standing as a Nation and recommending such action by the House and Senate

as may be deemed necessary to the progress of the country or the correction of abuses. Special messages are sent from time to time to either or both Houses, submitting treaties or correspondence, or in answer to a request from either branch for particular information, or to recommend specific or immediate legislation. Veto messages are sent with the returned bills which the President disapproves, in which he states his reasons for such disapproval. After pointing out wherein a bill fails to meet the requirements of the case he usually suggests the way to an effective measure that may receive Executive sanction. Article II., section 3, of the Constitution declares that the President "shall from time to time give to the Congress information of the state of the Union and recommend to their consideration such measures as he shall judge necessary and expedient." Washington and John Adams read their annual messages to Congress. Jefferson inaugurated the custom, since followed by all of his successors, of sending messages in writing to Congress (313). They are carried by the private secretary of the President, who is received at the door of the Senate or House, and whose presence is formally announced by an officer of the body, whereupon he delivers the message to the clerks.

**Messages, Presidential.** (See Annual Messages; Special session messages; Veto messages, under the several Presidents.)

**Meteorological Observatory**, establishment of, at Fort Myer, Va., recommended, 4792.

**Mettakahtla Indians.** (See Indian Tribes.)

**Mexican Cotton-boll Weevil**, report on, 7079.

**Mexican War.**—The Mexican War grew out of the annexation of Texas by the United States. March 2, 1836, Texas seceded from Mexico and declared her independence, which she maintained by the defeat of Santa Anna in the battle of San Jacinto, April 21, 1836. The United States, England, France, and Belgium recognized the new Government as independent. Dec. 29, 1845, Texas was annexed to the United States. A dispute as to the boundary induced President Polk to order Gen. Taylor to take a position in the disputed territory on the left bank of the Rio Grande. Here (near Matamoros) he was attacked April 23, 1846, by

**Mexican War—Continued.**

Mexicans under Arista, and a portion of his army was captured. Taylor advanced into the north of Mexico, leaving garrisons at Corpus Christi and at Fort Brown, opposite Matamoros, and after the battles of Palo Alto (May 8, 1846), Resaca de la Palma (May 9, 1846), Buena Vista (Feb. 22, 23, 1847), and a number of lesser fights, in which the Mexicans were defeated, he obtained control of all northern Mexico. Gen. Scott, landing at Vera Cruz, advanced to the City of Mexico, defeating Santa Anna at Cerro Gordo (April 17, 18, 1847), Contreras (Aug. 19, 20, 1847), Churubusco (Aug. 20, 1847), and Molino del Rey (Sept. 7, 8, 1847), causing the surrender of the capital and the termination of the war Sept. 14, 1847. During these operations in Mexico Gen. Kearny and Lieut. Fremont occupied California and New Mexico with American troops. Under the treaty of peace signed at Guadalupe Hidalgo (2423) Mexico, upon the payment by the United States of \$15,000,000 and of private claims which amounted to \$3,250,000, ceded to the latter the territory now comprising Nevada, Utah, most of Arizona, a large part of New Mexico, portions of Colorado and Wyoming, and all of California. (2437.)

**Mexican War:**

American blood shed on American soil, 2292.

American forces—

Gallantry of, referred to, 2490.

General officer to take command of, required, 2358.

Increase in, recommended, 2358.

Kind of money paid to, inquired into, 2360.

  - Increase in, recommended, 2399.
  - Promptness of, in rushing to the field, 2323.
  - Report regarding, transmitted, 2359.
- Mexico.**—A North American Republic, extending from lat. 14° 30' to 32° 42' north and from long. 86° 46' to 117° 8' west. It is bounded on the north by the United States, on the east by the Gulf of Mexico and the Caribbean Sea, on the south by British Honduras, Guatemala, and the Pacific Ocean, and on the west by the Pacific Ocean. The Republic includes Lower California and Yucatan. It has 27 States, 1 federal district, and 3 territories. Mining, agriculture, and cattle raising are extensively carried on. The Government is modeled after that of the United States. The language is Spanish, the religion Roman Catholic, and the people chiefly creoles, Indians, and mixed races. Mexico has an area of 767,316 sq. miles and a population (1900) of 13,607,259. The early inhabitants were Toltecs, Aztecs, and other native races.
- Some of the chief events in the history of the country are: The invasion by Cortez, 1519; conquest

of the capital, 1521; the country made a Spanish colony under the name of New Spain (a viceroyalty after 1535); revolution under Hidalgo, 1810; partially suppressed, 1815; revolution under Iturbide and Spanish viceroy deposed, 1821; Empire established, 1822; Texas seceded, 1836, which finally resulted in war with the United States, 1846-1848. There were frequent changes in its government until 1862, when war began with France. French military commanders and notables of Mexico and foreign countries having claims against the country, early in July, 1863, established a regency in Mexico, with Archduke Maximilian as emperor, established an empire, which was upheld by French troops, during the Civil War in the United States. The United States protested at the time against the establishment of the Empire because it was in violation of the Monroe Doctrine. Shortly after the close of the American Civil War the French troops were withdrawn, and Maximilian, being left to his own resources, was unable to maintain the Empire. He was captured by the Republican forces, condemned to death, and shot in 1867. Juarez, leader of the Republicans, organized a government in 1867, and was elected President of the Republic. At the election for president in 1871 Juarez was defeated by Porfirio Diaz, but refused to relinquish his power and Diaz maintained a civil war with varying success until in November, 1876, after defeating the government troops, he entered Mexico City, assumed power as provisional president and was later elected to that office under the constitution. The original constitution of 1857 provided that no president should succeed himself. Manuel Gonzalez, a nominee of Diaz, was made president for the term 1880-1884, and the constitution was amended so as to permit successive terms for the president and Diaz was reelected successively for seven terms.

Diaz, by some called the Tyrant and by others the Father of modern Mexico, was, in 1911, deposed by forces so puny in a military sense, that the result can only be comprehended by accepting as truth the oft-repeated assertion that ninety per cent. of the people of Mexico opposed him. His soldiers proved to be unreliable; his military commanders were incompetent; and while handfuls of his men were ineffectually striving to oppose the rebel forces in

**Mexico—Continued.**

the field he kept the bulk of his army inactive at Mexico City, as though fearing an uprising in the very capital. Madero led the only respectable command of insurrectos, though it deserved the appellation regiment more than the name army. He conducted a campaign near the United States border, finally driving two hundred-odd Government troops out of Ciudad Juarez. This success, trifling as it may seem, gave the final shake to Diaz's house of cards and it came rattling down. Diaz immediately resigned and fled to Spain. All through the country bands of marauders went about plundering and murdering, and, for dignity's sake, dubbed themselves insurrectos. In Lower California a band of Socialists campaigned in a futile but verbose way, and the Yaqui Indians, like some North American Indians in 1861, thinking that the rebellion gave them a chance to redeem their race's heritage, promiscuously murdered and destroyed.

The United States sent 20,000 troops to camp at San Antonio and Galveston, Texas. The orders were issued March 8, 1911. Officially, maneuvers were contemplated; unofficial surmises, however, went all the way from intervention to the repulsion of foreign troops sent to protect their countrymen. The full purpose has never been explained, but it was probably a mixture of reasons: (1) our treaty's relations required us to police the border so effectually that no munitions of war or men for the rebel junta could be smuggled across; (2) the outrages on foreigners probably caused foreign powers to cogitate whether they should protect their people, or in deference to the Monroe Doctrine, request us to do so; and (3) in order to get some profit out of the mobilization, maneuvers were ordered.

When the provisional government, which replaced the Diaz machinery, was firmly seated in the saddle, the troops were recalled, the last of them departing in early August, 1911.

**Mexico, City of, Surrender of.**—After a series of brilliant operations the United States invaders had overcome three times their own number and were in possession of the capital of Mexico. Before daylight of Sept. 14, 1847, the city council had waited upon Gen. Scott, the American commander, and demanded terms of surrender. He replied that the city had come into his power the night before and that the terms accorded would be imposed by the American army. At 7 o'clock the United States flag was hoisted on the top of the National Palace, and at 9 o'clock Gen. Scott rode into the plaza, escorted by the Second United States Dragoons. Soon after taking possession of the city a fire was opened upon the American soldiers from the roofs of houses, from windows, and street corners by about 2,000 convicts who had been liberated the night before by the fleeing Government. These were joined by as many soldiers, who had disbanded themselves and assumed the garb of citizens. This firing was kept up in a desultory way for 24 hours, and many soldiers were killed or wounded.

**Mexico, Treaties with.**—The treaty of peace, friendship, limits, and settle-

ment, known as the Guadalupe Hidalgo Treaty, was concluded in 1848, and closed the Mexican War. After a declaration of peace between the two nations, the treaty provided for the appointment of a commission to arrange a provisional peace and restore constitutional government so far as military occupation would permit.

Arrangements were made for the evacuation of the country as soon as possible after the ratification of the treaty, the evacuation of the capital to take place within one month after said ratification, Mexico agreeing to render all possible assistance. All Mexican possessions captured by the troops of the United States were to be restored, with all arms, artillery, and munitions of war; the final evacuation of Mexican territory to take place within a period of three months after ratification of the treaty, if possible; should the ratification be delayed so that the unhealthy season should overtake the troops, Mexico pledged herself to the performance of such friendly offices as will facilitate the removal of the troops to a more healthy location; all prisoners of war to be restored as soon as practicable after ratification.

The boundary line between the two republics was defined by this treaty, but modified by the Gadsden Treaty of 1853. Mexicans, who by the change of boundary should pass from the jurisdiction of Mexico, were to be incorporated as citizens of the United States with all reasonable ease and expediency. For the boundary extension the United States agreed to pay to Mexico the sum of fifteen million dollars in gold or silver coins of Mexico; three millions to be paid at the city of Mexico immediately after ratification, and the remaining twelve millions in annual installments of three million dollars each, with interest at the rate of six per cent. per annum. The United States agreed to the payment of all claims due and to become due, so that Mexico should be free from all expense of any kind in connection with them. The Mexican government was discharged from all claims of United States citizens which arose prior to the signing of this treaty; and the United States agreed to pay the same in a sum not to exceed three and one-quarter millions of dollars.

The privilege of fortifying any point within its own territories was

**Mexico, Treaties with—Continued.**

reserved by both nations. Supplies necessary to the support of United States troops within the territories of Mexico prior to evacuation, to be admitted duty free. Until the rehabilitation of the custom house in Mexico, goods arriving shall be exempt from confiscation if dutiable. Disputes arising in regard to matter not covered clearly by this treaty are to be arranged amicably by the parties; failing such amicable arrangement, then they are to be submitted to arbitration of commissioners or of a friendly power. Provision was made for the possible outbreak of war between the two nations.

The treaty of 1853, known as the Gadsden Treaty, transferred to the United States the territory out of which Nevada, Utah, California, and parts of Arizona, New Mexico, Colorado, and Wyoming were erected, comprising 45,535 square miles, and relinquishing claims against the United States for damages caused by Indian depredations amounting to between fifteen millions and thirty millions of dollars. In return, the United States paid the sum of ten millions of dollars, seven millions at the time of signing the treaty, and three millions on the completion of the survey. No opposition to passage on the plank and rail road across the Isthmus of Tehuantepec of which the government of Mexico had pledged its support was to be offered by either party. The privilege of carrying United States mail over the road was accorded without liability of duty charges on such parts of the mail as were not intended for distribution en route.

The boundary convention of 1882 provided for the establishment of an International Boundary Commission for the replacing of such monuments as should be deemed necessary to clearly define the boundary between the two republics. The powers of the commission, the sort of monuments to be used, the cost thereof, and the expenses of the commission, were all clearly detailed in the treaty. Penalties were also agreed upon for destruction or removal of such monuments.

The boundary convention of 1884 established and more clearly defined the boundary of the Rio Grande and the Rio Colorado than did the treaty of 1848 and the treaty of 1853. Several boundary conventions were concluded at later dates to extend the

time allowed to the commission for the completion of their work. By a boundary convention of 1889 a boundary commission was established for the determination of the boundary line consequent upon the changes in the courses of the Rio Grande and the Rio Colorado. (For the extradition treaty of 1899, see Extradition Treaties.)

**Meyer, George von Lengerke**, of Hamilton, Mass., Secretary of the Navy in President Taft's Cabinet; b. Boston, June 24, 1858; graduated from Harvard University in 1879; member of the Massachusetts House of Representatives, 1892-1896; speaker, 1894-1896; ambassador to Italy, 1900; transferred to Russia, 1905; recalled, 1907, to enter the Cabinet as Postmaster-General, holding that post until March 6, 1909, when he took oath of office as Secretary of the Navy.

**Michigamia Indians.** (See Indian Tribes.)

**Michigan.**—One of the United States; nickname, "The Wolverine State"; motto, "Si quæris peninsulam amœnam, circumspice" ("If you seek a delightful peninsula, look about you"). It consists of 2 peninsulas, which extend from lat. 41° 45' to 47° 30' north and from long. 82° 25' to 90° 30' west. The southern peninsula is bounded on the east by Lakes Huron, St. Clair, and Erie and by Canada (separated by the St. Clair and Detroit rivers), on the south by Indiana and Ohio, and on the west by Lake Michigan. The upper peninsula (separated from the southern by the Strait of Mackinaw) lies between Lake Superior on the north and Lakes Huron and Michigan and the State of Wisconsin on the south and west, and has an area of 58,915 square miles. The State is noted for its great mineral wealth. Its chief industries are the production of copper, salt, lumber, wool, and iron, and in the manufacture of furniture it is one of the most prominent States in the Union. The lumbering industry, in which it formerly led the country, has declined, owing to misuse of the forest, although the industry is still considerable. Michigan was first settled by the French at Sault Ste. Marie in 1668. It was ceded to Great Britain in 1763, was formally surrendered to the United States in 1796, formed

**Michigan—Continued.**

part of the Northwest Territory and later of Indiana Territory, and was constituted Michigan Territory in 1805. Detroit was taken by the British in 1812, but was recovered by the United States in 1813. Michigan was admitted to the Union in 1837.

Statistics of agriculture reported to the Federal Census Bureau, under date of April 15, 1910, place the number of farms in the State at 206,960, comprising 18,940,614 acres, valued, with stock and improvements, at \$1,088,858,379. The average value of farm land was \$32.48. The value of domestic animals, poultry, etc., was \$137,803,795, including 1,497,823 cattle, valued at \$40,500,318; 610,033 horses, \$71,312,474; 3,700 mules, \$493,825; 1,245,833 swine, \$9,755,042; 2,306,476 sheep, \$9,646,595; poultry, \$5,610,958. The yield and value of field crops for 1911 is given as follows: Corn, 1,690,000 acres, 55,770,000 bushels, \$36,250,000; wheat, 1,025,000 acres, 18,450,000 bushels, \$16,236,000; oats, 1,500,000 acres, 42,900,000 bushels, \$19,734,000; rye, 400,000 acres, 5,840,000 bushels, \$4,964,000; potatoes, 330,000 acres, 31,020,000 bushels, \$22,024,000; hay, 2,411,000 acres, 2,797,000 tons, \$47,549,000. The mineral products of the State consist largely of copper and iron, though coal, and building stone, sand, gravel, cement, etc., are taken out in paying quantities. The State ranks second in the production of iron ore. In 1910 there were mined 13,303,906 long tons, valued at \$41,393,585. The Marquette range, wholly in the State, and the Menominee and Gogebic, extending into Wisconsin, are rich mineral ledges. The State is one of the three largest producers of copper, being surpassed only by Arizona and Montana. The output in 1909 was 227,005,923 pounds, the largest in the history of the industry, valued at \$30,267,456; in 1910, only 219,000,000 pounds was produced, and in 1911 there was a further curtailment of about 5,000,000 pounds on account of the low price of the metal and the general condition of the market. The coal production in 1910 was 1,534,967 tons. The total receipts reported by the State Treasurer for the fiscal year of 1911 were \$12,344,453; the disbursements, \$12,956,591; balance on hand June 30, 1911, \$2,235,425.

The manufacturing business is concerned chiefly with lumber, agricul-

tural products, metals and mining. In 1904, 7,446 establishments with an aggregate capital of \$337,894,102 employed 300,000 persons and converted \$232,516,583 worth of raw material into finished product valued at \$429,039,778.

In 1908 there were 8,723 miles of steam railways and 930 miles of electric lines exclusive of city street railways. The population in 1910 was 2,810,173.

**Michigan, Lake.** (See Lake Michigan.)

**Michilimackinac.** (See Mackinaw.)

**Middle Creek (Ky.), Battle of.**—Jan. 9, 1862, Col. James A. Garfield broke up his camp at Muddy Creek, Ky., and advanced with 1,800 men to attack Gen. Humphrey Marshall, who had some 2,500 troops, in Johnson County. Marshall, being advised of Garfield's approach, took up a position on the heights of Middle Creek, about 2 miles from Prestonburg. On the morning of the 10th Garfield began the attack. The battle lasted all day. Marshall retired from the field in the evening upon the arrival of Federal reinforcements and burned his stores to prevent their falling into Federal hands. Seventy-five of the Confederate dead were picked up on the field. The Union loss was less than 30, according to Federal accounts.

**Middle States,** armed neutrality in, discussed, 3225.

**Midnight Appointments.**—During the last days of his Presidential term John Adams, piqued at the success of Jefferson, whom he bitterly opposed for the Presidency, made a number of Federal appointments, in every instance of men opposed to Jefferson and his principles. Among the appointments were 16 circuit judges. Some of the commissions of these appointees were signed just before midnight of March 3, 1801, and were called "midnight appointments."

**Midway Island,** referred to, 5187.

**Milan Decree.**—Nov. 11, 1807, France and England being then at war, the King of Great Britain and his privy council issued a decree forbidding trade between the United States and any European country under Napoleon's power. Napoleon thereupon, in retaliation, on Dec. 7, 1807, issued the Milan Decree, in which he declared "denationalized," whether found in continental ports or on the high seas, any vessel which should submit to search by a British vessel or should touch at or set sail to or from Great Britain or her Colonies. (See also Berlin Decree; Embargo; Orders in Council.)

**Milan, Italy.** Beneficence Congress at, 4626.

**Mileage.**—Compensation for traveling expenses at a certain rate per mile. The First Congress passed a law allowing each member \$6 for every 20 miles traveled in going to and from Congress. In 1818 this was raised to \$8, and in 1856 mileage was limited to two sessions. Railway transportation having cheapened traveling expenses, Congress in 1866 reduced the mileage to 20 cents a mile each way.

**Mileo, Nicolino,** impressment of, into service of and punishment by Italy, referred to, 5673.

**Miles, Nelson Appleton;** soldier, author; b. Westminster, Mass., Aug. 8, 1839; served during Civil War as a brigadier-general of volunteers; promoted to major-general, 1890, and success-

fully conducted campaigns against the Indians, and on several occasions prevented war with the Indians by judicious and humane settlement of difficulties without the use of military power; legislatures of Kansas, Montana, New Mexico and Arizona passed unanimous votes of thanks for his services on their borders; in the War with Spain, in 1898, he mobilized the regular army of 25,000 men and organized 200,000 volunteers for emergency; took command at Santiago, Cuba, July 11, 1908, and led an army of occupation to Porto Rico; wrote "Military Europe," "Observations Abroad," "From New England to the Golden Gate," etc.

Surrender of Indians to, 5099.

**Miles, The,** claims of owners of, against Portugal, 2453.

**Military Academy.**—As early as 1770 the idea of a National Military Academy had been advanced. A committee of the Continental Congress was appointed to "prepare and bring in a plan of a military academy of the army." Washington called the attention of Congress to the matter in 1793, and in 1796 recommended the institution of a military academy (194). March 16, 1802, Congress passed the law founding the Academy. On June 20, 1801, the Secretary of War directed that all cadets of the corps of artillerists should report at West Point, on the Hudson River, for instruction, and on Sept. 1, 1801, the school was opened, with four army officers and one civilian as administrators and instructors. The present high standard of the Academy is due largely to the efforts of Bvt.-Maj. (afterwards Gen.) Sylvanus Thayer, of the Corps of Engineers, known as the "Father of the Academy." The General Commanding the Army has, under the War Department, supervision of the Academy. The immediate government consists of a Superintendent, commandant of Cadets, and seven commissioned professors. The act of Congress of June 6, 1900, provided that the corps of cadets shall consist of 1 from each Congressional district, 1 from each Territory, 1 from the District of Co-

**Military Academy—Continued.**

lumbia, 2 from each State at large, and 30 from the United States at large. The act approved June 28, 1902, provided that the number of cadets to be appointed from the United States at large is not at any one time to exceed 40. An additional appointment of 1 cadet from Puerto Rico was authorized by a provision in the act of March 3, 1903. With each candidate appointed 2 alternatives are also named. The act of June 11, 1878, had provided that the number of cadets at large should not exceed 10, and this number had been increased to 20 by an act of March 2, 1899. The cadets are appointed by the President, those from the Congressional districts being recommended by a Congressman from the respective districts, and those from the States at large being recommended by the Senators of the respective States. Those from the United States at large and from the District of Columbia are appointed directly by the President. With the exception of those appointed from the United States at large, applicants must be actual residents of the Congressional or Territorial districts or of the States respectively from which they are appointed. Except in cases of unexpected vacancies appointments must be made 1 year in advance of the date of admission. By the act of June 28, 1902, it was provided that the pay of the cadets should be fixed at \$500 per year, and 1 ration per day or commutation therefor, such commutation to be \$.30 a day. Each student pays all of the expenses for his personal support.

Outside of studies relating to the art and science of war, the chief subjects of instruction are mathematics, drawing, natural and experimental philosophy, chemistry, geology, mineralogy, physics, electricity, history, constitutional and international law, and the Spanish and French languages. Examinations for entrance to the Academy are held at various army posts throughout the country on the 1st of May of each year, and are under the supervision of the Secretary of War. In 1902 the standard of requirements for admission was raised and provision was made for the admission of cadets by certificates of educational qualification. Candidates must be between 17 and 22 years of age, at least 5 feet in height, of sound health and good moral character. They take the oath

of allegiance to the United States and serve 8 years unless sooner discharged. Graduates are commissioned second lieutenants by the President. In 1903, the number of officers and instructors was 89; and in 1904, there were 94. The maximum number of cadets is 529, which includes 1 cadet from Costa Rica receiving instruction under a joint resolution of Congress. From 1802 to 1911 the number of graduates was 5,017. The superintendent is Major-General Thomas B. Barry, U. S. A., and the military and academic staff consists of 122 persons. (See Cadet.)

**Military Divisions and Departments:**

*The Eastern Division.*—Embracing Department of the East, Department of the Gulf, and the Panama Canal Zone; headquarters, Governors Island, N. Y.

*Department of the East.*—Embracing the New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, District of Columbia, Virginia, West Virginia, Ohio, the Island of Porto Rico and islands and keys adjacent thereto; headquarters, Fort Totten, N. Y. Commander, Brig.-Gen. T. H. Bliss.

*Department of the Gulf.*—Embracing the States of North Carolina, South Carolina, Kentucky, Tennessee, Georgia, Florida, Alabama, Mississippi and the Artillery Districts of New Orleans and Galveston; headquarters, Atlanta, Ga. Commander, Brig.-Gen. A. L. Mills.

*The Central Division.*—Embracing Department of the Lakes, Department of the Missouri, Department of Texas, and the military reservations of Fort D. A. Russell, Wyoming; Fort Leavenworth, Kansas, and Fort Riley, Kansas; headquarters, Chicago, Ill. Commander, Brig.-Gen. R. D. Potts (temporary).

*Department of the Lakes.*—Embracing the States of Michigan, Indiana, Illinois, Wisconsin, Minnesota, and North Dakota; headquarters, St. Paul, Minn. Commander, Brig.-Gen. R. W. Hoyt.

*Department of the Missouri.*—Embracing the States of Iowa, Missouri, Kansas (except that part included in the military reservations of Fort Leavenworth and Fort Riley), Nebraska, South Dakota, Wyoming (except that part included in the Yellowstone National Park and the military reservation of Fort D. A. Russell), and Colorado; headquarters, Omaha, Neb. Commander, Brig.-Gen. F. A. Smith.

*Department of Texas.*—Embracing the States of Texas (except that part included in the Artillery District of Galveston), Louisiana (except that part included in the Artillery District of New Orleans), Arkansas, Oklahoma, and New Mexico; headquarters, San Antonio, Tex. Commander, Brig.-Gen. J. W. Duncan.

*The Western Division.*—Embracing Department of California, Department of the Columbia, and Department of Hawaii; headquarters, San Francisco, Cal. Commander, Maj.-Gen. A. Murray.

*Department of California.*—Embracing the States of California, Nevada, Utah and Arizona; headquarters, Fort Miley, Cal. Commander, Brig.-Gen. D. H. Brush.

*Department of the Columbia.*—Embracing the States of Washington, Oregon, Idaho, Montana, so much of Wyoming as is included in the Yellowstone National Park, and Alaska; headquarters, Vancouver Barracks, Wash. Commander, Brig.-Gen. M. P. Maus.

*Department of Hawaii.*—Embracing the Hawaiian Islands and their dependencies; headquarters at Honolulu, H. T. Commander, Brig.-Gen. M. M. Macomb.

*Philippines Division.*—Embracing Departments of Luzon, Department of the Visayas, and Department of Mindanao; headquarters, Manila, P. I. Commander, Maj.-Gen. J. Franklin Bell.

*Department of Luzon.*—Embracing all that portion of the Philippine Archipelago lying north of a line passing southeastwardly through the West Pass of Apo, or Mindoro Strait, to the twelfth parallel of north latitude: thence east along said parallel to longitude 124° 10' east of Greenwich, but including the Island of Palawan and adjacent small islands, the Island of Masbate; thence north-erly to and through San Bernardino Straits; headquarters, Manila, P. I. Commander, Brig.-Gen. F. Funston.

*Department of the Visayas.*—Embracing all islands of the Philippine Archipelago lying south of the southern boundary line of the Department of Luzon and east of longitude 121° 45' east of Greenwich and north of the ninth parallel of latitude, except the islands of Mindanao, Palawan, and all islands east of the Straits of Surigao; headquarters, Iloilo, P. I. Commander, Brig.-Gen. G. S. Anderson.

*Department of Mindanao.*—Embracing all islands of the Philippine Archipelago not included in other departments; headquarters, Zamboanga, P. I. Commander, Brig.-Gen. John J. Pershing.

**Military Justice, Bureau of,** recommendations regarding, 4570.**Military Order of Foreign Wars.—The**

Military Order of Foreign Wars of the United States was instituted in the City of New York Dec. 27, 1894, by veterans and descendants of veterans of one or more of the five foreign wars which the United States had been engaged in, to wit: the War of the Revolution, the War with Tripoli, the War of 1812, the Mexican War, and the War with Spain, "to perpetuate the names and memory of brave and loyal men who took part in establishing and maintaining the principles of the Government" in said wars, and "to preserve records and documents relating to said wars, and to celebrate the anniversaries of historic events connected therewith." Since the establishment of the order the United States has fought its fifth foreign war. By an amendment to the constitution all American officers who participated in the war with Spain, or any future foreign campaign recognized by the United States Government as "war," are rendered eligible to membership as veteran companions.

Members are entitled "companions," and are either "veteran companions" or "hereditary companions." The former are commissioned

officers of the army, navy, or marine corps of the United States who participated in any of the foreign wars of the United States. The latter are direct lineal descendants, in the male line only, of commissioned officers who served honorably in any of the said wars. Commanderies may be established in each of the States, and State commanderies now exist in the States of New York, Pennsylvania, Connecticut, Illinois, California, Massachusetts, Maryland, Ohio, Missouri, Vermont, Virginia, Rhode Island, Louisiana, Indiana, Wisconsin, Michigan, Texas, Georgia, Colorado, New Jersey, and the District of Columbia.

The National Commandery was instituted March 11, 1896, by the officers of the New York, Pennsylvania, and Connecticut commanderies. Present membership, over 1,800 companions. There are Vice-Commanders-General representing each State commandery.

**Military Tribunals.** (See Military Courts and Commissions.)

**Militia.**—Citizens of a State enrolled as soldiers for training and discipline, but called into active service only in emergencies, as distinguished from the regular soldiers, who are in constant service. The Constitution empowers Congress "to provide for calling forth the militia to execute the laws of the Union, suppress insurrections, and repel invasions." In 1792 an act was passed to provide for the national defense by establishing a uniform militia throughout the United States by the enrollment of every free able-bodied white male citizen between the ages of 18 and 45. (See Army.) An act of March 2, 1867, permitted the enrollment of negroes.

The militia was called out by Federal authorities in 1794 to quell the Whisky Rebellion in western Pennsylvania, during the War of 1812, and in 1861, during the Civil War.

The law of Jan. 21, 1903, provided for the better equipment of this service and supplied an organic connection between the National Guard and the Regular Army, the purpose being to create a National Volunteer Reserve that could be called upon whenever needed by the general Government. This law provides that the militia shall consist of every available male citizen in the respective States, Territories, and the District of Columbia, and every available male of foreign birth who has declared his intention to become a citizen, the entire militia body being divided into two classes: (1) the Organized Militia, to be known as the National Guard of the State, Territory, or District of Columbia, or by such other designation as may be given them by the laws of the respective States or Territories; and (2) the remainder, to be known as the Reserve Militia.

The organized militia of those State and Territorial organizations that have in the past or shall in the future participate in the annual appropriation made by Congress for the militia, and the organization, armament, and discipline of the organized militia is the same as that prescribed for the regular and volunteer army.

The act of Jan. 21, 1903, and the laws antecedent thereto restricted the use of the organized militia when

called forth by the President in time of emergency to service in the United States and to a period of nine months. The act approved May 27, 1908, removes these two restrictions and makes the organized militia of the several States available for service during the period of commission of the officers or enlistment of the men, and within or without the boundaries of the United States. Under this law, therefore, it will not be necessary to go through the formalities of newly enlisting the organized militia when called forth by the President. Section 7 of the act of Jan. 21, 1903, as amended by the act of May 27, 1908, provides "that every officer and enlisted man of the militia who shall be called forth in the manner hereinbefore prescribed shall be mustered for service without further enlistment." The call of the President will, therefore, of itself accomplish the transfer of the organized militia specified in his call from State relations to Federal relations. The militia so called forth becomes at once a part of the Army of the United States, and the President becomes its Commander-in-Chief; it is therefore as completely under the orders of the President and as completely serviceable, both as to time and place, as the Regular Army.

Among other important provisions of the new militia act may be mentioned, fixing the organization, armament and discipline of the organized militia after Jan. 21, 1910, the same as that of the Regular Army; providing that the organized militia shall be called in time of emergency into the service of the United States in advance of any volunteer force.

The Secretary of War issues without cost to the States or Territories all arms and equipment necessary to supply all of the organized militia. The Secretary of War is also authorized to provide for the preparation of the organized militia for the encampment manœuvres and field manœuvres of the regular army in which the militia receives the same pay, subsistence and transportation as the regular army. Upon the requisition of the Governor of any State or Territory having militia organized under this law, the Secretary of War may assign one or more officers of the regular army for service in the militia of the State or Territory. Alaska has no militia. Guam and Samoa have small provisional forces used for police purposes. The Philippines have a constabulary force

**Militia—Continued.**

for police or regular military service. Puerto Rico has a provisional force under the command of a Lieutenant-Colonel of the United States Army.

Congress annually appropriates \$2,000,000 for the support of the militia, apportioned among the various States according to the strength of their organizations. In 1909, \$492,502.25 is to be devoted to the promotion of rifle practice, and \$1,477,497.75 for arms, equipment and camp purposes.

In 1908 there was reported approximately 111,000 officers and men in the organized militia. It is considered that about 75 per cent of this number would respond to a call to arms, and of the number responding a small percentage would be eliminated probably by physical disqualification. It is estimated that little more than 60 per cent—that is, about 67,000—would be available at present in case of an emergency.

The Chief of Coast Artillery has indicated that about 20,000 of the organized militia will be required for the coast artillery reserves and approximately the same number for coast artillery supports. These troops would be required for service in the immediate vicinity of the fortifications, and would not be available for use with the mobile army until all question of sea power along the coast had been settled favorably. (See also Army, War Department of, Artillery and Arms.)

**Mill Springs (Ky.), Battle of.**—Early in the winter of 1861-62 the Confederate General Felix K. Zollicoffer, with a force of about 5,000 men, intrenched himself at Mill Springs, on the Cumberland River in Wayne County, Ky. Jan. 17, 1862, Gen. George H. Thomas, with 8,000 Union troops, advanced to dislodge him. The Confederates set out to meet Thomas, and on Jan. 19, 1862, an engagement took place, begun by the advance guard of both armies. The Confederates were driven back to their camp, which they abandoned during the night. Twelve pieces of artillery, 156 wagons, 1,000 horses and mules, as well as large quantities of small arms, ammunition, and stores fell into the hands of the Union army. Crossing the Cumberland River, the retreating army burned their boats to prevent pursuit. The loss on the Confederate side was 350. The Unionists lost 246. Gen. Zollicoffer was among the Confederate dead.

**Mill Springs, Ky., battle of,** discussed, 3301.

**Milledge, John**, letter of President Madison to, regarding taking of oath, 451.

**Miller, Clarence Benjamin**; b. March 13, 1872, Goodhue Co., Minn.; graduated from the University of Minnesota law department, 1900; member of the Minnesota legislature, 1907; elected to the 61st and 62d Congresses from Minnesota.

**Miller, William**, refuge given to, by the *St. Louis*, 1133.

**Milligan Case.**—A United States Supreme Court case involving the right of the President to suspend the rights of citizens under *habeas corpus* proceedings. Oct. 5, 1864, during the Civil War, Milligan was arrested by order of Gen. Hovey, and on Oct. 21 was brought before a military commission convened at Indianapolis, Ind., by the same officer. He was tried, found guilty, and sentenced to be hanged for participating in rebellious schemes. By the *habeas corpus* act of Congress in 1863 lists were to be furnished in each State of persons suspected of violating national laws. But any such persons arrested against whom no indictments should be found by the circuit or district court were to be freed on petition verified by oath. The Milligan indictment was not found by the circuit or district court. He objected to the authority of the military commission and sued for a writ of *habeas corpus* in the circuit court. The case coming before the Supreme Court in 1866, it was decided, Justice Davis reading the opinion, that the writ should be issued and the prisoner discharged. The court held that the power of erecting military jurisdiction in a State not invaded and not in rebellion was not vested in Congress and that it could not be exercised in this particular case; that the prisoner, a civilian, was exempt from the laws of war and could only be tried by a jury; that the writ of *habeas corpus* could not be suspended constitutionally, though the privilege of that writ might be. The Chief Justice and Justices Wayne, Swayne, and Miller, while concurring in the judgment, made through the first named a separate statement of reasons. The decision expressly stated that conspiracies to

aid rebellion were enormous crimes and that Congress was obliged to enact severe laws to meet the crisis. (See also *Habeas Corpus*; *Merryman Case*.)

**Milliken's Bend (La.), Battle of.**—During the operations before Vicksburg Grant had withdrawn troops from all the posts within his reach to strengthen his army. The fort at Milliken's Bend, on the Mississippi River, in Louisiana, was left in charge of a small garrison, mostly negroes. June 6, 1863, the place was attacked by a party of Louisiana Confederates under Gen. Ben. McCulloch, who might have been successful in their assault but for the arrival of the gunboats *Choctaw* and *Lexington*. The Confederates were repulsed. The Federal loss was 404 killed and wounded.

**Ministers to United States.** (See the several powers.)

**Minnesota.**—One of the United States; nickname, "The Gopher State"; motto, "L'étoile du nord" ("The North Star"). It extends from lat. 43° 30' to 49° 25' north and from long. 89° 29' to 97° 5' west. It is bounded on the north by British America, on the east by Lake Superior and Wisconsin, on the south by Iowa, and on the west by the

Dakotas, and has an area of 83,365 sq. miles. The chief industries are wheat growing, lumbering, and flour and grist milling, and in the products of this latter industry the State has the largest output in the country. The manufacture of lumber and timber products is a rapidly progressing industry. Minnesota is one of the leading wheat-producing States of the Union. The region was first explored by the French near the close of the seventeenth century, the first settlement being made at Duluth in 1678. In 1763 France ceded the territory east of the Mississippi to England, by whom it was ceded to the United States in 1783. It formed part of the Northwest Territory organized in 1787, and was successively included in the Territories of Indiana, Michigan, and Wisconsin. The lands west of the Mississippi form part of the Louisiana Purchase, and were included successively in the Territories of Upper Louisiana, Arkansas, Missouri, and Iowa. March 3, 1849, Congress passed an act creating Minnesota Territory. In 1851, 21,000,000 acres of land were acquired of the Dakotas by the treaty of Traverse de Sioux. May 11, 1858, Minnesota became a State.

Statistics of agriculture reported to the Federal Census Bureau under date of April 15, 1910, place the number of farms in the State at 155,759, comprising 27,623,000 acres, valued, with the buildings thereon, at \$1,259,510,000, and the implements and machinery used in farming are worth \$52,243,000. The number and value of the principal domestic animals was: Horses, 767,000, valued at \$85,137,000; mules, 9,000, \$1,026,000; milch cows, 1,125,000, \$37,125,000; other cattle, 1,288,000, \$17,560,000; sheep, 482,000, \$1,928,000; swine, 1,003,000, \$11,534,000. The yield and value of field crops for 1911 is given as follows: Corn, 2,200,000 acres, 74,140,000 bushels, \$39,294,000; wheat, 4,350,000 acres, 43,935,000 bushels, \$40,420,000; oats, 2,948,000 acres, 67,214,000 bushels, \$26,886,000; rye, 240,000 acres, 4,488,000 bushels, \$3,501,000; potatoes, 225,000 acres, 25,875,000 bushels, \$15,008,000; hay, 799,000 acres, 799,000 tons, \$9,508,000.

The chief mineral product of the State is iron, and in this Minnesota ranks first among the States. In 1908 there was produced 18,652,220 long tons, valued at \$42,313,974. This, although far in excess of the production of any other State,

**Minnesota—Continued.**

was a decided falling off from the production of the previous year, which was 28,969,658 long tons, valued at \$76,668,836. In 1910, 31,966,769 long tons were mined, valued at \$78,462,500. In 1909 the output was 28,975,149 tons, worth \$60,253,314. The chief sources of supply are the Mesabi and Vermilion ranges. The report of the State Treasurer showed a balance on hand Aug. 1, 1910, of \$4,261,231; receipts during the year, \$15,612,048, and expenditures, \$16,364,789; cash balance July 31, 1911, \$3,508,491. The bonded debt at the end of the fiscal year was \$1,518,000.

There were in 1906, 8,223 miles of steam railway in the State and 538 miles of electric line. From St. Paul ten railways radiate with a total length of 60,000 miles. The Great Northern owns a line of steamers which run between Puget Sound and China, Japan and the Philippines. The population of the State in 1910 was 2,075,708.

(Tenn.), Battle of.—After retiring from Lookout Mountain, Bragg's army concentrated on Missionary Ridge, across the Chattanooga Valley and southeast of the city. On the morning of Nov. 25, 1863, Sherman assailed the Confederate right wing at the extreme north end of the ridge. Hooker advanced from Lookout Mountain across the valley and attacked the left. The battle raged all day, but the Confederates held the position until late in the afternoon, when the center was weakened by withdrawals to support the left and right. It was then that Grant, watching the progress of the fight from Orchard Knob, ordered forward the Army of the Cumberland, under Thomas. Wood's and Sheridan's divisions charged the Confederate center. The brigades of Hazen and Willich were in advance. Darkness came on, when the Confederates retreated. Pursuit was stopped when the ridge was won. The Confederates lost more than 9,000, including 6,000 prisoners. Forty pieces of artillery and 7,000 stand of small arms fell into the hands of the victors. The Federal casualties in the Chattanooga campaign between Nov. 24 and Nov. 29 were 753 killed, 4,722 wounded, and 349 missing—a total of 5,824.

**Mississippi.**—One of the United States; nickname, "The Bayou State." It is named for the river of that name and extends from lat. 30° 10' to 35° north and from long. 88° 5' to 91° 40' west. It is bounded on the north by Tennessee, on the east by Alabama, on the south by the Gulf of Mexico and Louisiana, and on the west by Louisiana and Arkansas (separated by the Mississippi River), and has an area of 46,810 sq. miles. The region was visited by De Soto in 1540, and a settlement was attempted by the French under Iberville at Biloxi in 1699. The territory was ceded by France to Great Britain in 1763. Part was ceded to the United States in 1783 and the remainder was acquired in 1803. The Territory of Mississippi was organized in 1798 and admitted as a State in 1817. It seceded Jan. 9, 1861, and was readmitted Feb. 17, 1870. The State has a semi-tropical climate and rich soil.

Statistics of agriculture reported to the Federal Census Bureau under date of April 15, 1910, place the number of farms in the State at 274,382, comprising 18,557,553 acres, valued, with stock and improvements, at \$426,314,634. The average value of land per acre was \$13.69, an increase from \$6.30 in 1900. The value of domestic animals, poultry, etc., was \$75,247,033, including 1,012,632 cattle, valued at \$15,269,364; 216,220 horses, \$20,303,851; 255,760 mules, \$32,028,421; 1,292,119 swine, \$94,913,166; 195,245 sheep, \$416,716; poultry of all kinds, \$1,346,751. The yield and value of the principal field crops for 1911 is as follows: Corn, 2,850,000 acres, 54,150,000 bushels, \$38,988,000; oats, 130,000 acres, 2,392,000 bushels, \$1,555,000; hay, 100,000 acres, 150,000 tons, \$1,650,000; cotton, 1,195,000 bales.

In 1905 1,520 manufacturing establishments, with an aggregate capital of \$50,256,309, employed 41,378 persons and converted \$25,800,885 worth of raw material into lumber, cotton seed oil and cake, cotton goods, turpentine, resin, railway cars, etc., to the value of \$57,451,445.

There are 3,975 miles of steam railway and 79 miles of electric line. The Mississippi River and the Gulf Coast provide natural facilities for transit. The population in 1910 was 1,797,114.

**Missouri.**—One of the United States. Motto: "Salus populi suprema lex esto" ("Let the people's safety be the supreme law"). It takes its name from the Missouri River, which in turn is named after a tribe of Indians belonging to the Siouan family. The State is included between lat. 36° and 40° 30' north and long. 89° 2' and 95° 44' west. It is bounded on the north by Iowa, on the east by Illinois, Kentucky, and Tennessee (separated by the Mississippi), on the south by Arkansas, and on the west by the Indian Territory, Kansas, and Nebraska (separated in part by the Missouri River), and has an area of 69,415 sq. miles. Slaughtering and meat-packing are the most important industries, the manufacture of tobacco ranking second. The State has great mineral resources, especially iron, coal and lead. The territory was first settled at St. Genevieve by the French in 1755, was ceded to Spain in 1763, ceded back to France in 1800, and was ceded by France to the United States in 1803, forming part of the Louisiana Purchase. Missouri Territory was formed in 1812 and admitted to the Union as a State in 1821.

Statistics of agriculture reported to the Federal Census Bureau under date

**Missouri—Continued.**

of April 15, 1910, place the number of farms in the State at 277,244, comprising 34,591,248 acres, valued, with stock and improvements, at \$2,052,917,488. The average value of land per acre was \$41.80, an increase from \$20.46 in 1900. The value of domestic animals, poultry, etc., was \$285,839,108, including 2,561,482 cattle, valued at \$72,883,664; 1,073,387 horses, \$113,976,563; 342,700 mules, \$43,438,702; 4,438,194 swine, \$31,937,573; 1,811,268 sheep, \$7,888,828; poultry, 20,897,208, valued at \$11,870,972. The yield and value of the principal field crops for 1911 was: Corn, 7,400,000 acres, 192,400,000 bushels, \$115,400,000; wheat, 2,300,000 acres, 36,110,000 bushels, \$31,777,000; oats, 1,200,000 acres, 17,760,000 bushels, \$7,992,000; potatoes, 95,000 acres, 2,565,000 bushels, \$2,616,000; hay, 2,430,000 acres, 1,458,000 tons, \$19,391,000; tobacco, 6,000 acres, 4,800,000 pounds, \$576,000. The mineral products of the State in 1910 were valued at \$52,640,054, of which \$14,225,992 represented lead, and \$15,190,416 zinc. Clay products and coal made up most of the balance. The report of the State Treasurer showed receipts for the year 1910 of \$10,005,610; balance on hand Jan. 1, 1911, \$200,557. Cobalt, nickel and barytes are also produced. There are 27,480 acres of land in the State unreserved and unappropriated. The United States land office is at Springfield.

The manufactures depend mostly on agriculture and forestry. In 1905 the capital invested was \$376,368,827, giving employment to 156,582 persons, and turning out \$439,548,957 worth of meats, flour, tobacco, beer, boots, shoes, building material and machinery.

St. Louis and Kansas City are important centers of traffic in live stock and grain. The State has 8,066 miles of steam railroads and 1,129 miles of electric lines. The population in 1910 was 3,293,335.

**Missouri Compromise.**—An agreement relative to the question of slavery embodied in a bill passed by Congress March 2, 1820, and in the act admitting Missouri, Feb. 28, 1821. Upon the introduction into Congress during the session of 1818-19 of a bill providing for the admission of Missouri as a State, but prohibiting slavery therein, the opposition on the part of the Southern members became violent and threatening, and after long and brilliant debates a compromise was effected, chiefly through the efforts of Henry Clay. Representative Tallmadge, of New York, in February, 1819, proposed an amendment declaring all children born after the admission of the State to be free. This was modified to make all children born slaves free at 25. The House passed the bill with this amendment, but the Senate refused to concur. Next year the bill passed the House again in the same form. The Senate voted to admit Maine provided Missouri was admitted as a slave State. The House rejected the proposal. Representative Thomas, of Illinois, proposed as a compromise the admission of Missouri as a slave State provided that in future slavery should be prohibited in all the territory forming part of the Louisiana Purchase north of 36° 30', the southern boundary of the new State. This was agreed to. On the question as to when the compromise was abandoned, whether before or at the passage of the Kansas-Nebraska bill in 1854, parties and sections have been divided. When Missouri's constitution was laid before Congress it was found that it contained clauses excluding free negroes from the State. The House therefore refused to admit Missouri. Clay effected a further compromise whereby Missouri agreed

**Mobile and Dauphin Island Railroad and Harbor Co.**, act regarding grant of right to, to construct trestle between Cedar Point and Dauphin Island, returned, 5784.

**Mobile Bay (Ala.), Battle of.**—Aug. 5, 1864, Rear-Admiral Farragut, lashed to the rigging of the flagship *Hartford*, passed the forts and obstructions at the entrance to Mobile Bay and captured the Confederate ram *Tennessee*. Mobile Bay was defended by Fort Gaines, on the eastern end of Dauphin Island, Fort Morgan, on the western extremity of Mobile Point, east of the channel, and Fort Powell, situated on a small island west of Dauphin. Forts Gaines and Morgan commanded the main channel, the former mounting 21 guns and the latter 48.

In the bay were the iron-clad ram *Tennessee* and the gunboats *Gaines*, *Morgan*, and *Selma*, under the command of Admiral Buchanan. The *Tennessee* was built on the plan of the *Merrimac*. Her armament consisted of 6 rifles—2 pivots of 7½ inches bore and 4 6-inch broadsides. Obstructions and defenses of all kinds had been placed around the harbor and 30 torpedoes were strung across the channel. Farragut's fleet consisted of 14 wooden ships and 4 monitors. Gen. Gordon Granger had landed 4,000 Federal troops on Dauphin Island, in the rear of Fort Gaines, to cooperate with the fleet. The fleet got under way early in the morning and before 7 o'clock the

engagement became general. The monitor *Tecumseh* fired the first shot, and shortly afterwards struck a torpedo and sunk, with her commander, Capt. Craven, and most of her crew. Within an hour the other vessels had passed the forts and met the gunboats and ram inside the harbor. After a severe contest the *Tennessee* surrendered at 10 o'clock. Farragut's loss was 165 killed and drowned (113 of whom went down on board the *Tecumseh*) and 170 wounded. The Confederate loss was 8 or 10 killed and wounded and 170 surrendered. Of the other three Confederate vessels, the *Morgan* escaped up the bay, the *Gaines* was disabled, and the *Selma* was captured with her crew of 90 officers and men.

The night after the battle Fort Powell was abandoned and blown up. Next day Fort Gaines was shelled by the *Chickasaw* and surrendered with 800 prisoners. Granger's troops were transferred to the rear of Fort Morgan. Aug. 22 it was bombarded and on the 23d it surrendered. With the defenses of Mobile there were taken 104 guns and 1,464 men. Operations against the city of Mobile were begun March 20, 1865. Two forts protected the city after the passage into the harbor had been made. April 4 these were bombarded. Four days later another bombardment was begun, followed in the evening by an assault. The outer works were carried during the night and preparations made to complete the conquest next day, but at 1 o'clock on the morning of April 9 the garrison surrendered.

at Tacubaya, the bishop's castle, overlooking the western approaches to the City of Mexico, and 2½ miles distant. The first formidable obstruction was El Molino del Rey ("The King's Mill"). Gen Worth's division of 3,100 men was detailed for attack upon this and its supporting fortification, Casa de Mata. These were stone buildings, strongly fortified and ably defended, the Mexicans contesting every foot of the ground. The attack was made on the morning of Sept. 8, 1847. After 2 hours' hard fighting the works were carried and the army of Santa Anna, 14,000 strong, driven back. The Mexican loss was 2,200 killed and wounded (among the former being Generals Valdarez and Leon) and more than 800 prisoners, including 52 commissioned officers. The American loss was 116 (including 9 officers) killed, 665 (including 49 officers) wounded and 18 missing. The magazine of Casa de Mata was blown up, and Worth returned to Tacubaya.

**Monitor, The,** engagement with the *Merrimac* discussed, 3313.

**Monmouth (N. J.), Battle of.**—An important conflict of the Revolutionary War, fought during the afternoon of June 28, 1778, at Wenrock Creek, Monmouth County, N. J., Gen. Washington in command of the American and Sir Henry Clinton commanding the British. June 18 Clincon left Philadelphia for New York with 11,000 men and a large supply train. Washington pursued him with about 20,000 men. After some preliminary skirmishing, in which the Americans, led by Gen. Charles Lee, second in command, retreated, a general battle occurred. The British were defeated and drew off under cover of night, leaving about 300 dead on the field. The Americans lost 288, less than 70 of whom were killed. An incident of the battle was Washington's severe reprimand of Gen. Charles Lee, which resulted in the latter's final dismissal. Lee had opposed bringing on the battle, but when his advice was rejected in the council of war, asked and obtained the right to lead off in the engagement.

**Monocacy (Md.), Battle of.**—Gen. Hunter succeeded Gen. Sigel in command of the Federal forces in the Shenandoah Valley in June, 1864. Gen. Early was detached from Lee's army at Richmond and sent to reinforce Gen. Breckenridge, who commanded the Confederate forces in the valley. Hunter retired westward across the mountains, leaving Washington unprotected. Lee thereupon reinforced Early, increasing his strength to 20,000, and ordered him to threaten Washington, in the hope of compelling Grant to withdraw some of the troops before Richmond and Petersburg. The Sixth Corps, under Wright, was sent to defend Washington, with the Nineteenth

**Monocacy (Md.), Battle of—Continued.**

Corps, which arrived from Hampton Roads. July 6 Early reached Hagerstown and moved a strong column toward Frederick, whereupon Gen. Lew Wallace advanced from Baltimore with a force of 6,000 men. He encountered Early on the 9th at Monocacy, Md., and for 8 hours resisted his advance, but was finally defeated, with a loss of 98 killed, 579 wounded, and 1,282 missing. The Confederate loss was stated by Gen. Early at from 600 to 700, including the cavalry.

**Monopolies,** evils of trusts and, discussed and recommendations regarding, 5358, 5478, 6176.

**Monroe, James** (fifth President United States):

James Monroe was elected by the Republican party in 1816 and 1820. In the election of 1816, Monroe and Daniel D. Tompkins were the nominees of the Republican Congressional caucus. The Federalists supported Rufus King for President, with no Vice-Presidential candidate. The election took place Nov. 5. The electoral vote, counted Feb. 12, 1817, gave Monroe 183, and King 34. Tompkins received 183 votes for Vice-President, and Howard, 22. Nineteen States took part in this election, Indiana for the first time. King's vote was received from the New England States, where the electors were chosen by the legislatures. Had the people voted there, it is more than probable that they would have expressed approval of the course of the administration in the War of 1812, which the Federalists opposed.

In the election of 1820, no candidates were chosen by Congressional caucus, as there was no opposition to Monroe and Tompkins. The election was held Nov. 7. The electoral vote, counted Feb. 14, 1821, gave Monroe all of the votes but one. It is said that the opposing vote was cast by a New Hampshire elector for John Quincy Adams, in order that Washington alone might have the glory of a unanimous election. Twenty-four States took part in this election—Mississippi, Illinois, Alabama, Maine, and Missouri having been recently added to the Union.

**Party Affiliation.**—In the Virginia contest over the adoption of the Constitution, Monroe stood beside Henry in opposition, and consented to the ratification only upon the adoption of certain amendments. In the Senate he was a prominent Anti-Federal-

ist and a most determined opponent of the Washington administration. On the publication of Monroe's pamphlet, "A View of the Conduct of the Executive," in 1796, he became the hero of the Anti-Federalists and was made governor of Virginia (1799-1802). Eventually, by his great popularity, he came to fill almost every exalted station to which a politician might aspire.

**Political Complexion of Congress.**—In the Fifteenth Congress (1817-1819) the Senate, of 44 members, was made up of 10 Federalists and 34 Democrats; and the House, of 185 members, was made up of 57 Federalists and 128 Democrats. In the Sixteenth Congress (1819-1821) the Senate, of 46 members, was made up of 10 Federalists and 36 Democrats; and the House, of 187 members, was made up of 42 Federalists and 145 Democrats. In the Seventeenth Congress (1821-1823) the Senate, of 48 members, was made up of 7 Federalists and 41 Democrats; and the House, of 187 members, was made up of 58 Federalists and 129 Democrats. In the Eighteenth Congress (1823-1825) the Senate, of 48 members, was made up of 40 Democrats and 8 Whigs; and the House, of 213 members, was made up of 72 Federalists and 141 Democrats.

**Internal Improvements.**—On this question the attitude of Monroe was the same as that of Jefferson and Madison. He held that there was no doubt of the desirability and necessity of contributions from the Federal Government to works of this nature; but that the Constitution did not confer upon the Federal Government the right of making them (pages 587 and 759) without an amendment to the Constitution which he favored. On this ground, while appreciating the need of the work, he vetoed the bill making appropriations to the improvement of the Cumberland road in 1822.

**Public Debt.**—The public debt of the United States during the administration of Monroe stood as follows:

January 1, 1818.	\$103,466,633.83
January 1, 1819.	95,529,648.28
January 1, 1820.	91,015,566.15
January 1, 1821.	89,987,427.66
January 1, 1822.	93,546,676.98
January 1, 1823.	90,875,877.28
January 1, 1824.	90,269,777.77
January 1, 1825.	83,788,432.71

**Tariff.**—The act of April 20, 1818, "to increase the duties on certain manufactured articles imported into

**Monroe, James—Continued.**

the United States" affected such articles as are manufactured from copper or in which copper is the article of greatest value, silver-plated harness, coach and harness furniture, cut glass, tacks, brads, springs, and brown and white Russia sheeting. Another act, on the same day, increased the duties on iron in bars and bolts, iron in pigs, castings, nails, and alum. An act of March 3, 1819, regulated the duties on certain wines. In his Fifth Annual Message (page 675) President Monroe says: "It may be fairly presumed that under the protection given to domestic manufactures by the existing laws we shall become at no distant period a manufacturing country on an extensive scale. Possessing as we do the raw materials in such vast amount, with a capacity to augment them to an indefinite extent; rising within the country alimnet of every kind to an amount far exceeding the demand for home consumption, even in the most unfavorable years, and to be obtained always at a very moderate price; skilled also as our people are in the mechanic arts and in every improvement calculated to lessen the demand for and the price of labor, it is manifest that their success in every branch of domestic industry may and will be carried, under the encouragement given by the present duties, to an extent to meet any demand which under a fair competition may be made upon it." In his Sixth Annual Message (page 760) he says: "... it appears that our manufactures, though depressed immediately after the peace, have considerably increased, and are still increasing, under the encouragement given them by the tariff of 1816 and by subsequent laws. Satisfied I am . . . that there are other strong reasons applicable to our situation and relations with other countries which impose on us the obligation to cherish and sustain our manufactures. Satisfied, however, I likewise am that the interest of every part of the Union, even of those most benefited by manufactures, requires that this subject should be touched with the greatest caution, and a critical knowledge of the effect to be produced by the slightest change." Again, in his Seventh Annual Message (page 784) he reiterates his views and adds: "... I recommend a review of the tariff for the purpose of affording such additional protection to those

articles which we are prepared to manufacture, or which are more immediately connected with the defense and independence of the country."

*Foreign Policy.*—The foreign policy of the Monroe administration has become famous under the name of the Monroe Doctrine. This attitude toward foreign interference in the Western Hemisphere is contained in two paragraphs in the Seventh Annual Message (page 787) sent to Congress Dec. 2, 1823. Very similar sentiments were expressed by President Madison in a message to Congress in 1811 (page 406); and John Quincy Adams, a member of Monroe's Cabinet, and with whom Monroe consulted, is also credited with originating these views. In its practical application, the policy upholds opposition from the United States against foreign conquest of any part of America. Regarding the relations of the United States with Europe, President Monroe says, in his First Annual Message (page 584): "A strong hope is entertained that by adhering to the maxims of a just, a candid, and friendly policy, we may long preserve amicable relations with all of the powers of Europe on conditions advantageous and honorable to our country."

*Commerce.*—The commercial status of the United States during the administration of President Monroe may be shown by statistics for the year 1820, here given:

Area, 2,059,043 sq. miles; population, 9,638,453; population per sq. mile, 4.68; total money in circulation, \$67,100,000; imports, \$74,450,000; exports, \$69,691,669; ships built, 51,394 tons; vessels in deep sea trade, 619,048 tons; vessels in coastwise trade, 660,065 tons; post-offices, 4,500.

*Slavery.*—In his Third Annual Message (page 631) President Monroe, in describing the means taken to put down the slave trade, says: "It is hoped that these vigorous measures, supported by like acts by other nations, will soon terminate a commerce so disgraceful to the civilized world." In a special message (page 632) he recommends that slaves taken from the cargoes of slavers be sent back to Africa and not retained in the United States.

**Monroe Doctrine.**—After the overthrow of Napoleon, France, Russia, Prussia, and Austria formed the so-called Holy Alliance in September, 1815, for the suppression of revolutions within each other's dominions and for perpetuating peace. The Spanish colonies in America having revolted, it was rumored that this alliance contemplated their subjugation, although the United States had acknowledged their independence. George Canning, English secretary of state, proposed that England and America unite to oppose such intervention. On consultation with Jefferson, Madison, John Quincy Adams, and Calhoun, Monroe, in his annual message to Congress in 1823 (787), embodied the conclusions of these deliberations in what has since been known as the Monroe Doctrine.

Referring to the threatened intervention of the powers, the message declares: "We owe it, therefore, to candor and to the amicable relations existing between the United States and those powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonies or dependencies of any European power we have not interfered and shall not interfere. But with the Governments who have declared their independence, and maintained it, and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing them, or controlling in any other manner their destiny, by any European power in any other light than as the manifestation of an unfriendly disposition toward the United States." The promulgation of this doctrine is accredited to Mr. Monroe, but Jan. 3, 1811, the principle was substantially enunciated by Mr. Madison. In a message to Congress on that date (473), while discussing a threat of Great Britain to take possession of a portion of Florida claimed by Spain, he used these words: "I recommend to the consideration of Congress the seasonableness of a declaration that the United States could not see, without serious inquietude, any part of a neighboring territory in which they

**Monroe Doctrine—Continued.**

have in different respects so deep and so just a concern pass from the hands of Spain into those of any other foreign power."

The practical application of this doctrine goes no further than to place the United States in opposition to any possible attempt of any European power to subjugate or take possession in whole or in part of any American country. The principle involved was clearly set forth by Secretary of State Richard Olney in his dispatch of July 20, 1895, on the Venezuelan Boundary dispute. He stated that the Monroe Doctrine "does not establish any general protectorate by the United States over other American States. It does not relieve any American State from its obligations as fixed by international law, nor prevent any European power directly interested from enforcing such obligations or from inflicting merited punishment for the breach of them."

This interpretation of the Monroe Doctrine has been upheld in the most emphatic manner by President Roosevelt in many of his public speeches and his messages to Congress in which he states that any well-merited punishment inflicted by a European power upon an American State does not violate the Monroe Doctrine, provided that such punishment does not involve any occupation, either permanent or temporary, of American territory.

**Monson, Sir Edmund**, award of, as arbitrator in claim of Carlos Butterfield & Co. against Denmark, 5545.

**Montana**.—One of the United States; motto, "*Oro y plata*" ("Gold and Silver"). It is included between lat. 45° and 49° north and long.

104° and 116° west. It is bounded on the north by British America, on the east by the Dakotas, on the south by Wyoming and Idaho, and on the west by Idaho, and has an area of 146,080 sq. miles. Gold, silver and copper are extensively mined and stock raising is an important occupation. Montana was first entered in 1743 by the Chevalier de la Verendrye who discovered the Rocky Mountains, but no attempt was made at a settlement. Montana formed part of the Louisiana Purchase, and the greater part of it was included in the Nebraska Territory. Montana Territory was organized in 1864 and admitted as a State in 1889.

Statistics of agriculture reported to the Federal Census Bureau under date of April 15, 1910, place the number of farms in the State at 26,214, comprising 13,545,603 acres, valued, with stock and improvements, at \$347,828,770. The value of domestic animals, poultry, etc., was \$85,663,187, including 943,147 cattle, valued at \$27,474,122; 315,956 horses, \$27,115,764; 4,174 mules, \$445,278; 99,261 swine, \$858,829; 5,380,746 sheep, \$29,028,069. The yield and value of the principal field crops for 1911 is given as follows: Corn, 20,000 acres, 530,000 bushels, \$424,000; wheat, 429,000 acres, 12,299,000 bushels, \$9,470,000; oats, 425,000 acres, 21,165,000 bushels, \$8,466,000; rye, 8,000 acres, 184,000 bushels, \$132,000; potatoes, 27,000 acres, 4,050,000 bushels, \$2,997,000; hay, 612,000 acres, 1,224,000 tons, \$12,240,000. The mineral products of the State in 1910 were valued at \$54,388,117; of this, copper represented \$35,950,966; gold, \$3,720,400; silver, \$6,632,700; coal, \$5,329,322; lead, \$147,520; zinc, \$1,340,064. The State ranks second in the production of copper, being surpassed only by Arizona, and second only to Utah in the production of silver. The copper production in 1911 fell about 10,000,000 tons short of the output of 1910, due to the policy of curtailment of the companies of the Butte district. The largest number of persons employed in any single manufacturing industry in the State is 3,106, engaged in the lumber and timber production. The total number of persons engaged in manufacture in the State in 1910 was 13,694, and the capital invested was \$44,558,000.

Montana has vast undeveloped agricultural and mineral resources and

**Montana—Continued.**

good opportunities are open to prospective settlers. There are within the State 46,532,440 acres of land unappropriated and unreserved, which can be obtained under the General Land Laws of the United States upon application to the Land Offices in Billings, Bozeman, Glasgow, Great Falls, Helena, Kalispell, Lewistown, Miles City, or Missoula. Most of the land is valueless for agricultural purposes without irrigation, but large irrigation plans are being successfully carried on by the Government and by private enterprise. Under the federal reclamation act more than 471,000 acres of the lands of the State have been irrigated.

The most important industries of the State are smelting and refining copper, and three of the five establishments are worked by one company, which withholds details. Including these there were in 1905, 382 establishments, with a capital of \$52,589,810, employing 9,862 operatives whose wages aggregated \$3,652,217, and who transformed \$40,930,060 worth of raw material into copper ingots, lumber and building material, flour, beer, and cars, to the value of \$66,415,452. In 1906 there were reported 3,300 miles of steam railway and 75 miles of electric street or elevated railway. The length of the telegraph lines was 9,556 miles, and of telephone, 5,384 miles. The population, by the census of 1910, was 376,053.

**Montauk Point, Long Island, lands lying on, referred to, 129.**

**Montenegro.**—A principality in southeastern Europe fronting on the Adriatic and bounded by Austria on the west and by Turkey on the north and east. Agriculture of the most primitive kind forms the staple industry of its people; grain, grapes, olives, and figs are the chief products; deposits of iron ore are found near the Adriatic coast and are worked by Italian capital. The people are of Slavonic origin and belong to the Greek orthodox church. In 1697 Montenegro was liberated from Turkish rule by Danilo Petrovich who was elected Vladika or prince-bishop, the succession descending collaterally in his family. In 1851 Danilo I. abandoned the title of Vladika and also its spiritual functions, taking the title of Gospodar or Prince. The area is 3,630 sq. miles, having a population of about 228,000, of whom 13,840 are Mohammedans.

Under the constitution granted by the Prince of Montenegro, Dec. 19, 1905, the country is now a hereditary constitutional monarchy, with popular representation. The first national assembly, or Skupshtina, met in 1906, but was dissolved in July, 1907. The present Skupshtina consists of seventy-four members, elected in 1906 for a term of four years, by universal suffrage. There are ministers of justice, foreign affairs, interior, agriculture, posts and telegraph, war, finance and public works, worship and public instruction, and a prime minister.

**Monterey (Mexico), Battle of.**—The Mexican army under Arista, driven across the Rio Grande, took refuge in Matamoras. Taylor receiving reinforcements, demanded the surrender of that city. Arista, unable to hold the place, abandoned it and retreated to Monterey, 180 miles from the Rio Grande and 700 miles from the City of Mexico. Aug. 18, 1846, Taylor, with a force of 6,600 men, began the long march toward Monterey, on the way to the enemy's capital, having established a depot for supplies at Camargo, at the head of steam navigation of the Rio Grande. Sept. 19 the American army encamped in sight of Monterey, in the beautiful valley of San Juan, almost encircled by the Sierra Madre Mountains. The city is the capital of the Province of Nuevo Leon and the seat of the Catholic bishop of the diocese. It was strongly fortified and garrisoned by 10,000 men, mostly regulars, under Gen. Ampudia. The attack was be-

**Monterey (Mexico), Battle of—Continued.**

gun by the Americans on Sept. 21 and on the following morning the bishop's palace was taken by assault. The city was then forced, the Mexicans stubbornly retreating from square to square. The fighting continued during the 22d and 23d, and on the morning of the 24th of September an armistice was agreed upon. Gen. Ampudia surrendered the place and was allowed to retire with his army. The American loss was slight.

**Montreal (Canada), Capture and Loss of.**—After the taking of Ticonderoga and Crown Point, Ethan Allen, Philip Schuyler, Benedict Arnold, and other Americans were anxious to invade Canada and secure the cooperation of the Canadians with the colonists. In June, 1775, the Continental Congress gave Gen. Schuyler discretionary power to proceed against Montreal. He sent Gen. Montgomery with 3,000 men down Lake Champlain. Gen. Carleton, with 500 British, was forced to surrender on the 13th of November. Eleven vessels also fell into Montgomery's hands. Carleton escaped to Quebec. Benedict Arnold, with 1,200 men, had been ordered to proceed by way of the Kennebec and Chaudière rivers and cooperate with Montgomery before Quebec. The expedition to the latter city proved disastrous. Three brigades of infantry, besides artillery, stores, and ammunition, having arrived from England, the Americans were forced to retire to Lake Champlain. (See also Quebec (Canada), Battle of.)

**Moore, John B.**, Acting Secretary of State, 6481.

**Moore, J. Hampton**; b. Woodbury, N. J., March 8, 1864; law student in Philadelphia, 1877 to 1880; Chief Bureau of Manufactures, Department of Commerce and Labor, 1905; president Atlantic Deeper Waterways Association, 1908-9; elected to the 59th Congress for an unexpired term, and to the 60th, 61st, and 62d Congresses from Pennsylvania.

**Moore, John Matthew**; b. Nov. 18, 1862, at Richmond, Fort Bend Co., Tex.; elected to the State legislature; elected to the 59th, 60th, 61st, and 62d Congresses from Texas.

**Moore, Thomas**, commissioner for Cumberland road, 406.

**Moore, Thomas F.**, minister to Colombia, judgment and discretion of, discussed, 1030.

**Mora, Antonio M.**, claim of, against Spain, 5677, 5910, 5962, 5989, 5998. Payment and distribution of, 6069.

**Morales, Don John Bonaventure**, authority to dispose of lands of Spain in Louisiana, referred to, 651.

**Morgan, Dick Thompson**; b. Prairie Creek, Vigo Co., Ind., Dec. 6, 1853; entered Union Christian College at Merom, Ind., from which institution he graduated in 1876, B. S.; in 1880, graduated from the Central Law School of Indianapolis, Ind.; member of the lower house of the Indiana legislature, 1880-81; appointed register of the United States land office at Woodward, Okla., by President Roosevelt, in 1904, and served until May 1, 1908; elected to the 61st and 62d Congresses from Oklahoma.

**Morgan, John T.:**

Argument of, in Senate on canal construction, referred to, 5624.

Member of commission to Hawaiian Islands, 6333.

**Morgan's Raid.**—In the summer of 1863 the Confederate General Buckner was in East Tennessee, near the borders of Kentucky, preparing for an expedition against Louisville. Gen. John H. Morgan was sent ahead with 2,460 cavalry to pave the way. He crossed the Cumberland River, and having been joined by about 1,000 Kentuckians, passed over the Ohio River into Indiana. The advance of Rosecrans's army prevented Buckner from joining him. Morgan rode through southern Indiana toward Cincinnati, burning bridges, tearing up railroads, and fighting home guards. The whole State of Ohio became alarmed, and a strong Union force was soon in pursuit. Others were advancing upon his flanks, and gunboats were patrolling the Ohio River to prevent his recrossing into Kentucky. Passing around Cincinnati, he reached the river at Buffington's Ford July 19. After a severe battle with various installments of Federal troops which had hotly pursued him, about 800 of the command surrendered, but Morgan, with the remainder, proceeded up the river to Belleville. About 300 succeeded in crossing the river here before the arrival of the gunboats. Many were drowned or shot in attempting to cross, and Morgan, with about 200 of his men, retreated farther up the river to New Lisbon, where he was surrounded and forced to surrender. In his raid Morgan traveled about 350 miles through Indiana and Ohio, making sometimes 50 miles a day. The amount of property destroyed scarcely exceeded \$50,000. More than 2,000 of his men were killed or captured. Morgan and some of his officers were sent to Columbus and confined in the penitentiary, from which he and 6 others escaped. Immediately after his escape he planned another raid into the Union lines in Tennessee, but was surrounded and killed by Union troops under Gen. Gillem, near Greenville, Tenn.

**Mormon Church** (see also Polygamy):

Commissioners appointed under act in reference to bigamy, etc., referred to, 4678, 4731, 4771, 4801, 4837, 4946.

Letter of president of, advising Mormons to refrain from contracting marriage forbidden by law, 5553, 5803, 5942.

Suit instituted by Government for termination of, discussed, 5379.

**Mormons.**—A religious sect calling themselves the "Church of Jesus

Christ of Latter-Day Saints." They came into political prominence because of their practice and advocacy of polygamy. The sect was founded by Joseph Smith in 1830 on what they claim to have been a divine revelation. They organized first in New York and Vermont and later in Missouri and Illinois. Finally, about 1847, they settled at Salt Lake City, Utah.

Their defiance and resistance of law caused many difficulties between them and the authorities. Their first armed resistance to Federal authority was in 1857. Special laws bearing upon the Mormons were passed by Congress in 1862, 1882, and 1887. The Supreme Court of the United States upheld these laws which forbade polygamy and provided for its punishment by heavy fines and imprisonment, disincorporated the church and its societies and confiscated their property.

In 1898, Brigham Henry Roberts was nominated for Congress by the Democratic party in the State of Utah and was elected, but owing to a charge that he was still living in polygamy he was not allowed to take his seat. In 1903 Reed Smoot, a Republican and a banker of Provo City, Utah, was elected to the Senate; an agitation was immediately set on foot to unseat him, on the ground that, being an official of the Mormon church, he countenanced polygamy. The agitation, however, was unsuccessful. (See Utah.)

**Mormons,** laws to prevent importation of, recommended, 4947.

**Morning Light, The,** seizure of the *Jorgen Lorenzen* by, 3271.

**Morocco.**—A nominally independent Mohammedan empire, though practically a French protectorate in northwestern Africa. It is bounded on the north by the Mediterranean Sea, on the east by Algeria, on the south by the Sahara, and on the west by the Atlantic Ocean. The Atlas Mountains traverse the country from west to east. Its government is administered by a Sultan, who is a direct descendant of Ali, son-in-law of Mohammed. During recent years, many rebellions have occurred.

Mulai-Abd-el-Hafid, after a successful revolution against his brother, was proclaimed Sultan, and recognized by the Powers, Jan. 5, 1909, upon his agreement to abide by and carry out the engagements entered into by his predecessor at Algeciras.

Jan. 16 to April 7, 1906, a con-

**Morocco—Continued.**

ference of the Powers was held at Algeciras, attended by thirteen delegates representing Morocco, the European Powers interested and the United States, for the settlement of disputed matters. An agreement embodied in a general act, was signed by all the delegates and the Sultan and the ratifications were deposited in Madrid.

Under this agreement there was established a Moorish police force commanded by Moorish Kaid, assisted by French and Spanish instructors and officers and a Swiss inspector. A State bank was established under the observation of four censors appointed by the Imperial Bank of Germany, the Bank of England, the Bank of Spain, and the Bank of France. Germany, Spain, and England also have interests in Morocco, and each country seems jealous of the influence of the others, making Morocco the subject of frequent diplomatic negotiations. According to the latest estimates the area of the country is about 219,000 sq. miles, with a population, mainly Mohammedan, of about 5,000,000.

**Morocco:**

Algeciras convention urged upon Congress, 7442.

Consuls of United States in, 169.

Presents given to. (See Consuls.)

Differences with United States, communication from Commodore Morgan relative to adjustment of, referred to, 2063.

Emperor of—

Death of, 169.

Lion and horses presented to the United States by, 1256.

Legation of United States in, premises for, presented by Sultan of, 4823, 4923.

Moors in, conference regarding protection for, 4561.

Relations with, 2081.

Treaty regarding exercise of right of protection in, 4580.

Treaty with, transmitted and discussed, 90, 140, 174, 178, 181, 353, 1458, 1484, 1498, 3582, 7442.

Expiration of first near at hand, 1318.

Vessels of United States seized or interfered with by, 352, 353.

**Morocco, Treaties with.**—The treaty of peace and friendship of 1787 was superseded by that of 1836. It provided for neutrality of the one power if the other should be at war with a third; and that the subjects of the one power taken in such war on prize

vessels should be at once set free and their effects restored to them. Examination and search of vessels of the contracting parties are to be conducted with all possible ease and freedom from embarrassment. Humane treatment of vessels in distress and shipwrecked crews is provided for. If a vessel of an enemy of one of the contracting powers be in a port of the other power at the same time that a vessel of the contracting power leaves the port, the vessel of the enemy shall be detained there for a period of twenty-four hours after the departure of the former.

Freedom of commercial intercourse is extended to vessels and individuals in the dominions of the two nations. Disputes are to be settled by consular officers. Justice is to be impartially dispensed towards the peoples of both nations. The consul may act as executor of estates. The rights, privileges, and powers of consuls are defined as in consular conventions.

The treaty of 1865 provided for the support and maintenance of the light-house at Cape Spartel by the United States and such powers of Europe as were contracting parties. The light-house was built by the Sultan of Morocco who, having no navy or merchant marine, gave the support of the light into the hands of the contracting powers without encroachment or loss of rights therein. The Sultan agreed to furnish a guard for the defense of the light, while all other expenses were to be borne by the powers.

The convention as to protection of 1880 was entered into with the United States and several of the powers of Europe, to establish protection on a uniform basis to the representatives of the several nations in Morocco.

**Moros**, referred to, 6719, 6720, 6760.

**Mott, Luther W.**; b. Oswego, Nov. 30, 1874; educated at the Oswego High School and Harvard College, graduating from the latter in 1896; in the banking business at Oswego, and has been president of the New York State Bankers' Association; elected to the Sixty-second Congress from New York.

**Moultrie, William**; soldier; b. South Carolina in 1731; member of militia organized for defense against Cherokee Indian raids; member Provincial Congress, 1775; made brigadier-general in 1776, and in 1779 defeated a superior force of British near Beaufort, and defended Charleston, S. C.; taken prisoner by the British and exchanged for Gen. Burgoyne; major-general, 1782; governor of South Carolina, 1785-86 and 1794-96; died Charleston, S. C., Sept. 27, 1805.

**Mound Builders.**—A prehistoric race of Americans who inhabited the valleys of the Ohio and Mississippi rivers. They are so named because the only traces of their existence are found in mounds of earth formed in regular geometrical shapes containing ashes, stone, and bronze implements and weapons. Some of these mounds seem to have been simply places of

**Mound Builders—Continued.**

sepulture, while others show unmistakable evidences of having been erected as fortifications. The race probably became extinct only a few generations before the discovery of America, as De Soto found tribes of Southern Indians who built mounds and possessed other characteristics of the extinct race. They belonged distinctly to the Indian race and to the Stone Age. The mounds range from 2 or 3 feet in height to 132 feet high and 188 feet long, the latter being the dimensions of one at Marietta, Ohio, while one at Grave Creek, W. Va., measures 70 feet in height and 900 feet in circumference.

**Mount Rainier Forest Reserve, Wash.,** establishment of, by proclamation, 6209.

**Mount Rainier National Park.** (See Parks, National.)

**Mountain Meadow (Utah) Massacre.**—Efforts of the Federal Government to enforce the laws against polygamy incited the Mormons to bitter hatred of all opposed to their religion. Brigham Young made threats of turning the Indians loose upon west-bound immigrants unless what he considered the Mormons' rights were respected. Sept. 7, 1857, about 30 miles southwest of Cedar City, a body of about 120 non-Mormon immigrants were attacked by Indians and Mormons under the leadership of John D. Lee, and after a siege of four days were induced to surrender under promise of protection, but all were massacred except 17 children under 7 years of age.

**Mountain Meadow Massacre,** referred to, 3123.

**Mount Vernon Ladies' Association.**—The Washington Estate at Mount Vernon, Va., is under the care and direction of the Mount Vernon Ladies' Association of the Union. The founder of the association in 1854 was Miss Ann Pamela Cunningham, of South Carolina. She was the first Regent, and her successors have been Mrs. Lily M. Berghman, 1874, and Mrs. Justine Van Rensselaer Townsend, 1893, the present Regent. There are Vice-Regents for thirty States.

**Mudd, Samuel A.,** implicated in assassination of President Lincoln, proceedings of trial and verdict of military commission, 3532, 3533, 3534, 3540, 3545, 3546.

**Mugwump.**—A corruption of the Algonquian Indian word "mugquomp," which signifies a chief, ruler, or a person of importance. After long use

in local politics the word came into national use in the Presidential campaign of 1884. The newspapers applied the term to those Republicans who refused to support James G. Blaine, the regular party nominee, and it has since been used to designate any person of independent politics or who is supposed to be lacking in loyalty to his political party.

**Mulvihill, Thomas,** petition of, for re-possession of lands conveyed to United States by, 4739, 4778.

**Mumfordsville (Ky.), Battle of.**—Here on Sept. 17, 1862, the Confederate army under Gen. Bragg attacked the Federals under Gen. J. T. Wilder. The post surrendered to the Confederates, the number of captured being about 4,000.

**Munich, Bavaria.**—Third International Exhibition of Fine Arts to be held at, 5193.

**Munitions of War.** (See Arms and Ammunition.)

**Munn vs. Illinois.**—One of the "ele-vator cases" decided by the Supreme Court of the United States. In 1872 Munn and another were found guilty of violating an article of the Illinois constitution in regard to grain warehouses. They had failed to take out a license and give bond and were charging higher rates for storage than the law allowed. The offenders were fined, and the supreme court of the State affirmed the action of the criminal court. The case was then appealed to the United States Supreme Court. That body affirmed the judgment on the ground that the act of the Illinois legislature was not repugnant to the Constitution of the United States, and that a State could lawfully determine how a man might use his own property when the good of other citizens was involved.

**Munsee Indians.** (See Indian Tribes.)

**Murat, Joachim,** commerce of United States, depredations committed on, by, 1269.

**Murdock, Victor;** b. Burlingame, Kans., March 18, 1871; became a newspaper reporter; moved to Chicago and worked there as a newspaper reporter, and later became managing editor of the *Wichita Daily Eagle*; elected to the 58th, 59th, 60th, 61st, and 62d Congresses from Kansas.

**Murfreesboro (Tenn.), Battle of,** fought Dec. 31, 1862, and Jan. 2, 1863, between forces of General Rosecrans and General Bragg. (See Stone River (Tenn.), Battle of.)

**Murray, William F.;** b. Boston, Sept. 7, 1881; educated in the Boston pub-

**Murray, William F.—Continued.**

lie schools, graduating from the Latin School in 1900; received the degree of bachelor of arts from Harvard College, 1904, and graduated from the Harvard Law School, 1906; practiced law in Boston; served in United States Volunteer Signal Corps, as private and corporal, during the Spanish-American War; elected successively to the Boston City Council, the Massachusetts House of Representatives, and the Governor's Council of Massachusetts, before his election to Congress in 1910; was elected to the Sixty-second Congress from Massachusetts.

**Murray, William Vans**, minister to France, nomination of, 272, 274.

**Muscat; seaport on Gulf of Oman:**

Presents offered President Van Buren by Imaum of, declined, 1809.

Offered United States, recommendations regarding, 1809, 2169.

Treaty with, 1272, 1457, 1593, 5195.

**Muscle Shoals, Ala.**, mentioned, 6817.

**Museum, National**, appropriation for, recommended, 4431, 4458.

**Muskogee Indians.** (See Indian Tribes.)

**Myers, Henry L.**; b. Oct. 9, 1862, in Cooper County, Mo.; educated in private schools in Missouri; taught school and studied law; licensed to practice law in his native State; in 1893 moved to Hamilton, Mont., and there engaged in the practice of law; has served as prosecuting attorney, State senator, and district judge; was serving his second term in the last-named position when, on March 2, 1911, he was elected United States Senator from Montana, for the term beginning March 4, 1911.

**Nagel, Charles**, of St. Louis, Mo., Secretary of Commerce and Labor in President Taft's Cabinet; b. Aug. 9, 1849, in Colorado Co., Tex.; member of the Missouri legislature, 1881-1883; president of the St. Louis city council, 1893-1897; member St. Louis Law School faculty since 1886; board of trustees of Washington University; national committeeman from Missouri in 1908.

**Nairne, John**, vessel under, ordered; from and forbidden to reenter waters of United States, 391.

**Naples, Italy:**

Claims against, by—

Merchants of United States, 598, 1112.

United States, 556, 598, 867, 1109, 1112, 1157.

Extension of time allowed commissioners for settlement of, recommended, 1267.

Minister of United States to, 557.

Treaty with, referred to, 1195.

**Narragansett Indians.** (See Indian Tribes.)

**Nash, Thomas**, was charged with murder and piracy on the British frigate *Hermoine*. He was surrendered to Great Britain, 1799.

**Nashville Convention.**—The Mississippi State convention of 1849 suggested to other Southern States the feasibility of holding conventions to make some public expression on the slavery question and the encroachments of Northern antislavery men. Accordingly, a convention was called in Nashville, Tenn., in June, 1850, composed of delegates from all the Southern States. The Wilmot Proviso and the Missouri Compromise were disapproved of by this meeting. Delegates from Texas, Mississippi, and South Carolina advocated open resistance to Federal authority, but more conservative action prevailed. The convention met again in November, but only moderate resolutions were passed.

**Nashville (Tenn.), Battle of.**—After the battle of Franklin, Nov. 30, 1864, Gen. Schofield retreated to Nashville, closely followed by Hood, who formed his lines near that city Dec. 4. Reinforcements were sent to Thomas at Nashville, swelling his forces to 56,000 men. Dec. 15 Thomas's army advanced against Hood. The day was consumed in manœuvering and skirmishing. There were not many killed or wounded, but the results of the day's operations were the driving of the Confederates from every position held by

them and the capture of 16 guns, 1,200 prisoners, 40 wagons, and several hundred stand of small arms. The Union forces bivouacked on the field and renewed the attack the next morning. By 4 o'clock in the afternoon the Confederates were in retreat toward Franklin. They were pursued until Dec. 28, when Hood crossed the Tennessee with the remnants of his army. The loss in killed and wounded was comparatively light, but 53 guns and 4,875 Confederate prisoners were captured.

**Nashville, The**, mentioned, 6805, 6806, 6807, 6808, 6909, 6910, 6912.

**Nassau, Duchy of:**

Convention with, 2303.

Exequatur issued consul of, revoked, 3709.

**Natchez:**

Commissioners of United States assemble in, 186, 192, 236.

Government in, establishment of, recommended, 236.

**Natchez, The.** (See *General Urrea, The.*)

**National Academy of Sciences.**—The National Academy of Sciences was incorporated under an act of Congress approved March 3, 1863. It was self-created and retains autonomous powers, but derives national character from the provision in the article of incorporation that "the academy shall, whenever called upon by any department of the Government, investigate, examine, experiment, and report upon any subject of science or art, the actual expense of such investigations, examinations, experiments, and reports to be paid from appropriations which may be made for the purpose; but the academy shall receive no compensation whatever for any services to the Government of the United States." The first meeting was held April 22, 1863, and Alexander D. Bache was elected president. Originally the membership was limited to 50. This limit was removed in 1870, but the policy remained exclusive, election being regarded as a dignity conferred in recognition of special scientific work and only five names are considered for each year's election. A stated session is held annually in Washington on the third Tuesday in April, and another is commonly held elsewhere during each autumn. The membership (at present 96 members and 43 foreign associates) comprises many of the leading scientific specialists of the United States who are grouped into committees on (1) mathematics and

**National Academy of Sciences—Continued.**

astronomy, (2) physics and engineering, (3) chemistry, (4) geology and paleontology, (5) biology, and (6) anthropology. There are in addition a number of foreign associates distinguished for scientific attainment. The president is elected for a term of six years, the present holder of the office being Professor Alexander Agassiz of Harvard. The academy holds funds in trust, to be applied in aid of scientific investigations or in medals or other prizes for scientific work.

**National Academy of Sciences**, commission from membership of, to formulate plans for forestry system, 6167.

**National Association of Naval Veterans.**—Organized 1887; 6,000 members; 1,500 contributing members; 30 associations in all the principal cities of the United States.

**National-Bank Circulation:**

Act to fix amount of United States notes and, vetoed, 4222.

Discussed by President—

Arthur, 4720, 4766, 4832.

**National Banks.** (See Banks, National.)

**National Board of Health.**—By act of Congress approved March 3, 1879, a National Board of Health was established, consisting of 7 civilian physicians, 1 army surgeon, 1 navy surgeon, 1 surgeon of the Marine-Hospital Service, and 1 officer of the Department of Justice. This board was abolished by law. A national quarantine law was passed June 3, 1879.

**National Board of Health:**

Establishment of—

Discussed, 4631.

Recommended, 5983.

Report of, transmitted, 4857, 4972.

**National Cemeteries.**—The army appropriation bill for 1850 contained a clause setting aside \$10,000 to purchase a lot near the City of Mexico for the interment of United States soldiers who fell near that place during the Mexican War.

Since the Civil War Congress has established 84 cemeteries within the United States. They are mostly in the South, as most of the soldiers fell in that region. Of these cemeteries 12 contain more than 10,000 graves

and nearly as many between 5,000 and 10,000. In all there are 360,753 graves, each marked with a marble head-stone. The name and rank of each occupant is chiseled on the head-stone when known.

The following table shows the number of cemeteries maintained by the Federal Government and the interments of soldiers and sailors therein up to June 30, 1911:

LOCATION.	Area in Acres.	Inter- ments.

Yorktown, Va.....	3	2,193
Total.....		360,753

Of these interments about 9,300 are those of Confederates, being mainly in the National Cemeteries at Camp Butler, Cypress Hills, Finns Point, Fort Smith, Hampton, Jefferson Barracks and Woodlawn.

The national cemetery at Gettysburg, Pa., is peculiarly interesting from its having been dedicated by President Lincoln in 1863. It abounds in numerous memorials of the departed soldiers, including a national monument. It has been the scene of a reunion of the survivors of the great battle fought there July 1-3, 1863. The Government assumed charge of it in 1872.

**National Cemeteries:**

Establishment of, and number of Union soldiers buried in, discussed, 3649.

**National Conference of Electricians** at Philadelphia referred to, 4956.

**National Foundry**, erection of recommended, 1607, 1714.

**National Guard**.—The enrolled militia of some of the States is known collectively as the National Guard. (See Militia.)

Encampment of, in coast works recommended, 5476.

Encouragement of, recommended, 5550.

Field manœuvres for, recommended, 7057.

Reorganization of, recommended, 6670, 6879, 7616.

**National Incorporation Act**, suggested, 7454.

**National Intelligencer**, publication in, of proceedings of President and Cabinet respecting interpretation of reconstruction acts discussed, 3725.

**National Museum**.—An institution established at Washington by successive acts of Congress in 1877 and later years, to take charge of all government collections in natural history, ethnology, etc., and to exhibit the same in a building erected by Congress in 1889. The Secretary of the Smithsonian Institution is the keeper of the National Museum.

**National Museum**, appropriation for, recommended, 4431, 4458.

Referred to, 6674.

**National Parks**, should be placed under Department of Agriculture, 7604.

**National Parks**. (See Chickamauga and Chattanooga National Military Park.)

**National Prison Congress** at Baltimore referred to, 4162. (See also International Prison Congress.)

**National Republican Party**.—After the defeat of John Quincy Adams by Jackson in 1828 the broad-construction wing of the Democratic-Republican party organized and came out with a platform directly opposed to Jackson on the question of the tariff and the United States Bank. They opposed the spoils system in the public service, favored internal improvements at national expense, a bank of the United States, and a division of the proceeds of land sales among the States. In 1832 they supported Henry Clay for the Presidency and advocated a protective tariff. Clay was defeated, and in 1835 the party, reenforced by other elements, took the name of Whig.

**National University**. — Washington strongly disapproved of foreign education for American youth and early conceived the idea of establishing a national university in the central part of the United States. He bequeathed 50 shares of the Potomac Company toward the endowment of such an institution in the District of Columbia, but ultimately the stock of the company proved valueless. Several of the Presidents from time to time in their messages recommended the establishment of a national university or universities, or, as they sometimes called them, "seminaries of learning."

**National University** (see also Education; Seminaries of Learning):

Establishment of, recommended, 58, 194, 197, 398, 470, 553, 878, 4208.

Lands, donation of, to, recommended, 398, 470, 4208.

**National Zoological Park**, referred to, 6674.

**Nationality**.—Federal and not State law determines the status of the nationality of persons in the United States. Until the adoption of the Fourteenth Amendment, the Constitution established no rules regarding the loss or acquisition of nationality. Birth in the country is, as a rule, the test, but not all persons born in the United States are considered as endowed with nationality. The naturalization act of 1790 extended na-

**Nationality—Continued.**

tionality to children born to American parents beyond the sea. In 1855 an act passed restricting this to children whose fathers were citizens. The civil-rights act (q. v.) of 1866 declared "all persons born in the United States and not subject to any foreign power" to be citizens of the United States. The Fourteenth Amendment defines citizens as "all persons born or naturalized in the United States and subject to the jurisdiction thereof." The citizens of Hawaii became citizens of the United States by virtue of annexation, it being so stated in the act of Congress of 1900 which made Hawaii a Territory. The inhabitants of the Philippine Islands and Puerto Rico are entitled to the protection of the Constitution but cannot enjoy the privileges of citizenship until Congress admits their countries to the Union as States or organizes them as Territories.

**Nations (see Index articles treating):**

**Nations, Congress of.** (See under Panama, Isthmus of.)

**Nations, Foreign.** (See Powers, Foreign; the several powers.)

**Naturalization.**—The investment of an alien with the rights and privileges of citizenship. Section 8 of Article I. of the Constitution empowered Congress "to establish a uniform rule of naturalization." Naturalization laws were passed by the colonial legislatures of Maryland, Virginia, New York, South Carolina, and Massachusetts between 1666 and 1715. In 1740 the British Parliament enacted a law regulating colonial nat-

uralization. In 1790 Congress legislated for the first time so as to provide for uniformity of naturalization under the Constitution. The conditions of this law were that any free white alien might be admitted to citizenship by any court of record of the State in which he has resided for 1 year, having been a resident of the United States 2 years. An act of 1795 required 5 years' residence and application 3 years prior to naturalization; that of 1798 required 14 years' residence and application 5 years prior to naturalization. The act of April 14, 1802, restored the conditions of the act of 1795 and required a proof of 5 years' residence in the United States and 1 in the State, good character, an oath of allegiance, and a renunciation of titles and prior allegiance. No alien may be naturalized if his country is at war with the United States. Conditions and procedure in naturalizing an alien are prescribed by sections 2163-2174 of the Revised Statutes of the United States. Naturalization of Chinese is prohibited by section 14, chapter 126, laws of 1882; and of anarchists by the immigration act of 1903. Naturalized citizens of the United States receive the same protection when abroad as native-born citizens. (See also Expatriation.)

By France, discussed and referred to, 3171, 3715, 5199, 5366.

Italy, referred to, 5673.

Prussia, discussed and referred to, 3120, 3123, 3715, 3778.

Returning to native country and claiming citizenship in United States, discussed, 3381, 3990, 4193, 4245, 4299.

**Navajo Indians.** (See Indian Tribes.)

**Naval Academy.** (See Navy, Department of.)

**Naval Academy:**

Appropriation for paving sidewalk at, recommended, 4671.

Board of Visitors to, report of, referred to, 3587.

Discussed, 2669, 3386.

Establishment of, recommended, 876.

Instruction at, should be more practical, 7497.

Removal of, discussed, 3561.

Reorganization of, discussed, 2713.

**Naval Code,** revision of, recommended, 2625.

**Naval Courts of Inquiry,** referred to, 892.

**Naval Expeditions.** (See Arctic Expeditions; Exploring Expeditions.)

**Naval Militia.** (See Navy, Department of.)

**Naval Militia,** development of, discussed, 5759, 6166, 6667.

**Naval Observatory.** (See also Navy, Department of.)

**Naval Observatory.**—A division of the Bureau of Equipment of the Navy Department. Its functions are to determine accurately the positions of the sun, moon, planets and the earth for use in preparing the *Nautical Almanac*; to test chronometers and to issue correct time daily; to distribute to vessels of the navy instruments of precision for navigating purposes; to conduct astronomical investigations of general and special scientific interest, and, since 1894, to publish the *Nautical Almanac*.

In 1830 the Navy Department established a depot of charts and instruments in charge of Lieutenant L. M. Goldsborough, and he mounted a 3-inch transit instrument. In 1833 Lieutenant Wilkes moved the depot to a site on Capitol Hill, and at his own expense built an observatory containing a transit instrument of 3¾ inches aperture and 63 inches focal length; a Borda's circle; a 3½-foot achromatic portable telescope; a portable transit instrument; and a sidereal clock. In 1838 the Secretary of the Navy granted authority for the purchase of all necessary supplies for making a constant series of observations in astronomy, magnetism and meteorology, and detailed naval officers to the work under the instructions of Lieut. J. M. Gilliss. The new equipment then installed consisted of a sidereal clock and a mean time clock; a meridian circle of 5.5 inches aperture furnished with a circle 30 inches in diameter; a portable achromatic telescope of 3¼ inches aperture and 42 inches focal length. Berlin, Paris, Greenwich, and Vienna presented some 200 rare volumes of the highest standard as the nucleus for an astronomical library. The work done at Capitol Hill between 1838 and 1842 was published as *Astronomical Observations Made at the Naval Observatory*, being the first American work of this nature.

In 1842 Congress, through the efforts of Lieut. Gilliss, authorized the erection of a new observatory. Lieut. Maury was placed in charge of the

**Naval Observatory—Continued.**

new establishment and gained an international reputation through his studies of ocean currents and other hydrographic and nautical subjects. He was succeeded in 1861 by Lieut. Gilliss and later by Charles H. Davis and John Rodgers.

Among the earliest scientific achievements of the new observatory were the observations of the planet Neptune, secured in 1846, immediately after its discovery, which enabled Sears C. Walker, by identifying two older foreign observations, to discuss the elements of Neptune during his short connection with the observatory. The adaptation of electricity to record observations by Prof. John Locke, formerly lieutenant in the navy, resulted in the installation of the first practical chronograph at the observatory in 1849. With the 9.6-inch equatorial Assistant Astronomer James Ferguson discovered several planetoids between 1854 and 1860. With the 26-inch refractor (made by Alvan Clark), at that time the largest telescope in the world, Prof. Asaph Hall discovered the moons of Mars in 1877. This instrument was set in place in time to observe the transit of Venus in 1874.

The present observatory buildings on the more favorable site of Georgetown Heights were completed in 1893. They comprise a commodious office building occupied by the astronomical, nautical instrument, time service and *Nautical Almanac* departments, while the 26-inch equatorial, a 9-inch and a 6-inch transit circle, and a 5-inch prime vertical instrument are placed in suitable dome and houses to the south, east, west and north of a clock house, the longitude of which is 5h. 8m. 15.78s. west and the latitude 38° 55' 14" north. Besides the above-named instruments there are a 12-inch equatorial, a 6-inch altazimuth, a 5-inch transit, a 5-inch photoheliograph.

Although one of the youngest among the great astronomical institutions, it has developed in a short time to a rank with those at Greenwich and Pulkowa. Its object is rather the development and application of the known facts of astronomy than the making of further discoveries. Professors Newcomb and Hall, of the older scientific staff of the institution, have recently been succeeded by Professors Skinner, See, Updegraph, Eichelberger, Littell, and Harschmann. The library now con-

tains some 22,000 volumes and stands second to Pulkowa only.

**Naval Observatory:**

Estimates for observation of transit of Venus, referred to, 4668.

Appropriation for, recommended, 4688.

Referred to, 4249.

Removal of, recommended, 5158.

**Naval Officers.** (See Navy.)**Naval Order of the United States.—**

Composed of a General Commandery and commanderies in the States of Massachusetts, Pennsylvania, New York, California, and Illinois, and in the District of Columbia. The General Commandery meets triennially on Oct. 5, and the State Commanderies meet annually in the month of November. The Massachusetts Commandery is the parent Commandery, and was organized at Boston on July 4, 1890. The General Commandery was established three years later, on June 19, 1893. The Companies of the Order are officers and the descendants of officers who served in the navy and marine corps in any war or in any battle in which the said naval forces of the United States have participated. The membership clause, as adopted at the triennial congress held at Boston, Oct. 5, 1895, provides for two classes of members: First, veteran officers and their male descendants; and, second, enlisted men who have received the United States naval medal of honor for bravery in the face of the enemy.

**Naval Parade,** to be held in New York Harbor, 5760.

**Naval Peace Establishment.** (See Navy.)

**Naval Pension Fund.** (See Pensions.)

**Naval Reserve, National,** establishment recommended, 6667.

**Naval Stations:**

Establishment of—

Discussed, 4573, 4586.

In West Indies, recommended, 3777.

Lands for. (See Lands, Public.)

Survey for, mentioned, 1038.

**Naval War College.** (See Navy, Department of.)

**Naval War College,** discussed, 6166.

**Navassa Island, West Indies:**

Occupation of, by American citizens, referred to, 3120.

Recognition of, as appertaining to United States, referred to, 5625.

Trial of laborers in, charged with killing agents of Navassa Phosphate Co., discussed, 5625.

**Navassa Phosphate Co.,** trial of laborers charged with killing agents of, in Navassa Island, discussed, 5625.

**Navigation:**

Accidents in, resulting from criminal negligence in use of steam power, discussed, 1253.

Advancement in science of nautical affairs, 2670.

Appropriation for improvement of, recommended, 2666.

Bridges so constructed over waters as to obstruct, discussed, 4934.

Depressed state of, 559.

Extension of laws of, etc., referred to, 2544.

Laws of, having tendency to prolong War of 1812, should be revised, 525.

Prosperous condition of, 2404.

Referred to, 74, 77, 78, 81, 95, 227, 318, 346, 470, 480, 559, 2571.

Treaty with Spain regarding, 106, 110, 164.

Utility of canal, explained, 482, 785.

**Navigation Act.**—An important move in England's struggle with the Dutch for possession of the carrying trade of the world. The act was first promulgated in 1645, amplified in 1650, and renewed with a few changes by Charles II. in 1660. It related to five subjects—coasting trade, fisheries, commerce with the Colonies, commerce with European countries, and commerce with Asia, Africa, and America. The clauses of importance to American history were those providing that all colonial trade should be carried on in ships built and owned in England and the Colonies and that in the case of many specified goods trade should be confined to English markets. The former clause acted as a powerful stimulant to colonial shipbuilding. The act was rendered largely inoperative by the prevalence of smuggling, and the efforts of Great Britain to enforce it were among the leading causes of the Revolution.

**Navigation Laws.**—The Constitution gives Congress power to pass navigation laws in accordance with the principles of international law. By act of 1789 a tonnage tax of 6 cents per ton was levied on all American vessels and one of 50 cents a ton on all vessels built and owned in foreign countries and entering American ports, which practically gave a monopoly of American trade to American bottoms. In 1792 the act requiring American registration was passed. In 1793 the coasting trade was closed to foreign vessels. In 1816, 1817, and 1820 the American navigation laws were remodeled and made to correspond closely to those

of Great Britain. Tonnage taxes, which had been abolished, were renewed at the outbreak of the Civil War. With the advent of iron vessels came the decrease in American shipbuilding and the decrease in the American marine was further due to the law forbidding any but American-built ships to fly the American flag. This restriction was, however, modified by the act of 1892. The act of 1886 reduced the tonnage rates considerably, and these two acts have done much to invigorate American shipping.

**Navigators Islands.** (See Samoan Islands.)

**Navy.**—*History.*—During the Revolution this country had practically no navy. In September, 1775, the British troops, closely environed in Boston, could receive supplies only by water. To intercept these Washington detailed certain of his officers and men who were familiar with nautical matters to patrol Boston Harbor in small armed cruisers. Some of the States had already constructed vessels at public expense to protect their coast line. New England seamen cruised with such effect in Massachusetts Bay as not only to deprive the British garrisoned in Boston of their necessary supplies, but also to add to the resources of the Continental Army by the capture of numerous prizes. At the end of 1775 the Continental Congress began the construction of a navy by ordering 13 frigates to be built. These performed some service, but most of the achievements of the war were by privateers. By 1781 all of the 13 Federal vessels had been either captured or destroyed.

In 1797 and 1798, in anticipation of war with France, Congress authorized the construction of the *Constitution*, *United States*, and *Constellation* and the purchase of 24 other vessels. Hostilities with France having been averted, the newly acquired navy was used with good effect in resisting the Barbary States. At the outbreak of the War of 1812 the United States had about a score of vessels, 3 of them being first-class frigates—the *Constitution*, the *President*, and the *United States*—as against England's 830. The brilliant achievements of American vessels in that war secured increased appropriations. In 1816 \$1,000,000 annually for 8 years was appropriated.

By the law of 1819 the Navy was largely increased and a resolution

**Navy—Continued.**

provided for naming ships of the line after the States, frigates after the rivers of the United States, and sloops of war after the chief cities and towns. The vessels were divided among four squadrons and stationed in the Mediterranean, the Pacific, the West Indies, and on the coast of Brazil, and in 1841 an additional squadron was ordered to cruise along the coast of the United States. During the Mexican War the Gulf Squadron blockaded Vera Cruz and bombarded the fort of San Juan de Ulloa into submission, while the Pacific Squadron seized Monterey and Los Angeles, Cal.

At the outbreak of the Civil War the United States had only about 40 vessels in commission. The character of naval warfare at this time had been changed by improved armament. The old wooden vessels were useless when opposed by the Whitworth and other modern guns of long range and heavy caliber. The turreted ironclad was born of the emergency. A new navy had to be constructed in order to maintain the blockade of Southern ports, and by Jan. 1, 1864, the National Government had over 600 vessels, 75 of them ironclads, with more than 4,600 guns and 35,000 men. After the war the Navy was reduced. Notwithstanding the appropriation of large sums of money, 1882 found the United States in possession of only 140 vessels, and more than 100 of these were incapable of sea service.

Soon after this date a new policy regarding the Navy was inaugurated and has since been pursued with credit and honor to the nation.

**Official Duties.**—The Secretary of the Navy performs such duties as the President of the United States, who is Commander-in-Chief, may assign him, and has the general superintendence of construction, manning, armament, equipment, and employment of vessels of war.

**Assistant Secretary of the Navy.**—The Assistant Secretary of the Navy performs such duties in the Navy Department as may be prescribed by the Secretary of the Navy or required by law.

**Chief Clerk.**—The chief clerk has general charge of the records and correspondence of the Secretary's Office and performs such other duties as may be assigned to him by the Secretary of the Navy.

**Bureau of Navigation.**—The duties of the Bureau of Navigation comprise

the issue, record, and enforcement of the orders of the Secretary to the individual officers of the Navy; the training and education of line officers and of enlisted men (except of the hospital corps) at schools and stations and in vessels maintained for that purpose; the supervision and control of the Naval Academy, technical schools for line officers, the apprentice seamen establishment, schools for the technical education of enlisted seamen, and the Naval Home at Philadelphia, Pa.; the maintenance and repair of the Naval War College; the enlistment, assignment to duty, and discharge of all enlisted persons, and the preparation of estimates for the pay of all officers and enlisted men. It has under its direction all rendezvous and receiving ships, and provides transportation for all enlisted persons under its cognizance. It establishes the complements of all ships in commission. It keeps the records of service of all officers and men, and prepares an annual Navy register for publication, embodying therein data as to fleets, squadrons, and ships furnished by the aid for operations. It is charged with all matters pertaining to applications for appointments and commissions in the Navy and with the preparation of such appointments and commissions for signature. It is charged with the preparation, revision and enforcement of all regulations governing uniform, and with the distribution of all orders and regulations of a general or circular character. Questions of naval discipline, rewards, and punishments are submitted by this bureau for the action of the Secretary of the Navy. The records of all general courts-martial and courts of inquiry involving the personnel of the Navy, before final action, are referred to this bureau for comment as to disciplinary features. It receives and brings to the attention of the Secretary of the Navy all applications from officers for duty or leave. It receives all reports of services performed by individual officers or men.

**Bureau of Yards and Docks.**—The duties of the Bureau of Yards and Docks comprise all that relates to the design and construction of all docks (including dry docks), slips, wharves, piers, quay walls, and buildings of all kinds for whatever purpose needed under the Navy Department, and the maintenance of the same, except at the naval proving ground,

**Navy—Continued.**

the naval torpedo station, the naval training stations, the Naval War College, and the Naval Academy, and magazines outside of navy yards. It prepares the plans and makes the estimates for the above structures, after consulting with the chief of the bureau for whose use they are designed, as to their internal arrangement. It repairs and requires for furniture for all buildings in navy yards. It provides light and water for all buildings, or for whatever other purposes they may be needed in navy yards; and requires for all the fuel except that which is used by other bureaus. It has charge of the construction, repair, maintenance, and operation of power plants at navy yards and naval stations. It has charge of the installation and maintenance of telephones within the limits of navy yards and naval stations. It has charge of all landings, derricks, shears, cranes, sewers, dredging, railway tracks, cars, wheels, trucks, all vehicles for use in the navy yards, grading, paving, walks, shade trees, inclosure walls and fences, ditching, reservoirs, cisterns, fire engines and apparatus, and requires for all material and articles necessary therefor. It provides watchmen, labor for cleaning navy yards and naval stations, except the naval proving ground, the powder factory, magazines, the naval torpedo station, the naval training stations, the Naval War College, and the Naval Academy, and for the protection of public property therein. It requires for the furniture, stationery, blank books and forms, and provides the clerical force, messengers, and laborers necessary for the offices of the commandant, captain, and public works officer (civil engineer) of navy yards, and defrays the cost of the same. It provides the motor trucks, horses, and teams required for all purposes at navy yards, the subsistence and care of the same, and the necessary operators and teamsters.

**Bureau of Ordnance.**—The duties of the Bureau of Ordnance comprise all that relates to the torpedo station, naval proving ground, and magazines on shore, to the manufacture of offensive and defensive arms and apparatus (including torpedoes), all ammunition and war explosives. It requires for or manufactures all machinery, apparatus, equipment, material, and supplies required by or for

use with the above. It determines the interior dimensions of revolving turrets and their requirements as regards rotation. As the work proceeds it inspects the installation of the permanent fixtures of the armament and its accessories on board ship, and the methods of stowing, handling, and transporting ammunition and torpedoes, all of which work shall be performed to its satisfaction. It designs and constructs all turret ammunition hoists, determines the requirements of all ammunition hoists, and the method of construction of armories and ammunition rooms on shipboard, and, in conjunction with the Bureau of Construction and Repair, determines upon their location and that of all ammunition hoists outside of turrets. It installs all parts of the armament and its accessories which are not permanently attached to any portion of the structure of the hull, excepting turret guns, turret mounts, and ammunition hoists, and such other mounts as require simultaneous structural work in connection with installation or removal. It confers with the Bureau of Construction and Repair respecting the arrangements for centering the turrets and the character of the roller paths and their supports. It has cognizance of all electrically operated ammunition hoists, rammers, and gun-elevating gear which are in turrets; of electric training and elevating gear for gun mounts not in turrets; of electrically operated air compressors for charging torpedoes; and of all range finders and battle-order and range transmitters and indicators. It designs the various shops and buildings in which its work is executed at the navy yard, Washington, D. C., so far as their internal arrangements are concerned. It designs, erects, and maintains all shops and buildings constructed for its own purposes outside the limits of navy yards and for which it may have estimated; and is charged with the preservation of the public property under its control.

**Bureau of Construction and Repair.**—The duties of the Bureau of Construction and Repair comprise the responsibility for the structural strength and stability of all ships built for the Navy; all that relates to designing, building, fitting, and repairing the hulls of ships, turrets, and electric turret-turning machinery, spars, capstans, windlasses, deck winches, boat cranes, steering gear,

**Navy—Continued.**

and hull ventilating apparatus (except portable fans); and, after consultation with the Bureau of Ordnance and according to the requirements thereof as determined by that bureau, the designing, construction, and installation of independent ammunition hoists, the same to conform to the requirements of the Bureau of Ordnance as to power, speed, and control, and the installation of the permanent fixtures of all other ammunition hoists and their appurtenances; placing and securing armor, placing and securing on board ship to the satisfaction of the Bureau of Ordnance the permanent fixtures of the armament and its accessories as manufactured and supplied by that bureau; installing the turret guns, turret mounts, and turret ammunition hoists, and such other mounts as require simultaneous structural work in connection with installation or removal. It has charge of the docking of ships and is charged with the operating and cleaning of dry docks. It is responsible for the care and preservation of ships in ordinary. It has cognizance of electric launches and other boats supplied with electric motive power. It designs the slips and the various buildings and shops, so far as their internal arrangements are concerned, where its work is executed. It has charge of the manufacture of anchors and cables; the supplying and fitting of rope, cordage, rigging, sails, awnings, and other canvas, and flags and bunting; it supplies, to the satisfaction of the Bureau of Supplies and Accounts, galley ranges, steam cookers, and other permanent galley fittings, and installs and repairs the same. It supplies and installs, in consultation with the Bureau of Steam Engineering, all voice tubes and means of mechanical signal communications.

**Bureau of Steam Engineering.**—The duties of the Bureau of Steam Engineering comprise all that relates to designing, building, fitting out, and repairing machinery used for the propulsion of naval ships; the steam pumps, steam heaters, distilling apparatus, refrigerating apparatus, all steam connections of ships, and the steam machinery necessary for actuating the apparatus by which turrets are turned. It has cognizance of the entire system of interior communications. It is specifically charged with the design, supply, installation, maintenance, and repair of all means of

interior and exterior electric signal communications (except range finders and battle-order and range transmitters and indicators), and of all electrical appliances of whatsoever nature on board naval vessels, except motors and their controlling apparatus used to operate the machinery belonging to other bureaus. It has charge of the design, manufacture, installation, maintenance, repair, and operation of wireless telegraph outfits on board ship and of wireless telegraph outfits and stations on shore. It maintains and repairs coaling plants not at navy yards, and operates all mechanical coaling plants, whether at a navy yard or elsewhere. Such operation includes the providing of all labor and supplies connected with the handling of coal; it passes upon the operating features of all plans for the construction of such plants prepared by the Bureau of Yards and Docks; it inspects all coal for the fleet. It has supervision and control of the Engineering Experiment Station. It designs the various shops at navy yards and stations where its own work is executed, so far as their internal arrangements are concerned.

**Bureau of Medicine and Surgery.**—The Bureau of Medicine and Surgery has control of all hospitals and of the force employed there, and it has the general direction of the internal organization and administration of hospital ships; it has advisory power with respect to all questions connected with hygiene and sanitation affecting the service and, to this end, opportunity for unobstructed inspection; it provides for all physical examinations; it passes upon the competency, from a professional standpoint, of all men in the Hospital Corps for enlistment and promotion by means of examinations conducted under its supervision, or under forms prescribed by it; it has information as to the assignment and duties of all enlisted men of the Hospital Corps, with opportunity to invite the attention of the department to any changes which may seem to be desirable; and has the power to appoint and remove all nurses in the Nurse Corps (female), subject to the approval of the Secretary of the Navy. The duties of the Bureau of Medicine and Surgery comprise all that relates to medical supply depots, medical laboratories, naval hospitals, hospital ships, dispensaries, and technical schools for the Medical and

**Navy—Continued.**

Hospital Corps, and the Nurse Corps (female). It requires for all supplies, medicines, and instruments used in the Medical Department of the Navy. It approves the design of the various buildings erected within navy yards for its own purposes, so far as their internal arrangements are concerned and, after their completion, has control of the same. It designs, erects, furnishes, and maintains all the buildings constructed for its own purposes outside the limits of navy yards, for which it may have estimated; and it approves, under the special instructions of the Secretary, the purchase, sale, and transfer of all land and buildings in connection therewith, and is charged with the preservation of the public property under its control. It determines upon and requires for all the stores, stationery, blank books, forms, materials, instruments, means and appliances of every kind used in the Medical Department for its own purposes, and has control of their inspection, storage, and preparation.

Bureau of Supplies and Accounts.

—The duties of the Bureau of Supplies and Accounts comprise all that relates to the supply of funds for disbursing officers and the keeping of the money accounts of the Naval Establishment; the purchase, reception, storage, care, custody, transfer, shipment, and issue of all supplies, including coal and water, for the Naval Establishment, and the keeping of a proper system of accounts for the same, except supplies for the Marine Corps, and except the reception, storage, care, custody, transfer, and issue of medical supplies; the requiring for, preparing or manufacture of provisions, clothing, and small stores; and the keeping of the cost of manufacture at the various navy yards and stations.

Office of the Judge-Advocate General.—The duties of the Judge-Advocate General of the Navy are as follows: To revise and report upon the legal features of and have recorded the proceedings of all courts-martial, courts of inquiry, boards of investigation, inquest, and boards for the examination of officers for retirement and promotion in the naval service; to prepare charges and specifications for courts-martial, and the necessary orders convening courts-martial, in cases where such courts are ordered by the Secretary of the Navy; to prepare general orders promulgating

the final action of the reviewing authority in court-martial cases; to prepare the necessary orders convening courts of inquiry and boards for the examination of officers for promotion and retirement, and for the examination of candidates for appointment as commissioned officers in the Navy other than midshipmen, and to conduct all official correspondence relating to such courts and boards. It is also the duty of the judge-advocate general to examine and report upon all questions relating to rank and precedence, to promotions and retirements, and those relating to the validity of the proceedings in court-martial cases; all matters relating to the supervision and control of naval prisons and prisoners; detention barracks and detentioners; the removal of the mark of desertion; the correction of records of service and reporting thereupon in the Regular or Volunteer Navy; certification of discharge in true name; pardons; bills and resolutions introduced in Congress relating to the personnel and referred to the Department for report, and the drafting and interpretation of statutes relating to the personnel; references to the Comptroller of the Treasury with regard to pay and allowances of the personnel; questions involving points of law concerning the personnel; proceedings in the civil courts in all cases concerning the personnel as such; and to conduct the correspondence respecting the foregoing duties, including the preparation for submission to the Attorney-General of all questions relating to subjects coming under his own cognizance which the Secretary of the Navy may direct to be so referred.

Office of the Solicitor.—The duties of the solicitor comprise and relate to examination and report upon questions of law, including the drafting and interpretation of statutes, and matters submitted to the accounting officers not relating to the personnel; preparation of advertisements, proposals, and contracts for naval vessels; contracts for public works; insurance; patents; the sufficiency of official, contract, and other bonds and guaranties; the sale of condemned naval vessels; proceedings in the civil courts by or against the Government or its officers; claims by or against the Government; questions submitted to the Attorney-General, except such as relate to questions of personnel; bills

**Navy—Continued.**

and congressional resolutions and inquiries not relating to the personnel and not elsewhere assigned; the searching of titles, purchase, sale, transfer, and other questions affecting lands and buildings pertaining to the Navy; the care and preservation of all muniments of title to land acquired for naval uses; and the correspondence respecting the foregoing duties; and rendering opinion upon any matter or question of law referred to him by the Secretary of the Navy.

Commandant of the Marine Corps.—The Commandant of the Marine Corps is responsible to the Secretary of the Navy for the general efficiency and discipline of the corps; makes such distribution of officers and men for duty at the several shore stations as shall appear to him to be most advantageous for the interests of the service; furnishes detachments for vessels of the Navy, according to the authorized scale of allowance; under the direction of the Secretary of the Navy, issues orders for the movement of officers and troops, and such other orders and instructions for their guidance as may be necessary; and has charge and exercises general supervision and control of the recruiting service of the corps, and of the necessary expenses thereof, including the establishment of recruiting stations.

**Navy Board:**

New organization of, 1252.

Report of, referred to, 2308.

Should be dispensed with, 1023.

**Navy, Department of.**—One of the nine Executive Departments of the Government. The Secretary of the Navy, the head of the Department, is appointed by the President at a salary of \$12,000 per annum, and is a member of the Cabinet.

The Continental Navy was under the direction of various committees, boards and agents; the first committee, being one of three members, was appointed on Oct. 13, 1775. In 1781, the Board of Admiralty then acting was replaced by the Secretary of Marine, whose duties correspond with those of the present Secretary of the Navy; but before the end of that year the duties of the office were transferred to the Treasury Department.

Upon the adoption of the Constitution, in 1789, naval matters were placed under the jurisdiction of the War Department and so remained until April 30, 1798, when in consequence of depredations of French cruisers, twelve new ships were added to the fleet; and the modern Department of the Navy was organized with a Secretary at its head. In 1815 a board of three "Navy Commissioners" was created which was charged with the duty of procuring naval stores, of constructing and equipping vessels and of superintending the navy yards; the order creating these Commissioners expressly provides that they should not interfere with the powers of the Secretary of the Navy Department.

In 1842 five bureaus, namely, Navy Yards and Docks, Construction, Equipment and Repairs, Clothing and Provisions, Ordnance and Hydrography, and Medicine and Surgery took

the place of the Commissioners. Another reorganization took place in 1862 which placed the Department substantially upon its present basis. The Hydrographic Office was then established and the office of Judge-Advocate General, created in 1865, was reorganized in 1880. Although assistants to the Secretary had been from time to time appointed before that date, it was not till 1890 that the office of Assistant Secretary was established.

The Secretary of the Navy has the general supervision of the work of the Department, and, although under the Constitution the President is Commander-in-chief of the Navy, the official acts of the Secretary are final. The Assistant Secretary performs the duties of the Secretary in the latter's absence. The details of the Secretary's duties are carried out by eight Bureaus, each presided over by a naval officer having the actual or nominal rank of Rear-Admiral. The Bureau of Navigation attends to the promulgation and enforcement of the Secretary's orders; the education of officers; the enlistment and education of enlisted men; keeps their records and preserves the Naval Register; and directs the enforcement of all regulations. The Bureau of Yards and Docks attends to the construction, equipment and maintenance of all Docks and Navy Yards. The Bureau of Equipment furnishes all supplies to the ships, directs the Naval Observatory and prepares the *Nautical Almanac*; the Hydrographic Office, whose duties relate to the preparation of charts and gathering information on all kinds of nautical subjects, is a branch of this Bureau. The Bureau of Ordnance supervises the manufacture of offensive and defensive armor and apparatus, and, in connection with the Bureau of Construction and Repairs, their installment on the ships. The Bureau of Construction and Repairs designs and constructs war-ships, has charge of the docking of the ships and repairing all permanent fixtures. The Bureau of Steam-Engineering constructs and repairs all steam machinery. The Bureau of Medicine and Surgery has charge of and furnishes supplies to the Medical Department and all naval hospitals. The Bureau of Supplies and Accounts furnishes all the general supplies and keeps all naval accounts.

In addition to these Bureaus, the

**Navy, Department of—Continued.**

office of the Judge-Advocate General forms the law department of the Navy; it prepares charges and keeps records of all courts-martial, attends to the legal side of all contracts and bonds, and reports upon questions involving the interpretation of the regulations. The Commandant of Marines is the head of the Marine Corps. The General Board, composed of naval officers of various grades, advises the Secretary on technical matters and submits plans for naval maneuvers, etc.

Following is a list of the Secretaries of the Navy from the establishment of the office in 1798 to 1909: George Cabot, Massachusetts (appointed and declined); Benjamin Stoddert, Maryland; Robert Smith, Maryland; Jacob Crowninshield, Massachusetts; Paul Hamilton, South Carolina; William Jones, Pennsylvania; B. W. Crowninshield, Massachusetts; Smith Thompson, New York; John Rodgers (acting), Maryland; Samuel L. Southard, New Jersey; John Branch, North Carolina; Levi Woodbury, New Hampshire; Mahlon Dickerson, New Jersey; James K. Paulding, New York; George E. Badger, North Carolina; Abel P. Upshur, Virginia; David Henshaw, Massachusetts; Thomas W. Gilmer, Virginia; John Y. Mason, Virginia; George Bancroft, Massachusetts; William B. Preston, Virginia; William A. Graham, North Carolina; John P. Kennedy, Maryland; James C. Dobbin, North Carolina; Isaac Toucey, Connecticut; Gideon Welles, Connecticut; Adolph E. Borie, Pennsylvania; George M. Robeson, New Jersey; Richard W. Thompson, Indiana; Nathan Goff, Jr., West Virginia; William H. Hunt, Louisiana; William E. Chandler, New Hampshire; William C. Whitney, New York; Benjamin F. Tracy, New York; Hilary A. Herbert, Alabama; John D. Long, Massachusetts; William Henry Moody, Massachusetts; Paul Morton, Illinois; Charles J. Bonaparte, Maryland; V. H. Metcalf, California; George von Lengerke Meyer, Massachusetts.

*Marine Corps.*—By an act of the Continental Congress of Nov. 10, 1775, the Marine Corps was established and the first and second battalions of marines were authorized. An act of Congress of July 11, 1798, reestablished the corps and provided that the marines, while subject at all times to the laws and regulations of

the Navy, were liable at any time to do duty in the forts and garrisons of the United States. There was no regimental organization, but the corps was to be formed into companies as the President might direct. By an act approved March 3, 1899, its strength was greatly augmented. It now consists of 1 brigadier-general commandant, 7 colonels, 6 lieutenant-colonels, 15 majors and 6,249 other officers and enlisted men.

*Marine, Secretary of.*—Up to 1781 the Board of Admiralty had supervision of all naval affairs. Feb. 7 of that year the Continental Congress created the office of Secretary of Marine, whose duties corresponded with those of the present Secretary of the Navy. Before the end of that year, however, the duties of the office were transferred to the Treasury Department. (See Navy, Secretary of.)

*Midshipman.*—One who is under training to become an officer in the United States Navy, by a course of instruction and discipline at the Naval Academy at Annapolis. Each Senator, Congressional District, Territory and the District of Columbia is entitled to have two midshipmen at the Academy, one midshipman is allowed from Puerto Rico, and the President has five nominations a year at his disposal. Candidates for nomination must be between 16 and 20 years of age. The course of instruction occupies 6 years, 4 years spent at the Academy and two years at sea, at the end of which period the graduation examination is taken. While under instruction midshipmen receive pay at the rate of \$500 per annum, out of which they defray their subsistence and clothing expenses. Midshipmen, on admission to the Academy, make an agreement to serve in the navy for 8 years and also deposit \$200 to cover cost of their outfit.

*Naval Academy.*—An institution for the training of naval officers, founded at Annapolis, Md., in 1845, through the efforts of George Bancroft, then Secretary of the Navy. The Academy was not established by formal legislation of Congress, but was opened in October, 1845, under orders from the Secretary of the Navy. It was not until Aug. 10, 1846, that Congress took any action toward the encouragement of the enterprise. At that time \$28,000 was appropriated for repairs, improvement, and instruction, and the following year a like sum was appropriated. In 1850 the school

**Navy, Department of—Continued.**

was reorganized and the name changed to the United States Naval Academy. At the outbreak of the Civil War the Academy was removed to Newport, R. I., where it remained until the summer of 1865, when it was reestablished at Annapolis. The Naval Academy is under the immediate control of an academic board, consisting of a superintendent, who is a naval officer; a commandant of cadets, and the heads of the different departments of study, who are, with one exception, naval officers.

*Naval Militia.*—In 1888 Congress passed an act authorizing the maritime States to organize a naval reserve, to be trained and fitted for operating the coast and harbor defense vessels, etc., in time of war, thus liberating the regular naval force to man the heavy seagoing war ships, etc. Massachusetts was the first State to pass laws providing for such organization. New York took similar action, and by 1898 most of the maritime States had regularly organized naval militia. The first appropriation for the equipment of the force was \$25,000, made by Congress in 1891. The naval militia is now organized in 18 States and in the District of Columbia, and all matters concerning it come under the cognizance of the Assistant Secretary of the Navy. Its present strength is 515 officers and 5,687 enlisted men.

*Naval War College.*—A course of lectures on and instruction in the manipulation of torpedoes established by the Government at Coasters Harbor Island, Newport, R. I., in 1889. The class consists chiefly of officers and men in the torpedo service, but lectures are delivered on all branches of naval improvements and progress. The course continues 3 months in each year.

**Navy Department:**

Accounts of, in Fourth Auditor's Office referred to, 1096.

Amount charged to State Department for services rendered by naval vessels referred to, 3660.

Appointments in, referred to, 1965.

Appropriations for, 927, 4426.

Diverted to survey of Isthmus of Darien referred to, 4000.

Necessary to render efficient, 1444.

Recommended, 955, 1163, 1475, 2055, 2872, 4405, 4674, 4796.

Referred to, 4407.

Transfer of, referred to, 1818, 2122.

Act authorizing, approved, 2131.

Appropriations for docks, etc., should be separated from those for naval service, 2625, 2670.

Board of Commissioners for, referred to, 603, 631.

Clerks in, referred to, 3585.

Deficiencies in, referred to, 4407.

Expenditures of, 335, 800, 2055, 2064, 2625, 2670, 3450, 3650, 3775, 3882, 4062, 4407, 4425, 4452, 4525, 4573, 5376, 5972.

Fireproof building for, recommended, 2281, 2704.

Law reserved for use of, 6743, 6746, 6837.

**Navy Board—**

New organization of, 1252.

Report of, referred to, 2308.

Should be dispensed with, 1023.

Persons employed in, without express provisions of law, 1964, 2174.

**Transfer of—**

Coasts, Survey to, recommended, 4727, 4932, 5973.

Light-House Service to, recommended, 4727.

Payment of naval pensions to, recommended, 4060.

**Navy League of the United States.—**

Incorporated under the laws of the State of New York Jan. 2, 1903, its declared object being "to acquire and spread before the citizens of the United States, through branch organizations and otherwise, information as to the condition of the naval forces and equipment of the United States, and to awaken public interest and co-operation in all matters tending to aid, improve, and develop their efficiency." It is strictly non-partisan. Men, women and children are eligible to membership. The button of the League is of silver gilt and blue enamel, with letters in white, and anchor of gold, and is worn by members. The membership fee is one dollar annually. There are eighty-three sections in the United States, and sections in England, France, Canada, Colombia, and two in Italy. Five or more citizens may sign an application for a charter to form a section of the League.

**Navy Medical Department,** relative rank of officers of, 7380.

**Navy, Secretary of:**

Letter of Boynton and Fisher to, referred to, 3669.

Report of, 3236, 6294.

Discussed. (See Navy discussed.)

Transmitted, 335, 845, 994, 1097, 1444, 2064.

**Navy Yards:**

At Boston, machinery at, for preserving wood, referred to, 4676.

Title of United States to land occupied as, referred to, 4698.

At New York, new boiler shop at, recommended, 4681.

At Norfolk, employment at, referred to, 3660.

At Washington, manufacture of guns at, discussed, 5973.

Civil service in connection with, discussed, 5974.

Order regarding, 6146.

Defense of, demands attention of Congress, 1754.

Discontinuance of, on Atlantic seaboard referred to, 2958.

Establishment of—

At Memphis referred to, 2202, 2829.

On Atlantic seaboard recommended, 3385, 3450.

Mississippi River recommended, 2132.

San Francisco Bay recommended, 2669.

Western river recommended, 3385.

Recommended, 3561.

Improvements in, recommended, 4062.

Labor at, secured through boards of labor, employment, discussed, 6166.

List of (see Encyclopedic article on the Navy, index.)

Officers and men in, referred to, 765, 3660.

Referred to, 6255.

Small, abolition of, recommended, 8076.

**Near East, and Europe, political conditions in, 8047.**

**Near East, commerce with, 8047.**

**Nebraska.**—One of the United States.

Motto, "Equality before the law."

It extends from lat. 40° to 43° north and from long. 95° 25' to 104° west.

It is bounded on the north by South Dakota (partly separated by the Missouri River), on the east by Iowa and Missouri (separated from both by the Missouri River), on the south by Kansas and Colorado, and on the west by Colorado and Wyoming, and has an area of 77,510 square miles.

Nebraska originally formed part of the Louisiana Purchase and was later made a part of the Territory of Missouri. It was made a Territory in 1854, and included portions of the Dakotas, Montana, Wyoming, and Colorado. Nebraska was admitted to the Union in 1867. The State takes its name from the river. It was first permanently settled at Bellevue in 1847.

The State is one of the first in the production of corn, being extremely fertile in the eastern part and along the Platte River. Its principal industries are agriculture and stock raising, slaughtering and meat packing, South Omaha being one of the great cattle markets of the world. Butter, cheese, condensed milk and kindred dairy products are the chief manufactured products.

The Federal irrigation scheme, completed in 1911, includes the watering of 110,000 acres of Nebraska and Wyoming. There are 3,074,658 acres of land in the State unreserved and unappropriated. Land offices are located at Alliance, Broken Bow, Lincoln, North Platte, O'Neill and Valentine.

Statistics of agriculture reported to the Federal Census Bureau, under date of April 15, 1910, place the number of farms in the State at 129,678, comprising 38,622,021 acres, valued, with stock and improvements, at \$2,079,817,647. The average value of land per acre was \$41.80, an increase from \$16.27 in 1900. The value of domestic animals, poultry, etc., was \$222,222,004, including 2,932,350 cattle, valued at \$73,074,057; 1,008,378 horses, \$102,804,907; 83,405 mules, \$10,374,076; 3,435,734 swine, \$29,649,482; 293,500 sheep, \$1,486,948. The yield and value of field crops for 1911 is given as: Corn, 7,425,000 acres, 155,925,000 bushels, \$85,759,000; wheat, 3,098,000 acres, 41,594,000 bushels, \$36,169,000; oats, 2,500,000 acres, 34,750,000 bushels, \$14,942,000; rye, 52,000 acres, 676,000 bushels, \$507,000; potatoes, 116,000 acres, 6,032,000 bushels, \$5,549,000; hay, 1,350,000 acres, 1,148,000 tons, \$11,136,000.

While not noted as a manufacturing State, Nebraska has 2,500 establishments, employing 32,000 persons, and capitalized at about \$100,000. These are engaged in slaughtering and meat packing, manufacturing flour and meal and dairy products for shipment, and minor industries incidental to local needs. The value of the output of the manufactories in 1911 was about \$200,000,000. There are no mines in the State. The receipts at the State Treasury for the biennial period ending Nov. 30, 1910, were \$10,960,919, and the disbursements \$10,744,066; balance on hand, \$601,290. School, college and university trust funds of the State amounted to \$8,863,690. The debt of the State amounts to \$2,005,001.

**Nebraska—Continued.**

There were in 1906, 5,834 miles of steam railway and 271 miles of electric line. Omaha is the center from which 14 trunk lines of railway radiate. The population in 1910 was 1,192,214.

**Nebraska** (see also Omaha):**Act—**

Extending time of payment to purchasers of Indian lands in, vetoed, 5525.

For admission of, into Union, vetoed, 3687.

For sale of Indian reservation in, 4656.

To provide for lease of Fort Omaha Military Reservation to, vetoed, 6119.

Admission of, into Union, proclaimed, 3714.

Indian lands in, titles to, extinguished, proclaimed, 5535.

Memorial from citizens of, regarding creation of new Territory, 3111.

Military forces sent to and reasons therefor, discussed, 4673.

Public lands in, survey of, referred to, 4959.

Red Cloud Agency in, deficiency in supplies at, 4312, 4313.

Reservation of public lands, 6693, 6695, 6749, 7018.

Supplies issued suffering people in, referred to, 4272.

Surveyor-general in, recommendations for discontinuance of office of, 4959.

**Negro Plot.**—An alleged attempt on the part of certain negroes, incited and assisted by whites, to burn New York City. March 18, 1741, a fire occurred in the chapel and barracks of Fort George. It was at first thought to be accidental, but 8 other fires of unaccountable origin within a month strengthened the allegation of one Mary Burton, a servant in the employ of John Hughson, that a number of negroes and sailors were implicated in a plot to destroy the town. It was charged that the Spanish were inciting plots among the negroes. Twenty whites and more than 160 negro slaves were imprisoned. Four whites and 18 negroes were hanged and 13 others were burned at the stake before the excitement abated.

**Negro Troops.**—In early Revolutionary days and in the first two years of the Civil War negro troops were employed to a limited extent. In July, 1863, a general provision was made for their enlistment in the Union Army and numbers were in service. Since the Civil War there have al-

ways been negro troops in the Regular Army. They served in the war with Spain in 1898, and proved to be less subject to the prevailing fever and the enervating effects of heat than white soldiers.

**Negroes.**—According to the census of 1900 there were in the United States 9,192,389 colored inhabitants. Of these, 119,050 were Chinese, 85,986 Japanese, and 266,760 Indians, leaving 8,621,493 negroes, or about one-ninth the entire population.

**Negroes** (see also Free Negroes; Freedmen):

**Colonization of—**

Discussed, 3255, 3328, 3341, 3401, 3588.

In Mexico, and action taken by United States for relief of, discussed, 6066, 6096.

Vessels to bring back colonists, 3433.

Education and industrial training, recommended, 7412.

**Emigration of—**

Agreement with Barnard Koch for, canceled, 3368.

Discussed, 3653.

Lynching of, discussed, 5767, 7410.

Recruiting of, in War between the States, order regarding, 6335.

Sale of, taken from United States by British forces, referred to, 6278.

To be employed for military purposes in war between the States, order regarding, 3318.

Welfare of, discussed by President Taft, 7669.

**Neighbors, Robert S.**, mentioned, 3249.

**Nelson, John Mandt**; b. Burke, Dane Co., Wis., Oct. 10, 1870; grad. Univ. Wisconsin, 1892, and law department of the Univ. of Wisconsin, 1896; elected to the 59th Congress to fill a vacancy and to the 60th, 61st, and 62d Congresses from Wisconsin.

**Nelson, Knute**; b. Norway, Feb. 2, 1843; came to United States in 1849, to Minnesota in 1871; was a private and noncommissioned officer during the War of the Rebellion; admitted to the bar in 1867; member of the Wisconsin legislature in 1868 and 1869; county attorney of Douglas Co., Minn., in 1872, 1873, and 1874; State senator in 1875, 1876, 1877, and 1878; member of the board of regents of the State University Feb. 1, 1882, to Jan. 1, 1893; member of the 48th, 49th, and 50th Congresses from Minnesota; elected governor of Minnesota in 1892; elected United States Senator for Minnesota for the term commencing March 4, 1895; reelected in 1901 and 1907.

**Nelson, Samuel**, associate justice, Supreme Court, member of commission to settle questions with Great Britain, 4075.

**Nelson, Thomas A. R.**, counsel for President Johnson in impeachment proceedings, 3924.

**Nero, The**, soundings taken by, 6759.

**Nesqually Indians**. (See Indian Tribes.)

**Nesqually, Wash.**, proclaimed port of delivery, 2588.

**Netherlands**.—A Kingdom of western Europe, often called Holland, after North Holland and South Holland, 2 of the 11 provinces into which the Kingdom is divided. It is bounded by the North Sea on the north and west, Prussia on the east, and Belgium on the south. The country is occupied by an intellectual, industrious, and thrifty people, who have reclaimed much of the land from the sea and are extensively engaged in commerce, agriculture, and manufactures. The government is a hereditary constitutional monarchy of the House of Orange (descended from the German Count Walram), administered by Queen Wilhelmina Helena Pauline Maria and a States-General composed of an upper chamber of fifty and a lower chamber of one hundred members. The inhabitants, generally called Dutch, are of Low German origin, descendants of the brave Batavi of ancient times. Their prevailing religions are Dutch Reformed and Roman Catholic. The country once formed a part of the Germanic Empire, then of Burgundy, and later was acquired by Spain. Following the Reformation came the revolution under William of Orange. After a long series of struggles with Spain the independence of the Dutch Republic was recognized, 1648. Its Stadtholder was King of England (William III.) from 1689 to 1702. The Dutch Republic was conquered by France in 1794, became the Republic of Batavia in 1795, was converted into a kingdom under Louis Bonaparte in 1806, annexed by France in 1810, united with Belgium in the Kingdom of the Netherlands in 1815, and admitted the independence of Belgium in 1839. It has an area of only 12,648 square miles, upon which live a population amounting, according to the census of 1910, to 5,945,155.

The colonial possessions of the Netherlands are the Dutch East Indies (Java and Maduro, Sumatra, Borneo, Riau-Lingga Archipelago, Banca, Billiton, Celebes, Molucca

Archipelago, the Sunda Islands, and part of New Guinea); the Dutch West Indies (Surinam or Dutch Guiana and the colony of Curacao). These islands have an area of (Dutch East Indies, 736,400; Dutch West Indies, 46,060) 782,460 square miles, and a population of (Dutch East Indies, 38,000,000; Dutch West Indies, 85,094) 38,094,000.

Agriculture and horticulture are highly developed in the kingdom, and many of the modern improvements in the science of cultivation are due to Dutch farmers.

**Netherlands** (see also Hague, The):

Accounts of bankers of United States in Amsterdam, rendered, 113.

Claims of United States against, 852, 1109, 1456, 1693.

Claims arising out of, 1693.

War with Acheen, neutrality of United States in, 4192.

**Netherlands, Treaties with.**—The treaty of commerce and navigation of 1839 was in part superseded by the treaty of commerce and navigation of 1852. Together they provide for equitable imposition of duties of import and export, together with the extension to one of the contracting parties of such additional rights, privileges, or exemptions as may hereafter be granted by either of them to a third power. The reciprocal equality of the flags is recognized in home ports and in the colonial possessions. The coasting trade is exempted from the provisions of the treaty. Holland does not relinquish her right of imposing discriminating duties on trade between the home ports of Holland and her colonies; nor does the United States relinquish her right to sustain her discriminating duties on coffee and tea. But in the event of the abolition of these discriminating duties by the one power, the other shall reciprocate. (For the consular convention of 1878, see Consular Conventions; for the terms of the extradition treaty of 1887, see Extradition Treaties.)

In Department of Texas, action of Government regarding, discussed, 5877.

**Neutrality, Proclamation of.**—Neutrality, in international law, is the attitude and conditions of a nation or State which does not take part directly or indirectly in a war between other States, but maintains relations of friendship with all the contending parties. In ancient times war between any two nations was likely to involve any other, either through sympathy or by its being drawn unwillingly into the controversy on accusation of favoring one or the other of the belligerents. Modern civilization has made it possible for a peacefully inclined nation to avoid entanglements in quarrels not of its own making. The position which a State intends to take in case of war between its neighbors should be clearly defined. It is customary, therefore, on the breaking out of hostilities for every nation not participating therein to declare its position with reference to the belligerents. This is usually done by a proclamation by the chief ruler of a State proclaiming its neutrality and calling upon its citizens to refrain from any acts of hostility or special favor toward either of the parties to the strife. It is also customary for every nation to put on its statute books general laws regulating the acts of its citizens with reference to foreign wars. Upon the declaration of war between France and Great Britain in 1793 it was decided unanimously by Washington and his Cabinet that a proclamation of neutrality should issue and that a French minister should be received. The proclamation was drafted by John Jay and declared the intention of the United States to pursue a policy of friendship toward both nations, and enjoined upon all citizens to avoid a contravention of that disposition upon pain of prosecution. It is a curious fact that the word "neutrality" was omitted from this proclamation, but it was enforced with fairness. The latest proclamation of neutrality was issued by President Roosevelt on Feb. 11, 1904, declaring the neutrality of this country in the Russo-Japanese War.

**Nevada.**—One of the United States; nickname, "The Sage Brush State"; motto, "All for our country." Nevada extends from lat. 35° to 42° north and from long. 114° to 120° west. It is bounded on the north by Oregon and Idaho, on the east by Utah and Arizona, and on the west and southwest by California, and has an area of 110,700 square miles. The State is rich in precious metals, the principal products being silver and gold. The territory was ceded by Mexico in 1848, and the first settlements were made in 1848 and 1850. Silver was discovered in 1859. Nevada Territory was organized in 1861 and was admitted to statehood in 1864.

There are within the State 61,177,050 acres of unappropriated and unreserved lands, which can be entered at the United States land office at Carson City. Agriculture is retarded by lack of transportation facilities.

There are 160,000 acres within the State subject to the Federal irrigation project. The farm area consists of nearly 3,000,000 acres, of which about one-third is improved land. The farm animals reported Jan. 1, 1910, were 98,000 horses, valued at \$7,644,000; 4,000 mules, \$316,000; 19,000 milch cows, \$836,000; 404,000 other cattle, \$8,363,000; 1,585,000 sheep, \$5,864,000. The yield and value of field crops for 1911 is given as follows: Corn, 1,000 acres, 30,000 bushels, \$27,000; wheat, 36,000 acres, 1,018,000 bushels, \$968,000; oats, 8,000 acres, 360,000 bushels, \$223,000; potatoes, 8,000 acres, 1,280,000 bushels, \$1,197,000; hay, 254,000 acres, 864,000 tons, \$8,208,000. The State is one of the leading producers of gold and silver. The output of gold in 1911 was 917,605 fine ounces, worth \$18,968,578; the silver output was 10,651,571 fine ounces, valued at \$5,858,364. While theretofore ranking first in the production of silver, Nevada in 1911 took third place, being surpassed by both Utah and Montana. The Ely district, in White Pine County, produced 64,494,640 pounds of copper in 1910, and has increased since. The receipts by the State Treasurer for the fiscal year of 1911 were \$994,882, and the disbursements, \$1,128,347; balance on hand Jan. 1, 1911, \$655,531.

In 1905 there were 115 manufacturing establishments, with a capital of \$2,891,997, employing 908 persons, who converted \$1,627,776 worth of

**Nevada—Continued.**

raw material into finished goods worth \$3,096,274.

In 1906 there were 1,440 miles of steam railway in the State and 5 miles of electric line. The population in 1910 was 81,875.

**Nevada:**

Admission of, into Union proclaimed, 3430.

Referred to, 3450.

Condition of, referred to, 3405.

Public Lands of, 6856.

**Neville, John**, attacked while discharging duties as revenue inspector, 151.

**New Brunswick**, Canadian Province; area, 2,000 square miles; population, 1901, 31,120.

Aggressions on rights of American citizens by citizens of, 963.

Imprisonment of American citizens by, 963, 969, 990, 1575, 1622, 1687. (See also Great Britain.)

**New England.**—A name applied to the northeastern section of the United States by Capt. John Smith in his map of the New World published in 1616. Though composed of separate Colonies, there was always a similarity in the customs and habits of the people. New England formed part of North Virginia, granted to the Plymouth Company by James I. in 1606. In 1643 most of the New England Colonies were united for defensive purposes in the New England Confederation. New England is now applied collectively to the States of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut.

**New England, Council for.**—On Nov. 3, 1620, Ferdinando Gorges and others incorporated in a reorganized form the old North Virginia Company of 1606. It was called the Council for New England, and had its headquarters at Plymouth, in the county of Devon. Its stated object was the "planting, ordering, ruling, and governing of New England, in America." The patent granted to this company gave them all the land lying between lat. 40° and 48° north and from the Atlantic to the Pacific Ocean. In 1621 Gorges obtained an additional grant of territory, covering the present States of Maine and New Hampshire, under the name of Laconia, most of which, however,

seems to have been included in the original grant. The lands of this company were then divided among 20 noblemen. William Bradford obtained from this company a grant permitting the settlement of the Pilgrims, a sect of English separatists who had fled from England to Holland to escape religious persecution, and who sought in America an asylum where they might worship God according to the dictates of their own consciences.

**New England Emigrant Company.**—

The passage of the Kansas-Nebraska law in 1854 made the institution of slavery in Kansas dependent upon the will of the majority of the people of the State. Proslavery advocates in Missouri set to work to establish slavery by assisting in the emigration of Southern families. In 1855 an association was formed in Boston to offset this movement by assisting New England farmers to establish homes in the debatable territory. This organization was known as the New England Emigrant Company, and did much toward making Kansas a free State.

**New England Shilling.**—The general

court of Massachusetts on May 27, 1652, established a mint at Boston and installed John Hull as mint master. The first coins which were struck were but rude planchets stamped "N. E." near the border on the obverse and the denomination mark (XII) on the reverse, signifying the value of 12d. This was known as the New England shilling, and was valued at 18¾ cents.

**New France.**—A French expedition

under Verrazano formed a settlement in America as early as 1524, on land discovered by John and Sebastian Cabot in 1497. In 1535 Jacques Cartier ascended the St. Lawrence River as far as the site of Montreal. The first permanent settlement in New France was founded at Quebec by Champlain in 1608. The colonists cultivated friendly relations with the Indians, and Jesuit missionaries extended the French influence through the region of the Great Lakes to the headwaters of the Mississippi and down that stream to the French possessions in the South. The country was conquered by the English in 1629 and restored in 1632. At the beginning of the Seven Years' War New France was made the scene of a part of the struggle between France and England. By 1750 New France, with

**New France—Continued.**

Louisiana added, comprised the St. Lawrence and Great Lakes basins and the Mississippi basin, though the settlements were scattered. In 1759 Canada was reconquered by the English and its possessions confirmed to them by the treaty of Paris, Feb. 10, 1763. The result of this treaty was the cession of all the country east of the Mississippi to England and that west to Spain. The French laws were continued in force and religious liberty was extended to Roman Catholics.

**New Hampshire.**—One of the thirteen original States; nickname, "The Granite State." It extends from lat. 42° 40' to 45° 18' north and from long. 70° 43' to 72° 33' west. It is bounded on the north by the Province of Quebec (Canada), on the east by Maine and the Atlantic Ocean, on the south by Massachusetts, and on the west by Vermont (separated by the Connecticut River) and Quebec. New Hampshire is called the "Switzerland of America," being noted for the grandeur of its mountain scenery and the beauty of its lakes. It has an area of 9,305 square miles.

It is one of the leading States in the manufacture of boots and shoes, and produces also cotton, woolen, and worsted goods, lumber and timber products, hosiery, and foundry and machine shop products. New Hampshire was visited by Pring in 1603 and by Capt. John Smith in 1614. It formed part of the territory granted to Gorges in 1621. It was settled by the English at Portsmouth and Dover in 1623. Between 1641 and 1679, and at various times thereafter, it was a part of Massachusetts. Its final separation was in 1741. Vermont was claimed as part of New Hampshire until 1764.

About three-fifths of the area of the State consists of forests.

Statistics of agriculture reported to the Federal Census Bureau, under date of April 15, 1910, place the number of farms in the State at 27,053, comprising 3,249,438 acres, valued, with stock and improvements, at \$103,704,196. The average value of farm land per acre was \$13.70, an increase of \$9.83 in 1900. The value of domestic animals, poultry, etc., was \$11,910,478, including 167,831 cattle, valued at \$5,240,122; 46,229 horses, \$5,266,389; 195 mules, \$29,681; 45,237 swine, \$504,174, and 43,772 sheep, \$192,346. The yield and value of field crops for 1911 was: Corn, 23,000 acres, 1,035,000 bushels, \$849,000; oats, 12,000 acres, 406,000 bushels, \$248,000; potatoes, 17,000 acres, 2,125,000 bushels, \$1,849,000; hay, 640,000 acres, 672,000 tons, \$11,558,000; tobacco, 100 acres, 170,000 pounds, \$27,200. The manufacturing business of the State employs 84,191 persons and \$139,990,000 capital, and turns out \$164,581,000 worth of goods annually. The leading industry is the manufacture of boots and shoes and next is cotton goods, followed by woolen goods, lumber and paper. The indebtedness of the State at the end of the fiscal year 1911 was \$463,867. Receipts were \$2,612,077, and disbursements, \$2,707,535.

The mountain and lake regions of the State afford delightful summer resorts. There are 1,276 miles of steam railways in the State, and 292 miles of electric line. The population in 1910 was 430,572.

**New Hope Church, or Pumpkin Vine Creek (Ga.), Battle of.**

—When Gen. Johnston withdrew the Confederate forces from Resaca, Ga., May 16, 1864, he retired by way of Cassville across the Etowah and occupied a strong position commanding the Allatoona Pass. May 23 Sherman crossed the Etowah and moved toward Dallas. Hooker, with the Twentieth Army Corps, moving from Burnt Hickory toward Dallas, May 25 encountered a force of Confederate Cavalry at Pumpkin Vine Creek. They were driven across the stream, and about 2 miles to the eastward the Federals encountered Johnston's entire army. Here a severe battle took place. The Confederates retired and occupied a strong position from Dallas to Marietta. The losses of each army in these operations were about 2,500 men killed and wounded.

**New Ireland.**

—Jan. 12, 1779, Capt. Mowatt, with 3 British sloops of war, landed Gen. McLane and 900 troops on the peninsula of Biguysduce (now Castine), on the south coast of Maine. On the 25th of the following July an expedition of 19 armed vessels and 24 transports under Gurdon Saltonstall, a Connecticut sea captain, and 1,500 men from Massachusetts under Gen. Lovell, arrived at Penobscot for the purpose of dislodging the British. They delayed making the attack, however, and the arrival of five British ships from New York on the 13th of August forced them to burn their ships and disperse. As a result of their success the British during the next year attempted to erect Maine into a province under the name of New Ireland.

**New Jersey.**

—One of the thirteen original States. It extends from lat. 38° 56' to 41° 21' north and from long. 73° 54' to 75° 33' west. It is bounded on the north by New York, on the east by New York (separated by the Hudson River, New York Bay and Staten Island Sound) and the Atlantic Ocean, on the south by Delaware Bay, and on the west by Pennsylvania and Delaware (both separated by the Delaware River). It has an area of 7,815 square miles. New Jersey was first settled by the Dutch at Bergen, probably about 1617. There were succeeding colonies there of

Swedes, Finns, and English. In 1664 it was granted by the Duke of York to Sir George Carteret, lieutenant-governor of the Isle of Jersey, to be a perpetual inheritance and to be called New Jersey. It was reconquered by the Dutch in 1673 and restored to England in 1674 and sold to the Quakers. Proprietary government ceased in 1702 and New Jersey was made a royal province. It was under the same governor as New York until 1738.

Statistics of agriculture reported to the Federal Census Bureau, under date of April 15, 1910, place the number of farms in the State at 33,487, comprising 2,573,857 acres, valued, with stock and improvements, at \$254,832,665. The average value of land per acre was \$48.23. The value of domestic animals and poultry, etc., was \$24,558,639, including 222,999 cattle, valued at \$8,393,117; 88,922 horses, \$12,012,512; 4,041 mules, \$621,774; 147,005 swine, \$1,127,040; 30,683 sheep, \$161,138; poultry, \$2,221,610. The yield and value of field crops for 1911 is given as follows: Corn, 270,000 acres, 9,936,000 bushels, \$7,055,000; wheat, 84,000 acres, 1,462,000 bushels, \$1,404,000; oats, 71,000 acres, 2,024,000 bushels, \$1,012,000; rye, 72,000 acres, 1,181,000 bushels, \$980,000; potatoes, 84,000 acres, 6,132,000 bushels, \$6,439,000; hay, 428,000 acres, 449,000 tons, \$9,878,000. Some iron and zinc is mined in the State. The Mine Hill mines, in Sussex County, produced, in 1910, 308,353 short tons of zinc, besides 67,324 tons of crude oil. The receipts by the State Treasurer for the fiscal year 1911 were \$8,014,876, and the disbursements were \$9,250,283; balance on hand Oct. 31, 1911, \$3,301,781.

In 1905 the manufacturing establishments of the State had a capital of \$715,060,174 and employed 289,532 operatives, who converted \$470,449,176 worth of raw material into silks, cotton and woolen goods, worsteds, hats, hosiery, ironware, leather, beer, breadstuffs, chemicals, pottery, refined petroleum, etc., to the amount of \$774,369,025.

There are 2,297 miles of steam railway within the State and 1,198 miles of electric line. The population in 1910 was 2,537,167.

**New Jersey:**

Boundary line with New York, 1268. Ratification of—

Amendment to Federal Constitution by, referred to, 70, 249.

**New Jersey—Continued.**

Fifteenth amendment by, 4081.

Fourteenth amendment by, discussed, 3836.

Request from the governor of, that Congress consent to an agreement made with New York State regarding boundary, 1268.

**New Jersey, The,** interference by American minister to France in case of, 387.

**New Jersey Plan.**—At the convention held in Philadelphia in 1787 to amend the Articles of Confederation William Paterson, of New Jersey, proposed a constitution providing for a single house of Congress, with power to regulate taxation and commerce and choose the President; that requisitions from States should be continued as under the Articles of Confederation; that a judiciary should be established; that the Executive should coerce refractory States or individuals, and other matters of general but minor interest. The plan was unfavorably reported. The convention accepted the Virginia plan with extensive modifications.

**New Jerseymen Foreigners.**—The humorous reference to New Jersey as a foreign country had its origin in a special act of the legislature of that State permitting Joseph Bonaparte, former King of Spain and Naples, to hold real estate within its boundaries. After the downfall of Napoleon, Joseph sought an asylum in America. The legislature of Pennsylvania refused to allow him, being an alien, to acquire land in that State, so he appealed to New Jersey. His request was granted and he established himself in princely magnificence at Bordentown. Hence the citizens of other States were accustomed to jestingly twit the Jerseymen with being foreigners under a foreign prince.

**New London (Conn.), Capture of.**—Sept. 6, 1781, Benedict Arnold's expedition against Connecticut arrived in the harbor of New London. The only defense of the town was the unfinished Fort Trumbull, manned by about 25 or 30 State militia under Capt. Shopley. About a third of these were lost while escaping in boats to Fort Griswold after firing one volley, disabling 4 or 5 of their assailants.

**New Madrid (Mo.), Battle of.**—On the surrender of Fort Donelson to Grant the Confederates abandoned Columbus, Ky., on the Mississippi, and fell back to New Madrid, Mo., about 80

miles below Cairo. It was defended by Fort Thompson and several batteries and by 6 gunboats mounting heavy guns under Commodore Hollins. March 4, 1862, Gen. Pope appeared before New Madrid with an army of 20,000, which he had been commanding in eastern Missouri. On the 14th, having received heavy guns from Cairo, he gave the place a severe cannonading, disabling several of the gunboats. Gen. McCown, unable to hold New Madrid, removed his garrison during the night and in the midst of a thunderstorm to Island No. 10. Pope lost 51 men killed and wounded. The Confederate loss is not known.

**New Mexico.**—An organized Territory of the United States; motto, "Crescit eundo" ("It increases as it goes"). It extends from lat. 31° 20' to 37° north and from long. 103° 2' to 109° 2' west. It is bounded on the north by Colorado, on the east by Texas and Oklahoma, on the south by Texas and Mexico, and on the west by Arizona. It was visited by Niza in 1539, and Francisco Vasquez de Coronado conducted an expedition consisting of 400 Spanish and 800 Indians as far north as the present city of Santa Fé in 1540. Near the close of the sixteenth century Spanish missionaries made settlements about the head waters of the Rio Grande, and in 1605 Santa Fé was founded. The Spanish were temporarily expelled by the Indians in 1680. In 1846 the region was conquered by the Americans under Gen. Kearny, who proclaimed himself provisional governor. By the treaty of Guadalupe Hidalgo, proclaimed in 1848, New Mexico became a part of the United States. A Territorial government was established by act of Congress approved Sept. 9, 1850. In 1853 a part of the Gadsden Purchase was added to New Mexico, making the present area 122,580 square miles.

The industries of New Mexico are mostly confined to mining and stock-raising. Some cereals, vegetables, fruit and cotton are raised. With the extension of irrigation more attention is being given both to agriculture and stock-raising. In 1900 the irrigated area covered 203,893 acres, exclusive of lands in Indian reserves. The area to be reclaimed under the Federal reclamation act includes 40,000 acres in New Mexico. The Rio Grande project provides for reservoir construction for the irriga-

**New Mexico—Continued.**

tion of 180,000 acres in New Mexico and Texas. Private enterprise is also devoted largely to reservoir and canal construction. The forest area covers more than 8,300,000 acres. There are 44,777,905 acres of public lands in the territory unreserved and unappropriated. The land offices are at Clayton, Las Cruces, Roswell, and Santa Fé.

The agricultural development of New Mexico has been promoted by irrigation, both public and private. From less than 400,000 acres of fertile soil in 1900, the farm lands have increased to 2,000,000 acres actually producing through irrigation and dry farming, and it is believed that 3,000,000 acres additional may be reclaimed by storage and diversion of water. The Las Vegas irrigation project just completed will deliver water to 18,000 acres; by diversion of water from the Pecos River, Guadalupe County, 16,000 acres have been reclaimed; the central pumping station in Portales, Roosevelt County, furnishes water for 10,000 acres. During the fiscal year ending in 1910, the irrigation department received 158 applications to appropriate water to 617,816 acres of land. During the year ended June 30, 1910, 299,255 cattle and 10,988 horses were shipped, at prices ranging from \$18 to \$28. Sheep to the number of 719,444 were shipped. In the spring of 1910 there were 3,500,000 sheep in pasture in the State. Wild game and fish are abundant.

The copper production of 1910 was 3,784,609 pounds, while 5,031,136 pounds were produced the preceding year. In 1911 the output was increased and the cost of production decreased. Companies whose finished product cost 15 cents per pound in 1907, sold in 1911 at 12.7 cents and made a profit. The Chino Copper Company, with mills in the Santa Rita district, is the latest important producer. The gold produced in 1911 was worth \$639,897, and the silver was valued at \$628,282.

In 1906 there were 2,795 miles of steam railway and 14 miles of electric line in the territory. The population in 1910 was 327,301.

**New Netherlands.**—The second in order of settlement of the thirteen Colonies. It was the name of the region lying between the Delaware and Connecticut rivers. It was claimed by the Dutch by virtue of its discovery by Henry Hudson, an English navigator in charge of a Dutch expedition, in 1609. A trading post, the germ of a colony, was established, 1613-14, and maintained. In 1614 the States-General of the Netherlands granted the exclusive privilege of trading in New Netherlands to the explorers. In 1615 the New Netherlands Company was formed to trade in furs, but little attempt was made to settle families before 1621. In 1623 the new country was made a province of Holland and granted the armorial distinction of a count. Charles II. of England in 1664 granted the country to his brother, the Duke of York, and the garrison of the little block-house at New Amsterdam, being menaced by six times its number, was compelled to surrender. The place was recovered by the Dutch in 1673, but restored the following year. In 1674 the name was changed to New York. The question of the priority of the settlement of New York by the Dutch to that of Plymouth by the expatriated English Pilgrims, fresh from Holland, is one that still divides the historians. Dr. Brodhead, on the authority of Holland documents, seems, however, to have shown that the early trading post set up by the Dutch in 1613 was never abandoned and was really a settlement before the date of the Plymouth colonization. A similar post was established, 1614, near the present site of Albany.

**New Orleans (La.), Battle of.**—Within a week after the battle of Rodriguez Canal both Jackson and Sir Edward Pakenham received reinforcements. Jackson's whole force on the New Orleans side of the river on Jan. 8, 1815, was about 5,000, of which only 2,200 were at the front. Only 800 of the latter were regulars. On the opposite side of the river was Gen. Morgan with 800 militia. This force of 5,800 indifferently armed and disciplined, was confronted by 10,000 of the finest soldiers in the world, most of them fresh from the continental campaign under Wellington. The Americans were intrenched behind their fortifications, which the British were compelled to approach across an open plain. In the conflict 2,600 were lost to the British, of whom 700 were killed, 1,400 wounded, and 500 taken prisoners. The Americans lost only 8 killed and 13 wounded. Probably no other battle in history presents this disparity in the number lost.

**New Orleans (La.), Capture of.**—Feb. 20, 1862, Commodore Farragut, with his flagship, the sloop of war *Hartford*, arrived at Ship Island, 100 miles north-northeast of the mouth of the Mississippi. He was in command of the Western Coast Blockading Squadron, with directions to take possession of New Orleans. A military force to cooperate with Farragut arrived at Ship Island March 25, under Gen. B. F. Butler. The defenses of New Orleans were Fort Jackson, on the right bank or south side of the river, near its last great bend before it separates into the Delta, and Fort St. Philip, a little farther upstream on the opposite side. The former, with its water battery, mounted 75 guns; the latter 40. Just above the forts was a fleet of 15 vessels, including the ironclad ram *Manassas* and a floating battery, covered with railroad iron, called the *Louisiana*. These were in command of Commodore J. K. Mitchell. A heavy chain was also stretched across the river below Fort Jackson. Farragut's fleet consisted of 6 sloops of war, 16 gunboats, 21 schooners, each carrying a 13-inch mortar, and 5 other vessels. The fleet carried more than 200 guns.

Farragut bombarded the forts for 6 days with his mortar boats without much effect. The Confederate loss was 14 killed and 39 wounded. It was then decided to run by the forts. The obstructions were opened in the face of a heavy fire, and the fleet formed in 3 divisions and awaited the signal. It was given at half past 3 o'clock on the morning of April 24, 1862. Capt. Bailey led off with his division of 8 vessels. Under the storm of shot and shell they passed the obstructions and ran by the forts against the current in a stream less than half a mile wide, escaping the blazing rafts only to be met at the end of their journey by the Confederate gunboats eager to begin the fight. The second division of the fleet was led through the fiery gauntlet by the *Hartford*, with Farragut on board. The *Sciot*a, carrying Fleet Captain Bell, led the third division. The *Kennebec*, *Itasca*, and *Winona* failed to pass the forts, becoming entangled in the rafts and floating debris and delayed beyond the dawn. The latter lost all but one man of her rifled-gun crew. Having passed the forts the fleet savagely attacked the small Confederate gunboats beyond and their destruction was speedily accomplished. May 1 New Orleans was

formally occupied by the United States troops. The Federals lost in the taking of New Orleans 37 killed and 147 wounded. The Confederate loss was stated as only 40 killed and wounded.

International exhibition at Melbourne to celebrate founding of, discussed, 5176.

Postal convention with, 4882.

**New York.**—One of the thirteen original States; nickname, "The Empire State"; motto, "Excelsior." It extends from lat. 40° 30' to 45° 1' north and from long. 71° 51' to 79° 46' west. It is bounded on the north and northwest by Ontario, Canada (separated for the most part by Lake Ontario and the St. Lawrence River); on the east by Vermont (partly separated by Lake Champlain), Massachusetts, and Connecticut; on the south by the Atlantic Ocean, New York Bay, New Jersey, and Pennsylvania (partly separated by the Delaware River), and on the west by Pennsylvania and Ontario (separated by Lake Erie and the Niagara River). Long Island, Staten Island, and several small islands are included in the State. The area is 49,170 square miles. It is mountainous in the eastern part, along the Hudson River. A beautiful rolling country constitutes the watershed separating the north and south drainage of the western and central parts of the State. To the north the surface descends in undulating terraces toward Lake Ontario. To the south the country is higher, in places reaching an altitude of 2,000 to 2,500 feet. The valley of the Mohawk extends westward from the Hudson for nearly 150 miles. New York is the first State of the Union in commerce, manufactures, population, and estimated value of property, and the second State in value of farms.

Statistics of agriculture reported to the Federal Census Bureau, under date of April 15, 1910, place the number of farms in the State at 215,597, comprising 22,030,367 acres, valued, with stock and improvements, at \$1,451,481,495. The average value of land per acre was \$32.13, against \$24.34 in 1900. The value of domestic animals, poultry, etc., was \$183,090,844, including 2,423,003 cattle, valued at \$33,062,242; 59,008 horses, \$80,043,312; 4,052 mules, \$650,497; 666,179 swine, \$5,905,272; 930,300 sheep, \$4,839,651, and poultry, \$7,879,388.

**New York—Continued.**

The yield and value of field crops for 1911 was: Corn, 530,000 acres, 20,405,000 bushels, \$15,712,000; wheat, 345,000 acres, 6,728,000 bushels, \$6,392,000; oats, 1,310,000 acres, 38,645,000 bushels, \$19,709,000; rye, 135,000 acres, 2,254,000 bushels, \$2,006,000; potatoes, 375,000 acres, 27,750,000 bushels, \$24,975,000; hay, 4,763,000 acres, 4,858,000 tons, \$86,958,000; tobacco, 3,800 acres, 5,054,000 pounds, \$525,616. The State ranks fourth in the production of iron ore, the output for 1910 being 1,287,209 tons, valued at \$3,848,683.

In 1906 the output of talc was 67,800 tons, worth \$626,000, and 9,642,178 barrels of salt, worth \$2,335,150. In 1907, 1,375,020 tons of iron ore, valued at \$2,820,135, mostly magnetite, were mined. The yield of crude petroleum was valued at \$2,127,748, the natural gas at \$766,157, the mineral water at \$686,574, and the building stone, cement, clay products, etc., at \$21,917,152.

Manufacturing was carried on, according to the returns made in 1905, in 37,194 establishments, wherein 954,959 employees converted \$1,348,603,236 worth of raw material into finished goods to the value of \$2,488,345,579. Preeminent among the industries of the State is the manufacture of clothing. This factory industry originated in the State about 1835, and by 1880 it was first among the industries of the State. In 1905 New York was first in the production of clothing—the value of the output of men's clothing being 47 per cent. and of women's clothing being 70 per cent. of this business carried on throughout the country.

The sugar-refining business, though conducted in only 8 establishments, turned out \$116,438,838 worth of finished goods. Next in importance to sugar comes the manufacture of iron ware and machinery. Printing and the manufacture of liquors, bread, tobacco, meats and flour follow in importance in the order named. Dairying is carried on in 1,766 establishments, with a capital of \$9,066,426, and the annual output exceeds \$31,000,000. The textile industries turned out \$114,371,226 worth of cotton and woolen goods, silks, carpets, hosiery and knit goods in 1905. In 1906 the flour and grist mills made \$54,546,435 worth of breadstuffs. The issues from the printing presses brought \$137,985,751, nearly half of which was from periodical papers, printed in

English, French, German, Italian, Spanish, Hebrew, Scandinavian, Polish, Bohemian, Chinese, Japanese, Arabic, Greek, Hungarian, and twenty-six other languages.

New York City is the third shipping port of the world, London and Liverpool taking precedence. The imports for 1907-08 amounted to \$688,215,938, and the exports to \$701,062,913; the tonnage of foreign trade was: entered, 12,154,780 tons; cleared, 11,939,964 tons.

In 1906 there were 8,336 miles of steam railway and 3,304 miles of electric line. The population in 1910 was 9,113,279.

Sequestration of lands in, claimed by William Webster, referred to, 4327.

Titles to lands in, claimed by American citizens referred to, 5179.

**Newbern (N. C.), Capture of.**—After securing Roanoke Island Burnside proceeded to the execution of another clause of his orders by advancing upon Newbern. March 14, 1862, he landed a force of men on the banks of the Neuse River, 18 miles below the city. They advanced within 5 miles of the place where they en-

countered a redoubt, which was taken by assault. The bridge over the Trent, a tributary of the Neuse, was burned by the Confederates as they retreated. With the capture of Newbern 46 heavy guns, 3 batteries of light artillery, and a large amount of stores fell into Burnside's hands. The Federal loss was 90 killed and 466 wounded. The Confederate loss was 23 killed, 58 wounded, and about 2,500 prisoners.

**Newburg Addresses.**—There were many things to criticize and much to complain of in the conduct of the Revolutionary War, but heroic achievement and devotion to the cause of freedom, as a rule, overshadowed the jealousies of officers and the complaints of men. Gen. Horatio Gates had always been a rival of Washington for command of the army, and frequently conspired against the latter's popularity. In 1783, while Washington's army was encamped at Newburg, two anonymous appeals were issued to the officers, urging them to hold a meeting to consider the question of the money due them by Congress. The appeals were written by Capt. Armstrong, of Pennsylvania, and were supposed to have been instigated by the Gates faction. Washington immediately denounced the meeting as subversive of discipline and called a regular meeting of the officers to consider the matter. Gates was placed in the chair. Washington's friends carried motions characterizing as "infamous proposals" the suggestions of the Newburg addresses, and furthermore declaring unshaken confidence in Congress.

**Newcomb, Frank H.,** thanks of Congress to, recommended, 6302.

**Newcomb, Simon,** report of, on improvements in astronomical observatories, etc., referred to, 4790.

**Newfoundland.**—An island at the mouth of the St. Lawrence River, in eastern part of British North America. It is surrounded by the Atlantic Ocean except on the west and north where it is separated from the main land by the Gulf of St. Lawrence and the Strait of Belle Isle. It is nearly triangular in shape, extending from 46° 37' to 51° 40' north latitude, about 320 miles, and about the same distance from 52° 35' to 59° 25' west longitude, having an area of 42,734 square miles. It was discovered by Sebastian Cabot June 24, 1497, and by him named Prima Vista. It was proclaimed an English

**Newfoundland—Continued.**

possession by Sir Humphrey Gilbert in 1583. English, French, Spanish and Portuguese fishermen maintained rival fleets in the adjacent waters, but by 1625 the English predominated, and exclusive sovereignty was ceded to England by France in 1713 by the Treaty of Utrecht, and confirmed by treaties of 1763 and 1783. Newfoundland was granted a colonial legislature in 1832. The coast of the island is rugged and in some places attains an elevation of 2,000 feet. The hills generally reach their highest elevation within a few miles of the coast and then spread out into rolling country, consisting of barrens and marshes, but in some places along the rivers good land is found, often heavily wooded. The population in 1910 (estimated) was 237,531, of which 62,674 were engaged in the fisheries, 2,475 were farmers, and 4,687 mechanics and miners. The capital is St. Johns, which has a population of 31,500. The government is administered by a governor (appointed) and an executive council of nine members, a legislative council of twenty members, and a house of assembly of thirty-six representatives, elected from eighteen districts. Sir Ralph Williams, K. C. M. G., was appointed governor in 1909, with a salary of \$10,000. His prime minister is Rt. Hon. Sir Edward P. Morris, P. C., K. C., LL. D., and Colonial Secretary, Hon. Robert Watson.

**Newfoundland:**

Certain articles of treaty at Washington extended to, 4227, 4243.  
Commercial intercourse with, referred to, 2867.  
Importations from, proclamation removing duties on, 2922.  
Postal convention with, 4203.  
Reciprocity with, 6757.

**Newlands, Francis Griffith;** b. Natchez, Miss., Aug. 28, 1848; attended the Columbian College Law School at Washington, went to San Francisco, where he entered upon the practice of law and continued until 1888, when he became a citizen of the State of Nevada; elected to the 53d, 54th, 55th, 56th, and 57th Congresses; elected to the United States Senate for the term beginning March 4, 1903. In the general election of 1908 Mr. Newlands submitted his candidacy for reelection to a popular vote, under the election law of Nevada, and received a large majority over the votes of all competitors. The legis-

lature, being pledged in advance by the party platforms to carry out the popular will, thereupon, without opposition, reelected him United States Senator from Nevada, for the term ending March 3, 1915.

**Newport, Vt.,** privileges of other ports granted to, by proclamation, 3428.

**Newspapers,** transportation of:

Referred to, 120, 124.

Repeal tax on, recommended, 134.

**Niagara Falls:**

American victory on Canadian side of, 533.

Attack of American forces upon British troops near, unsuccessful, 501.

Ship canal around, discussed, 4150.

**Nicaragua.**—One of the six Central American Republics. It is bounded on the north and northwest by Honduras, on the east by the Caribbean Sea, on the south by Costa Rica, and on the west by the Pacific Ocean. It is traversed from southeast to northwest by a depression including the San Juan River and Lake Nicaragua and Managua. This was the route proposed for the Nicaragua Canal. The province of Zelaya on the eastern coast is under the dominion of the savage Mosquito King who is under the protection of Great Britain. Earthquakes are numerous and violent in the country and there are many active volcanoes. The inhabitants are Spanish creoles, Indians, and negroes. The language is Spanish and the State religion is Roman Catholic. The chief products of the country are coffee, hides, cabinet woods, rubber, fruits, and gold. Silver mining, once an important industry, has been almost entirely abandoned. By the constitution amended in 1896 the chief executive is a President chosen for 4 years, and the Congress consists of a single chamber of 40 members elected by universal suffrage. Columbus touched on the eastern coast of Nicaragua in 1502, and the western coast was first explored by Gil Gonzales Davila in 1521-22. Until 1821 it was a province of Guatemala. Independence was at that time proclaimed, and from 1823 to 1839 Nicaragua was a State in the Central American Confederation. It has been an independent Republic since 1840. During 1855-56 the filibuster Walker held a part of the country. Civil wars are common and

**Nicaragua—Continued.**

greatly retard the growth of the country. Nicaragua has an area of about 49,200 square miles.

A census was taken July 1, 1906, which showed a population of more than 600,000. The coffee estates, largely in German and American hands, exported 9,363,906 kilos of coffee, valued at 1,515,750 pesos gold in 1909. The sugar estates in 1909 were valued at 17,894,460 pesos, and their output at 4,161,985 pesos. The Central American peso is worth about 39 cents. Bananas are grown in the Bluefields region and New Orleans imported 1,401,595 bunches from there in 1906. Rubber is collected in the mountain forests and there are rubber plantations on the coasts.

A six per cent. loan of £1,250,000 was issued in 1909 for the construction of railways, etc., and for conversion purposes. There is a French debt of 12,500,000 francs bearing five per cent. interest, and the internal debt at the beginning of 1911 amounted to 20,176,709 pesos. On June 6, 1911, a convention was signed at Washington, between the United States and Nicaragua, by which it is intended to establish the latter on a sound financial basis by floating a loan to refund the existing foreign debt.

In October, 1909, a revolution aimed at President José Santos Zelaya assumed formidable proportions. Two Americans who were with the insurgents—Leroy Cannon and Leonard Groce—were captured, tortured and shot by order of Zelaya. The United States broke off diplomatic relations and sent war ships to the coast, while Secretary Knox issued a scathing denunciation of Zelaya, who resigned the presidency and took refuge in Mexico. One of his associates, José Madriz, assumed control, and the revolution continued under General Estrada, whose forces were organized chiefly on the east coast, while Madriz occupied Managua, on the west coast. Estrada, in the latter part of 1910, compelled Madriz to leave the country, and issued a proclamation restoring constitutional order. Estrada resigned May 11, 1911, and was succeeded by Adolfo Diaz. Oct. 7, 1911, congress elected Gen. Luis Meña president for four years beginning Jan. 1, 1913. In January, 1912, Elliott North was appointed minister from the United States. A revolution against the Meña government in the summer and autumn of 1912 was suppressed by

the United States marines, who were compelled to fire upon the insurgents, who refused to allow the running of trains on the railroad from Managua to Corinto.

**Nicaragua** (see also Mosquito Indian Strip):

Adventurers undertake to establish government in, 2814.

  - Duties on vessels from San Juan del Norte suspended by proclamation, 4872.
- Nicaragua Canal.**—A proposed ship canal across the Republic of Nicaragua to connect the Atlantic and Pacific oceans. As early as 1522 Lake Nicaragua was entered from the western coast and explored by Spanish navigators. In 1550 Antonio Galvao, a Portuguese, proposed 4 routes for a ship canal across the Isthmus, one by way of Lake Nicaragua and the San Juan River. Later surveys were made by the Spanish and Central American governments. In 1850 Col. O. W. Childs surveyed a canal route from Lake Nicaragua to the Pacific. More complete surveys were made for the United States in 1872-73 and 1885, and the cost of construction was variously estimated at from \$40,000,000 to \$140,000,000. The Nicaraguan Government made concessions to Americans for constructing a canal in 1849 and 1880 and to a Frenchman in 1858, but they all lapsed without results. In 1884 a treaty was signed for the construction of a canal by the United States, but the Senate refused to ratify it. In 1887 a new concession was granted by Nicaragua and confirmed by Costa Rica. A company was immediately formed and chartered by the United States, work was begun, but ceased in 1892 for lack of funds, and finally in 1893 the company was placed in the hands of a receiver. President McKinley in 1899 appointed a commission to report on the question of the best route for an interocean canal and in 1901 a report was presented advising the Nicaragua route, mainly on the ground of the difficulty of acquiring rights and control in Panama. In 1900 the House passed a bill providing for the construction of a Nicaragua Canal but the Senate refused to pass it. Another bill of a similar character passed the House in January, 1902, but before it went to the Senate, a report was received from the Canal Commission recommending the Panama route and action was taken upon this report.

Withdrawn, 4888, 4912.

**Nicaragua Canal Commission** discussed, 6326, 6366.**Nicaragua, The**, indemnity to owners of, 6900.

**Nicaragua, Treaty with.**—The treaty of friendship, commerce, navigation, and as to isthmian transit, was denounced by Nicaragua to take effect in 1902. The extradition treaty of 1870 was also denounced by Nicaragua to take effect in the same year. The protocol with Nicaragua of 1900 for the construction of an interoceanic canal provided that the President of the United States is empowered to acquire control of such portion of the territory of Nicaragua as may be necessary or advisable to construct a ship canal from a point near San Juan del Norte on the Caribbean Sea, through Lake Nicaragua to Brite, on the Pacific Ocean. As a preliminary to negotiations it is agreed that the details of the canal construction be the same as those contained in a treaty with Great Britain pending decision of the Senate of the United States.

**Nicholas, Emperor.** (See Russia.)**Nichols, Edward F.**, thanks of Congress to, recommended, 3277.**Nicks, John**, removal of, from office, explanation regarding, 1094.**Nico, Econchatta**, claim of, for losses sustained, 1683.**Nicoll, Francis H.**, memorial of, presented to Congress, 1037.**Ninety-Six (S. C.), Siege of.**—Immediately after the surrender of Charleston (May 12, 1780) Clinton sent

Lieut. Conger up the Saluda to Ninety-Six, a village in South Carolina, about 75 miles from Columbia. May 21, 1781, a part of Gen. Greene's army laid siege to the place. Kosciusko planned the approaches and the condition of the garrison had become critical, when, on June 20, the siege was raised on the approach of Lord Rawdon with the flank companies of 3 regiments.

**Niobrara Forest Reserve**, Nebraska, proclaimed, 6695.**Nipmuc Indians.** (See Indian Tribes.)**Nipsic, The**, disabled at Samoan Islands, 5479.**Niter**, appropriation for improvement in manufacture of, recommended, 2957.

**Nixon, George S.**; b. April 2, 1860, in Placer Co., Cal.; entered the employ of a railroad company and studied telegraphy; transferred to Nevada, where he served three years as a telegraph operator, and in 1884 accepted a clerical position in a bank at Reno; largely interested in banking, mining, stock raising, and farming; served as a member of the Nevada legislature in 1891; elected to the United States Senate from Nevada for the term beginning March 4, 1905.

**No Man's Land.**—A small island 3 miles southwest of Martha's Vineyard, Mass., to which it belongs. The term was also applied to a strip of land ceded by Texas to the United States in 1850. It lies between lat. 36° 30' and 37° north and long. 100° and 103° west. It was not included under any government, though often called part of the Indian Territory. In 1890 it became part of Oklahoma, and is now known as Beaver County.

**Noah, M. Mordecai**, surveyor of customs, renomination of, 1043.

**Nobel Prizes.**—The Swedish scientist, Alfred B. Nobel, the inventor of dynamite, died in 1896, bequeathing his fortune, estimated at \$9,000,000, to the founding of a fund, the interest of which should yearly be distributed to those who had mostly contributed to "the good of humanity." The interest is divided in five equal shares, given away, "One to the person who in the domain of physics has made the most important discovery or invention, one to the person who has made the most important chemical discovery or invention, one to the person who has made the most important discovery in the domain of medicine or physiology, one to the person who in literature has provided

**Nobel Prizes—Continued.**

the most excellent work of an idealistic tendency, and one to the person who has worked most or best for the fraternization of nations, and the abolition or reduction of standing armies, and the calling in and propagating of peace congresses."

A committee of the Norwegian Storthing awarded the prize for the promotion of peace between nations to President Roosevelt in 1906. The money value of the prize was about \$40,000, and the President devoted it to the Foundation for the Promotion of Industrial Peace at home. In accordance with his wishes, Congress passed an act creating a board of trustees, consisting of the Chief Justice of the United States, the Secretaries of Agriculture and Commerce and Labor, a representative each of labor and capital, and two persons representing the general public, to administer the fund. An industrial peace committee of nine members was authorized, to meet in Washington each year during the sessions of Congress to discuss differences arising between capital and labor. (See Industrial Peace Committee.)

**Noland, N. B.**, claims of, against Peru, 6099.

**Nominating Conventions.** (See Conventions, Nominating.)

**Nominations.**—In politics an act of designation to office, the ratification of which depends upon another person or body of persons. The President nominates to the Senate candidates for high Federal offices, and makes the appointment only after approval. The head of an Executive Department nominates to the President those whom he desires as his subordinates in the higher official positions. A National, State, city, county, or town convention of a political party nominates its candidates for office in anticipation of election.

**Nominations.** (See Executive Nominations.)

**Nonimportation Agreement.**—In 1765 the merchants of New York and Boston unanimously agreed to order no new merchandise from England, and to countermand old orders. This was done in retaliation for the passage of the Stamp Act by Parliament. The agreement was strictly observed until 1770, when only tea was prohibited. The members of the Continental Congress signed a nonimportation agreement in 1775.

**Nonintercourse Act.**—In consequence of the interference with American

commerce by vessels of France and England who were then at war, Congress in 1807 passed the embargo act prohibiting foreign commerce. This was found to work unnecessary injury to American shipping interests, and in 1809 it was repealed and the nonintercourse act substituted. It forbade the entrance to American ports of public or private British or French vessels, all commercial intercourse with France or Great Britain, and the importation after May 20, 1809, of all goods grown or manufactured in the two countries or their colonies. The act was to continue until the next session of Congress, but was revived by acts of June 28, 1809, May 1, 1810, and March 2, 1811.

**Noo-whā-hā Indians.** (See Indian Tribes.)

**Norfolk, Va.:**

Blockade of port of, removed by proclamation, 3431.

Referred to, 3446.

British officers treated at hospital at, 3404.

Navy-yard at, referred to, 2312.

Surrender of, referred to, 3313, 3315.

Vessels entering and leaving port of, order regarding, 3225.

**Norfolk (Va.), Burning of.**—Lord Dunmore, the royal governor of Virginia, assumed military control of Norfolk in November, 1775. He was defeated in an effort to dislodge some Virginia and Maryland militia who had taken up a position near the town. He thereupon embarked in a British vessel which lay in the Elizabeth River. Col. Woodford, with the Second Virginia Militia, and Col. Howe, with 1 regiment from North Carolina and 2 companies of Maryland militia, occupied the town. On Jan. 1, 1776, Dunmore began a bombardment, and sent ashore a party who set fire to the town. Its destruction was completed by the Americans to prevent its becoming a shelter for the British.

**Norfolk (Va.), Surrender of.**—The movement of the Federal Army up the peninsula of Virginia, in May, 1862, led to the withdrawal of the Confederate force from Norfolk and to the destruction of the ironclad *Merrimac*. This left the James River open to navigation. An expedition was sent out from Fortress Monroe, under Gen. Wool, May 10, to take possession of Norfolk. It was turned

**Norfolk (Va.), Surrender of—Continued.**  
over by the mayor without a struggle.

**Norris, George William; b.** Sandusky Co., Ohio, July 11, 1861; attended Baldwin Univ., Berea, Ohio, and the North Indiana Normal School, Valparaiso; studied law while teaching, and was admitted to the bar in 1883; went to Nebraska in 1885; was three times prosecuting attorney; elected district judge in 1895 and 1899, which position he held when nominated for Congress; elected to the 58th, 59th, 60th and 61st Congresses from Nebraska.

**Norris, P. W.,** petition of, for compensation for services rendered transmitted, 4669.

**Norsemen.**—In the sagas or accounts of Scandinavian heroes the vikings of Norway are represented as having visited the coast of America as early as 861 A. D. The narratives of the early voyages of the Northmen to America are more or less intermingled with fiction. Enough has been verified, however, to warrant some reliable historians giving credence to the more likely part of their claims. We are told that Norsemen had established a settlement in America in 875 A. D. (probably in Iceland, visited by Nadodd 12 to 15 years previously), and that Gunbiorn, a Norse navigator, sighted land farther west.

Eric the Red discovered and named Greenland in 982, and 3 years later made a second voyage to the new country. During the same year an expedition under Bjarni sailed from Iceland for Greenland, but was driven south by a storm and sighted land at Newfoundland and at Cape Cod or Nantucket. Thence he returned to Greenland. In the year 1000 Leif, son of Eric the Red, sailed with one ship and 35 men in search of the land seen by Bjarni. He touched on the coast of Labrador and, journeying southward, stopped for the winter near the site of the present city of Boston. Leif called the place Vinland, from the abundance of grapes found. This seems to be the earliest authentic account of Norse discoveries in America.

Thorvald, Leif's brother, visited Vinland in 1002, wintered near Mount Hope Bay, R. I., and in the spring of 1003 sent a party of his men to explore the coast, probably as far south as Cape May. In 1004 Thorvald was killed near Boston by

Skraelings (the Icelandic name for the aboriginal Americans), and his companions returned to Greenland. About 1007 or 1008 Thorfinn Karlsefne sailed from Greenland with 3 ships and 160 persons. He landed at Rhode Island and spent 3 years in Vinland. Here a son was born to Thorfinn, from whom Albert Thorvaldsen, a Danish sculptor living at Copenhagen in the latter part of the eighteenth and the early part of the nineteenth century, was able to trace direct descent. A full account of these early voyages is preserved in the "Codex Flatöiensis," written in 1387-1395, and found in a monastery on the west coast of Iceland. The latest tidings of Vinland were received in 1347, and communication with Greenland ceased about 1400. Before Columbus was born European navigators had journeyed westward and touched land, and several maps of the Atlantic Ocean had been made. Prior to 1470 Columbus had visited Iceland, and it has been suggested that he there learned of the Western Continent from the Norse navigators.

**North Ann Crossing (Va.), Battle of.**—

Proceeding southward after the battle of Spottsylvania, Grant's army arrived at the North Ann River May 23, 1864. Warren, whose corps was on the right, crossed the river at Jericho, Hancock at a point 4 miles below, and the Sixth Corps at Jericho. Lee meantime had retired to a position south of the North Ann, and his left wing rested on the river at a point between the two sections of Grant's army. Burnside's corps was unable to cross the river. Lee's position was impregnable and Grant was compelled to withdraw his army to the north side of the river after a loss of 1,607 in killed and wounded. May 27, having been rejoined by Sheridan, the Army of the Potomac moved toward the Pamunky River.

**North Carolina.**—One of the thirteen original States; nicknames, "The Tar State," "The Tar-Heel State," and the "Old North State"; motto, "Esse quam videri" ("To be rather than to seem"). It extends from lat. 33° 50' to 36° 33' north and from long. 75° 27' to 84° 20' west. It is bounded on the north by Virginia, on the east and southeast by the Atlantic Ocean, on the south by South Carolina and Georgia, and on the west by Tennessee (separated by the Smoky and other ranges of mountains). It has an area of 52,250 square miles. The surface is moun-

**North Carolina—Continued.**

tainous in the west, rolling or gently undulating in the center, and toward the eastern coast or lands bordering on the Albemarle and Pamlico sounds generally level.

Unsuccessful attempts at colonization were made by Sir Walter Raleigh in 1518-1587. Scattering settlements were made prior to 1663, probably as early as 1653. The territory was granted to proprietors in 1663 by Charles II. The first two colonies are known in history as the Albemarle and the Clarendon. In 1669 a constitution was introduced modeled by the philosopher, John Locke, upon principles of a landed aristocracy and feudal service. The constitution was not a success and was abandoned after twenty-five years. Citizens of North Carolina passed a set of resolutions in 1775 similar to the Declaration of Independence. (See Mecklenburg Declaration.) It was the first colony to instruct its delegates in Congress to vote for independence. The State seceded from the Union May 20, 1861, and was readmitted by act of Congress June 25, 1868.

Statistics of agriculture reported to the Federal Census Bureau, under date of April 15, 1910, place the number of farms in the State at 253,725, comprising 22,439,129 acres, valued, with stock and improvements, at \$375,716,210. The average value of land per acre was \$15.29, as against \$6.24 in 1900. The value of domestic animals, poultry, etc., was \$62,649,984, including 700,861 cattle, valued at \$12,550,054; 166,151 horses, \$18,428,134; 174,711 mules, \$23,669,687; 1,227,625 swine, \$4,628,46; 214,473 sheep, \$559,217, and poultry, \$2,212,570. The yield and value of field crops in 1911 was: Corn, 2,700,000 acres, 49,680,000 bushels, \$40,738,000; wheat, 626,000 acres, 6,636,000 bushels, \$6,769,000; oats, 219,000 acres, 3,614,000 bushels, \$2,277,000; rye, 47,000 acres, 470,000 bushels, \$470,000; rice, 500 acres, 13,000 bushels, \$10,000; potatoes, 31,000 acres, 1,488,000 bushels, \$1,607,000; hay, 161,000 acres, 169,000 tons, \$2,873,000; tobacco, 140,000 acres, 99,400,000 pounds, \$11,530,000; cotton, 935,000 bales. North Carolina is the leader among the Eastern States in the production of gold, the output for 1910 being 3,291 fine ounces, worth \$68,045. The silver production was 9,053 fine ounces, valued at \$4,620. Iron and

copper are also produced. Vegetable raising for early northern markets is a growing industry, as well as dairying.

The manufactures of the State are those of cotton, lumber and tobacco. The total output for 1905 was \$142,520,776, of which \$51,002,843 was cotton goods, oil and cake; \$28,087,969 tobacco, and \$15,731,379 lumber and timber. In 1906 the State contained 4,409 miles of steam railway and 107 miles of electric line. The population in 1910 was 2,206,287.

**North Dakota.**—One of the United States; motto, "Liberty and Union, now and forever, one and insepa-

**North Dakota—Continued.**

nable." It extends from lat. 46° to 49° north and from long. 96° 30' to 104° 5' west. It is bounded on the north by the Dominion of Canada, on the east by Minnesota, on the south by South Dakota, and on the west by Montana. Its area is 70,795 square miles. Its surface is generally undulating and level. It was first settled at Pembina by French traders in 1780. The Territory of Dakota, comprising the present States of North and South Dakota, was organized from Nebraska Territory by act of March 2, 1861. It was divided on the forty-sixth parallel and the upper portion admitted to the Union Nov. 2, 1889 (5455).

Under the Federal reclamation act much improved farm land is subject to irrigation. The tillable area of the State is more than 15,000,000 acres, of which 10,000,000 is improved. The live stock reported Jan. 1, 1910, was 712,000 horses, valued at \$81,168,000; 8,000 mules, \$1,040,000; 270,000 milch cows, \$8,373,000; 616,000 other cattle, \$12,628,000; 621,000 sheep, \$2,484,000; 206,000 swine, \$2,266,000; the wool production was 715,000 pounds scoured. The yield and value of field crops in 1911 was: Corn, 290,000 acres, 7,250,000 bushels, \$4,350,000; wheat, 9,150,000 acres, 73,200,000 bushels, \$65,148,000; oats, 2,180,000 acres, 51,230,000 bushels, \$21,004,000; rye, 36,000 acres, 598,000 bushels, \$454,000; potatoes, 42,000 acres, 5,040,000 bushels, \$2,772,000; hay, 192,000 acres, 211,000 tons, \$1,477,000; flaxseed, of which the production was the largest of any State in the Union in 1910, was 5,778,000 bushels on 1,605,000 acres, and sold for \$13,578,000. There were 399,041 tons of lignite coal produced in the State in 1910, worth \$595,139. The total mineral output of the State was \$738,818. There were 753 manufacturing establishments in the State, with an aggregate capital of \$11,594,000, paying \$2,422,000 in wages and producing \$19,150,000 in finished products.

There are within the State 1,300,333 acres of public land unreserved and unappropriated. United States land offices are located at Bismarck, Devil's Lake, Dickinson, Fargo, Minot, and Williston.

In 1906 there were 3,761 miles of steam railway and 16 miles of electric line within the State. The Federal census of 1910 gave the population as 577,056.

Unlawful combinations in, proclamation against, 5485.

**North Point (Md.), Battle of.**—After burning Washington in 1814 Gen. Ross withdrew to Admiral Cockburn's fleet and the invaders ran up the Chesapeake Bay to the mouth of the Patapsco River. On the morning of Sept. 12, 1814, the British forces 9,000 strong were landed at North Point, 12 miles from Baltimore, with provisions for 3 days and 80 rounds of ammunition per man. Baltimore was defended by about the same number of troops under Gen. Samuel Smith. Hearing of the landing of the British, he sent Gen. Stricker with 3,200 men to oppose their advance. Gen. Ross was killed in a preliminary skirmish. The battle was carried on for 4 hours, when the Americans fell back toward the city and the British bivouacked on the field.

**North Star, The.** (See *Rodgers, The.*)

**Northeastern Boundary.**—By the treaty of 1783 the northeastern boundary of the United States was defined as extending from the source of the St. Croix River due north to the highlands or watershed between the Atlantic and St. Lawrence systems, thence along those highlands to the northwesternmost head of the Connecticut River. There was a continual dispute over this boundary, and the claims of Americans and Canadians were pressed so vigorously as to lead to preparation for hostilities. The matter was referred to arbitration. In 1831 the King of the Netherlands, as arbitrator, made an award which neither Great Britain nor the United States would accept. Finally by the Webster-Ashburton treaty of 1842 the present boundary was agreed upon, not far from that suggested by the Dutch King. The United States secured about seven-twelfths of the disputed territory and Great Britain five-twelfths.

**Northeastern Boundary between United States and Great Britain:**

Amicable settlement of, discussed, 1747, 1811, 1820.

- Northwest Territory.**—The portion of the United States known in history as the Northwest Territory comprises

all the country lying between the Ohio River, the Mississippi River and the Great Lakes, immediately west of the original States, and now forming the States of Ohio, Indiana, Illinois, Michigan, and Wisconsin. The original States severally laid claim to this territory by their charters, which granted possession from ocean to ocean. New York ceded her claims to this region to the General Government in 1782, and was followed by Virginia in 1784, Massachusetts in 1785, and Connecticut in 1786. The latter State, however, retained a small tract as the foundation for her school fund. This became known as the Western Reserve.

Congress in July, 1787, passed an ordinance for the government of this territory, and to the wise measures incorporated into that law the States formed from the territory are indebted for much that is wise and judicious in their constitutions. It is claimed by some that the foundations for future national greatness were laid by the manner in which Congress dealt with the question of territorial government at this time. A clause forbidding slavery after 1800 was at first voted down, but afterwards was adopted. The ordinance provided that no land should be taken up until it had been purchased from the Indians and offered for sale by the United States; no property qualification was to be required of electors or elected; a temporary government might be established until the male population of the territory reached 5,000, then a permanent representative government would be permitted, with a Representative in Congress entitled to debate but not to vote. When the inhabitants of any one of the five divisions of the territory reached 60,000 it should be admitted as a State, these States to remain forever a part of the United States, pay their portion of the Federal debt, and in their government uphold republican forms and prohibit slavery; but fugitive slaves were to be surrendered. Arthur St. Clair was governor from 1788 to 1802.

**Northwest Territory:**

Government established in, and recommendations made to enable the governor and secretary to visit the posts in, 190.

**Northwestern Boundary.**—The territory bounded on the north by lat. 54° 40', on the east by the Rocky Mountains, on the south by lat. 42°, and on the west by the Pacific Ocean, has been

**Northwestern Boundary—Continued.**

variously claimed by Russia, Spain, Great Britain, and the United States. Russia's claim rested for the most part upon occupation by fur traders, and was settled by a treaty of Jan. 11, 1825, under the terms of which the United States were to make no settlements north of lat. 54° 40' and Russia none south of that latitude. England made a treaty with Russia on the same terms. By the treaty which ceded Florida in 1819 the Spanish claims were confined to the south of lat. 42°. This left the territory between 42° and 54° 40' to the Americans and English. Great Britain had no claim by discovery. The claim of the United States rested upon the voyage of Gray up the Columbia River in 1792 and the explorations of Lewis and Clark through the Rocky Mountains and the Oregon country in 1805 and 1806 under the orders of Jefferson. By the treaty of Oct. 20, 1818, the entire country west of the Rocky Mountains was to be opened to both countries for 10 years, and at the end of this period joint occupation for an indefinite time was agreed upon. This arrangement produced much dissatisfaction and was made a political issue in the United States in 1844. (See "Fifty-four Forty or Fight.") After considerable negotiation lat. 49° was agreed upon (in 1846) as the boundary from the Rocky Mountains to the channel between Vancouver Island and the mainland. (See also San Juan de Fuca Explorations.)

**Norwalk Harbor, Conn.**, survey of, referred to, 1043.

**Norway.**—The northernmost country of Europe, forming with Sweden the Scandinavian Peninsula. It is bounded on the north by the Arctic Ocean, on the east by Russia and Sweden, on the south by the Skager Rack, and on the west by the North Sea and the Atlantic and Arctic oceans. The coast line is deeply indented by fiords. The country generally is elevated and mountainous. Among the leading industries are fisheries and lumber manufacture and trade. There are mines of silver, copper, iron, and nickel. The Government is a limited hereditary monarchy. The King and a ministry form the executive council, and the legislative power is vested in the Storting or Parliament, consisting of an upper and a lower house. The Kingdom was consolidated under Harold the Fair-Haired in the latter part of the ninth century. Christianity was introduced toward the close of the tenth century. The established religion is Lutheran. The country was united with Denmark in 1389 and passed to Sweden in 1814. The Norwegians, however, declared their independence and elected Charles, duke of Holstein, as their King; he soon abdicated and the people then accepted Charles XIII. of Sweden, who recognized Norway as a free and independent state united to Sweden for the common good of both countries. In 1905 the Norwegians deposed King Oscar II. and dissolved the union, electing Prince Charles of Denmark to the vacant throne, under the title of Haakon VII. The country has an area of 124,130 square miles and a population (1910) of 2,391,782.

**Norway—Continued.**

Of the total area 75 per cent. is unproductive, 22 per cent. forest, and only 3 per cent. is under cultivation.

The principal articles of trade are cereals, textiles, oils, coal, minerals, metal manufactures, skins, yarns, etc., which are imported from Germany, Great Britain, Sweden, Denmark, Russia, United States, Netherlands, Belgium, and France. The exports consist of animal products, woodenware, timber, minerals, paper, skins, metals, cereals and textiles. The merchant marine in 1909 consisted of 5,742 sailing vessels, 2,810 steamers; vessels entered, 10,684; cleared, 11,181.

An average of 20,000 persons emigrate from Norway to the United States annually.

**Neustra Senora, The**, seizure of, and claims arising out of, discussed, 3795.

**Nullification.**—The general meaning of nullification is the act of invalidating or making void. In American politics it is almost exclusively applied to the doctrine set forth by John C. Calhoun and his friends in the South Carolina controversy with the Federal Government, 1828-1833. This doctrine asserted the right of any State to declare the unconstitutionality of any United States law, though it should have been enacted in the proper manner and held to be constitutional by the Supreme Court of the United States. It was further claimed that any attempt to enforce such law in a State which had refused to acknowledge its validity would justify it in at once leaving the Union. The immediate cause of this declaration of principles was that the existing tariff law bore unjustly, so it was claimed, on the non-manufacturing and raw-material-producing States of the South. The arguments in favor of nullification were mainly based upon language

used by Jefferson and Madison in the Kentucky and Virginia resolutions of 1798 and 1799 in regard to the alien and sedition laws. Here it was asserted that the General Government was not "the final or exclusive judge of the powers delegated to itself, but that, as in all other cases of compact among powers having no common judge, each party has an equal right to judge for itself, as well of infractions as of the mode and measure of redress." Senator Hayne, of South Carolina, was the first to advocate this doctrine in Congress. On the advice of Calhoun the governor of South Carolina called a convention, and an ordinance of nullification was passed on Nov. 19, 1832. This ordinance declared the Federal tariff law "null and void" and authorized the citizens to refuse payment of duties under it. It also denied the right of the Supreme Court of the United States to pass upon the nullification ordinance. The legislature was on the point of enacting a bill in accordance with this ordinance when the necessity was partly obviated by the passage of Clay's compromise measures (q. v.) in 1833. The attempt to interfere with the execution of Federal laws was met by President Jackson's prompt instructions to the revenue officers at Charleston, his proclamation of Dec. 10, 1832 (1203), and his special message to Congress on the subject (1173). March 3, 1833, a new tariff bill was passed which gave satisfaction to the nullifiers, and on March 16 a State convention of South Carolina repealed the ordinance of nullification.

**Oath.**—A solemn appeal to the Supreme Being in attestation of the truth of some statement or the binding character of some covenant, undertaking, or promise. In point of law an oath is a solemn declaration which is necessary as a condition to the filling of some office more or less public or of giving evidence in a court of justice. The Constitution requires that before the President shall "enter on the execution of his office he shall take the following oath or affirmation: 'I do solemnly swear (or affirm) that I will faithfully execute the office of President of the United States, and will to the best of my ability preserve, protect and defend the Constitution of the United States.'" The first act of Congress provided for oaths of office. An oath similar to the foregoing is required of all officers of the executive, legislative, and judicial departments of States and the nation.

Congress in June, 1778, directed Washington to administer the following oath of allegiance to the officers of the Army before leaving Valley Forge: "I, [name of office] in the armies of the United States of America, do acknowledge the United States of America to be free, independent, and sovereign States, and declare that the people thereof owe no allegiance or obedience to George III, King of Great Britain, and I renounce, refuse, and abjure any allegiance or obedience to him; and I do—that I will to the utmost of my power support, maintain, and defend the United States against the said King George III, his heirs and successors, and his or their abettors, assistants, and adherents, and will serve the said United States in the office of—, which I now hold, with fidelity according to the best of my skill and understanding." By an act of Congress of Aug. 3, 1861, the oath of allegiance for the cadets at West Point was amended so as to abjure all allegiance, sovereignty, or fealty to any State, county or country whatsoever and to require unqualified support of the Constitution and the National Government. In 1865 oaths of allegiance were required as a condition of pardon of persons who had participated in the rebellion. The oath required of persons appointed to office from the Southern States, declaring that they had in no way

aided or abetted the rebellion, was called the "iron clad oath," and was modified as soon as all apprehension of further difficulty with the South had passed away.

The oath administered to jurors entering upon their duties is substantially as follows: "You shall well and truly try the issue between the parties and a true verdict give according to the evidence, so help you God"; and the juror sometimes kisses the New Testament. Witnesses must be sworn in a similar manner, the words being, "The evidence you shall give shall be the truth, the whole truth, and nothing but the truth, so help you God." Witnesses must have sufficient understanding to know the nature of an oath, and on this ground young children are excluded as witnesses. A religious belief was formerly required before an oath could be considered as binding. Several statutes of Congress permit a simple affirmation in lieu of an appeal to the Almighty. Any person having conscientious scruples against oaths now makes a solemn affirmation. Jews are sworn on the Pentateuch, keep on their hats, and conclude their oaths with the words "so help me Jehovah." A Mohammedan is sworn on the Koran. A Chinaman is sworn by breaking a dish on the witness box or beheading a fowl. The form of taking an oath is immaterial, the essential thing being that the witness acknowledge some binding effect derived from his sense of moral obligation to tell the truth. (See also Perjury.)

**Ogden vs. Saunders.**—An important United States Supreme Court case limiting the operation of State bankruptcy laws. Ogden, of Louisiana, declared upon certain bills of exchange drawn in 1806 upon the defendant Saunders, a citizen of Kentucky, but then living in New York. Saunders pleaded a certificate of discharge under the act of the New York legislature of 1801 for the relief of insolvent debtors. The district court of Louisiana gave judgment for the plaintiff. On a writ of error the case was taken before the Supreme Court of the United States, which decided in 1827 that the power to pass bankruptcy laws did not belong exclusively to the United States, and that the fair and ordinary exercise of that power by the States need not involve a violation of the obligation of contracts, but that State law could not discharge a debt due to a citizen of another State. Justice Johnson delivered the opinion, in which concurred Chief Justice Marshall and Justices Duval and Story.

**Ogdensburg (N. Y.), Capture of.**—In September, 1812, Gen. Brown was sent to Ogdensburg, N. Y., at the mouth of the Oswegatchie River, to garrison Fort Presentation and attempt the capture of some British stores that were reported as being on the way up the St. Lawrence River.

Oct. 2, about 40 British bateaux, escorted by a gunboat, were seen approaching. On the 4th two gunboats and 25 bateaux, containing 750 men, started for Ogdensburg. The American force amounted to about 1,200 effective men. After two hours of firing the invaders withdrew with a slight loss. No one was injured on the American side. Later Maj. Forsyth was placed in command of the garrison at Ogdensburg. With a party of citizens and militia he crossed over to Elizabethtown, Canada, Feb. 6, 1813, and rescued a number of prisoners held there. In retaliation for this exploit Lieut.-Col. McDouell, with about 800 men, crossed the river on the ice Feb. 22, 1813, and after a short engagement gained possession of the town, which they gave over to plunderers.

**O'Gorman, James A.;** b. New York City, May 5, 1860; educated in the public schools, the College of the City of New York and the law department of the New York University, graduating with LL. B. in 1882; admitted to the bar in 1882; served as justice of the district court, justice of the supreme court, State of New York; elected United States Senator from New York, March 31, 1911.

**Ohio.**—One of the United States. Nick-name, "The Buckeye State." Ohio extends from lat. 38° 24' to 41° 57' north and from long. 80° 34' to 84° 49' west. It is bounded on the north by Michigan and Lake Erie, on the east by Pennsylvania and West Virginia (separated by the Ohio River), on the south by Kentucky (separated by the Ohio River), and on the west by Indiana, and has an area of 41,060 sq. miles.

Ohio was first visited by the French under La Salle at the end of the seventeenth century. It was claimed by both the French and English. It was ceded to Great Britain in 1763 and to the United States in 1783. In 1787 it became part of the Northwest Territory. The first settlement was made at Marietta in 1788. The State was admitted to the Union in 1802.

Statistics of agriculture reported to the Federal Census Bureau under date of April 15, 1910, place the number of farms in the State at 272,545, comprising 24,105,708 acres, with stock and improvements, valued at \$1,902,694,589. The average value of farm land per acre was \$53.34, an increase from \$33.35 in 1900. The value of the domestic animals, poul-

**Ohio—Continued.**

try, etc., was \$197,332,112, including 1,837,607 cattle, valued at \$51,403,344; 910,224 horses, \$93,910,638; 22,850 mules, \$2,775,831; 3,105,627 swine, \$19,412,730; 3,909,162 sheep, \$14,941,381; poultry, \$9,532,672. The yield and value of field crops for 1911 was: Corn, 3,900,000 acres, 150,540,000 bushels, \$87,313,000; wheat, 2,265,000 acres, 36,240,000 bushels, \$32,978,000; oats, 1,700,000 acres, 54,570,000 bushels, \$24,556,000; rye, 60,000 acres, 930,000 bushels, \$790,000; potatoes, 190,000 acres, 12,350,000 bushels, \$10,374,000; hay, 2,556,000 acres, 2,505,000 tons, \$47,344,000; tobacco, 88,000 acres, 81,400,000 pounds, \$6,186,400. The coal fields of the State have an area of 12,000 sq. miles, and give employment to 47,000 miners. The output in 1910 was 34,209,668 short tons, valued at \$35,932,288. About half the miners of the State were on strike for a quarter of the number of working days of the year. Ohio was the leading State in the mining of coal by machines. The output of 1911 showed a decrease of 10 to 15 per cent from that of 1910, owing to the fact that during the latter year the product was stimulated by the extra demands of a cold winter and the strike of the mine workers in the States to the westward.

The capital invested in manufacturing enterprises in 1905 was \$856,988,830. The amount paid in salaries and wages was \$225,864,293, and \$527,636,585 worth of raw material was converted into finished goods worth \$960,811,857, consisting of iron and steel goods, machinery, flour, meats, boots, shoes, liquors, vehicles, pottery, clothing, lumber, rubber goods, books and periodicals.

There were 9,290 miles of steam railway in the State in 1906, and 4,495 miles of electric lines. The population in 1910 was 4,767,121.

**Ohio Companies.**—In 1749 George II. granted to a band of wealthy citizens of Virginia and Maryland, calling themselves the Ohio Company, a tract of land containing 500,000 acres, lying in the Ohio Valley south of the Ohio River. Thomas Lee was the projector of the company, but it was later conducted by Lawrence Washington. The terms of the grant required that 100 families should be established upon the tract, a fort should be built, and a garrison maintained. A number of storehouses were also established. In 1783 the territory east of the Mississippi, north of the Ohio River, and west of Pennsylvania, which before the Revolution had been part of the Province of Quebec and afterwards had been claimed by Virginia, was ceded to the United States, with the proviso that it was to be settled and formed into States. March 1, 1786, Rufus Putnam suggested a second Ohio company, and two days later he and Messrs. Cutler, Brooks, Sargent, and Cushing formed an association and issued 1,000 shares at \$1,000 each in Continental certificates or \$125 in gold. A year afterwards Congress granted certain lots free of charge, and an enormous tract was bought at about 8 or 9 cents per acre in specie. Colonization was immediately begun. Slavery was prohibited. This company had large influence in shaping the ordinance for the government of the Northwest Territory, of which it became a part.

**Oklahoma.**—One of the United States, formed in 1907 by the union of Oklahoma with the Indian Territory. Motto, "Labor omnia vincit" (Labor conquers everything). It extends from latitude 33° 35' to 37° north and from longitude 94° 20' to 103° west. It is bounded on the north by Kansas and Colorado, on the east by Arkansas and Missouri, on the south by

**Oklahoma—Continued.**

Texas (separated by the Red River), and on the west by Texas and New Mexico. It has an area of 70,239 sq. miles. The Territory was formed in 1890 from the western part of Indian Territory and the public strip called No Man's Land (q. v.). Invasions of the Indian Territory took place in 1879, but the settlers were ordered out by proclamations of President Hayes (4499, 4550). Several subsequent invasions of the Territory were made in defiance of Federal law, but all expeditions of settlers were arrested and their towns broken up. Finally delegates of the Creek Nation met at Washington and sold the western half of their domain to the United States Government for \$2,280,857. Congress ratified this agreement March 1, 1889. By proclamation of President Harrison (5450) Oklahoma was opened to settlement at noon April 22, 1889, and during the afternoon of that day 50,000 settlers, who had been encamped on the border, rushed into the territory, formed a provincial government, and laid out town sites. In 1893 the Cherokee strip was ceded by the Indians to the Government for \$8,300,000. Agriculture and stock-raising are the principal industries. Salt is the only mineral now mined, but in the future mining promises to be the chief industry of Oklahoma, as gold, silver, lead, zinc and gypsum are known to exist in many places.

Statistics of agriculture reported to the Federal Census Bureau under date of April 15, 1910, place the number of farms in the State at 190,192, comprising 28,859,353 acres, valued, with stock and improvements, at \$918,198,882. The average value of land per acre was \$22.49, an increase from \$6.50 in 1900. The value of domestic animals, poultry, etc., was \$152,432,792, including 1,953,560 cattle, valued at \$43,187,601; 742,959 horses, \$63,651,631; 257,076 mules, \$28,618,224; 1,839,030 swine, \$11,997,641; 62,472 sheep, \$253,864; poultry, \$3,713,943. The yield and value of the field crops for 1911 was: Corn, 5,675,000 acres, 36,888,000 bushels, \$25,822,000; wheat, 1,122,000 acres, 8,976,000 bushels, \$8,258,000; oats, 909,000 acres, 8,181,000 bushels, \$3,927,000; rye, 4,000 acres, 38,000 bushels, \$40,000; potatoes, 30,000 acres, 540,000 bushels, \$670,000; hay, 810,000 acres, 648,000 tons, \$5,184,000, and cotton, 915,000 bales. The coal production of the State in 1910 was

2,646,226 short tons, valued at \$5,867,947, a decrease of 473,151 short tons from the previous year, due to the prolonged strike of the mine workers, and the inadequate supply of labor after the strike. The number of men employed in the coal mines in 1910 was 8,657, of whom 8,213 went on strike for 152 days and worked only 144 days during the year. In the production of petroleum Oklahoma now ranks second, having been surpassed only by California in 1910. The production that year was 52,028,718 barrels. Some gold and silver also are produced.

The Federal Census of 1910 gave the population as 1,657,155.

**Olive Branch, The,** condemnation of, indemnification asked for, 1268.

**Oliver, George Tener,** b. County Tyrone, Ireland, Jan. 26, 1848, while his parents were visiting in that country, they at the time being residents of Allegheny City, Pa.; studied law and was admitted to the bar of Allegheny county in 1871; after an active practice of ten years, he retired and engaged in iron and steel manufacturing; president of the Youngstown Car Manufacturing Company, at Youngstown, Ohio; connected as a director with several financial and industrial corporations in Pittsburgh; in 1900 purchased the *Pittsburg Gazette*, and later in the same year acquired the controlling interest in the *Pittsburg Chronicle-Telegraph*; in 1906 the *Pittsburg Gazette* and the *Pittsburg Times* were merged and are now published under the name of the *Gazette-Times*, and he is the principal owner

of both papers; elected March 17, 1909, to the United States Senate from Pennsylvania.

**Olmstead, Gideon:**

Correspondence with governor of Pennsylvania in regard to case of, 462.

Resolutions of Pennsylvania legislature protesting against Supreme Court decision in case of, 456.

**Olmstead et al. vs. Rittenhouse's Executrices.**—In 1778 Olmstead and other citizens of Connecticut were pressed into the service of the British aboard the sloop *Active*. They revolted and took possession of the vessel, and were in turn captured by the Pennsylvania armed brig *Convention*. The State court of admiralty of Pennsylvania adjudged the *Active* lawful prize and awarded the proceeds of her sale to the State, officers and crew of the *Convention*, and the owners, officers, and crew of *Le Gerard*, a privateer, which assisted in the capture. Olmstead and the others claimed the whole prize, but were awarded only one-fourth. They then appealed to the Federal commissioners of appeals and received a favorable verdict. The State court of admiralty of Pennsylvania set aside this verdict and ordered that the money be brought into court. May 1, 1779, the loan certificates for the prize money were deposited with State Treasurer Rittenhouse. In 1803 the district court of the United States for the State of Pennsylvania entered a final decree that the money be paid over to the libellants. The case having come before the United States Supreme Court, March, 1808, that court ordered a mandamus as against the district judge, and in 1809 judgment was executed in favor of the plaintiffs in spite of violent opposition from Pennsylvania, which opposition had prevented Judge Peters from carrying out his decree. The facts in the matter are all given in the Peters case. (See also 456, *Peters vs. United States*.)

**Olmsted, Marlin Edgar,** b. in Ulysses Township, Potter Co., Pa.; admitted to the bar of the supreme court of Pennsylvania May 16, 1881; Supreme Court of the United States Nov. 12, 1884; received honorary degree of doctor of laws from Lebanon Valley College in 1903, and from Dickinson College in 1905; elected to the 55th, 56th, 57th, 58th, 59th, 60th, and 61st Congresses from Pennsylvania.

**Olney, Richard,** Secretary of State, 6024.

**Olustee (Fla.), Battle of.**—In February, 1864, a Federal expedition was sent to Florida from Port Royal under command of Gen. Seymour. It was composed of 20 steamers, 8 schooners, and about 5,000 troops. Feb. 7 the land forces occupied Jacksonville. On the 18th they marched inland, encountering the Confederates on the 20th at Olustee, a railroad station about 50 miles west of Jacksonville. The battle was unexpected and was fiercely fought from 2 o'clock till dark, when the vanquished Federals retired 20 miles to Barbers. Seymour lost nearly 2,000 men, as well as 5 pieces of artillery, in this disastrous fight, and the expedition returned to Hilton Head.

**Olympia, The,** mentioned, 6297.

**Omaha, The.** (See *Ikisima Island*.)

**Omaha Indians.** (See *Indian Tribes*.)

**Omaha, Nebr.,** act to extend privileges to port of, vetoed, 4999.

**Omnibus Bill.**—Early in the first session of the Thirty-first Congress Henry Clay introduced a series of 6 resolutions as a basis for the compromise of the slavery question. These resolutions provided for the admission of California as a free State; Territorial governments for New Mexico and Utah without conditions as to slavery; a territorial boundary line between Texas and New Mexico favorable to the former; payment of the Texas debt; suppression of the slave trade in the District of Columbia; a more effective fugitive slave law, and a denial of the power of Congress to interfere with the slave trade between the slave States.

On Feb. 5 and 6, 1850, Clay ably advocated the passage of his resolutions by the Senate. That body was strongly Democratic, though the Administration was Whig. Debate on Clay's resolutions lasted 2 months and was participated in by Webster (Mass.), Calhoun (S. C.), Benton (Mo.), King (Ala.), Davis and Foote (Miss.), Hamlin (Me.), Cass (Mich.), Seward and Dickinson (N. Y.), Chase and Corwin (Ohio), Douglass (Ill.), Frémont (Cal.), Soulé (La.), Hale (N. H.), Mangum (N. C.), Hunter and Mason (Va.), Bell (Tenn.), and others of note. On April 19 the resolutions were referred to a committee of 13, with Clay as chairman, and consisting of 6 other Whigs and 6 Democrats. On May 8 this committee submitted an elaborate series of bills embodying the substance of

Clay's resolutions. These several bills were known collectively as the "Omnibus bill," and the last was passed on Sept. 20. (See also *Compromise of 1850*.)

**One Hundred Years of Peace.**—It is proposed to celebrate in 1914-1915 the centennial of the Treaty of Ghent, marking one hundred years of peace between the United States and Great Britain. The matter was first discussed at the Harvard University Commencement of 1909, when the Hon. W. L. King, Minister of Labor of Canada, urged that a memorial be erected on the frontier at Niagara. Subsequently it was discussed at the Mohonk Peace Conference in May, 1910, and at a meeting on June 10 a temporary committee on organization, which later was made permanent, chose Andrew Carnegie Chairman; William H. Short, Secretary, and John A. Stewart, Chairman of an Executive Committee.

The National Committee will act in conjunction with similar organizations in Great Britain, Canada and other parts of the English-speaking world. A number of suggestions have been made regarding the nature of permanent memorials. One proposes a monument in the form of a water-gate to be erected at Detroit, Mich., and Windsor, Ont., on the American and Canadian sides of the Detroit River; another that an arch be placed on the Canadian frontier over the New York to Montreal Highway, now being constructed. It has also been advocated that a building be erected in the city of New York to be dedicated to the cause of peaceful progress in which international congresses and public meetings can be held.

A suggestion is made by Senator and ex-Secretary of State Elihu Root that for a given five minutes on Feb. 15, 1915, the anniversary of the ratification by the British and American Governments of the treaty signed at Ghent, all human activities, so far as possible, shall absolutely cease, and that the 150,000,000 English-speaking people throughout the world "shall engage in silent prayer and contemplation."

**Open Door, in the Orient, policy of the United States to be firm in controversies, 7666.**

**Open Door in China.**—With China foreign commerce is a matter of modern history. As early as 1516 the Portuguese had established a trading port in China and, together with the Dutch, English and Americans, who followed them, carried on an irregular and unsatisfactory trade for a hundred years without government protection or favor besides being looked upon with suspicion and hatred, as barbarians. From 1664 to 1834 England's China trade was in the hands of the East India Company, whose monopoly came to an end in the latter year. The opium trade, worth \$5,000,000 to \$8,000,000 annually to the government of British India, had long been illegal, and China, in 1837, decided to suppress it. England's refusal to make traffic in opium a crime punishable with death brought on a war in 1840. This was concluded by a treaty which opened to British trade the five ports of Canton, Amoy, Fu-Chow, Ning-Po, and Shanghai.

Caleb Cushing, heading an embassy from the United States, negotiated a similar treaty in 1844. By its terms a customs duty was established and in consideration of a transit duty, goods were given free conveyance to all places in China.

In 1856 England again found a pretext for war with China, and was joined by France in 1857. This was terminated in 1858 by the treaty of Tien-Tsin, which granted toleration to the Christian missionaries in China, and freedom of Chinese rivers to English and French merchant vessels. At the same time Russia signed a treaty by which she acquired the Amur territory.

While these powers were gaining concessions in China, President Buchanan sent William B. Reed to open negotiations on behalf of the United States. The result of Mr. Reed's efforts was a treaty of amity and commerce, guaranteeing that no American vessel should engage in contraband trade with China.

Anson Burlingame, United States minister to China from 1861 to 1867, won the confidence of the Orientals and secured a treaty granting further concessions. Burlingame later headed a Chinese embassy accredited to eleven different nations. In June, 1873, the Chinese Emperor for the first time gave personal audience to

the ministers of the United States, Russia, Great Britain, France, Germany, Holland, and Japan. By the war with Japan in 1894-95 China was forced to concede the independence of Korea, and cede to Japan the island of Formosa, the Liaotung peninsula and the Pescadore Islands and an indemnity in money.

While China was thus embarrassed Russia, through France, advanced a loan of \$77,200,000 to help pay the Japanese indemnity. In 1896 American and German capitalists loaned \$80,000,000, and in 1898 another \$80,000,000 was advanced by the English and German banks. In return for these loans valuable railway and trading concessions were exacted with a view to establishing spheres of influence which would serve as an excuse for military occupation.

Until 1904 only twenty-one ports had been opened to foreign trade. In that year three others were opened, and in 1906 sixteen more allowed the ships of the western world to enter. The opening of these ports was looked upon by China as a great concession wrung from her by the overpowering military strength of the allied commercial world. The agreements of 1897-1898 provide that "the administration of the Imperial Maritime Customs Service shall be conducted by representatives of foreign powers until 1943."

An outbreak of the anti-foreign feeling in China, directed against Americans in particular, on account of the Chinese exclusion laws of this country, was shown in the Boycott against American goods which began in the southern provinces in 1905. This was entirely dispelled by the wise policy of the Roosevelt administration, carried into execution by Secretaries John Hay and Elihu Root.

William H. Taft, when Secretary of War, declared in a speech made in China that the United States would actively interfere whenever necessary to preserve the open door in all parts of the Chinese Empire. Further acts of friendship on the part of the United States were the remission of a part of the Boxer indemnity, upon recommendation of President Roosevelt, and the liberal contributions, under Presidential patronage, to the famine fund in 1908.

**Opium Traffic, treaty with China for repression of, and recommendations regarding, 4629, 4986.**

**International Commission, 8051.**

**Opium Traffic—Continued.**

Report of, transmitted, 7849.

Legislation regarding, recommended, 5083.

Referred to, 7976.

Taxes and laws regulating traffic in, recommended, 7799, 7850, 7976.

**Orange River Colony.**—A British colony in South Africa. It was formerly an independent republic known as the Orange Free State, and was founded by the Boers in 1836 and recognized by Great Britain ten years later. In consequence of the part taken in the Boer War it was annexed to the British Crown in 1900. Area, 48,326 sq. miles; population in 1890 (estimated), 77,716 white and 129,787 blacks, natives of the country.

**Ord, Edward O. C.**, negotiations of, for and correspondence regarding restoration of peace, 3461.

**Order of Indian Wars of the United States.**—This order was organized at Chicago, Ill., June 10, 1896, and received its charter from the State of Illinois. The order consists of two classes of companions: First, commissioned officers of the army, navy, and marine corps, and of State and Territorial organizations, which have been, or may hereafter be, engaged in conflicts, battles or actual field service against hostile Indians in the United States; second, sons of living members of the first class. The object of the Association is to perpetuate the history of the services rendered by the American military forces in their conflicts and wars within the territory of the United States, and to collect and secure for publication historical data relating to the instances of brave deeds and personal devotion by which Indian warfare has been illustrated.

**Order of the Founders and Patriots of America.**—This order was founded in 1896, its object being "to bring together and associate congenial men whose ancestors struggled together for life and liberty, home and happiness, in the land when it was a new and unknown country and their patriot descendants; from them came thorough patriots who sustained the Colonies in the struggle for independence in the Revolutionary War; to teach reverent regard for the names and history, character and perseverance, deeds and heroism of the founders of this country and their patriot descendants; to teach that the purpose of the founders could have had no lasting result but for their patriot

sons; to inculcate patriotism; to discover, collect, and preserve records, documents, manuscripts, monuments, and history relating to the first colonists and their ancestors and their descendants, and to commemorate and celebrate events in the history of the Colonies and the Republic." Eligibility—Any man above the age of twenty-one years, of good moral character and reputation, and a citizen of the United States, who is lineally descended in the male line of either parent from an ancestor who settled in any of the Colonies now included in the United States of America prior to May 13, 1657, and whose intermediate ancestors in the same line during the Revolutionary period adhered as patriots to the cause of the Colonies, shall be eligible for membership. There are State Societies in New York, Connecticut, New Jersey, and Pennsylvania.

**Orders in Council.**—As the sovereigns of Great Britain can act only through privy councillors or upon their advice, the more formal acts of the administration must proceed from the authority of the sovereign in council, and their execution is directed at a meeting of the privy council, and laid before Parliament within 30 days if in session, and if not in session within 30 days after assembling. Those of most interest in the United States were issued in 1793 and 1794, prohibiting trade with France and directing the seizure of neutral ships engaged in such traffic. In 1806 an order was issued declaring the whole coast of Europe from the Elbe to Brest, France, under blockade. The specific order which caused the greatest indignation in America and provoked retaliatory measures by both France and the United States was that of 1807, which prohibited neutral trade directly with France or her allies. All goods were ordered to be landed in England, to pay duties there, and to be reexported under British regulations. (See also Berlin Decree; Embargo; Milan Decree.)

**Ordinance** (see also Arms and Ammunition):

Board of Fortifications and, discussed, 5373.

Cannon—

Exportation of, order prohibiting, 3326.

Foundry for making, recommended, 1607, 1714, 4797.

Manufacture of, discussed, 323, 4724, 4833.

Discussed, 5550, 5878, 5972, 6159.

**Ordinance—Continued.**

Foundry for heavy, board appointed to select location for, 4748.

Discussed, 4767.

Report of, referred to, 4791, 4797, 4833.

Gunpowder manufactory, recommended, 1608, 1714.

Proving and experimenting ground for, site for, recommended, 4148.

Small arms, manufactory for, recommended, 1608.

Statement of, in fortifications, etc., transmitted, 6287.

**Ordinance Department:**

Board for determining strength and value of iron, steel, etc., appointed, 4281.

Continuance of, recommended, 4378.

Report of, referred to, 4321, 4438, 4534.

Expenses of, referred to, 766, 771.

Increase in corps, recommended, 1448, 1475, 1607.

Manufacturing operations of, recommendations regarding, 4362, 5878.

Progress in, 2942.

Regulations for distribution of arms, stores, etc., 5159, 5462.

**Oregon.**—One of the United States. Motto, "The Union"; nickname, "Webfoot country," from the excessive rainfall. It extends from lat. 42° to 46° 15' north and from long. 116° 40' to 124° 32' west. It is bounded on the north by Washington (partly separated by the Columbia River), on the east by Idaho (partly separated by the Snake River), on the south by Nevada and California, and on the west by the Pacific Ocean. It has an area of 96,030 sq. miles. Oregon is traversed by the Coast Range and Cascade and Blue Mountains, which run parallel to the coast in the eastern portion of the State. It is drained largely by the Columbia, though there is a large inland basin in the southeast. The chief industries are fishing and agriculture. The mouth of the Columbia River was discovered by Capt. Gray, an American, in 1792. The river was partly explored by Lewis and Clark in 1804-5. A trading post was founded at Astoria in 1811. The territory, long in dispute, was finally made part of the United States by the treaty with Great Britain in 1846. It was organized as a Territory in 1848 and was admitted to the Union in 1859.

Statistics of agriculture reported

to the Federal Census Bureau under date of April 15, 1910, place the number of farms in the State at 45,502, comprising 11,685,110 acres, valued, with stock and improvements, at \$528,243,782. The value of domestic animals, poultry, etc., was \$59,461,828, including 725,255 cattle, valued at \$17,570,685; 271,708 horses, \$25,181,143; 9,927 mules, \$185,788; 217,577 swine, \$1,570,949; 2,699,135 sheep, \$12,213,942; poultry, \$1,067,743. The yield and value of field crops for 1911 was: Corn, 20,000 acres, 570,000 bushels, \$456,000; wheat, 796,000 acres, 16,726,000 bushels, \$12,545,000; oats, 359,000 acres, 12,457,000 bushels, \$5,481,000; rye, 18,000 acres, 351,000 bushels, \$316,000; potatoes, 46,000 acres, 5,980,000 bushels, \$4,007,000; hay, 452,000 acres, 949,000 tons, \$9,110,000. The mineral production of the State is inconsiderable, the coal output having been curtailed by the use of petroleum from California for fuel for railroads and in manufactures. The lumber cut has grown steadily for many years, until lumbering has taken first rank in the State's industries. Oregon has one-sixth of the standing timber of the United States. In 1909 there were 1,468,155 thousand feet cut, which sold for \$18,010,588, mostly fir, spruce, and cedar. The salmon catch on the Oregon side of the Columbia River in 1908 was 18,464,000 pounds, and on the coast streams 6,423,000 pounds. Nearly five thousand men are engaged in the Columbia River fisheries. The State has of late years become noted for its innovations in government. In the general election of 1910 the voters enacted under the initiative four important measures. They were: Presidential preference, giving to each voter the opportunity of expressing in primary elections his choice for President and Vice-President of the United States. The single tax, which authorizes each county in the State to prescribe its own method of taxation; an employers' liability law, prepared and submitted to the people by organized labor, after a less objectionable bill had met defeat in the legislature; the three-fourths jury verdict, which has reduced the number of mistrials and relieved the badly congested condition of the courts. A constitutional amendment extending the right of suffrage to women will be submitted to the voters in Nov., 1912. This has been defeated three times with increasing majorities. (See Initia-

**Oregon—Continued.**

tive, Referendum and Recall.) Sugar beets and hops are also important crops. Apples and plums are raised in great abundance and shipped to all leading markets. West of the Cascade Mountains almost every crop common to the temperate zone is grown, but east of the mountains the country is arid. The Federal irrigation plan, now in operation, contemplates the reclamation of 254,000 acres in Oregon. Private irrigation schemes will add 267,000 acres more. There are 6,072,550 acres of forest reservation in the State. July 1, 1908, there remained unreserved and unappropriated, 16,957,913 acres of land. The United States land offices are located at Burns, LaGrande, Lakeview, Portland, Roseberg, and The Dalles.

The mineral output of 1907 was valued at \$2,638,587, and consisted of gold, silver, copper, coal, nickel, cobalt, lead, and gypsum. Garnet and opals are found.

In 1905 there were 1,602 manufacturing establishments, with an aggregate capital of \$44,023,548, giving employment to 20,292 persons, who converted \$30,596,763 worth of raw material into \$55,525,123 worth of finished goods. The lumber and timber output was \$12,483,908; the flour and grist mills produced \$8,467,613, and the fish canning and preserving establishments turned out \$2,577,746 worth of goods.

Large ocean-going vessels navigate the Columbia River as far as Portland. The railway mileage in 1907 was 2,031 miles of steam road and 286 miles of electric lines. The population in 1910 was 672,765.

**Original Package.**—In the enforcement of the prohibitory liquor law in the State of Iowa the officers were fre-

**Original Package—Continued.**

quently charged with exceeding the limits of the State's jurisdiction in interfering with the traffic in spirits. State officers seized and confiscated liquors which it was claimed by the owners were sent into the State for reshipment to points outside the jurisdiction of the State courts. State officers defended themselves under the prohibition amendment to the constitution. In 1890 the Supreme Court of the United States, in the case of *Leisy & Co. vs. Hardin*, held that the plaintiffs, brewers in Illinois, had the right to carry liquors into any State and sell them in the original package without reference to local prohibitory or restrictive laws. The decision of the Court rested on the right of Congress to have exclusive control of interstate commerce. Congress thereupon passed a law giving States control of the liquors so imported, although in the original package.

**Oriskany (N. Y.), Battle of.**—In August, 1777, Gen. Burgoyne sent a detachment of his army, consisting of 200 regulars, Sir John Johnson's Royal Greens, and some Canadian rangers and Indians, under Col. St. Leger, to operate in western and central New York and ultimately to join the main army under Howe at New York. St. Leger proceeded by way of the St. Lawrence River, Lake Ontario, and the Oswego and Oneida rivers to within a few miles of Fort Stanwix (now Schuyler), near the present city of Rome, on the Mohawk River. The post was garrisoned by less than 1,000 men, under Colonels Gansevoort and Willet. Gen. Herkimer collected the militia of Tryon County and advanced to the assistance of the fort. On Aug. 6 when about 6 miles from the post, near Oriskany, he fell into an ambush and was fiercely assailed by the British and the Indians under Brant. By reason of a successful sally by Willet the assailants were repulsed, but not without the loss of 400, including many of the leading patriots of that region. St. Leger made no official report of his loss except that of his Indian allies. The fight lasted several hours and was one of the most fiercely contested conflicts of the war. St. Leger, deserted by his Indian allies, retired precipitately to Canada.

**Orleans, Territory of.**—The old name for the present State of Louisiana. In March, 1804, after the purchase of Louisiana from France, Congress di-

vided the territory, cutting off that portion between Texas and the Mississippi River and from the Gulf of Mexico north to the parallel of lat. 33° north and establishing it as a Territory, with William C. C. Claiborne as governor. In 1810 the citizens of Baton Rouge, territory of St. Francisville, overcame the local Spanish garrison, shot the Spanish governor and established the Territory of West Florida. After the people of West Florida had elected a governor and framed a constitution President Madison issued a proclamation (465) directing Governor Claiborne, of the Territory of Orleans, to take possession of West Florida and annex it to Orleans. In February, 1811, an act was passed "to enable the people of the Territory of Orleans to form a constitution and State government." April 12, 1812, an act was passed for the admission of the State of Louisiana into the Union, extending the limits to include all between the Mississippi and Pearl rivers south of lat. 31° north.

**Orleans Territory:**

Admission into Union applied for by, 483.

Citizens of, must be protected, 372.

**Osborn vs. United States Bank, Ohio.**—

A leading case in the Supreme Court, September term, 1819, involving the right of a State to tax United States property. Osborn, auditor of the State of Ohio, through his deputy, forcibly took from the United States Bank at Chillicothe \$100,000 and delivered it to the State treasurer as payment to the State under the act which was passed by the legislature Feb. 8, 1819, levying taxes upon banks doing business in the State without authorization of the State law. The United States circuit court of Ohio decreed that a restitution be made with interest. The Supreme Court of the United States,

**Osborn vs. United States Bank, Ohio—**  
*Continued.*

having been appealed to, affirmed the decision of the circuit court, but gave no interest. The opinion was delivered by Chief Justice Marshall and was very elaborate. Justice Johnson dissented on the point of jurisdiction. Clay, Webster, and Sergeant argued for the right of the bank to sue in the circuit court of the United States. (See also McCulloch *vs.* Maryland.)

**Osette Indians.** (See Indian Tribes.)

**Osgood, Samuel,** house of, to be prepared for temporary accommodation of President Washington, 35, 36.

**O'Shaunessy, George F.;** b. Galway, Ireland, May 1, 1868; came to this country when 4 years of age; was educated at St. Theresa's School, De La Salle Institute, and Columbia College Law School, New York; admitted to the New York bar in 1889; deputy attorney-general for New York State 1904-5 and in 1906 assistant corporation counsel, New York City, which position he resigned going to Providence in 1907; was admitted to the Rhode Island bar in that year; was elected to the Rhode Island House of Representatives in 1909; was elected to the Sixty-second Congress from Rhode Island.

**Ostend Manifesto.**—In 1852 France and England, fearful of the filibustering expeditions against Cuba and the possible future favor of the United States toward such expeditions, suggested a tripartite convention in which each nation should disclaim all intention to obtain possession of Cuba and should discountenance such possession by another power. With a view to promoting negotiations with Spain for the purchase of Cuba by the United States, Pierre Soulé, American minister to Spain (empowered to negotiate for the purchase of Cuba), John Y. Mason, minister to France, and James Buchanan, minister to Great Britain, met at Ostend, Belgium, Oct. 9, 1854, and after 3 days' session adjourned to meet at Aix-la-Chapelle. They wrote to the United States Government their views of the policy the Administration should pursue. Their message or communication is known as the Ostend Manifesto. It declared that, as Spanish oppression in Cuba was such that the island would speedily resort to arms to free herself, the United States should offer Spain a sum not to exceed \$120,000,000 for

Cuba, and in the event of Spain's refusal to sell, the United States would be justified in taking forcible possession of Cuba rather than see it Africanized, like Santo Domingo. President Pierce did not think it prudent to act upon this suggestion, and Soulé, disgusted, resigned soon afterwards and returned home.

**Oswego (N. Y.), Capture of.**—May 5, 1814, the British squadron commanded by Sir James Yeo, and consisting of 8 vessels, aggregating 222 pieces of ordnance, besides several gunboats and other small craft, moved toward Oswego, N. Y., at the mouth of the Oswego River. The squadron carried more than 1,200 troops, under Lieut.-Col. Drummond. Oswego was protected by Fort Ontario, mounting 6 old guns, and a garrison of less than 300 men, under Lieut.-Col. Mitchell. These repulsed a landing party sent ashore and the fleet put to sea. It returned the next day and landed the greater portion of the force, which ascended a long, steep hill to the fort in the face of a heavy fire from the Americans. Overwhelming numbers finally compelled Mitchell to fall back. The American loss was 69, including among the killed Lieut. Blaney. The British lost 94, among the wounded being Capt. Mulcaster, of the *Princess Charlotte*, and Capt. Popham, of the *Montreal*.

By its terms equitable imposition of taxes and duties is agreed upon in the case of

**Ottoman Empire, Treaties with—Continued.**

merchants of the Sublime Porte traveling in the possessions of the United States and upon citizens of the United States traveling in the countries and ports of the Sublime Porte; and conditions of trade shall be conducted in all cases upon the terms of the most favored nation. Appointment of consular officers is agreed upon in the dominions of both parties upon the terms usual in consular conventions. Brokers may be employed to assist in the conduct of business; and vessels coming to the several ports in both countries shall proceed upon the same conditions of charges as the most favored nation.

In cases of litigation between subjects of the Sublime Porte and citizens of the United States, no decision shall be made or verdict reached unless the American dragoman be present; and citizens of the United States peaceably and lawfully following their avocation shall not be molested. When an offense has been committed such citizens shall be tried before their own consul and punished by his sentence or decision. American vessels may safely go under their own flag, but must not take the flag of another country nor lend their flag. Merchant vessels may pass the royal residence and come and go in the Black Sea. The vessels of either country may not be taken by force and be compelled to engage in war

service. The customary humane regulations are made regarding shipwreck. (For the extradition treaty of 1874, see Extradition Treaties.)

**Pacific Railroads.**—In 1848 Asa Whitney, a New York merchant, zealously advocated the building of a railroad by the Federal Government to the Pacific Ocean from some point on the Missouri or Mississippi River. A bill providing for such a road was introduced in the Senate. It was opposed by Thomas H. Benton and finally tabled by a vote of 27 to 21. The next year Benton introduced a Pacific railroad measure of his own. In March, 1853, an act was passed providing for surveys. By 1855 Government surveyors had ascertained practicable passes through the Rocky Mountains. The rapid growth of the Pacific States in consequence of the "gold fever" and the difficulty of communication between the East and the West, on account of the vast extent of intervening plains made railroad communication more and more desirable. The hopelessness of undertaking so stupendous a work with private capital led many who otherwise were opposed to the principle of Federal aid to internal improvements to advocate the building of the Pacific railroads under Government subsidies. In 1860 both the leading political parties in their platforms declared in favor of building a road under national supervision. The outbreak of the Civil War and the necessity for closer military communication aided the movement.

The bill providing for the Union Pacific and Central Pacific roads was approved July 2, 1862, and granted as subsidies 6 per cent gold bonds of the United States. It gave to the Union Pacific \$16,000 per mile for the great plain west from Omaha, Nebraska, \$48,000 per mile for 150

miles over the Rocky Mountains, and \$32,000 per mile for the remainder—in all, 1,034 miles, \$27,236,512; to the Central Pacific \$16,000, \$32,000, and \$48,000 per mile—in all, 883 miles, \$27,855,562. Each company also received 12,800 acres of land per mile of road—25,000,000 acres in all—by a subsequent act July 1, 1864. The companies were allowed to issue an equal amount of their own bonds, which were to be a first lien on the road, the Government bonds the second. The time fixed for opening was set at July 1, 1876, and the road was actually opened May 10, 1869. The general direction is nearly east and west on or about the fortieth degree of latitude. The total length of the road built by the two companies from Omaha to San Francisco is 1,917 miles. July 2, 1864, a charter with subsidies was granted to the Northern Pacific from Lake Superior to Puget Sound, a distance of 1,800 miles, and thence to the Columbia River, 200 miles. The land granted to this road amounted to 47,000,000 acres, or 73,000 sq. miles. The road was commenced in 1870 and was to have been finished in 1879, but in 1873 the company became embarrassed and ceased work. In 1875 the company was reorganized and the time for construction extended. On Sept. 9, 1883, the last spike was driven at a point 50 miles west of Helena, Mont. The Great Northern extension from Pacific Junction, Mont., to Lowell, on Puget Sound, was completed Jan. 6, 1893.

July 27, 1866, the Atlantic and Pacific road was chartered to run from Springfield, Mo., to the Pacific on or near the thirty-fifth parallel of latitude, a distance of 2,000 miles, and subsidized with 42,000,000 acres of land. March 3, 1871, the Southern Pacific road was chartered to run from Marshall to El Paso, Tex., thence through New Mexico and Arizona to Los Angeles, Cal., along the thirty-second parallel of latitude. The act granted the same amount of land per mile as the others had received.

**Palo Alto (Mexico), Battle of.**—May 7, 1846, Gen. Taylor started from Point Isabel, with a force of 2,288 men, to relieve Fort Brown, 27 miles away. At noon on the following day, when about half way between Point Isabel and Fort Brown, Taylor's army sighted the enemy at the water hole of Palo Alto. The regular Mexican force under Arista numbered 6,000 men, and there were some irregular troops and 12 pieces of artillery. Battle was immediately begun and fiercely fought until sunset. By the light of the moon and the burning prairie grass the belligerents buried their dead. The Mexicans lost 200 killed and 400 wounded. The American loss was only 4 killed and 40 wounded.

**Palo Alto, Mexico, Battle of,** referred to, 2295, 2300, 2342.

**Pan-American Congress.** (See International American Conference.)

**Pan-American Exposition.**—To illustrate the progress of civilization in the western hemisphere during the nineteenth century, there was held at Buffalo, N. Y., from May 1 to Nov. 2, 1901, an International American Fair, participated in officially by the various States of the Union, by Canada, and the South and Central American countries. The site covered an area of 350 acres and the buildings were artistically designed and arranged so as to present an allegorical study of man's struggle with the elements and his final triumph. The color scheme, as well as the artistic beauty, gained for the grounds the name of the Rainbow City. The total attendance was 8,179,674. The cost of the exposition was \$8,860,757, and the receipts \$5,534,643, a deficit of \$3,326,114. President McKinley was shot by an assassin in the Temple of Music while holding a reception there Sept. 6, 1901, and died eight days later at the home of the president of the Exposition.

**Pan-American Exposition,** referred to, 6673, 6674.

**Pan-American Railroad,** discussed, 6939.

**Pan-American Union.**—The Pan-American Union (the new name given to the International Bureau of American Republics by the Fourth International American Conference,

which met at Buenos Aires in July and August, 1910) was established under the recommendation of the First Pan-American Conference, held in the city of Washington in 1889-90 for the purpose of developing and maintaining closer relations of commerce and friendship between the twenty-one Republics of the Western Hemisphere. Its first report was transmitted to Congress in 1891 (5647). It was reorganized by the Third and Fourth Pan-American Conferences, held in Rio de Janeiro in 1906, and in Buenos Aires in 1910, respectively, and its scope widened by imposing many new and important duties. The Pan-American Union regularly communicates with these Governments, and furnishes such information as it possesses or can obtain on a great variety of subjects to all of the Republics and to their officials and citizens. It is the custodian of the archives of the Pan-American Conferences, and is especially charged with the performance of duties imposed upon it by these conferences. The Pan-American Union is sustained by contributions from the American Republics in proportion to their population, and is governed by a board composed of their diplomatic representatives at Washington, and the Secretary of State of the United States, who is ex officio its chairman. It is therefore strictly an international institution and not a subordinate bureau of any one government. Its chief executive officer is the Director-General, elected by this governing board. It publishes a monthly bulletin containing the latest information respecting the resources, commerce, and general progress of the American Republics, as well as maps and geographical sketches of these countries, handbooks of trade, travel, and description, and special reports on commerce, tariffs, improvements, concessions, new laws, etc. It also conducts a large correspondence not only with manufacturers and merchants in all countries looking to the extension of Pan-American trade, but with writers, travelers, scientists, students, and specialists, for the purpose of promoting general Pan-American intercourse. Another and practical feature of the Pan-American Union is the Columbus Memorial Library and reading room, which contains 22,000 volumes relating to the American Republics, together with their newspapers and magazines, and is

**Pan-American Union—Continued.**

open to visitors for consultation.  
(See also International American Conference and American Republics, Bureau of.)

**Pan-American Union, 8044.**

**Panama.**—One of the six republics of Central America, bounded on the north by the Caribbean Sea, on the south by the Pacific, by Costa Rica on the west and Colombia on the east. The soil is of great fertility but only a small part is under cultivation, bananas being the chief product. Cocoa, indigo, vanilla, pearls, and turtle shells are also exported.

The republic was formerly a department of Colombia. It asserted its independence on Nov. 4, 1903, and was recognized by this country two days later.

By a treaty signed Nov. 18, 1903, the United States guaranteed the independence of Panama and the latter granted to the United States in perpetuity and with sovereign rights therein a strip of land (the Canal Zone) extending to width of five miles on each side of the Panama Canal for its entire width. For this concession the United States paid \$10,000,000 on the ratification of the treaty and agreed to pay \$250,000, beginning after nine years. The capital is Panama, and the government is vested in a president, elected by popular vote, for four years, and a cabinet of five members and a unicameral assembly of thirty-two members. There is no army, but the government maintains a national police force of 1,000 men. The president is Dr. Pablo Arosemena.

The extreme length of the country is about 480 miles and the breadth varies from thirty-seven miles to 110 miles. The total area is some 32,380 square miles, and the population is estimated at 419,029.

**Panama Canal.**—The idea of constructing a ship canal between the Atlantic and Pacific oceans occurred to navigators as soon as the form of the continents of North and South America became known. As early as 1527 H. de la Serna surveyed a canal route from Chagres to Panama. Lopez de Gomarfa in 1551 proposed to the Spanish Government the building of a canal. In 1698, when William Paterson, an adventurous Scot, had established an English colony on the Isthmus of Darien which he called New Caledonia, he advocated constructing a canal across the narrow strip of land separating the two great oceans. Many surveys have been made of the Isthmus with the view of piercing it with an artificial waterway. The United States obtained some very complete maps of the country by the explorations of Col. Hughes in 1849, Lieut. Strain in 1854, Lieut. Michler in 1858, and Commodores Selfridge and Tull in 1870 and 1875. In 1869 a treaty was signed by representatives of the United States of Colombia and the United States, providing for the construction of a canal by the latter nation, but there was so much delay and the treaty was so amended by the Colombian Congress that the matter was temporarily dropped by the United States. In 1877 the Colombian Government granted a concession to a Frenchman named Wyse for constructing a canal giving him "exclusive privilege for the excavating of a canal between the two oceans," the terminal ports and waters to be neutral.

At the invitation of Ferdinand de Lesseps, an International Scientific Congress met at Paris in 1879 and hastily decided upon the Panama route for a canal, the American members of the congress refraining from voting. The Panama Canal Company was then formed, with De Lesseps as president, and the Wyse concession was purchased for 10,000,000 francs. The route selected was close to the present line of the Panama Railroad, crossed the Chagres River 6 times, and contemplated a long and deep cut through the Cordillera. The cost had been estimated at \$169,000,000, and shares of the company had been taken by French citizens, many of them of the middle class, to the

**Panama—Continued.**

amount of \$260,000,000. Work was begun in 1881, but the affairs of the company were conducted with so great corruption, that it became bankrupt in 1889, and a year later suspended work. In 1892, after an investigation of the affairs of the company, De Lesseps, his son, the contractor Eiffel, and others in public life were arrested on charges of fraud in the management of the funds intrusted to them for use in the construction of the canal, and in March of the following year, the New Panama Canal Company was formed, with renewed concessions to terminate in April, 1910.

In the meantime American interest in an interoceanic canal had revived, and there was much discussion of a route across the territory of Nicaragua. The Nicaraguan Canal Association obtained concessions from Nicaragua and carried on work of construction from 1889 until 1893, when it became bankrupt. In 1899 a commission was appointed by Congress to determine the most feasible route for an isthmian canal. It reported that if the rights and property of the New Panama Canal Company could be purchased for a reasonable price a canal across Panama could be built more economically than one across the territory of Nicaragua, and recommended the Panama route. In order that the United States might have exclusive control over the proposed canal the Clayton-Bulwer Treaty (q. v.), between Great Britain and the United States, was superseded by the Hay-Pauncefote Treaty on Dec. 17, 1901. In 1902, in accordance with the report of its commission appointed in 1899, Congress passed an act (approved June 28) authorizing the President to secure for the United States the property of the New Panama Canal Company, at a cost of \$40,000,000. It was further provided in the act, that "should the President be unable to obtain for the United States a satisfactory title to the property of the New Panama Canal Company and the control over the necessary territory of the Republic of Colombia \* \* \* within a reasonable time and upon reasonable terms, then the President should endeavor to provide for a canal by the Nicaragua route." The Colombian Government, however, on Aug. 12, 1903, rejected the Hay-Herran Treaty, which had been negotiated between it and the United

States, thereby refusing the United States' final offer of \$10,000,000 down and \$250,000 annually for the Panama concession.

On Nov. 3, 1903, the Department of Panama proclaimed its independence of Colombia, and having been recognized as an independent republic by the United States, on Nov. 18, the Isthmian Canal Treaty between the United States and the Republic of Panama was signed at Washington.

According to this treaty the Republic of Panama granted to the United States the perpetual use, occupation and control of a zone of land 10 miles wide (five miles on each side of the central line of the route of the canal) across the Isthmus, complete sovereignty to which was to pass to the United States. The price paid the Republic of Panama by the United States was \$10,000,000 down and \$250,000 annually as long as the convention should continue, beginning nine years after the date of ratification. The United States also guaranteed the neutrality of the canal and the independence of the Republic of Panama. Ratifications of the treaty were exchanged at Washington on Feb. 26, 1904. According to an act of Congress approved April 28, 1904, the President took possession of the Canal Zone and organized its government. The President also appointed an Isthmian Canal Commission of seven members, and directed that the War Department, through this Commission, should undertake the supervision of the construction of the canal and the government of the Canal Zone. On April 4, 1905, this Commission was dismissed and a second appointed, the responsibility being placed chiefly upon the executive committee of three members.

The present composition of the Isthmian Canal Commission is as follows: Chairman and Chief Engineer, Col. George W. Goethals; Assistant Chief Engineer, Col. H. F. Hodges, Civil Engineer, U. S. N.; assistant to the Chief Engineer, H. H. Rousseau; Division Engineer, Central Division, Lieut.-Col. D. D. Gaillard; Division Engineer, Atlantic Division, Lieut.-Col. William L. Sibert; Chief Quartermaster, Lieut.-Col. C. A. Devol; Chief Sanitary Officer, Col. W. C. Gorgas; Hon. Maurice H. Thatcher, in charge of the Department of Civil Administration.

The canal will have a summit elevation of 85 feet above the sea, to

**Panama—Continued.**

be reached by a flight of three locks located at Gatun, on the Atlantic side, and by one lock at Pedro Miguel and a flight of two at Miraflores, on the Pacific side; all these locks to be in duplicate—that is, to have two chambers, side by side. Each lock will have a usable length of 1,000 feet and a width of 110 feet. The summit level, extending from Gatun to Pedro Miguel, a distance of about 31.5 miles, is to be regulated between 82 and 87 feet above sea level by means of the spillway in the dam at Gatun. The Gatun Lake, which will have an area of 164.23 square miles, will be maintained by earth dams at Gatun and Pedro Miguel. The Chagres River and other streams will empty into this lake. A small lake, about two square miles in area, with a surface elevation of 55 feet, will be formed between Pedro Miguel and Miraflores, the valley of the Rio Grande being closed by an earth dam on the west side and a concrete dam with spillway on the east side at Miraflores.

The approaches from deep water to the Gatun locks on the Atlantic side, and from deep water to the locks at Miraflores on the Pacific side, will be sea-level channels, about seven and eight miles in length, respectively, and each 500 feet wide.

The canal is to be about 50 miles in length from deep water in the Caribbean Sea to deep water in the Pacific Ocean. The distance from deep water to the shore line in Limon Bay is about  $4\frac{1}{2}$  miles, and from the Pacific shore line to deep water is about 4 miles; hence the length of the canal from shore to shore will be approximately  $41\frac{1}{2}$  miles.

The channel from mile 0 in the Caribbean to mile 6.70, at the north end of Gatun locks, will be 500 feet wide; from the south end of Gatun locks to mile 23.50, not less than 1,000 feet wide; from mile 23.50 to mile 26.50, 800 feet wide; from mile 26.50 to mile 27.00, 700 feet wide; from mile 27.00 to mile 31.25, 500 feet wide; from mile 31.25 to Pedro Miguel lock (mile 39.36), 300 feet wide, and from Pedro Miguel lock to Miraflores locks, and from Miraflores locks to deep water in Panama Bay, 500 feet wide.

The average bottom width of the channel in this project is 649 feet, and the minimum width is 300 feet. The canal will have a minimum depth of 41 feet.

The Gatun dam along the crest will be 8,000 feet long, including the spillway, or about  $1\frac{1}{2}$  miles, and 2,100 feet wide at its greatest width.

The crest of the dam will be at an elevation of 115 feet above sea level, or 30 feet above the normal level of Gatun Lake, and 100 feet wide. The width of the dam at the normal water level of the lake, *i. e.*, 85 feet above sea level, will be about 388 feet.

The central part of the dam will be filled by hydraulic process, protected by rock toes on both sides of the dam. The upper slope on the lake side of the dam will be further protected by 10 feet thickness of rock. The other parts of the dam will be filled with available material from canal excavation.

In entering the canal from the Atlantic side, a ship will proceed from deep water in Limon Bay to Gatun locks, a distance of about seven miles, through a channel 500 feet wide; passing into the locks, .6 of a mile in length, the ship will be carried up to an elevation of 85 feet above sea level in three lifts to the level of the water in Gatun Lake; thence for a distance of nearly 16 miles the channel will be 1,000 feet or more in width to San Pablo; from San Pablo to Juan Grande, 3.8 miles, the channel will be 800 feet wide; from Juan Grande to Obispo, 3.7 miles, the channel will be 500 feet wide; from Obispo to Pedro Miguel locks, through the Culebra cut, a distance of about 8.2 miles, the channel will be 300 feet wide. Going through the Pedro Miguel lock and approaches, nearly .3 of a mile in total length, the vessel will be lowered to the level of Miraflores Lake, 55 feet above mean tide, through which there will be a channel 500 feet wide and 1.4 miles long to the Miraflores locks; thence through the two Miraflores locks, of a total length, including approach walls, of over .9 of a mile, the vessel will be lowered to tide level and proceed through a channel 500 feet wide and 8 miles long to deep water in the Pacific. It is estimated that the time required for the passage of a ship of medium size through the entire length of the canal would be from  $9\frac{1}{2}$  to 10 hours, and for larger vessels from  $10\frac{1}{2}$  to 11 hours.

**Panama Canal Commission, members of, 7400.**

**Panama Congress.**—A congress called by the several South and Central American Republics to meet at Panama in June, 1826, to consider the rights of those States. The United States was invited to send delegates, and in response to this invitation President J. Q. Adams, with the consent of the Senate, appointed Richard C. Anderson, minister to Colombia, and John Sergeant, of Philadelphia, delegates, and Congress appropriated \$40,000 for their expenses. They arrived too late for the preliminary meeting, and the adjourned session of the congress for 1827 never occurred. Among the objects of the proposed congress were the regulations of commercial intercourse, assent to the doctrine that free ships make free goods, and an agreement that "each will guard against the establishment of any future European colony within its borders." The failure of the congress demonstrated the inadvisability of an alliance between the United States and

**Panama Congress—Continued.**

the smaller Republics. President Adams warmly favored the establishment of closer relations with the Central and South American Republics, and was supported in the Cabinet by Henry Clay, whose influence in Congress was considerable. In opposing the alliance of American Republics in a speech in the Senate in April, 1826, John Randolph referred to the coalition of Adams and Clay as a "coalition between the Puritan and the blackleg." This remark provoked a duel between Clay and Randolph.

**Panama-Pacific Exposition in 1915.—**

An International Exposition to commemorate the opening of the Panama Canal to commence and celebrate the four hundredth anniversary of the discovery of the Pacific Ocean will be held in the city of San Francisco, Cal., in 1915.

Congress, in February, 1911, decided the rival claims of San Francisco and New Orleans for Federal recognition as the site of the exposition in favor of the former city, the vote of the House of Representatives being 259 to 43. The act of Feb. 15, 1911, provided that "Whenever it shall be shown to the satisfaction of the President of the United States that a suitable site has been selected and that the sum of not less than \$15,000,000 will be available to enable the Panama-Pacific International Exposition Company, a corporation organized and existing under and by virtue of the laws of the State of California, for the purpose of inaugurating, carrying forward and holding an exposition at the city and county of San Francisco on or about Jan. 1, 1915," then the President is authorized to invite by proclamation all foreign countries and nations to such proposed exposition. By act of March 4, 1911, the President is further authorized to invite the representatives of foreign nations and their fleets to assemble at Hampton Roads, Va., and thence the representatives go to the city of Washington to be formally welcomed by the President, after which he will proceed with them to Hampton Roads and there review the assembled fleets as they start on their voyage for San Francisco.

In pursuance of this authority, President Taft, on Oct. 14, 1911, in the city of San Francisco, in the presence of a great assemblage, turned the first spadeful of earth at the fair site. The President, Governor of the State and Mayor of the city made addresses, the ships of the Pacific fleet in the harbor joined in the celebration and there was an extended military parade in the streets. The site of the permanent buildings of the exposition is Golden Gate Park, excepting an enormous convention hall to be located at the civic center

**Panama-Pacific Exposition in 1915—**  
*Continued.*

of the city, Van Ness Avenue and Market Street. The industrial buildings and other temporary structures will be placed on the bay shore overlooking the entrance to the harbor. The citizens of San Francisco have subscribed \$7,000,000, the State legislature has authorized an appropriation of \$5,000,000 and the municipal city one of \$5,000,000 for the exposition. The various commercial and industrial bodies of San Francisco have interested themselves in the enterprise and numerous plans have been considered to make the occasion of the exposition attractive to the visitors who may be expected to come in throngs from all parts of the world, not only to witness the wonderful uprising of San Francisco from its desolation by fire, but to view the scenic splendors of the Pacific Coast region.

**Panama, Treaties with.**—By the treaty concluded in 1903 for the construction of a ship canal, it was agreed that the United States guarantees and will maintain the independence of Panama. The United States receives in perpetuity the use, occupation, and control of a zone of land for the construction, maintenance and protection of a canal; said zone to be ten miles in width and extending five miles in width on both sides of the central line of the path of the canal, and three marine miles at each end out to sea. Grant is also made of other parts of territory adjacent which may be necessary for the construction and maintenance of the canal. This grant includes the islands of Perico, Naos, Culebra, and Flamenco. The rights, power, and authority of the United States within the zone shall be the same as though the territory were an integral part of the United States. The use of rivers, streams and bodies of water is included in the grant.

The Republic of Panama acknowledges a monopoly to the United States of the construction of the canal within the limits of its possessions. At the same time the grants hereby conveyed do not in any degree invalidate the claims of private landholders within the area; nor does the grant interfere with the rights of the public to roads and means of conveyance within the territory. Damages arising from the occupancy by the United States are to be appraised by a joint commission of Panama and the United States and

awards for damages resulting from the construction of the canal shall be paid solely by the United States.

The United States has the power to make such alterations in the sanitary arrangements of the cities of Panama and Colon as it may deem desirable for the supply of water and the distribution of sewage; and for such improvements made at the cost of the United States, that government has the authority to impose reasonable taxes upon the inhabitants of the cities.

Authority is granted to the United States to adopt the measures necessary for the maintenance of law and order within the limits of these cities. The Republic of Panama transfers to the United States all rights of sovereignty over the canal, the New Panama Canal Company, and the Panama Railroad Company which it has inherited from the Republic of Colombia, and authorizes the United States to exercise all such rights and privileges in the construction of the canal.

The only charges, imposts, and duties which are to be levied by the United States at the entrance to the canal and by the Republic of Panama shall be the ordinary charges of toll for the use of the canal and the imposition of customs duties upon such merchandise as is destined to be consumed within the Republic of Panama. No national, state, or municipal taxes shall be imposed upon the canal or upon any machinery, or material of construction, or auxiliaries and accessories of all kinds. The telegraph and telephone lines within the zone shall be at the service of the government of the Republic of Panama for the transmission of official messages at the customary and usual rates. There shall be free and safe access permitted by Panama to the immigration to the zone by persons of all classes and nationalities.

The United States agrees to pay to Panama for the rights, privileges and concessions herein granted ten millions of dollars in gold on ratification of this treaty and an annual sum of two hundred and fifty thousand dollars, beginning nine years after ratification.

The canal shall be neutral in perpetuity and shall be opened in accordance with the treaty between the United States and Great Britain on this subject. Free transportation of vessels, troops, and munitions of war is granted to Panama. If any terms

**Panama, Treaties with—Continued.**

or conditions of this treaty shall prove incompatible with later terms or conditions granted to a third power, the Republic of Panama agrees to waive its rights on such points. No anterior pledges, debts, liens, trusts, or liabilities granted by the Republic of Panama shall operate to the detriment of the United States and any damages resulting therefrom shall be liquidated by Panama.

All claims for remuneration in connection with the canal construction which have been arranged for or any profits which might accrue to the advantage of Panama are hereby renounced by that power.

The United States has full power to police, fortify, and station troops to preserve order or maintain safety in the canal zone. The rights hereby granted to the United States shall not be lessened or impaired by any changes in the laws or in the political integrity of Panama. Naval or coaling stations will be conveyed by Panama to the United States by sale upon terms to be agreed upon should such become necessary for the better maintenance or preservation of the canal.

**Panchita, The,** seizure of, on African coast, 3017.

**Panics.**—A word formed from the name of the Greek god of shepherds, who is said to have had the power of inspiring sudden fright without apparent cause. It is now commonly used to describe a state of fear bordering on frenzy, from whatever cause induced. In history great commercial crises are spoken of as panics. England, Holland, and France have experienced them, and the United States has passed through several notable ones. Those most disastrous have usually followed general injudicious speculation in lands or inflated securities. The crisis of 1816-1819 in the United States, it is claimed, was due to the speculation and disorder following the War of 1812. The next occurred in 1825. A very memorable panic was that of 1837. The few years preceding had been marked by extraordinary speculation, carried on with an unsound banking system. Jackson's "specie circular" caused many banks to suspend, and credit was generally impaired throughout the country. Governmental aid was invoked by many financial institutions, but without avail, as Van Buren, who had succeeded to the Presidency, insisted

upon individuals righting their own affairs. In 1857 another period of inflation was followed by another panic. Again in 1873 there was a severe monetary crisis. Just 20 years later occurred the last panic from which the country has suffered. (See also Black Friday.)

The crisis of 1873 is usually dated from the failure of Jay Cooke & Co., Sept. 18. The New York Stock Exchange closed on the 20th and was not reopened until the end of the month. Clearing House loan certificates were issued in large quantities, the last of which were redeemed Jan. 14, 1874. There had been certain premonitory symptoms of the approaching collapse, and there followed a long period of depression, which did not reach its lowest point until three years later. The number of business failures reported by commercial agents in 1872 was 4,069, and by 1876, the year of the deepest depression, the number had steadily increased to 9,084.

The depression of 1893 was preceded by reckless investments in foreign securities and was brought on by the shipments of gold to Europe caused by the operation of the act of Congress of July 14, 1890, which required the purchase by the United States Treasury of 4,500,000 ounces of silver per month. When the gold reserve held in the Treasury for the redemption of United States notes fell to near \$100,000,000, panic seized the business centers of the country. Bank reserves in New York fell from \$25,439,925 in May, to \$5,481,975 in June. The financial tension was rendered more acute by the news that the Indian government had suspended the public coinage of silver. This caused insistent demands for the repeal of the silver purchase law. President Cleveland called an extra session of Congress and the vicious measure was repealed, whereupon recovery was rapid, aided materially by imports of gold and easier money.

Renewed activity in all lines of manufacture and commerce succeeded the panic of 1893 and the year 1906 witnessed the culmination of the remarkable industrial expansion. In 1907 many great railway and industrial enterprises endeavored to sell securities to augment their working capital, with the result that the stock markets felt the over-supply and prices fell with a crash; bank loans were called in and debtors failing to respond were sold out. The crisis was

**Panics—Continued.**

accentuated by the efforts of a few men to corner certain stocks, and their failure caused the suspension of banks which held their securities as collateral for loans. It transpired that the market manipulators were in some instances officers of the banks making the loans, and criminal indictments were secured against them. This panic was relieved by J. Pierpont Morgan, who formed a pool of \$25,000,000 to lend on approved security.

**Paoli (Pa.) Massacre.**—After the retreat from Brandywine Washington moved out on the Lancaster road as far as Warren's Tavern. Finding that Howe did not contemplate an attack upon Reading, Washington stationed Gen. Anthony Wayne with 1,500 men at Paoli, a retired and well-chosen position, to be ready to fall upon the rear of Howe's army. On the night of Sept. 20, 1777, Wayne was surprised, through the treachery of the people of the country, and 300 of his men were killed, wounded, or captured, with a loss of only an inconsiderable number of the enemy. Wayne saved his artillery and most of his baggage.

**Papago Reservation.** (See Gila Bend Reservation, Ariz.)

**Papal States.**—A former dominion of Italy, comprising the Romagna, the Marches, Umbria, and the present province of Rome, and governed directly by the Papal See. It was bounded on the north by the Lombardo-Venetian Kingdom, on the east by the Adriatic Sea, on the southeast by the Kingdom of Naples, on the southwest by the Mediterranean Sea, and on the west by Tuscany and the Duchy of Modena. In 1860 the larger part was annexed to Italy, and the remainder in 1870.

**Paper Currency.** (See Currency; Finances discussed.)

**Paraguay.**—A Republic of South America. It is bounded on the north by Bolivia and Brazil, on the east by Brazil and a portion of Argentina, and on the south and west by Argentina. The capital is Asuncion. The main portion of the country is hilly or undulating. It has a semitropical climate. The Europeans found are mostly descended from Spaniards, by whom the country was first settled in 1536. The principal products are hides, fruits, tobacco, sugar, and Paraguayan tea. Executive authority is vested in a President, elected for 4 years. The Congress consists of a Senate and a Chamber of Deputies. The country declared its independence in 1811, refusing to unite with the Argentine Confederation. In 1865 the Republic became involved in a war with Brazil, Argentina, and Uruguay, which resulted in impoverishing the country and almost depopulating it. The area of Paraguay is about 157,000 square miles. A new constitution was proclaimed in November, 1870. The provisional president March 1, 1912, was Pedro Peña. There is an unsettled boundary dispute with Bolivia. In 1910 the population was estimated to be 752,000, including 50,000 Indians.

**Paraguay, Treaties with.**—A treaty of friendship, commerce, and navigation was concluded in 1859. Concessions to the United States include free navigation of the Paraguay River as far as the boundaries of Brazil and of the right side of the Parana in the dominions of Paraguay on like terms as are conferred upon other nations; vessels may discharge all or part of the cargo at the ports of Pilar or may proceed to Assumption. Rights and concessions enjoyed by other nations are conferred and shall accrue to the United States. Equitable imposition of charges, tolls, and fees; freedom of importation and exportation are equally enjoyed by the United States and Paraguayan vessels.

The rights of citizens of the United States to conduct trade, commerce, and to follow trades, avocations, and professions, in Paraguay are equal to those of subjects of Paraguay. The transfer and holding of property, succession to real or personal property by will or otherwise and free and open access to courts of justice are secured to citizens of the United States. The consular office may act as executors or administrators of estates.

No military exactions of service or forced loans or contributions other than those to which all subjects of Paraguay are lawfully subject shall be imposed. Consular appointment is provided for as in consular conventions. In the event of war it is agreed that citizens of each country residing or doing business within the confines of the other shall suffer no injustice, persecution, or spoliation and shall be free to continue in business or to close out as they may elect; nor shall debts, stocks, or interest be sequestered or detained.

Religious freedom is secured to citizens or subjects in the dominions of the other contracting party.

**Parcels Post.**—The agitation for a parcels post in the United States dates back to 1875 at least, and during the following thirty-five years (to quote Postmaster-General Wanamaker), only four objections have been raised against it, namely, the United States, the Wells Fargo, the American, and the Adams express companies, but the fact that no parcels post yet exists is evidence as to the force of these objections.

In 1907 Postmaster-General Meyer advocated the establishment of a general and a local parcels post system. His plan for the general parcels post he described as follows: "The present rate for the transmission of fourth-class matter through the mails is 16 cents a pound, and the limit of weight is 4 pounds. Under our postal treaties the rate from any American post office to 29 foreign countries is 12 cents a pound, and the limit of weight to twenty-four of these countries is 11 pounds. The Department has simply recommended that our citizens be permitted to dispatch parcels to each other, in our own country, at as liberal a rate as that at which they are allowed to send them to a foreign country." With a rate of 12 cents per pound, the charges for additional fractions of a pound would be: 1 oz., 1 cent; up to 3 oz., 2 cents; up to 4 oz., 3 cents; up to 5 oz., 4 cents; up to 6 oz., 5 cents; up to 8 oz., 6 cents; up to 12 oz., 9 cents; up to 16 oz., 12 cents. The general parcels post system is in operation in Great Britain, New Zealand, Australia, Germany, Austria, France, Belgium, Italy, Holland, Chile, and Cuba. The weight limit in each case (with the exceptions of Austria and Belgium) is 11 pounds. In England 26 cents will mail an 11-pound package, the rate being 6 cents for the first pound and 2 cents for each additional pound. Germany has scheduled its rates by zones; thus all packages conveyed not more than 10 miles are charged 6 cents, and for greater distances they are charged 13 cents, and when the parcels exceed 11 pounds, the rates are for each additional 2 pounds carried 10 miles, 2 cents; 20 miles, 3 cents; 50 miles, 5 cents; 100 miles, 8 cents. The weight limits in Austria and Belgium are, respectively, 143 and 132 pounds.

**Parcels Post—Continued.**

As to the cost of a general parcels post system in the United States, Mr. Meyer, using the cost of handling fourth-class matter as a basis, estimated it as follows:

Revenue from postage..... \$240 00

Expenditures:

R. R. charge per	
ton .....	\$29 70
Labor charge per	
ton .....	103 87
Other conveyances.	15 70
	<hr/> 149 27

Excess of receipts over expenditures ..... \$90 73

The above figures being based on the average haul (540 miles), Mr. Meyer points out that \$90.73 excess would cover the transportation by rail of the entire ton over an additional 1,640 miles.

With respect to the scheme for the local parcels post he recommended "the establishment of a distinctly local parcels post, entirely separate from the general parcels post, and confined to packages weighing not more than 11 pounds and received upon a rural route or at the distributing post-office thereof, and delivered upon the same rural route or another emanating from the same distributing post-office."

"This recommendation is founded upon the broad ground of the ability of the Government to render the service at a profit, yet with great advantage to the farmer, the retail merchant, and other patrons of the rural routes. The necessary machinery is at hand. There are approximately 15,000,000 people served on these routes."

For the local parcels post system he recommended the following rates: On packages weighing 1 pound or more, 5 cents for the first pound and 2 cents for each additional pound or fraction thereof; on packages weighing less than 1 pound, up to 2 oz., 1 cent; up to 4 oz., 2 cents; up to 8 oz., 3 cents; up to 12 oz., 4 cents; up to 16 oz., 5 cents. Thus the charge on packages of maximum weight would be 25 cents.

Discussing the opposition to the proposed local parcels post on the part of retail merchants, he said: "That the establishment of such a local rural parcels post would be of material and manifold advantage to the retail merchant in competition with the mail-order houses, is seen at once, as the latter at the proposed

general parcels post rate of 12 cents a pound would be obliged to pay \$1.32 for sending an 11-pound package to a rural route patron, a difference in favor of the local storekeeper of about 10 cents a pound. But the mail-order houses, as I understand it, ship the greater portion of their goods by freight, and the reduction of this postage from 16 cents to 12 cents is not going to affect materially the shipments of the mail-order houses." As a further protection of the retail merchant, Mr. Meyer proposed to prohibit the mailing at local offices, at parcels post rates, of packages shipped to the town in quantities, though intended for many persons.

Postmaster-General Hitchcock, in December, 1910, recommended the establishment of a general parcels post throughout the country "as soon as the postal savings system is thoroughly organized." As the preliminary step he hoped that Congress would authorize the local parcels post, which, he said, would entail little if any additional expense, and which, if successful, might lead to the general one. However, he urged Congress to appropriate a fund for further investigation of the cost and possibilities of the general system at the time when it authorizes the local parcels post.

In accordance with an act of the Sixty-second Congress a parcels post system will be inaugurated Jan. 1, 1913.

**Paris, Declaration of.**—In the treaty of  
Paris, which was concluded March  
30, 1856, between Russia and Turkey,  
Great Britain, France, and Sardinia,  
the following declarations with re-  
gard to the conduct of war were sub-  
scribed to by all the parties to the  
treaty and have since been accepted  
by nearly all civilized nations: First,  
Privateering is and remains abol-  
ished. Second, Neutral goods in ene-  
mies' ships, enemies' goods in neu-  
tral ships, except contraband of war,  
are not liable to capture. Third,  
Paper blockades are unlawful. The  
United States refused to agree to  
this declaration on account of the  
clause doing away with privateers,  
as the country was compelled to rely  
largely upon such service in naval  
warfare. This refusal cost it heav-  
ily in the Civil War, although it was  
willing to subscribe to the declara-  
tions in 1861. In 1871 the declara-  
tion was censured by the British Par-  
liament.

**Paris, Monetary Conferences at.—**

There have been three important in-  
ternational monetary conferences  
held in Paris. The first assembled  
June 17, 1867, at the solicitation of  
France, to "consider the question of  
uniformity of coinage and seek for  
the basis of ulterior negotiations." The  
United States sent representa-  
tives, as did also nearly every Eu-  
ropean nation. The conference ad-  
journed after about a month with-  
out having arrived at any definite  
conclusion. On Aug. 16, 1878, a sec-  
ond international monetary confer-  
ence convened at Paris, this time at  
the instance of the United States,  
"to adopt a common ratio between  
gold and silver for the purpose of  
establishing internationally the use  
of bimetallic money and securing  
fixity of relative value between  
those metals." The collective deci-  
sion of the European delegates was  
that this would be impossible, mone-  
tary questions being governed by  
the special situation of each State  
or group of States. With this as the  
final conclusion the conference ad-  
journed Aug. 29. The conference of  
April 8, 1881, assembled at the call  
of France and the United States to  
adopt a permanent relative value be-  
tween gold and silver, but adjourned

**Paris, Monetary Conferences at—***Continued.*

July 8 without arriving at any agreement. (See also Brussels, Belgium; Paris, France.)

**Paris, Treaties of.**—Paris has been the scene of numerous important diplomatic conferences, both between France and other powers and between neighboring nations, who found hospitable neutral ground at the French capital. Among the most important of treaties of Paris is that of Feb. 10, 1763, between Great Britain on one side, and France, Spain, and Portugal on the other. France ceded to Great Britain Canada, Prince Edward Island, Cape Breton, Mobile, all the territory east of the Mississippi, Dominica, Tobago, St. Vincent and Grenada. England restored to France Guadeloupe, Martinique, St. Pierre, Miquelon and Pondicherry, and ceded St. Lucia to her. Spain ceded Florida to Great Britain, England restored Havana to Spain, and France ceded Louisiana to Spain. The treaty of Paris of 1782-83 between Great Britain on one side and France, Spain, and the United States on the other, was arranged in 1782 and formally ratified Sept. 3, 1783. John Jay, John Adams, Benjamin Franklin, and Henry Laurens formed the American commission. The absolute independence of the United States was recognized; Florida and Minorca were returned to Spain; navigation of the Mississippi was made free to both Spain and the United States; the Americans relinquished their pretensions to the territory north of Lake Erie; the St. Lawrence River system from the western end of Lake Superior to the forty-fifth parallel was made the boundary between the United States and the British possessions (from the forty-fifth parallel to the sea the boundary followed the highlands after an uncertain fashion and was long a matter of dispute); loyalists and tories were to be protected in America; English troops were to be withdrawn without destroying any property or taking away any negro slaves belonging to Americans; the right of fishing on the Canadian and Newfoundland coasts was granted to Americans. The portion of the treaty which directly affected America was signed at Paris, but that between Great Britain, France, and Spain was signed at Versailles, by which name the entire treaty is sometimes called. At Ver-

sailles the region of Senegal was granted to France and neutral restitution of conquests in the West Indies was made. In 1898 commissioners were appointed by the Governments of the United States and Spain to meet at Paris and frame a treaty of peace in accordance with the terms of the protocol signed Aug. 12, 1898. The commissioners began their sessions Oct. 1 and ended with the signing of a treaty of peace, Dec. 10. (See also Treaties with the various countries.)

**Parker, Willis W.,** inspector and collector, nomination of, 390.

**Parks, Gorham,** correspondence regarding African slave trade, 2538.

**Parks, National.**—Congress has on several occasions set aside and exempted from sale certain territory because of its picturesque character or historic interest. The principal tracts thus appropriated to the use of all the people up to the present time are the Yellowstone National Park and the Yosemite National Park, which was made a national park by act of Congress passed June 30, 1864, and ordered to include the Mariposa Big Tree Grove. This park was granted by Congress to the State of California, conditional upon its being forever set aside as a place of public resort and recreation. It is about 155 miles from San Francisco, is 6 miles long by about a mile in width, and its perpendicular depth below the surrounding country is about a mile, though it lies 4,000 feet above the

**Parks, National—Continued.**

level of the sea. Yellowstone Park was created by an act approved March 1, 1872, which dedicated it as a pleasure ground for the benefit and enjoyment of the people. Its general elevation is about 6,000 feet, though mountains 10,000 and 12,000 feet high rise on every side. The region abounds in scenery of unparalleled grandeur. Tall columns of basalt rise to 1,000 feet in height; waters of different degrees of temperature and of untold therapeutic properties are met on every hand; acres of miniature volcanoes sputter and fume; giant geysers intermittently spurt columns of hot water and steam hundreds of feet into the air from basins of all sizes and most fantastic shapes and vivid colorings, while the Gardner River plunges through a forbidding black hole into the Grand Canyon, whose precipitous walls of 2,000 feet in height have never been explored, and emerges, with an abrupt descent of 350 feet, to pursue its tranquil course over a fertile rolling prairie.

In 1890 three sections of land in Tulare County, Cal., containing giant trees, were reserved for a national park. In 1890 Congress provided for a park of 1,500 acres on Rock Creek, District of Columbia, half the cost (\$1,200,000) being paid by the people of Washington and half by the United States. Later Congress reserved the battle grounds of Chickamauga, Shiloh, Vicksburg, and others as public parks. The total area of the national parks amounts to 3,654,196 acres.

The national parks and reservations mentioned below are under the supervision of the Secretary of the Interior. General information, the annual administrative reports, copies of the rules and regulations, and compilations of the laws relating to the parks may be obtained from the Secretary of the Interior or from the superintendents of the parks.

Yellowstone National Park is in Wyoming, Montana, and Idaho, and has an area of 2,142,720 acres. The superintendent's address is Yellowstone Park, Wyoming. The park can be reached by the following railroads: Northern Pacific Railroad to Gardiner, the northern entrance, via Livingston, Mont.; Oregon Short Line Railroad to Yellowstone, Mont., the western entrance; Chicago, Burlington and Quincy Railroad to Cody, Wyo., from which the eastern entrance to the park is accessible.

Stage and private transportation connections for the reservation are made at all these points. The tourist season extends from June 1 to Sept. 15, but accommodations are furnished at Mammoth Hot Springs the entire year.

Yosemite National Park, California, including the Yosemite Valley and Mariposa Big Tree Grove, embraces an area of 719,622 acres. The superintendent's address is Yosemite, Cal. The park can be reached from Merced on the Atchison, Topeka and Santa Fé and the Southern Pacific railroads, by way of Yosemite Valley Railroad, which runs to the western boundary; and by connections of the same roads to Raymond, on the southwest; stage lines run from the terminus of the Yosemite Valley Railroad and from Raymond to Yosemite Valley within the park. The tourist season extends from May 1 to Nov. 1, but the park is accessible and hotel accommodations are furnished the entire year.

Glacier National Park, Montana, has an area of approximately 915,000 acres, of which 15,000 acres have been surveyed. Within the limits stated there are 250 lakes, ranging from 10 miles to a few hundred feet in extent. There are more than 60 glaciers between 5 square miles and a few acres in area. There are wild animals, plants, and rocks in numbers and quantity to satisfy the most ardent student, and views of great variety, beauty and grandeur to gratify the artist and the lover of nature. Major William R. Logan is the acting superintendent in charge of road and trail construction, his address being Belton, Mont. The park can be reached via the Great Northern Railway. The tourist season extends from May 1 to about Sept. 15.

Mount Rainier National Park, Washington, has an area of 207,360 acres. The superintendent's address is Ashford, Wash. The park is reached by stage or private transportation from Ashford, Wash., on the Tacoma Eastern Railroad, and by trail from Fairfax, on the Northern Pacific Railroad. The tourist season extends from June 15 to Sept. 15.

Sequoia National Park, California, has an area of 161,597 acres. The address of the superintendent is Ranger, Cal., during the tourist months (June 1 to Sept. 15) and Three Rivers, Cal., the balance of the year. This park may be reached from Visalia, on the Southern Pacific and the

**Parks, National—Continued.**

Achison, Topeka and Santa Fé railroads by way of the Visalia Electric Railroad Company to Lemon Cove, thence by stage or private conveyance to the Giant Forest within the park, or by private conveyance from Visalia via Lemon Cove.

General Grant National Park, California, has an area of 2,536 acres. This reservation is administered jointly with Sequoia National Park, and the tourist season extends from June 1 to Sept. 15. The address of the superintendent is given above. The park may be reached by stage and private conveyance from Sanger, on the Southern Pacific Railroad, or by trail from Sequoia National Park.

Crater Lake National Park, Oregon, has an area of 159,360 acres. The address of the superintendent during the tourist months (June 15 to Sept. 30) is Crater Lake, Ore., and during the balance of the year Klamath Falls, Ore. This park may be reached by steamer line and stage from Klamath Falls, Ore., or by private conveyance from Medford, on the Southern Pacific Railroad. Klamath Falls may be reached by the Southern Pacific Railroad and connecting stage and steamer line.

Wind Cave National Park, South Dakota, contains 10,522 acres. The superintendent's address is Wind Cave, S. Dak. This park may be reached by private conveyance from Hot Springs, on the Chicago, Burlington and Quincy and the Chicago and Northwestern railroads, or by similar conveyance from Custer, on the Chicago, Burlington and Quincy Railroad. The reservation is open to tourists the entire year.

Sullys Hill Park, North Dakota, on the shore of Devil's Lake, has an area of 780 acres. The address of the superintendent is Fort Totten, N. Dak. Devil's Lake, Narrows, and Tokio, on the Great Northern Railroad, are close to the park, and from these points the reservation can be approached by wagon, or by boat (private conveyance).

Platt National Park, at Sulphur, Oklahoma, has an area of 848.22 acres. Sulphur is the post-office address of the superintendent. The town is accessible by the Achison, Topeka and Santa Fé and the St. Louis and San Francisco railroads. The park, which is open to tourists the entire year, is within walking or riding distance of the railroads.

Mesa Verde National Park, Colo-

rado, has an area of 42,376 acres, and the 5-mile strip under the park jurisdiction for the protection of ruins, which abuts the park, contains 175,360 acres. The address of the superintendent is Mancos, Col., the nearest railroad station, on the Rio Grande Southern Railroad. This station is about 25 miles from the ruins, which may be reached only by horseback or on foot. The tourist season extends from May 1 to Sept. 30.

Casa Grande Ruin, Arizona, a reservation, has an area of 480 acres. The nearest railroad station is Casa Grande, on the Southern Pacific Railroad. It may also be reached by private conveyance from Florence, Ariz., on the Phoenix and Eastern Railroad. The address of the custodian is Florence. The Mesa Verde National Park and the Casa Grande Reservation were set aside to protect the instructive prehistoric ruins and other objects of antiquity which they contain. These ruins are being excavated and repaired and are open for the inspection of visitors. Reports on the repair of such ruins have been issued by the Department of the Interior, and more detailed accounts are distributed by the Bureau of American Ethnology, Smithsonian Institution.

Hot Springs Reservation, Arkansas (the permanent reservation), has an area of 911.63 acres. Eleven bathhouses on the reservation and thirteen in the city of Hot Springs, as well as several hotels operated in connection with bathhouses, receive hot water from the springs, under lease with the Secretary of the Interior. The address of the superintendent is Hot Springs, Ark.

**Patents.**—Literally, open letters. In England the word is applied to all licenses and authorities granted by

**Patents—Continued.**

the Crown. Patents for titles of nobility were first granted by Edward III. in 1334. The earliest patent for the exclusive privilege of printing books was granted in 1591. The property right of inventors and discoverers to their arts and manufactures was first secured by letters patent by an act passed in 1623. In the United States a patent is generally understood to mean the right to the exclusive use for a limited number of years, of a new or useful invention or discovery by the inventor or discoverer or his heirs or assigns. A few patents had been issued by the States. In 1790 the first patent law was passed by the General Government, and granted letters patent for 14 years to both citizens and foreigners. Application had formerly to be made to the Secretaries of War and State and the Attorney-General. In 1793 an act was passed permitting the issue of patents to citizens only and requiring a fee of \$30. The States were not permitted to issue patents. This was decided in the case of *Gibbons vs. Ogden* (q. v.), from New York. In 1836 the patent laws were revised and the present patent system in this country may be said to date from that year. One of the most important changes then introduced was the regulation requiring a preliminary examination of the novelty and patentability of an invention. In 1839 an inventor was given the right to use his invention before applying for a patent, but such use was limited to two years. Under the law of 1842 patents were granted for a term of 7 years; the term was subsequently extended to 14 years, and finally in 1861 the present 17-year term was granted. The patent laws were revised in 1870 and patents were allowed to all persons, both citizens and foreigners, who could prove the novelty and usefulness of their inventions. The salient features of the patent laws of to-day, however, are still those of the law of 1836. The number of patents granted annually is about 30,000. Since the year 1836, no less than 885,635 patents have been issued by the United States, while the combined total of foreign countries amounts to 1,863,836. (See also Department of the Interior.)

**Patten, Thomas G.;** b. New York City Sept., 12, 1861; educated at Mount Pleasant Academy, Ossining, N. Y., and Columbia College; president of the New York and Long Branch Steamboat Co.; never held public office until elected to the 62d Congress from New York.

**Patterson, Eliza W.,** act for relief of, permitted to become law and reasons therefor, 4806.

**Patterson, William,** associate justice, Supreme Court, nomination of, void, 129.

**Patton, Charles E.;** b. July 5, 1859, in Curwensville, Clearfield County, Pa.; received his early education in the common schools of his native place and later attended Dickinson Seminary at Williamsport, Pa.; started in business as a dry-goods merchant, but later branched out in various lines of business, being stockholder and director in the Curwensville National Bank, president of the Curwensville Light and Power Co., interested in lumber and contracting business, be-

**Patton, Charles E.—Continued.**

sides owning several fine farms; has held nearly every elective office in his own town; elected to the 62d Congress from Pennsylvania.

**Paul vs. Virginia.**—An important case before the United States Supreme Court. The statutes of Virginia required the deposit in the State treasury of certain moneys in State bonds by insurance companies not incorporated under the State laws in return for licenses to do business in the State. This law was enacted Feb. 3, 1866, and later in the month a supplemental act was passed. In the same year Samuel Paul, a citizen of Virginia, acting as agent for a New York insurance company, was indicted before the Circuit Court of Petersburg and sentenced to pay a fine of \$50 for refusing to comply with the above law. The court of appeals of Virginia affirmed the decree of the Circuit Court, and, the case having been taken to the Supreme Court of the United States, that tribunal affirmed the judgment of the State court of appeals on the ground that the State law in question did not conflict with that clause of the National Constitution which declares that "the citizens of each State shall be entitled to all privileges and immunities of citizens in the several States," nor with the power of Congress to "regulate commerce with foreign nations and among the several States." Justice Field, for the court, held that issuing a policy of insurance is not a transaction of commerce. The policies are local transactions and are governed by the local law. Justice Field stated that corporations are not citizens within the meaning of the Constitution.

**Paulding, Hiram,** arrest of William Walker and associates in Nicaragua by, 2997.

Referred to, 3001, 3017.

**Pauls, George,** death of, referred to, and appropriation to widow of, recommended, 5494.

**Paulus Hook (N. J.), Capture of.**—In the summer of 1779 the British had a garrison of 383 men stationed at Paulus Hook, N. J., opposite New York City. At 3 o'clock on the morning of Aug. 19, Maj. Harry Lee, with a force of 300 picked men, made a descent upon the fort and in a short engagement killed 30 men and took 160 prisoners. The British having retired to a small circular redoubt too strong for Lee's men, he returned to camp with his prisoners.

Congress rewarded Lee with thanks and a gold medal.

**Pauncefote, Lord,** British ambassador: Agreement between United States and Great Britain for *modus vivendi* regarding Bering Sea fisheries, signed by, 5581.

Communications in regard to Venezuelan boundary, transmitted by, 6087.

Death of, 6745.

Proceedings to try title to, referred to, 1809.

**Pea Ridge (Ark.), Battle of.**—Called by the Confederates the battle of Elk Horn. In December, 1861, Gen. Samuel R. Curtis took command of the 12,000 Federal troops at Rolla, Mo., and advanced against Gen. Sterling Price, who retreated before him into Arkansas. Gen. Price was joined by Gen. Ben. McCulloch. In January Gen. Earl Van Dorn assumed command of the combined Confederate forces, estimated at 16,000, including some 5,000 Cherokee Indians recruited for the service by Albert Pike. Curtis had about 10,000 men in line and 48 pieces of artillery. March 7, 1862, Van Dorn attacked Curtis in his position on Pea Ridge, a line of bluffs along Sugar Creek, in Benton County, Ark. Skillful manipulation of the artillery in Sigel's division did much toward determining the result. Fighting continued all day, and during the night both armies changed positions. The battle was renewed at sunrise on the 8th, and after 2 hours Van Dorn's forces retreated. The Confederate Generals McCulloch and McIntosh were killed and Price and Slack were wounded. The Confederate losses were about 1,300. The Union army lost 1,351 in killed, wounded, and missing.

**Peabody, Charles A.**, provisional judge for Louisiana, appointed, 3323.

**Peabody, George**, medal presented to, referred to, 3897.

**Peace Commission:**

Postponement of, referred to, 4717.

**Peace Establishment of Navy.** (See Navy.)

**Peach Tree Creek (Ga.), Battle of.**—July 17, 1864, Sherman's army advanced across the Chattahoochee

River and Johnston fell back toward Atlanta. Just at this time Johnston was superseded in command of the Southern army by Gen. John B. Hood. Before the Federal forces could be brought into line of battle before Atlanta they were attacked by Hood's army near Peach Tree Creek, July 20, 1864. The attack fell mainly upon Newton's division of the Fourth Corps, the Twentieth Corps, and Johnston's division of the Fourteenth Corps. After a severe battle the Confederates retired into their intrenchments, leaving upon the field 500 dead, 1,000 wounded, 7 stand of colors, and many prisoners. The Federal loss in killed, wounded, and missing was 1,500. Gen. Hood censured Hardee for the reverse.

**Peacock, The.**—A United States sloop of war, carrying 18 guns, commanded by Capt. Lewis Warrington. On April 29, 1814, when off the coast of Florida, this vessel attacked the British brig *Epervier*, also mounting 18 guns. After a battle lasting 40 minutes, in which 22 of her men were killed or wounded, the *Epervier* surrendered. It proved a rich prize, as it had on board \$118,000 in specie. On June 30, 1815, the *Peacock* attacked and captured the *Nautilus*, of 14 guns. This capture took place after the treaty of peace. Next day, on ascertaining this fact Capt. Warrington released the *Nautilus*, and returned home.

**Pearce, Samuel**, ensign in Navy, nomination of, and reasons therefor, 3357.

**Pearl Harbor, Hawaii**, improvement and fortification recommended, 7484.

**Pearl River, Hawaiian Islands**, improvement of harbor of, and establishment of naval station at, recommended, 5623.

**Peck, Ferdinand W.**, commissioner-general to Paris Exposition, 6330.

**Pedersen, Peder**, Danish minister, mentioned, 911.

**Peirpont, Francis H.**, governor, to be aided in restoring Virginia into Union, 3535.

**Pelletier, Antonio**, imprisonment of, in Haiti, and claims arising out of, discussed, 3829, 4665, 4918, 5120.

**Pembina, Minn.**, proclamation granting privileges of other ports to, 2859.

**Pendleton, George H.**, report of, on diseases of swine in Germany referred to, 5197.

**Penitentiaries.**—The first penitentiary in the United States was founded in

**Penitentiaries—Continued.**

Philadelphia in 1786 through the influence of the Society of Friends. This was followed soon afterwards by the New York prisons at Sing Sing and Auburn. Sept. 23, 1789, Congress recommended to the several States to make it the duty of keepers of jails to receive prisoners committed under authority of the United States. In 1790 the legislature of Pennsylvania passed a law to try the system of solitary confinement of prisoners at hard labor as a reformatory measure. A society for the improvement of prison discipline and for the reformation of juvenile offenders was established in Boston in 1815, and in 1825 the House of Refuge on Blackwells Island, N. Y., the first institution in the United States for reforming juvenile delinquents, was opened. The contract system of leasing prisoners to private parties began with the Mississippi penitentiary Feb. 21, 1867. Territorial penitentiaries were placed under control of United States marshals and the Attorney-General was authorized to prescribe rules for their government by act of Congress of June 10, 1871. In 1874 the United States Military Prison was established at Fort Leavenworth. In 1886 a United States jail was located at Fort Smith, Ark. In 1891 Congress authorized three United States prisons, there being now, besides those mentioned above, a United States penitentiary at Atlanta, Ga., one on McNeil's Island, State of Washington, a United States jail in the District of Columbia, and a Territorial prison at Yuma, Arizona. There is also one penitentiary in Hawaii, and in the Philippine Islands two such institutions for the confinement of offenders against the civil law. In the several States, under State jurisdiction, there are altogether 56 prisons and penitentiaries. United States prisoners not confined in Federal institutions are kept in those of the various States.

**Penitentiaries:**

State laws regulating, discussed, 5755.  
Uniform credit for good behavior in, recommended, 5755.

Recommended, 5969.

**Penitentiary Congress, International, at London, 4162.**

Penn Yan, N. Y., special agent to take charge of post-office in, referred to, 3799.

**Pennamite War.** (See Wyoming Controversy.)

**Pennsylvania.**—One of the thirteen original States; nickname, "The Keystone State"; motto, "Virtue, Liberty and Independence." It extends from lat. 39° 43' to 42° 15' north and from long. 74° 40' to 80° 34' west. It is bounded on the north by Lake Erie and New York, on the east by New York and New Jersey (separated from both by the Delaware River), on the south by Delaware, Maryland and West Virginia, and on the west by Ohio and West Virginia.

It has an area of 45,215 square miles. It was originally named *Sylvania* ("forest country"). In 1681 William Penn obtained a grant of 40,000 square miles of land from Charles II. in payment of a debt of £16,000 due Penn's father, an admiral in the English navy. The King gave the territory the name of *Pennsylvania* in honor of Penn. In 1682 the city of Philadelphia was laid out on plans drawn in England. Penn established a popular form of proprietary government and offered inducements to immigrants by his wise administration and honorable dealings with the Indians. His rights passed to his heirs, from whom they were purchased by the State in 1776. Pennsylvania had been settled by a colony of Swedes in 1638, prior to the grant of the territory to Penn. The United States Constitution was ratified by a State convention Dec. 12, 1787. A new State constitution was made in 1790, another in 1838, and the present in 1873.

The State is traversed from northeast to southwest by low parallel ranges of the Alleghanies, and is drained by the Ohio, Susquehanna, and Delaware rivers. It is the first State in the production of petroleum and the manufacture of iron and second in general manufactures.

Statistics of agriculture reported to the Federal Census Bureau, under date of April 15, 1910, place the number of farms in the State at 219,295, comprising 18,586,832 acres, valued, with stock and improvements, at \$1,253,274,862. The average value of land per acre was \$33.92, an increase from \$29.70 in 1900. The value of domestic animals, poultry, etc., was \$141,480,052, including 1,586,519 cattle, valued at \$47,229,894; 549,756

**Pennsylvania—Continued.**

horses, \$68,055,489; 44,323 mules, \$6,424,039; 977,637 swine, \$7,624,494, 883,074 sheep, \$3,934,144, and poultry, \$7,674,387. The yield and value of field crops for 1911 was: Corn, 1,435,000 acres, 63,858,000 bushels, \$43,423,000; wheat, 1,289,000 acres, 17,402,000 bushels, \$16,010,000; oats, 1,121,000 acres, 31,724,000 bushels, \$15,862,000; rye, 285,000 acres, 4,304,000 bushels, \$3,443,000; potatoes, 270,000 acres, 15,120,000 bushels, \$14,062,000; hay, 3,148,000 acres, 3,148,000 tons, \$62,960,000; tobacco, 46,000 acres, 65,500,000 pounds, \$5,998,500. The coal production in 1911, according to the United States Geological Survey, was 236,006,762 short tons, valued at \$313,304,812. Of this, 84,485,236 short tons was anthracite, valued at \$160,275,302, and 150,521,526 short tons was bituminous, valued at \$153,029,510. The anthracite mines of the State in 1910 employed 169,497 men, while the bituminous fields employed 175,403 men. In the production of coal Pennsylvania outranks all countries of the world, except Great Britain and Germany, and the output of 1910 came within 10,000,000 short tons of equaling Germany. There were 1,140 men killed and 2,192 injured in the industry in 1910. The receipts by the State Treasurer for the fiscal year ending Nov. 30, 1911, were \$32,146,978, and the disbursements, \$29,132,646; balance in general fund, \$10,526,687; indebtedness at close of year, \$2,295,510.

In 1905 there were 23,495 manufacturing establishments with a combined capital of \$1,995,836,988, employing 829,363 persons, who converted \$1,142,942,707 worth of raw material into \$1,955,551,332 worth of finished goods, consisting of iron and steel products, leather, textiles, flour, tobacco, liquors, sugar, oil, lumber and glass.

In 1906 the State contained 11,265 miles of steam railway and 3,626 miles of electric lines. The population in 1910 was 7,665,111.

Act to amend, by increasing pension of soldiers and sailors who lost arm or leg in service returned, 4994.

**Pension Vetoes.** (See Cleveland, Grover; Grant, Ulysses S.)

**Pensions.**—The word "pension" is derived from the word *pensio*, a payment, and refers to allowances of money paid in fixed amounts at certain intervals by a government to such persons as have rendered some valuable public service, or to the dependent relatives of such. In England pensions are granted to those "who by their useful discoveries in science and attainments in literature and the arts have merited the gracious consideration of their sovereign and the gratitude of their country." Aug. 26, 1776, the Continental Congress passed an act to provide by pension for the disabled soldiers of the Revolution. It was also resolved during the same year that all the officers who should continue in the service until the end of the war should receive half pay for 7 years after peace had been established. A few years later the widows and orphans of those who had died were included in the provision of this act. In 1785 Congress recommended that the several States provide for invalid soldiers. By laws passed in 1789 and 1808 the United States assumed the pension obligations of the several States.

Officers and seamen of the Navy disabled in service were placed on the pension lists by act of July 1, 1797, and by acts passed in 1799 and 1800 money accruing from prizes was made to constitute a fund for the payment of naval pensions. By an act passed April 24, 1816, the rate of pension for total disability was fixed at \$17 per month for first lieutenants, \$15 for second lieutenants, and \$8 for noncommissioned officers and privates. In 1818 an act was passed granting pensions to all who had served 9 months or more in the Revolutionary Army and were in indigent circumstances. More claimants applied than could possibly have survived from Washington's army. The amount required to be paid the first

year was eleven times what had been estimated, and the second year seventeen times the estimate. In 1868, when all the Revolutionary pensioners had died, there remained 888 widows of such soldiers. There remained on the pension rolls as late as 1908 two daughters of Revolutionary soldiers. Acts of July 14, 1862, and subsequent dates provided pensions for soldiers and sailors disabled in the Civil War and for the dependent relatives of those who had died. Under these acts expenditures for pensions reached \$34,443,895 in 1871, and then declined until, on Jan. 25, 1879, the arrears act was passed, allowing back pay on all claims theretofore allowed. In 2 years this act doubled the total annual sum paid for pensions. Meanwhile, in 1871, another act had pensioned all who had served a certain time in the War of 1812, and their widows if married before the treaty of Ghent. The last survivor of the War of 1812 who was on the pension rolls was Hiram Cronk, of Ava, N. Y., who died May 11, 1905, at the age of 105 years.

The act of June 27, 1890, pensioned all who served 90 days in the Civil War, and were honorably discharged, and who were incapacitated for manual labor, and the widows, children, and dependent parents of such.

The fiscal year ending June 30, 1910, began with 946,194 pensioners, and 29,219 having been added and 54,330 dropped, the year closed with 921,083 pensioners, a net reduction of 25,111 having taken place. \$159,974,056.08 was paid to pensioners during the year, which sum was smaller by \$2,000,000 than that disbursed for the same purpose the preceding year. The administrative cost for the year was \$2,657,673.86. Pension disbursements by the Government now total \$4,191,419,304.49. Up to June 30, 1865, the Government had expended for pensions only \$96,445,444.23, but from July 1, 1865, to June 30, 1910, it paid out for pensions \$4,094,973,860.26.

The first section of the act of April 19, 1908, provides that from and after its passage "the rate of pension for widows, minor children under the age of sixteen years, and helpless minors as defined by existing laws, now on the roll or hereafter to be placed on the pension roll and entitled to receive a less rate than hereinafter provided, shall be \$12 per month." The second section of the act grants pensions at the rate of

**Pensions—Continued.**

\$12 per month to the widows of persons who served ninety days or more in the army or navy of the United States during the Civil War and were honorably discharged, without regard to their pecuniary condition, provided they were married prior to June 27, 1890. All pensions granted under the second section of this act commence on the date the applications are filed in the bureau of pensions. The conditions of title under this section of the act are identical with those imposed upon widows by the act of June 27, 1890, as amended by the act of May 9, 1900, with the exception that the requirements as to dependance are eliminated. This act therefore supersedes the act of June 27, 1890, in so far as the claims of widows are concerned, and pensions are not now being granted to widows under the act of 1890 upon applications executed and filed on or after April 19, 1908.

There is no law granting service pensions to any person for service rendered since 1858, aside from the allowances made under the provisions of sections 4756 and 4757, Revised Statutes, for twenty years' and ten years' service, respectively, in the United States Navy or Marine Corps.

There were added to the rolls during the year ended June 30, 1911, the names of 26,200 new pensioners. The number of pensioners lost from the rolls during the year was 55,185, showing a decrease of 28,985 on the rolls, as compared with the close of the fiscal year 1910. There were 892,098 pensioners on the rolls June 30, 1911. The pension disbursements for the year ending June 30, 1911, were \$157,325,160.35.

**Pensions:****Act—**

**Pensions, Bureau of.**—Up to 1833 the disbursement of pensions had been under the supervision of the Secretary of War and the Secretary of the Navy. In that year Congress established the Pension Bureau and placed J. L. Edwards in charge. He immediately assumed the business thereto-

**Pensions, Bureau of—Continued.**

fore under the War Department, and in 1840 the pension affairs of the Navy Department were transferred to this Bureau. In 1849, when the Department of the Interior was created, the Pension Bureau was placed under its jurisdiction. The chief officer of this Bureau is called the Commissioner of Pensions.

**Pensions, Bureau of:**

Expenditures of. (See Pensions discussed.)

Good work of, 6877.

Increase in clerical force of, 5552.

Recommended, 4673.

Transfer of, from Interior Department to War Department recommended, 4060.

**Pensions, Commissioner of, provision for continuance of, recommended, 1789.**

**People's Party.**—In December, 1889, a meeting of the Farmers' and Laborers' Union of America was held at St. Louis, Mo., for the purpose of consolidating the various bodies of organized farmers which had been formed at different times and places in the United States since 1867, and which were known under the general name of Grangers (q. v.). The consolidated body was called the Farmers' Alliance and Industrial Union. On Dec. 2, 1890, a national convention was held at Ocala, Fla. Thirty-five States and Territories were represented by 163 delegates. Independent political action was decided upon, and a platform was adopted advocating free silver, the subtreasury plan, equal taxation, a graduated income tax, election of President, Vice-President, and Senators by direct vote, and prohibition of alien ownership of land. (See Ocala Platform.) The second convention was held at Cincinnati, Ohio, May 19, 1891. Thirty States and Territories were represented by 1,418 delegates. At this convention the Ocala platform was heartily indorsed and the name People's party was adopted. A third national meeting was held at St. Louis, Mo., in February, 1892. It was decided to put in the field candidates for President and Vice-President, and on July 2, 1892, a national body of delegates met at Omaha, Nebr., and nominated Gen. James B. Weaver, of Iowa, for President, and James G. Field, of Virginia, for Vice-President. Weaver obtained a popular vote of 1,030,128 and an electoral vote of 23.

In 1896 the People's party met at

St. Louis, Mo., and nominated for President William J. Bryan, of Nebraska, and for Vice-President Thomas E. Watson, of Georgia. Mr. Bryan had been previously nominated for the Presidency by the Democratic party. In the popular vote the Bryan and Watson ticket (straight Populist) received 245,728 votes, and Bryan and Sewall ticket (Democratic and straight fusion ticket) 6,257,198 votes. In the electoral college McKinley and Hobart (Republican candidates) received 271 votes, Bryan 176, Sewall 149, and Watson 27. On May 10, 1900, a convention of the fusion wing of the party met at Sioux Falls, S. D., and nominated William J. Bryan for President and Charles A. Town for Vice-President. Mr. Town withdrew in favor of Adlai Stevenson, the Democratic candidate, and on Aug. 28th the executive committee nominated Mr. Stevenson. The anti-fusion wing of the party met at Cincinnati on May 10th and nominated Wharton Barker for President and Ignatius Donnelly for Vice-President. The Democratic and fusion nominees received 6,374,397 popular votes and 155 electoral votes. The anti-fusion (middle of the road) wing of the People's party received 50,373 popular votes. In 1904 the People's party nominated Thomas E. Watson for President and Thomas H. Tibbles for Vice-President and they received 120,903 votes. In 1908 Watson and Samuel Williams of Indiana were nominated to head the ticket. The vote this year fell to 33,871.

**Peoria Indians.** (See Indian Tribes.)

**Pepper, Irvin S.;** b. Davis County, Iowa, June 16, 1876; graduated from Southern Iowa Normal at Bloomfield, Iowa; taught school, and while serving as private secretary to Congressman M. J. Wade, studied law, graduating from the George Washington University Law School, of Washington, D. C., in 1905; while serving his second term as prosecuting attorney of Muscatine County, Iowa, was elected to the 62d Congress from Iowa.

**Pequot, or Pequod Indians.** (See Indian Tribes.)

**Percy, Le Roy;** b. Nov. 9, 1860, in Washington County, Miss.; educated at the University of the South; and graduated from the law department of the University of Virginia in 1881; began the practice of law at Green-

**Percy, Le Roy—Continued.**

ville; elected by legislature of Mississippi to fill the unexpired term of Senator A. J. McLaurin, deceased, Feb. 22, and took his seat Feb. 24, 1910. Never held office prior to his election as Senator.

**Perjury.**—In law the willful giving, under oath lawfully administered in a judicial proceeding, of false testimony in regard to a matter or thing material to the issue or point of inquiry. The early Romans threw perjurers from the Tarpeian Rock. The Greeks branded them with a mark of infamy. After the Empire became Christianized any person who swore falsely upon the Gospels was sentenced to have his tongue cut out. The canons of the early church imposed 11 years' penance. In some countries the perjurer was liable to any punishment to which his false testimony had exposed an innocent person. In England perjury was punished by fine, the pillory, and imprisonment. It is now in both England and America a statutory offense, punishable by fine or imprisonment, or both.

**Perkins, Benjamin W.**, claim of, against Russia, 3826.

**Perkins, George Clement**; b. at Kennebunkport, Me., 1839; was reared on a farm, attended public school; shipped "before the mast" on the sailing ship *Galatea*, for San Francisco, in 1855; engaged in mercantile business, banking, farming, mining, whale fishery, and steamship transportation; in 1869 he was elected to the State senate, serving eight years; governor of California, 1879-83; appointed United States Senator to fill vacancy caused by the death of Hon. Leland Stanford, 1893; elected by legislature in 1895, 1897, 1903, 1909, to represent California in the Senate.

**Permanent Taxation.** (See Revenue, Public; Taxation.)

**Pernicious Activity.**—A phrase contained in an Executive order of President Cleveland. It occurred in the following sentence: "Individual interest and activity in political affairs are by no means condemned. Officeholders are neither disfranchised nor forbidden the exercise of political privileges, but their privileges are not enlarged nor is their duty to party increased to pernicious activity by officeholding," 5079.

**Perpetual Emigrating Fund Co.**, suit instituted by Government for termination of, discussed, 5379.

**Perry, Benjamin F.**, provisional governor of South Carolina, appointed, 3524.

**Perry, Matthew Calbraith**; naval officer; b. about 1821; made lieutenant, 1848, and served for several years in the coast survey; commissioned captain, 1867, and placed on retired list; died New York City, Nov. 16, 1873.

**Perry, Matthew C.:**

Directed to protect rights of American fishermen in British possessions, 2694.

Report of, on light-houses of England and France, 1819.

**Perry, Oliver Hazard**; naval officer; b. South Kingston, R. I., Aug. 21, 1785; commissioned midshipman, 1799; served in the Mediterranean fleet in campaign of 1801-03, against pirates; after the surrender of Gen. Hull, at Detroit, Perry asked to be put in command on the lakes, then in undisputed possession of the English; built a fleet on Lake Erie in 1813, consisting of eight vessels, and with about 500 men defeated the British fleet of six vessels fully manned, and sent the laconic message to Gen. Harrison: "We have met the enemy, and they are ours"; rendered further service on the great lakes; in the defense of Baltimore, and in the Mediterranean; he was highly honored for his achievements; died of yellow fever at Trinidad, in the West Indies, Aug. 23, 1819, while in command of the *John Adams*; his remains were transferred to Newport, R. I., Dec. 4, 1826.

**Perry, Oliver H.:**

Death of, referred to, 631.

Victory of naval forces under, on Lake Erie discussed, 519.

**Perry's Victory Exposition.**—The one hundredth anniversary of the victory of Commodore Oliver Hazard Perry over the British fleet under command of Captain Barclay in the battle of Lake Erie, Sept. 10, 1813, will be celebrated by an historical and educational exposition at Put-in-Bay Island during the summer of 1913 and a dedication of a national memorial to Commodore Perry and the American seamen who perished in that conflict, the remains of many of whom have reposed in unmarked graves on Put-in-Bay Island for nearly a hundred years. The memorial is to cost more than a million dollars. Congress has appropriated \$250,000.

The State of Ohio took the initiative in the project by necessary legislation providing for the appointment of commissioners to carry for-

**Perry's Victory Exposition—Continued.**

ward such plans as they deemed advisable, and since that time Pennsylvania, Michigan, Illinois, Wisconsin and other States, nine in all, by legislation and the appointment of commissioners, have joined in the enterprise.

The officers of the Ohio Commission are: President, William H. Reinhart, Sandusky; Vice-President, George H. Worthingham, Cleveland; Secretary, Webster P. Huntington, Columbus; Treasurer, S. M. Johannsen, Put-in-Bay. Among the other members of the commission are Lieut.-Gen. Nelson A. Miles, Rear-Admiral Charles E. Clark, Col. Henry Watterson, Myron T. Herrick and Richmond P. Hobson.

The exposition will open on July 4, 1913, and close Sept. 10. Its historical and educational interests will be under the direction of the historical societies and the universities and colleges of the States participating. The only industrial feature will relate to an exhibit for the promotion of the shipping interests of the great lakes. In conjunction with the permanent memorial to Commodore Perry the exposition will commemorate the one hundredth anniversary of Gen. William Henry Harrison's Northwestern campaign.

**Perry, Rodger**, commander in Navy, nomination of, and reasons therefor, 3354.

**Perryville (Ky.), Battle of.**—Oct. 1, 1862, the Confederate forces under Bragg and Kirby Smith having united at Frankfort, Ky., Bragg issued a proclamation calling the people of Kentucky to his assistance. He inaugurated a provisional government at Frankfort, with Richard Hawes as governor. Buell's army, divided into 3 corps, under McCook, Gilbert, and Crittenden, advanced against the Confederates by way of Louisville. Oct. 8, McCook's corps was attacked near Perryville, and after a fight lasting all day Bragg's army was repulsed. The engagement, while not general all day, was severe. During the night the Confederates retired, and later retreated to Cumberland Gap, leaving 1,200 wounded and sick behind. The Federal losses were 916 killed (including Generals Jackson and Terrell), 2,943 wounded, and 489 missing—a total of 4,348. The Confederates lost 510 killed, 2,635 wounded, and 251 missing—a total of 3,396.

**Persia.**—A constitutional monarchy of western Asia. The native name is

Iran. It is bounded on the north by Russia, the Caspian Sea, and Russian Central Asia, on the east by Afghanistan and Baluchistan, on the south by the Arabian Sea, the Strait of Ormuz, and the Persian Gulf, and on the west by the Persian Gulf and Turkey. It extends 900 miles from east to west and 700 miles from north to south. The surface is largely mountainous table-land. Much of the country is desert and without drainage to the sea. Wheat, fruit, and sugar are produced. The leading manufactures are silks, shawls, embroidery, etc. The Government up to the year 1906 was similar to that of Turkey. The Shah was an absolute ruler within the limitations imposed by the Mohammedan religion, and regarded by the people as the vicegerent of the prophet. In January, 1906, it was announced that the Shah had given his consent to the demands of the people for a representative government. Oct. 7, 1906, a national council composed of princes of the reigning dynasty, clergy, chiefs, nobles, landowners, merchants and tradesmen met. They were welcomed by the Shah in a speech, and the representative government was outlined. The National Council may consist of 200 members, and a Senate of 60 was provided for. Muzaffar-ed-din died in 1907 and was succeeded by his son, Mohammed Ali Mirza. The mother of Mohammed Ali Mirza was not a Kajar princess, as the constitution requires, and the present Shah is not, therefore, the heir apparent to his father. By a rescript of Feb. 11, 1907, he confirmed a previous rescript, which he had signed Dec. 30, 1906, as heir apparent. Oct. 8, 1907, he signed the constitution, and Nov. 12 took the prescribed oaths before the House.

Aug. 31, 1907, Great Britain and Russia agreed to limit the sphere of their respective interests in Persia to the provinces adjoining the Russian frontier on one hand and the British frontier on the other. The two powers respect the integrity and independence of Persia.

In June, 1908, the first parliament was dissolved and the building partially demolished and sacked by military. Insurrection broke out in many places, but in June, 1909, when the nationalist forces were marching on Teheran, the Shah reconfirmed the constitution and abdicated and fled the country. Azud el Mulk, chief of the Kajar tribe, was proclaimed re-

**Persia—Continued.**

gent. He died in 1910 and Abu'l Kassim Khan Nasser el Mulk was chosen his successor, taking office March 4, 1911.

A plan for the reorganization of the financial administration under American supervision having been approved, the Persian Minister conferred with the State Department at Washington, and on the recommendation of President Taft, Mr. Morgan W. Shuster, formerly of the Philippine Service, was appointed Treasurer-General. The powers accorded the new official were extensive. One of his earliest acts was the organization of a gendarmerie to enforce the collection of the revenue. Early in his administration he encountered difficulty in carrying out his plans through the attitude of Russian officials, who refused to recognize the American Treasurer-General. Mr. Shuster's appointment of Major Stokes of the British Army as organizer of the new revenue gendarmerie was also objected to by the Russians. In 1911 Mr. Shuster compelled the rich landholders to pay their overdue taxes. The gendarmerie seized the property of one delinquent prince and threatened that of another for arrears of taxes. Russian officials pronounced these measures too drastic. Matters came to a crisis when the treasury gendarmes confiscated the property of a brother of the former Shah, for complicity in the attempt of his brother to regain the throne. Russia demanded an apology and restitution, and started an army for Tabriz, and on Nov. 29, 1911, demanded the immediate dismissal of Mr. Shuster and Persia's submission to the advice of Russia and England in choosing foreign advisers. As Great Britain supported Russia's ultimatum, Persia was unable to resist, and Mr. Shuster was dismissed. The affair created indignation in England and America as well as in Persia.

The prevailing religion is Mohammedanism. According to the most reliable authority, the ancient Persians came to Elam (the original name of Persia) from Parsua, near Lake Urumiah, the traditional birthplace of Zoroaster, about 600 B. C., and about 549 B. C., under Cyrus the Great, overthrew Astyages. The monarchy of the Medes and Persians rose to power under Cyrus, Cambyses, and Darius. The country was overcome by Alexander the Great 333 B. C.,

and ruled by him and the Seleucidae until the rise of the Parthian Monarchy, about the middle of the third century B. C. The prosperity of the Empire was at its height during the sixth and seventh centuries. It has been engaged in wars with all the powers of the ancient world, and in modern times has fought with Russia (in 1827) and Great Britain (1856-57). Persia has an area of 628,000 square miles and a population of about 9,500,000.

Referred to, 2977.

**Persia, Treaties with.**—A treaty of friendship and commerce was concluded in 1856. Provision is made for the reception and protection of ambassadors and diplomatic agents on terms of the most favored nation; freedom of travel is secured to all citizens, and of trade in conformity with the laws of the country in which such is carried on. Such privileges as may at any time be conferred upon other powers are to be enjoyed by citizens and subjects of the two contracting powers. No exceptional or discriminating tax upon import or export is to be charged. Suits and disputes are to be tried before the proper Persian officer in the presence of the consul or of his agent or representative at the place of consular residence. Disputes between citizens of the United States are to be settled by and before the consul.

Disputes between citizens of the United States and subjects of other powers in Persia are to be settled by their consuls. The goods and effects of a citizen or subject dying in the country of the other shall be delivered to his heirs or successors; when such are not represented, the effects shall be delivered to the consul for disposition. Each country shall appoint a diplomatic agent to reside at the seat of government of the other, and three consuls, those of the United States to reside at Teheran, Bender Bushir, and Tauris; those of Persia at Washington, New York,

**Persia, Treaties with—Continued.**

and New Orleans. No greater number of domestics may be retained by the diplomatic agent in Persia than are allowed to Russia by treaty.

**Personal-Liberty Laws.**—A name given to laws passed by some of the Northern States for the purpose of impeding the operations of "fugitive-slave laws." In 1840 and the years immediately prior and subsequent thereto most of the Northern States enacted statutes for the protection of negroes within their borders. Indiana and Connecticut had previously provided that fugitive slaves might have trial by jury. After the Prigg decision many of the States forbade the use of their jails for the detention of fugitives. The bitter opposition in the North to the fugitive-slave law of 1850 induced many of the State legislatures to enact personal-liberty laws. Besides prohibiting the use of State jails, these laws forbade State judges and officers to assist claimants or issue writs. Trial was to be given all alleged fugitives. Such acts were passed by Vermont, Connecticut, Rhode Island, Massachusetts, Maine, Michigan, Wisconsin, Kansas, Ohio, and Pennsylvania, and heavy penalties were provided for their violation. New Jersey and California alone of the Northern States sanctioned the return of fugitives. It was claimed by the people of the South that these laws were in violation of Article IV., section 2, of the Constitution, which reads as follows: "No person held to service or labour in one State, under the laws thereof, escaping into another, shall, in consequence of any law or regulation therein, be discharged from such service or labour, but shall be delivered up on claim of the party to whom such service or labour may be due."

**Perthshire, The**, appropriation to owners for detention of, recommended, 3247.

**Peru.**—A Republic of South America. It is bounded by Ecuador on the north, Brazil and Bolivia on the east, Chile on the south, and the Pacific Ocean on the west and southwest. The western part is traversed by 3 ranges of the Andes, inclosing several high plateaus. In the northeast are vast wooded plains which are drained by the Amazon River. The country is rich in gold, silver, and other minerals. It produces lumber, cinchona, cocoa, india rubber, wool, sugar, petroleum, spirits, borax, cotton, etc.

It is governed by a President and a Congress consisting of a Senate and House of Representatives. The prevailing language is Spanish and the religion is Roman Catholic. The country, which had been highly developed under the Incas, was conquered by the Spaniards under Pizarro in 1533-34. Independence was proclaimed in 1821. Peru has suffered from frequent revolutions and has several times been ravished by earthquakes. A war with Chile began in 1879. Lima, the capital, was entered by the Chileans in 1881. By the treaty of 1883 Peru ceded Tarapacá to Chile and granted temporary occupancy of other provinces. Neither the territorial extent nor the number of inhabitants has been accurately determined. The boundaries with Bolivia were fixed in 1909 and with Brazil in 1910, but there remain boundary disputes with Colombia and Ecuador. Guillermo E. Billinghurst, a native, of English descent, elected president of Peru in August, 1911, took office Sept. 24, 1912. He succeeded Auguste Leguía, and his term extends to 1916.

The Peruvian Corporation has a concession of about 2,750,000 acres in the rich central districts, but less than half of the concession is occupied for lack of labor and transportation facilities. Sugar, cotton and coffee are the chief agricultural products. Cocoa cultivation is extending. There are twenty rice mills in the country. Cocaine to the extent of 5,914 kilos was made in 1907. The guano deposits on Huanillos, Punta Lobos, and Pabellon de Pica have reverted to the Chilean government, but some beds yet remain in the possession of Peru. The most active mining operations are American. The mineral output for 1907, according to the President's message, was £3,499,057. A thousand looms in cotton factories turn out about 15,000,000 yards of cloth per year.

**Petersburg, Va.**, explosion of mine in  
front of, referred to, 3471.

**Petersburg (Va.), Siege of.**—When  
Grant crossed the Rapidan, May 4,  
1864, with the Army of the Potomac  
to operate against Lee, he ordered  
Gen. Butler, with the Army of the  
James, to proceed up the James  
River toward Richmond. Butler's  
army consisted of the Tenth and  
Eighteenth army corps, under Gen-  
erals Gillmore and W. F. Smith, and  
numbered 38,648 officers and men  
and 90 guns. May 5, he occupied  
City Point and Bermuda Hundred, 18  
miles southeast of Richmond. On  
the evening of May 13 and the morn-  
ing of the 14th he carried a portion  
of the first line of defenses of Rich-  
mond at Fort Darling, on Drury's  
Bluff. On the 16th Butler was at-  
tacked and driven back to Bermuda  
Hundred. June 10 he sent a force  
under Gillmore and Kautz against  
Petersburg. The cavalry entered the  
town, but were driven back, and the  
expedition returned to Bermuda Hun-  
dred. June 15, after a march of  
55 miles from Cold Harbor in two  
days, Grant was ready to cross the

**Petersburg (Va.), Siege of—Continued.**

James. The army of 130,000 men crossed by pontoon bridge in three days. The two armies were now united and prepared for final operations against Richmond. The first step toward taking Richmond seemed to be the occupation of Petersburg, 22 miles to the south, on the Richmond and Petersburg Railroad. June 16, 1864, after the junction of the Army of the James and the Army of the Potomac, an attack was made on Petersburg by W. F. Smith's corps. The assaults were continued for four days. Reinforcements were sent from Richmond to defend the place, and the attempts cost Grant 7,881 men.

During parts of June and July a powder mine was dug beneath portions of the Petersburg intrenchments. It was intended to explode this and make an assault through the breach thus made. The mine, known as "the Crater," was charged with 8,000 pounds of powder, and at 4 o'clock A. M., July 30, 1864, was exploded. A Confederate battery and most of a regiment were blown up. The assault, which was made by 50,000 men under Burnside, Warren, and Ord, was a total failure, and 4,000 men were lost in it. Gen. Mahone commanded the Confederate force that recovered the line broken by the explosion. During this siege a number of brilliant sorties were made. The losses in Lee's army are not fully reported. Elliott's brigade lost 677 men. Petersburg was not surrendered until April 3, 1865, nearly a year afterward.

**Petition.**—The Constitution prohibits Congress from making any law to abridge "the right of the people peaceably to assemble and to petition the Government for a redress of grievances." Feb. 11, 1790, a petition signed by Benjamin Franklin was offered to Congress praying for the abolition of slavery, but no notice was taken of it. Between 1830 and 1844 numerous petitions from Abolitionists poured into Congress. May 26, 1836, the House resolved, by a vote of 117 to 68, that "all petitions, memorials, resolutions, propositions, or papers relating in any way to the subject of slavery or the abolition of slavery shall, without being printed or referred, be laid on the table, and that no further action be taken thereon." This was the first of the famous "gag rules" of Congress. John Quincy Adams cham-

pioned the cause of the Abolitionists and opposed the gag rules for 10 years, finally securing their repeal. In 1837 he presented a petition to Congress purporting to come from slaves. This was the first of the kind ever offered, though in 1800 Congress was thrown into an uproar of debate by a petition from freed negroes.

In his annual message to Congress, Dec. 2, 1835, President Jackson asserted that publications addressed to the passions of slaves and stimulating them to insurrection were being circulated through the mails, and suggested laws to prohibit, under severe penalties, such circulation (1394). One of the most noted laws under this recommendation was the Atherton gag, introduced by C. G. Atherton, of New Hampshire. It was rescinded in 1845. The rules of Congress now provide that petitions, when presented, shall be indorsed with the name of the member presenting them and the committee to which they are referred. They are entered by the Clerk on the Journal and then transmitted to the proper committee. The notice of their introduction appears in the Congressional Record.

**Petrel, The,** mentioned, 6297.

**Petroleum,** taxation of, in Holland, etc., referred to, 4979, 4986.

**Pettaquamscut Purchasers.**—In 1660 John Hull, who had become well known through his coinage of pine-tree money (q. v.), organized a company and purchased a tract of land from the Narraganset Indians, about Pettaquamscut Rock, on the south shore of Rhode Island, between Point Judith and Wickford. About the same time lands near Wickford had been purchased by a company headed by Humphrey Atherton, of Massachusetts, the two companies claiming the same territory. When the boundary line between Connecticut and Rhode Island was settled, in 1662, the Atherton Company had its region placed under the government of Connecticut. In 1665 the royal commission ordered the Indians to return the price paid by the Atherton Company, and that the lands be returned to them. The disputed territory became the King's province. It was later made part of Rhode Island and was known as King's County until the Revolution, when the name was changed to Washington County. It was a subject of

**Pettaquamscut Purchasers**—*Continued.*  
contention between Connecticut and Rhode Island for 50 years.

**Pewter Muggers.**—A faction of the Democratic party in New York City which in 1828 bolted the Tammany candidates. These dissatisfied Democrats held their meetings over a resort in Frankfort Street, New York, locally famous for its refreshments served in pewter mugs; hence the name.

**Philadelphia (Pa.), Occupation of.**—

The defeat of Washington's army at Brandywine Creek and the disaster to Wayne's forces at Paoli rendered Howe's occupation of Philadelphia merely a successful maneuver. Sept. 25, 1777, he entered Germantown, and the next day sent Cornwallis to occupy Philadelphia. The occupation was effected without a battle.

**Philippine Commission**, mentioned, 6720, 6935.

**Philippine Islands.**—The Philippine Islands form a great part of the vast archipelago lying southeast of Asia. They were discovered by Magellan in 1521, but it was not until 1564 that the group received its present name, in honor of Philip II. of Spain. In many respects these islands were Spain's best possessions, due to the abundance and variety of products, numerous good ports, character of inhabitants, and the vicinity of certain countries of eastern Asia which are now entering upon a high stage of civilization and commerce.

From the year of discovery until 1542 several expeditions from Spain attempted to gain possession of the islands, but all failed. In 1564 another expedition, commanded by Migul de Legaspi, was dispatched and a footing established in Cebu. Headquarters were later transferred to Luzon, and in 1571 the city of Manila was founded. Various attempts to drive out the Spaniards were made during the following years by the Portuguese, Dutch, and Chinese. 1762 Manila was taken and held by the English for a ransom of £1,000,000. This, however, was never paid, and the islands were finally returned to Spain. The archipelago extends from lat. 5° 32' to 19° 38' north and from long. 117° to 126° east. It thus covers about 1,000 miles north and south and 600 east and west. On the north and northwest the islands are separated from China by the China Sea and the Indo-Chinese Peninsula. Toward the east is the Pacific. On the north a number of small islands stretch out toward Formosa. On the south, while a double connection is formed with Borneo by the lines of the Palawan, Balabac, and Sulu islands, the basin

**Philippine Islands—Continued.**

of the Celebes Sea extends for a distance of 300 miles between the southernmost island (Mindanao) and the Celebes.

The number of islands is not definitely known, but it is variously estimated at from 1,200 to 2,000. New ones are being continually added to the maps. Some members of the vast archipelago, as well as the more remote districts in the larger islands, lying beyond the direct control of the Spanish, have remained unexplored. The principal islands are Luzon, Mindanao, Palawan, Samar, Panay, Mindoro, Leyte, Negros, Cebu, Masbate, Bohol, Catanduanes, Polillo, Marinduque, Tablas, Burias, and Ticao. The coast line of all the islands is very irregular and broken, the ocean cutting in and forming many gulfs, bays, isthmuses, and peninsulas. There are long stretches of canals and passages between the islands, but these are not always navigable. The whole surface of the Philippines is essentially mountainous, the only plains that occur being alluvial districts at the river mouths and the spaces left by the intersection of the ranges. The principal ranges have a tendency to run north and south, with a certain amount of deflection east and west, as the case may be, so that the orographic diagram of the archipelago as a whole has a similarity to a fan, with northern Luzon as its center of radiation. The three lines of partially submerged ridges stretching from Indonesia toward the Philippines, running north and south, continue their main axis and strike the southern part of the same region at the Saragani Volcano. East of this range is found a broad chain, occupying all the eastern section of Mindanao, which borders on the Pacific. While none of the mountain peaks greatly exceed 8,000 feet in height, Apo, in Mindanao, is over 9,000 feet; Halson, in Mindoro, is over 8,900 feet, and Mayón, in Luzon, over 8,200 feet. The latter is an active volcano, which has been the scene of several eruptions during the present century. Extinct or active craters are relatively as numerous in the Philippines as in the eastern archipelago, and as a consequence of these subterranean forces earthquakes are frequent and violent. In 1627 one of the most elevated mountains of Cagayan disappeared, and on the island of Mindanao, in 1675, a passage

was opened to the sea and a vast plain emerged. The more recent of the convulsions occurred in 1863 and in 1880. The destruction of property was great, especially in Manila. The general belief is that the Philippines once formed a part of an enormous continent, from which they were separated by some cataclysm. This continent probably extended from Celebes to the farthest Polynesian islands on the east, to New Zealand on the south, and to Ladrone and Sandwich islands on the north. The immense coast line of the islands contains a great number of good harbors, but as a consequence of the exclusive policy of the Spanish Government in closing them to foreign commerce very little is known except to coast-wise navigators. Trade is confined chiefly to Manila, Iloilo, Cebu, Sual, and Zamboanga, on the island of Mindanao. The bay of Manila, one of the finest in the world, is about 120 miles in circumference, with very few dangers to navigation. Of the interior roads little can be said, and of those running along the coast positive information is not available. The extreme length of the Philippine group from north to south, their northern extremity reaching to the northern limit of the tropical zone, causes a considerable variety of climate. However, the general characteristics are tropical. In the region of Manila the hottest season is from March to June, the greatest heat being in May, before the rains set in, when the maximum temperature ranges from 80° to 100° in the shade. The coolest weather occurs in December and January, when the temperature falls at night to 60° or 65° and seldom rises in the day above 75°. From November to February the sky is bright, the atmosphere cool and dry, and the weather in every way delightful. The gales of the Philippines occur chiefly in the northern islands, and their direction is from the northward. Typhoons have their origin to the east or to the southeast of the Philippines, whence their course is westward, with a slight divergence to the north or south, the average direction appearing to be west by north. They occur in all months of the year, but the greater number take place about the time of the equinoxes. Among the Philippine islands when the sun has north declination the higher tides occur during the day, and when it has south declination during the night.

**Philippine Islands—Continued.**

The population has been estimated at about 8,000,000, of which the bulk is of Malay origin. On their first arrival the Spaniards found a part of the natives somewhat civilized, but while they had a written language, of which some specimens have been preserved, it was of no value in throwing light upon their early history, and their traditions are very few. The soil is most fertile, but agriculture almost wholly undeveloped. The people are skillful weavers of cotton and silk. They tan leather and make rude wagons and carts.

The islands are very rich in woods, ebony, cedar, ironwood, sapanwood, logwood, and gum trees being plentiful. Gutta-percha is found in certain localities. The cocoa palm is of great value, trunk, branches, leaves, fruit, shell, and husk all being used. Bamboo and areca palm are abundant and of great utility. Two woods—the “banava” and the “malave”—resist the destructive action of water for centuries. Many plants have medicinal value. Mangoes, plantains, jack fruits, and the Malayan fruits are met with. Rice is the staple food, but often not enough is raised to supply the demand. Potatoes, peas, and even wheat are raised in the higher localities.

Deer abound in the thickets of all the islands. There are also many buffalo (“caravaos”) and wild horses. The buffalo, called “karbo” by the Malays, is the great beast of burden. It is very strong and docile if domesticated, but dangerous in the wild state. The Philippine horse is small and of poor appearance, but it is a strong and sturdy animal. The bull (of Spanish origin) has propagated his species very numerously, and is found wild. There are various kinds of monkeys, mountain cats, and the “naisigan,” a small quadruped that is an enemy to rats. Among reptiles are found the “boa” or “culebra casera,” the python, and the terrible “dehenpalay.” The bite of the latter is almost instantly fatal. Of birds there are many species. Fish are plentiful and sharks and alligators are found in the seas. Swampy and damp localities swarm with insects, the mosquito being conspicuous. The “anay,” a sort of ant, destroys all wood except the “molane” with astonishing rapidity.

From what is known of the mineralogy of the islands there is no doubt that a scientific geological survey

would prove that they are rich in ore deposits of many kinds. Gold is found, especially in the mountainous districts of Luzon and on the islands of Mindanao and Mindoro. It is not believed that true coal is to be found in large deposits. Iron ore of excellent quality is abundant, but from lack of means of transportation and machinery it has so far been found cheaper to depend upon importation. Rich deposits of copper exist, and galena and zinc blends have been found. Sulphur is found in the vicinity of many of the ancient volcanoes. Early commerce with the world was greatly restricted by the efforts of Spain to secure a monopoly for her subjects. It was not until 1809 that the first English firm obtained permission to establish a business house in Manila. In 1814 this permission was more general. It is, however, only since 1834 that greater freedom of intercourse and larger introduction of foreign capital and methods have materially affected the development of natural resources. Internal commerce as well as foreign trade suffer from lack of facilities for transportation. But one railroad has been built, running from Manila to Pangasinán. A single-track road, it is of substantial construction and connects the capital with the rice-growing districts. Great improvements are now being effected, railroads and highroads are being rapidly built. The principal staples of export are tobacco, manila hemp, sugar cane, and cacao. The principal manufactures consist of a variety of textile fabrics, hats, mats, baskets, ropes, coarse pottery, and musical instruments. The chief imports are rice, flour, dress goods, wines, coal, and petroleum.

The Philippine Islands came into the possession of the United States as a result of the war with Spain through the treaty of Paris, Dec. 10, 1898. Two days before the ratification of the treaty the Filipinos, under Aguinaldo, attacked the American soldiery in Manila and an insurrection was set on foot which lasted for two years.

Civil government was established in the Philippines by an act of the United States Congress passed July 1, 1902. William H. Taft was appointed governor by the President. The present government consists of James F. Smith, governor, four American commissioners and four Filipino commissioners appointed by the

**Philippine Islands—Continued.**

President. The four American commissioners are the heads of departments of the government—Interior, Finance and Justice, Commerce and Police, and Public Instruction. There are thirty-nine provinces, each with a governor, a supreme court with seven judges, and fourteen judicial districts. In accordance with an act of Congress, an election of delegates to a Philippine Assembly was held July 20, and the new body was opened Oct. 16, 1903, by Secretary of War Taft. Only about 1 per cent. of the population voted at this, the first election in the islands.

In December, 1901, the Supreme Court of the United States decided that free trade existed between this country and the Philippines until Congress provided for a tariff. Accordingly a tariff bill was immediately introduced which became law in March, 1902; this tariff has since been frequently modified till, at the present time, there is free trade with this country in all articles except sugar, rice and tobacco.

A general amnesty was granted to all except criminals under the common law and rebels who persisted in remaining under arms on July 4, 1902. The Roman Catholic religion owns the allegiance of the vast majority of the Filipinos, and the religious orders, especially the Dominicans, Augustinians and Franciscans were particularly strong in the islands. During the three centuries of their work in the Philippines the orders had acquired considerable property, which was sold, after protracted negotiations, to the government for \$7,239,784. These lands are being gradually resold.

In March, 1903, Congress provided a new coinage for the islands, the unit of value being the gold peso (value 50 cents) divided into 100 centavos. An educational system has been established upon American lines. The islands are policed by a military force. Under American rule commerce has improved considerably.

The exports for the fiscal year 1911 were \$39,778,629, against \$39,864,169 in 1910; and the imports were \$49,833,722, against \$37,067,630 in 1910. Cotton and manufactured goods constituted 20 per cent. of the imports and amounted to \$10,395,480, of which the greater part came from the United States. Imports of iron and steel from the United States amounted to \$5,887,185. Of the ex-

ports manila hemp retained the leading place, but declined both in actual value and relative importance in the face of substantial gains made by copper and sugar. The cigar trade declined considerably from the excessive figures created by the first year of free access to the American market. Sugar exports in 1911 were valued at \$8,014,360, about a million dollars more than for the previous year. The revenues for the fiscal year 1911 were \$21,931,572, and the expenditures \$13,688,559.

Prior to 1902 there was a military governor, but in that year Congress passed an act creating a civil government, and William H. Taft was appointed governor. Later a commission form of government was adopted. This consists of eight members, the Governor-General and four other Americans and three natives. The present commissioners are W. Cameron Forbes, Governor-General; Newton W. Gilbert, Vice-Governor and Secretary of Public Instruction (not a commissioner); Dean C. Worcester, Secretary of the Interior; Charles B. Elliott, Secretary of Commerce and Police; Frank A. Branagan, José R. Luzuriaga, Gregorio Araneta, Rafael Palma and John Summlong, members.

Under the Chinese exclusion act (applied to the Philippines in 1902) Chinese immigration is prohibited. There are about 25,000 Americans and Europeans in the islands and about 50,000 Chinese.

According to the census taken in 1903 the total population was 7,635,426, of which 6,987,686 were civilized and 647,740 were wild people.

**Piegan Indians.** (See Indian Tribes.)

**Pierce, Franklin** (fourteenth President United States):

Pierce was elected by the Democratic party. At the national convention which met at Baltimore in June, 1852, thirty-five ballots were taken for a Presidential candidate without a choice being reached and without mention of Pierce's name. Up to that point Lewis Cass and James Buchanan were leaders in the balloting. Virginia then presented Pierce's name and he was chosen on the forty-ninth ballot. The platform of the Democratic party commended rigid economy in public expenditure and a tariff for revenue and for the gradual payment of the public debt; opposed the national banking system as being unconstitutional; favored free immigration and ease of naturalization; deprecated Federal interference in domestic affairs, and especially in imposing restrictions upon slave-holding; supported the Fugitive Slave Act; characterized the war with Mexico as just and necessary; and condemned monopolies and exclusive legislation for the benefit of the few.

The Whig National Convention at Baltimore, in June, 1852, nominated

**Pierce, Franklin—Continued.**

General Winfield Scott on the fifty-third ballot, over Millard Fillmore and Daniel Webster. The party stood upon a platform embodying strict construction of the Constitution; freedom from entangling alliances with foreign countries; a tariff for revenue and for the encouragement of American industry; internal improvements, and support of the Fugitive Slave Act. The Free-Soil Democrats met at Pittsburg in August, 1852, and nominated John P. Hale, on a platform setting forth strict construction of the Constitution; "no more slave States, no slave territory, no nationalized slavery, and no national legislation for the extradition of slaves"; the abolition of slavery; the repugnance of the Fugitive Slave Act to the Constitution; the inconsistency with Democracy of the Compromise Measures of 1850; the natural right of all men to the soil; the holding in trust of the public lands for the landless settlers; the keeping of government funds separate from banking institutions; the provision by Congress of internal improvements; the hostility of the Free Democratic party to both the Whigs and the Democrats; and embodying the principles of the party in the phrase "Free Soil, Free Speech, Free Labor, and Free Men."

The popular vote in thirty-one States—California participating for the first time—gave Pierce, 1,601,274; Scott, 1,386,580; and Hale, 155,825. The electoral vote, counted on Feb. 9, 1853, gave Pierce 254 votes, and Scott 42.

*Party Affiliation.*—Pierce gave his earliest political allegiance to the cause of General Jackson, whom he supported throughout. In Congress he opposed the abolition of slavery within the District of Columbia, and the policy of internal improvements. When he left Congress and retired temporarily to private life, he favored the annexation of Texas; and led the Democrats of his State in the memorable struggle against John P. Hale. In 1850, he reluctantly supported the several compromise measures, including the Fugitive Slave Act and the admission of California as a free State. He was thus in hearty accord with the principles enunciated by his party when elected to the Presidency.

*Political Complexion of Congress.*—In the Thirty-third Congress the Senate was composed of 62 members, of

whom 38 were Democrats, 22 Whigs, and 2 Free-Soil. The House was composed of 234 members, of whom 159 were Democrats, 71 Whigs, and 4 Free-Soil. In the Thirty-fourth Congress the Senate of 62 members was made up of 42 Democrats, 15 Republicans, and 5 Americans. The House of 234 members was divided as follows: 83 Democrats, 108 Republicans, and 43 Americans.

*Slavery.*—In his Inaugural Address (page 2730) the President set forth his conviction that slavery was constitutional, as was also the Fugitive Slave Act, and denounced slavery agitation. "Such," he says, "have been, and are, my convictions, and upon them I shall act. I fervently hope that the question is at rest, and that no sectional or ambitious or fanatical excitement may again threaten the durability of our institutions or obscure the light of our prosperity." Doubtless he was sincere in his hopes and wishes, but the enforcement of his policies was fraught with tremendous and lasting results. The two most important pre-slavery measures supported by the Pierce administration were the "Ostend Manifesto" and the Kansas-Nebraska Bill. President Pierce reviews the historical and constitutional aspects of slavery in his Third Annual Message (page 2860), and, in concluding his denunciation of abolitionist reformers, says: "I know that the Union is a thousand times stronger than all the wild and chimerical schemes of social change which are generated one after another in the unstable minds of visionary sophists and interested agitators." In his Fourth Annual Message (page 2930) he is especially severe in his arraignment of the slavery reformers, of whom he said: "They are perfectly aware that the change in the relative conditions of the white and black races in the slave-holding States which they would promote is beyond their lawful authority; that to them it is a foreign object; that it cannot be effected by any peaceful instrumentality of theirs; that for them and the States of which they are citizens the only path to its accomplishment is through burning cities, and ravaged fields, and slaughtering populations, and all there is most terrible in foreign, complicated with civil and servile, war; and that the first step in the attempt is the forcible disruption of a country embracing in its broad bosom a

**Pierce, Franklin—Continued.**

degree of liberty and an amount of individual and public prosperity to which there is no parallel in history, and substituting in its place hostile governments, driven at once and inevitably into mutual devastation and fratricidal carnage, transforming the new peaceful and felicitous brotherhood into a vast permanent camp of armed men, like the rival monarchies of Europe and Asia."

But for the wanton opening of the slavery question, Pierce's administration would have been one of the most creditable in the nation's history. But for the repeal of the Missouri Compromise and the popular excitement attending the whole question of slavery the defection from the Democratic party and the formation of the Republican party in 1856 would have been at least longer delayed.

**Tariff.**—In his First Annual Message, President Pierce (page 2747) asks the attention of Congress to the consideration of a decrease in duties, in view of the surplus in the Treasury. Again, in his Third Annual Message he says (page 2871): "The conspicuous fact that the annual revenue from all sources exceeds by many millions of dollars the amount needed for a prudent and economical administration of public affairs, can not fail to suggest the propriety of an early revision and reduction of the tariff of duties on imports." In his Fourth Annual Message (page 2941) he urges a reduction so that the revenue from customs should not exceed forty-eight or fifty millions. Congress accordingly passed the act of March 3, 1857, "reducing the duty on imports, and for other purposes."

**Finance.**—The platform of the Democratic party upon which Pierce was elected committed the administration to a policy of rigid economy in the expenditure of the public funds. The practice of this economy, and opposition to internal improvements, curtailed the expenditure and left a surplus in the Treasury, which was applied to the reduction of the public debt, and made the subject of an argument in favor of a reduction in the tariff. The condition of the public finances is referred to and discussed in each of the annual messages, but as the statements cover dissimilar periods, the following table will better show the financial status of the country during the ad-

ministration at the end of each fiscal year:—

Year.	Public Debt, Less Cash, in Treasury.	Receipts, Total Net, Ordinary.
1853.....	\$59,803,117.70	\$61,587,032.00
1854.....	42,242,222.42	73,800,341.00
1855.....	35,586,956.56	65,350,575.00
1856.....	10,965,953.01	74,056,699.00

Year.	Expenditures, Total Net, Ordinary.	Total Money in Circulation.
1853.....	\$44,078,156.00	\$402,238,107.00
1854.....	51,967,528.00	425,551,240.00
1855.....	56,316,198.00	418,020,247.00
1856.....	66,772,528.00	425,846,625.00

**Foreign Policy.**—In his Inaugural Address (page 2730) President Pierce advocated the cultivation of peace with the nations of the world. He said: "The rights, security and repose of this Confederacy reject the idea of interference or colonization on this side of the ocean by any foreign power beyond present jurisdiction as utterly inadmissible." During this administration, no fewer than twenty-eight treaties with foreign powers were signed. Among the most important of them was that with Japan by Commodore Perry; the settlement with Great Britain of the fisheries rights in Canada, and the free navigation of the St. Lawrence, and the Gadsden Treaty with Mexico. Complications with Nicaragua caused the bombardment of Greytown in the spring of 1854, by the United States vessel *Cyane*, in retaliation for property stolen from Americans; and in 1856, William Walker conducted a filibustering expedition against Nicaragua with such temporary success that President Pierce recognized the Minister sent by him to the United States. The British Minister and the Consuls at New York, Philadelphia, and Cincinnati were dismissed by President Pierce for complicity in recruiting in the United States for the Crimean War, in 1854 and 1855. Bills for the reorganization of the diplomatic and consular systems were signed by the President in 1855. The attempts to gain Cuba from Spain, in which the "Ostend Manifesto" was an incident, in 1854, proved abortive by reason of the unfriendly attitude of European powers and the excitement at home over the Kansas-Nebraska Bill. In his Fourth Annual Address he said (page 2950): "In foreign relations we have to attempt our power to the less happy condition of other Republics in America and to place ourselves in the calmness and

**Pierce, Franklin—Continued.**

conscious dignity of right by the side of the greatest and the wealthiest of the Empires of Europe.”

*Internal Improvements.*—In his First Annual Message (page 2751) President Pierce declares that the subject of internal improvements “has stood as a deep graven line of division between statesmen of eminent ability and patriotism”; refers to President Jackson’s message of May 27, 1830, on the subject; and asks Congress for a reconsideration of the subject, with a view to adopting a settled standard of action. In vetoing certain bills making appropriations for works coming under this head (page 2790), the President fully discusses the several phases of the question and clearly defines his opposing attitude, summing up with these words: “On the other hand, so long as these improvements are carried on by appropriations from the Treasury the benefits will continue to inure to those alone who enjoy the facilities afforded, while the expenditure will be a burden upon the whole country and the discrimination a double injury to places equally requiring improvement, but not equally favored by appropriations.” He seeks to illustrate the difficulty of knowing what improvements may properly be provided by the national government and what should be left to individual or State enterprise, by concrete examples of railroads and harbor improvements. Again, in 1856, several bills of the same nature were vetoed by the President. In fact, nearly all of the vetoed measures during this administration were bills of this nature.

*Commerce.*—In his Second Annual Message (page 2808) President Pierce was able to say: “Our foreign commerce has reached a magnitude and extent nearly equal to that of the first maritime power of the earth, and exceeding that of any other.” Especial emphasis was laid in this message upon the necessity of securing by treaty with the other world powers a recognition of the rights of neutrals in time of war as the best means of conserving the commercial interests and safety of the country. Great progress was made by the administration in securing from European nations a treaty agreement to the principle that free ships make free goods, except in the case of articles contraband of war, and that neutral property other than

contraband, though on board enemy’s ships, shall be exempt from confiscation. The condition of the commercial aspects of the country during the four years’ administration is presented in the following table:

	1853	1854
Imports.....	\$263,777,265	\$297,803,794
Exports.....	203,489,282	237,043,764
Miles of Railway...	15,360	16,720
Tons of Vessels		
Built.....	427,494	536,046
No. of Immigrants.	368,645	427,833
	1855	1856
Imports.....	\$257,808,708	\$310,432,310
Exports.....	218,909,503	281,219,423
Miles of Railway...	18,374	22,016
Tons of Vessels		
Built.....	583,450	469,293
No. of Immigrants.	200,877	195,857

*Army.*—In his Second Annual Message President Pierce (page 2819) urges that the forces be increased to prevent the Indian atrocities on the frontier, and adds: “Without increase of the military force these scenes will be repeated, it is to be feared, on a larger scale and with more disastrous consequences.” At the previous session of Congress a bill was passed increasing the pay of the rank and file of the Army, which the President reports “has had beneficial results, not only in facilitating enlistments, but in obvious improvement in the class of men who enter the service.” He regrets that the increase had not been extended to the officers. To meet the present needs of the nation, he asks for four new regiments, two of infantry and two of cavalry. Several suggestions are made in this message to reform the Army organization, especially in the direction of the creation of a retired list in order to provide for officers who, having rendered distinguished or even meritorious service, would by the standard of seniority be promoted to posts which impairment by age would render them unfit to fill. He asks that a test of one year be made of the efficacy of the plan proposed. The organization of the artillery is subjected to criticism because the force as then organized required infantry duty from the force, because of its arrangement in regiments instead of batteries. In his Fourth Annual Message (page 2941) he commends the work of the Army in suppressing the hostile demonstrations of the Indians and reiterates his recommendation for the adoption of measures of reform in the organization and in the increase of the force which “during the past year

**Pierce, Franklin—Continued.**

has been so constantly employed against the hostile Indians in various quarters that it can scarcely be said to have been a peace establishment."

*Navy.*—The Navy was substantially increased during this administration by the addition of six new steam frigates, of which the President says (page 2942): "The condition of the Navy is not merely satisfactory but exhibits the most gratifying evidences of increased vigor. . . . The new frigates ordered by Congress are now (1856) afloat and two of them are in active service. They are superior models of naval architecture and with their formidable battery add largely to public strength and security." Among the reforms in the organization of the Navy carried through by this administration were the apprentice system by which boys were trained for service on a three years' cruise in national vessels, the permission granted to honorably discharged seamen to enlist after a few months without cessation of pay, and the law for the promotion of discipline in the naval force.

**Pierce, Franklin:**

**Pike's Peak Timber Land Reserve**, Colorado, superseded, 7136.

**Pilgrim Fathers.**—A name given by William Bradford in his journal to certain emigrants under the leadership of Bradford, Brewster, Cushman, Carver, and Miles Standish, who came to New England early in the seventeenth century on account of religious differences in England and founded the colony of Plymouth. Those who came in the first 3 ships are also called "old comers" or

**Pilgrim Fathers—Continued.**

"forefathers." The first ship, the *Mayflower*, arrived on the coast in December, 1620, and had on board 108 souls. The *Fortune* came in November, 1621, with 29, and the *Anne* and *Little James* came in August, 1623, bringing 46 persons. In religion the Pilgrims were Separatists or Independents, while the settlers of Massachusetts Bay were Puritans, who at first adhered to the Church of England and endeavored to purify it.

**Pillow, Gideon J.**, courts of inquiry in case of, referred to, 2444, 2454.

**Pinal Mountains Forest Reserve**, Arizona, proclaimed, 7089.

**Pinchot-Ballinger Controversy.**—James R. Garfield, Secretary of the Interior under Roosevelt, and Gifford Pinchot, Chief Forester, attacked the policy and conduct of Mr. R. A. Ballinger, Secretary of the Interior under President Taft, in the matter of the conservation of the natural resources in the public domain, using as their principal text the course of Mr. Ballinger with reference to the coal lands in Alaska.

This furore regarding predatory malefactors getting a monopoly of the Alaskan coal fields had a beneficial effect. The advertising given the resources of the country made people ask, "If Alaska's so rich, why isn't she worked? What's the matter with Alaska?"

The first law passed to control these coal lands was a nullity; it treated of "surveyed" lands, and there were no surveyed lands. The second law, passed in 1904, was more successful, but as it limited holdings by individuals to 160 acres and holdings by associations to 320 acres (or 640, if they spent \$5,000 on developing the first parcel), it failed to stimulate the territory to any substantial growth.

The law of 1908 was wiser; it permits the consolidation of 2,560 acres; but this concession is coupled up and almost neutralized by a drastic anti-trust section which, as affecting titles to the land, has the effect of restraining capitalists from investing.

President Taft's views on the question of Alaska's development are to be found on pages 7913, 7915, and 7942-7946. He believed that if Congress would adopt a leasing system for these coal lands, monopoly would be impossible, the railroads would be built, and Alaska would grow in a manner to "surprise the country."

The principal items in the indictment of Mr. Ballinger were as follows:

(1) That, in 1907, as Land Commissioner under President Roosevelt, he ordered the so-called Cunningham claims prepared for patent, though to his knowledge there were on file three reports by field agents that these claims were fraudulent, and that shortly thereafter he urged a Congressional Committee to favor a law which would have validated the claims.

(2) That he violated a statute by aiding in the prosecution of a claim which was pending while he was Land Commissioner within two years after leaving that office.

(3) That, by unwise administration, Mr. Ballinger caused the nation the loss of valuable water-power sites on the public domain.

Congress, in January, 1910, appointed a committee consisting of six members from each house to investigate the charges. In September the four Democratic members and one "insurgent" Republican met in Minneapolis, and drafted a report recommending the dismissal of Mr. Ballinger. The seven "regular" Republican members—Senators Nelson, Flint, Sutherland and Root, and Representatives McCall, Olmsted and Denby—issued a majority report, Dec. 7, 1910, in which it was declared that the evidence did not exhibit Mr. Ballinger as being anything but a competent and honorable gentleman, honestly and faithfully performing the duties of his high office with an eye single to the public interest, and that the charges regarding the Cunningham claims were unjustified. The most important finding of the committee was that coal mines on the public land should be leased, not sold, by the Government.

**Pinckney, Charles Cotesworth** (1746-1825); politician; b. Charleston, S. C.; fought with the continental army in the Revolutionary War; member of the Constitutional Convention of 1787; special envoy to France on the "X. Y. Z. mission"; Federalist candidate for Vice-President, 1800, and for President, 1804 and 1808.

**Pinckney, Charles C.:**

Minister to France and envoy extraordinary, nomination of, 235.

Minister to negotiate treaty with Spain, nomination of, 339.

President Jefferson notified of election by, 308.

**Pinckney, Thomas;** soldier, lawyer, jurist; b. Charleston, S. C., Oct. 23, 1750; governor of South Carolina, 1787-89; minister to Great Britain, 1792-94, and in the latter year went on a mission to Spain, where he made the treaty of St. Ildefonso, securing to the United States the free navigation of the Mississippi River; returned to Charleston in 1796, and was elected to Congress, 1799-1801; died Charleston, S. C., Nov. 2, 1828.

**Pinckney, Thomas,** mentioned, 886, 962. Minister to negotiate with Spain, nomination of, 164.

**Pine Mountain and Zaca Lake Forest Reserve,** California, mentioned, 6944.

**Pine Ridge Sioux Indian Reservation,** addition to, 7019.

**Pine-Tree Money.**—On May 27, 1652, the general court of Massachusetts passed an act establishing a mint at Boston. John Hull was appointed mint master, and he began the coinage of shillings, 6d. pieces, and 3d. pieces. This was called pine-tree money from a design on the obverse of a pine-tree encircled by a grained ring, with the legend "Masathusets. In." The coinage was discontinued on the death of the mint master, Oct. 1, 1683.

**Pines, Isle of, Cuba,** referred to, 6779.

**Pinkney, William;** lawyer; b. Annapolis, Md., March 17, 1764; member of convention which ratified the Federal Constitution; representative in Congress from 1789 to 1792; member State legislature in 1795; sent to England in 1806 as envoy extraordinary, and in 1806 raised to the rank of minister plenipotentiary; attorney-general of Maryland in 1811, and representative in Congress in 1815-16; later he was sent as minister to Russia and as envoy to Naples; elected to the United States Senate in 1819, and continued in that position till his death, in Washington, Feb. 25, 1822.

**Pinkney, William:**

Commissioner appointed by United States under treaty with Great Britain, 188.

Minister to Russia, nomination of, 557.

Minister to settle questions with Great Britain, nomination of, 390.

Letter received by Secretary of State from, 456.

**Piracy.**—Robbery on the high seas. In the law of nations the essential element of piracy is the intention of preying indiscriminately on the human race, and not a desire to inter-

fere with the trade of some distinct power. As the high seas are not under the jurisdiction of any one State, the crime of piracy is triable in any court. The difference between a pirate and a privateer consists in these facts, that whereas the former is a sea rover who preys on the vessels and goods of any nation he may chance to run across, or who makes descents upon land for purposes of plunder, a privateer, on the other hand, has for his purpose the preying upon the commerce of a hostile nation only; he is under bond to the State whose flag he flies and of which he carries the commission or letter of marque granting him a share in the prizes taken. A privateer exceeding his commission might not be considered a pirate, but one with commissions from two opposite belligerents would be, for it would be apparent that his motive would be plunder of both. A vessel of a part of a country organized for rebellion has been held to be piratical because, although it may have a commission, such commission issued by an unknown and unrecognized power can not be admitted as valid, as it offers no guaranty of legal belligerent behavior. Piracy in the international sense of the word, however, is a crime against all nations; but any nation may class other crimes under this head.

The United States in 1820 made the slave-trade piracy for any of its citizens on any ship and for persons not citizens on any of its vessels. Notwithstanding this law passed by the United States, slave trading was not piracy in the international sense of the word. Search of a vessel by a public ship of another State is a war right only, but the right to search on suspicion of piracy exists at all times. The usual penalty for piracy is the confiscation of the vessel and hanging of the crew, while the penalty for privateering is at most imprisonment. (See also Privateering.)

**Piracy:**

Cuba, piracies from, suppressed, 782. Gulf of Mexico, force employed in, for suppression of, 826.

Mediterranean Sea infested with piracies, 929.

Practice of—

Death penalty for, discussed, 2202.

**Plaster of Paris**, restriction on importation of, removed by proclamation, 603, 605.

**Platforms.**—In politics the platform of a party is the public declaration of the principles that the party represents. In May, 1832, a national assembly of young men was held in Washington, D. C., to indorse the nomination of Henry Clay by the National Republican party. They agreed to the first platform ever adopted by a national convention. In 1844 both the Whigs and Democrats drew up platforms, but in 1848 the Whigs refused to commit themselves by a platform. After this time the adoption of party platforms by national conventions became general.

**Platt Amendment.** (See Cuba.)

**Platt National Park.** (See Parks, National.)

**Plattsburg, The**, surrender of persons charged with murder on board of, referred to, 1808.

**Plattsburg (N. Y.), Battle of.**—The overthrow of Napoleon by the allied powers in 1814 released many British soldiers from service in Europe, and several thousand of them were sent to reenforce the little army in Canada. By Aug. 1, Governor-General Prevost had 15,000 troops under his command at Quebec, most of them hardened veterans from the Peninsula. One brigade was sent west. The remainder were held for a contemplated invasion of New York. Wilkinson and Hampton had been retired from the American Army and Gen. George Izard was placed in command of the right wing of the Army of the North, May 4, 1814,

with headquarters at Plattsburg, N. Y., near the head of Lake Champlain. Notwithstanding it was evident that the British contemplated a descent upon New York by way of Lake Champlain and the Hudson, Izard was detached from his command and sent with 4,000 men to the Niagara frontier, leaving Gen. Macomb in command with about 3,500 men. Sept. 6, 1814, the British army, fully 14,000 strong, already upon American soil, marched toward Plattsburg. Maj. Wool, with a body of about 300 regulars, met the invading army at Beekmantown, about four miles north of Plattsburg, and subjected it to a harassing fire all the way to the Saranac River. Wool's retreating column crossed the stream to South Plattsburg and destroyed the bridges. Though in overwhelming force, the British army was checked, with a loss in killed and wounded of more than 200 men. The American loss was 45.

From Sept. 7 to 11, Prevost's army rested, preparatory to acting in conjunction with the fleet on Lake Champlain. On the 11th, while the forces of Macomb and Prevost contended on land, a desperate naval battle was fought on Lake Champlain between the American and British fleets, the former under Macdonough and the latter under Downie. This battle lasted for two hours, resulting in victory for the Americans. The British lost 200 men and the commodore of the fleet. The news of the naval victory reached the contending armies at a critical point of the battle and turned the tide in favor of the Americans. Prevost fled with his army to Champlain, leaving behind his sick and wounded and large quantities of stores. Sept. 24 the British returned to Canada, having lost in the expedition about 2,000 men.

**Plattsburg, N. Y., battle of**, British troops defeated in, 534.

**Pleasant Hill (La.), Battle of.**—After the defeat of the Federal army under Gen. Banks at Sabine Cross Roads, April 8, 1864, it retreated by way of Pleasant Grove to Pleasant Hill, about 18 miles south, where Banks was joined by Gen. A. J. Smith with 10,000 men. Occupying a strong position here, the Federals awaited the pursuing force under Kirby Smith and Dick Taylor. April 9, about 4 o'clock in the afternoon, the Confederates came up and began the attack. In the battle which ensued they were

**Pleasant Hill (La.), Battle of—Continued.**

checked and some of the guns they had taken the day before at Sabine Cross Roads were retaken. Banks now returned to the Red River at Grand Ecure, having lost in the campaign 18 guns, 5,000 men, 130 wagons, 1,200 horses, and many small arms.

**Pleuro-Pneumonia** among cattle, discussed, 4578, 4580, 4771, 5112, 5383, 5764, 5887.

**Plum Creek Timber Land Reserve**, Colorado, superseded, 7136.

**Plumas Forest Reserve**, California, proclaimed, 7093.

**Plumley, Frank**; b. Eden, Vt., Dec. 17, 1844; admitted to the bar 1869; appointed umpire by President Roosevelt in 1903 of the mixed commissions of Great Britain and Venezuela, and Holland and Venezuela sitting in Caracas; was later selected by France and Venezuela as umpire in the French-Venezuela mixed commission, which sat in Northfield in 1905; has the honorary degrees of A. M. and of LL. D.; elected to the Vermont house of representatives in 1882, and in 1894 was elected to the Vermont senate; elected to the 61st and 62d Congresses from Vermont.

**Plymouth Colony.**—The earliest settlement in Massachusetts. It was founded by a party of English Separatists who arrived in this country Dec. 21, 1620, and landed for permanent settlement in the following January. These Separatists were dissenters from the Church of England. Unlike the Puritans, who sought to purify the church, they regarded such purification as hopeless, and therefore advocated and practiced separation. The Plymouth colonists came to America from Delft, Holland, whither they had emigrated from Plymouth, England. One of the chief objects in coming to America was to enjoy their religion without molestation. The company named their settlement Plymouth, partly because it had been so called by Capt. John Smith, who had previously surveyed the harbor, and partly because the people of Plymouth, England, had treated them kindly. Miles Standish was made captain, with military authority, soon after landing, and John Carver was chosen the first governor of the colony. They entered into a treaty with Massasoit, chief of the Wampanoags, which was faithfully kept for 55 years. No royal charter was ever granted. With the arrival of the ship *Fortune* and 29 immigrants in 1621

came a land patent from the Council for New England. The patent did not fix territorial limits, but allowed 100 acres of land to each immigrant and 1,500 for public buildings, and empowered the grantees to make laws and set up a government. After enduring many hardships and privations the first colonists were joined by others from England and material prosperity followed. Plymouth Colony became a member of the New England Confederation in 1643. By the Massachusetts charter of 1691 it was united with the Colony of Massachusetts Bay.

**Plymouth Company.**—In 1606 a company of merchants of Bristol and Plymouth, England, were incorporated under a charter granted by James I. and called the North Virginia Company. They became a rival of the London Company. In 1607, having obtained a grant of land between Long Island and Passamaquoddy Bay, they sent out two ships carrying a company of colonists commanded by George Popham. A settlement was attempted on the Kennebec, but Popham died and the other colonists returned home. The company continued to exist till 1620, when it was reorganized as the New England Company or Council for New England.

**Plymouth, N. C.**, capture of, referred to, 3458.

**Pocatella Forest Reserve**, Idaho, proclaimed, 6843.

Contributions from corporations should be prohibited, 7370.

**Political Prisoners.** (F e Civil War.)

**Polk, James K.** (eleventh President United States):

Polk was elected by the Democratic party, Nov. 5, 1844. He was the first "dark-horse" candidate ever nominated by a prominent party. At the Democratic National Convention held in Baltimore, May 27-29, 1844, Van Buren and Cass were the leaders in the first eight ballots. On the ninth ballot, Polk's vote rose from 44 in the eighth to 233, sufficient for the nomination. The platform of the party reaffirmed the nine sections of the platform of 1840 and added three more sections. These

specified that the public lands should be held as the Constitution provides, and that proceeds from the sale should not be distributed among States; that the veto power of the President should in no wise be curtailed; and that all of Oregon belonged to the United States, and that Texas should be reannexed as soon as practicable.

At the Whig National Convention held at Baltimore in May, 1844, Henry Clay was endorsed for the Presidency and the first Whig national platform was formulated. It advocated a well-regulated currency, tariff for revenue and protection, distribution of the money derived from sales of public lands, a single term for the Presidency, curtailing of Executive power, and an effective, careful, and economical government. The Liberty party met at Buffalo in convention on Aug. 30, 1843, and nominated James G. Birney for the Presidency. The platform adopted at that convention announced belief in human brotherhood, the abolition of slavery.

The popular vote cast by twenty-six States gave Polk, 1,337,243; Clay, 1,299,068; and Birney, 62,300. The electoral vote, counted on Feb. 12, 1845, gave Polk 170 and Clay 105.

**Party Affiliation.**—Polk was brought up a Jeffersonian in politics and, during the whole period of Jackson's administration, he was a leading supporter of his policies. As Speaker of the House (1835-1839) he supported Van Buren's administration. His opposition to the reforms advocated by the anti-slavery party was firm but not rabid. As Governor of Tennessee (1839-1841) he opposed the national bank, Federal taxation for revenue surplus, and the policies of the Abolitionists. He strongly favored the reannexation of Texas, and it was upon this issue that he was elected President.

**Political Complexion of Congress.**—In the Twenty-ninth Congress (1845-1847) the Senate of 56 members was composed of 30 Democrats, 25 Whigs, and 1 vacancy; and the House of 225 members was made up of 141 Democrats, 78 Whigs, and 6 Americans. In the Thirtieth Congress (1847-1849) the Senate of 58 members was composed of 37 Democrats and 21 Whigs; and the House of 227 members was made up of 108 Democrats, 115 Whigs, and 4 Independents.

**Public Debt.**—The public debt of the United States during the years

**Polk, James K.—Continued.**

of Polk's administration stood as follows:—

July 1, 1846.....	\$15,550,202.97
July 1, 1847.....	38,826,534.77
July 1, 1848.....	47,044,862.23
July 1, 1849.....	63,061,858.69

In his First Annual Message (page 2252) President Polk referred to the total extinguishment of the public debt by a previous administration and cherished the hope that, by especial effort, his administration might bring about the same most desirable result. But the expenses due to the wars in which the country became involved soon dispelled all hope of accomplishing his purpose.

**Tariff.**—In his First Annual Message (page 2253) President Polk discusses the tariff in theory and the scale of the tariff of 1842 specifically. He points out the difference between the revenue standard and the protection standard, and says: "It does not follow that Congress should levy the highest duty on all articles of import which they will bear within the revenue standard, for such rates would probably produce a much larger amount than the economical administration of the Government would require." Such incidental protection as a tariff for revenue carries with it should in his opinion be so regulated that the tax may be made to bear equally upon consumers, and should be so arranged as to justly protect all industries alike. He refers to the fact that the tariff of 1842 was passed by a majority of only one vote in the Senate and two in the House (page 2255). He recommends a reduction in the tariff and prefers the *ad valorem* to the specific duty. "Such a system, when once firmly established, would be permanent, and not be subject to the constant complaints, agitations, and changes, which must ever occur when duties are not laid for revenue, but for the protection merely of a favored interest." In a special message of June 16, 1846, the President presents a plan from the Secretary of the Treasury for the modification of the duties. He says (page 2301): "The high duties at present levied on many articles totally exclude them from importation, whilst the quantity and the amount of others which are imported are greatly diminished. By reducing these duties to a revenue standard, it is not doubted that a large amount of the articles on which they are imposed would be imported,

and a corresponding amount of revenue be received at the Treasury from this source." On July 30, 1846, Congress passed an act "reducing the duty on imports, and for other purposes." This act went into effect on Dec. 1, 1846. In his Third Annual Message the President (page 2403) reports the satisfactory working of this act in its first year, and says: "All the beneficial effects which were anticipated from its operation have been fully realized." The revenue for the year was increased over \$8,000,000. "While the repeal of the prohibitory and restrictive duties of the act of 1842 and the substitution in their place of reasonable revenue rates levied on articles imported according to their actual value has increased the revenue and augmented our foreign trade, all the great interests of the country have been advanced and promoted." These results are reported as continuing during the following year (page 2497). The President's attitude on the question of protection is fully enunciated in his discussion of the American System in his Fourth Annual Message (page 2504).

**Foreign Policy.**—Of the annexation of Texas and the possible interference by foreign powers, the President said in his Inaugural Address (page 2230): "I regard the question of annexation as belonging exclusively to the United States and Texas. They are independent powers competent to contract, and foreign powers have no right to interfere with them or to take exceptions to their reunion. Foreign powers do not seem to appreciate the true character of our government. . . . Foreign powers should therefore look on the annexation of Texas to the United States not as the conquest of a nation seeking to extend her dominions by arms and violence, but as the peaceful acquisition of a territory once her own, by adding another member to our confederation, with the consent of that member, thereby diminishing the chances of war and opening to them new and ever-increasing markets for their products." In his First Annual Message (page 2237) the President, in referring to the same subject, said: "We may rejoice that the tranquil and pervading influence of the American principle of self-government was sufficient to defeat the purposes of British and French interference, and that the almost unanimous voice of

**Polk, James K.—Continued.**

the people of Texas has given to that interference a peaceful and effective rebuke. From this example, European governments may learn how vain diplomatic arts and intrigues must ever prove upon this continent against the system of self-government which seems natural to our soil, and which will ever resist foreign interference." In the same message he reviews the conditions of the war with Mexico. The proclamation of war against Mexico (page 2320) was issued by President Polk on May 13, 1846. In his Second Annual Message (page 2321) the President goes fully into the Mexican War history. A special message (page 2361) accompanies the treaty with Granada, which by its thirty-fifth article confers upon the United States the right of passage across the Isthmus of Panama. The President says: "The importance of this concession to the commercial and political interests of the United States can not be easily overrated. The route by the Isthmus of Panama is the shortest between the two oceans, and from the information herewith communicated it would seem to be the most practicable for a railroad or canal." In his Third Annual Message, in speaking of the Mexican War (page 2394), he says: "I am persuaded that the best means of vindicating the national honor and interest and of bringing the war to an honorable close will be to prosecute it with increased energy and power in the vital parts of the enemy's country." In his Fourth Annual Message (page 2481), in speaking of the effects of the Mexican War, the President says: "One of the most important results of the war into which we were recently forced with a neighboring nation is the demonstration it has afforded of the military strength of our country. . . . The great results which have developed and been brought to light by this war will be of immeasurable importance in the future progress of our country. They will tend powerfully to preserve us from foreign collisions, and enable us to pursue uninterruptedly our cherished policy of 'peace with all nations, entangling alliances with none.'"

*Slavery.*—In his Fourth Annual Message President Polk gives his views on slavery (page 2491) in these words: " . . . No duty imposed on Congress by the Constitution requires that they should legislate on

the subject of slavery, while their power to do so is not only seriously questioned but denied by many of the soundest expounders of that instrument. Whether Congress shall legislate or not, the people of the acquired territories, when assembled in convention to form State constitutions will possess the sole and exclusive power to determine for themselves whether slavery shall or shall not exist within their limits. . . . Any and all of the States possess this right, and Congress can not deprive them of it. The people of Georgia might if they chose so alter their Constitution as to abolish slavery within its limits, and the people of Vermont might so alter their Constitution as to admit slavery within its limits."

- Poll Tax.**—An individual or head tax levied upon the male citizens of some foreign countries and a portion of the United States. The Federal Government has the power to levy such a tax in proportion to the census (20) but has never exercised it. Before the Revolution the Colonies levied poll taxes at various times. In 1898 27 States and Territories levied and collected a poll tax. Some States, as South Carolina, have constitutional provisions for levying the poll tax. In Ohio and some other States any tax on polls is prohibited by the constitution. In others, as in Massachusetts and Tennessee, its payment is made a qualification for voting. Many of the States devote their revenues from poll taxes to free schools.

**Pontiac's War—Continued.**

council of Indians near Detroit April 27, 1763, and unfolded his plans for retarding or preventing white settlers locating west of Pittsburg. To capture Detroit was Pontiac's special task, and May 7 was the date selected, but the commander of the post was warned of the plot by an Indian girl, and the attempt was not made. The town was surrounded, however, and July 31 the garrison made a night attack on the Indians, in which 59 English were killed or wounded. Oct. 12 Pontiac raised the siege and retired. Forts Sandusky, St. Joseph, Miami, Ouatanon, Mackinaw, Presque Ile, Le Beuf, and Venango were taken and their garrisons massacred by the Indians in this war. A treaty of peace was made in 1766. Pontiac was murdered by a Kaskaskia Indian in 1769.

**Pope of Rome,** sentiments of regard for President, conveyed, referred to, 2761.

**Popular Sovereignty.**—This was the name applied to the doctrine that the principle of slavery "should be kept out of the National Legislature and left to the people in their respective local governments." In 1847 the doctrine was thus stated substantially by Lewis Cass. Many of the Northern Democrats indorsed it. On the other hand, Mr. Calhoun contended that a man's right to his property, even if it was in slaves, should every-

where be maintained, and that a man could take his slaves into any Territory regardless of the wishes of the inhabitants thereof. Mr. Douglas was the chief supporter of the former doctrine. He maintained that it was the basis of the compromise of 1850. Another effort was made to apply it in the Kansas-Nebraska Bill. Calhoun nicknamed the doctrine "squatter" sovereignty. It was charged that the inhabitants of some of the Territories had become citizens thereof for political purposes only and were only "squatters," or temporary tenants, on the lands of others.

**Population.**—The first United States census having been taken in 1790, all population figures previous to that date are based upon estimates. Figures obtained from the best possible sources place the population of New Hampshire in 1700 at about 5,000; Massachusetts and Maine, 70,000; Rhode Island, 6,000; Connecticut, 25,000; New York, 25,000; New Jersey, 14,000; Pennsylvania and Delaware, 20,000; Maryland, 30,000; Virginia, 80,000; and the Carolinas, 15,000. By 1750 the thirteen Colonies are thought to have contained 1,500,000 inhabitants, and at the breaking out of the Revolutionary War something less than 3,000,000. The population of New England was almost purely English; that of New York largely Dutch. Pennsylvania and the Colonies to the southward contained many German, Scotch-Irish, and a few Huguenot settlers, and South Carolina many of the last named. The census of 1790 showed a total population of 3,929,214; that of 1800, 5,308,483; 1810, 7,239,881; 1820, 9,633,822; 1830, 12,866,000; 1840, 17,069,453; 1850, 23,191,876; 1860, 31,443,321; 1870, 38,558,371; 1880, 50,155,783; 1890, 62,622,250; 1900, 76,303,387.

**Population.** (See Census.)

**Population, Center of.**—At the time of the first census in 1790, the center of population in the United States lay some 23 miles to the east of Baltimore. In 1800 it was about the same distance west of Baltimore; in 1810, about 40 miles west-northwest of Washington; in 1820, 16 miles north of Woodstock, Va.; in 1830, 19 miles west-southwest of Moorfield, W. Va.; in 1840, 16 miles south of Clarksburg, W. Va.; in 1850, 23 miles southeast of Parkersburg, W. Va.; in 1860, 20 miles south of Chillicothe, Ohio; in 1870, 48 miles east by north of Cincinnati, Ohio; in 1880 in Kentucky,

**Population, Center of—Continued.**

8 miles west by south of Cincinnati; in 1890, 20 miles east of Columbus, Ind., and in 1900, 6 miles south-east of the same town. The center of the negro population is near Rome, Ga., and is moving gulfward. The center of population is about three-quarters of a degree south and more than 13 degrees east of the center of area.

**Pork Products.** (See Animals and Animal Products.)

**Port Gibson (Miss.), Battle of.**—On the night of April 16, 1863, the Federal gunboats under Admiral Porter succeeded in running past the batteries at Vicksburg. Grant ordered Sherman to make a feint on the Confederate batteries at Haines Bluff, above Vicksburg, while Porter covered the landing of McClernand's and McPherson's corps at Bruinsburg, a few miles below Grand Gulf. Immediately upon landing McClernand pushed forward toward Port Gibson. A march of 8 miles brought him in sight of the Confederates, whom he forced back until dark. The next day (May 2) the Confederates held a strong position, which they stubbornly defended. That night the troops slept on their arms. During the night the Confederate forces retired across the Bayou Pierre, pursued next day by McPherson's corps. The Federal loss was 131 killed, 719 wounded, and 25 missing—a total of 875. One thousand prisoners and 5 cannon were taken from the Confederates.

**Port Hudson (La.), Surrender of.**—As early as August, 1862, Confederates began to fortify Port Hudson, a point on the Mississippi River in Louisiana, at the terminus of the Clinton and Port Hudson Railroad, 25 miles above Baton Rouge and 147 above New Orleans. Dec. 14, 1862, Maj.-Gen. N. P. Banks took command of the Department of the Gulf, and in March, 1863, made a demonstration against Port Hudson while Farragut's fleet attempted to run the batteries to assist Porter in the naval investment of Vicksburg. The attempt was a failure. May 26, 1863, Banks again invested Port Hudson, and was reenforced by Maj.-Gen. Augur, Brig.-Gen. T. W. Sherman, and Gen. Weitzel, increasing his forces to 12,000 men. An unsuccessful assault was made on the 27th, which showed the place to be strongly fortified. Banks lost 2,000 men in

the assault. June 14 a second assault was made after a bombardment of several days by Farragut's fleet. This was also repulsed, with a loss of 700 killed and wounded. Banks now invested the place by a series of approaches. July 6 the news of the surrender of Vicksburg reached Port Hudson, and 3 days later Gardner surrendered, with 6,340 men and 51 guns. Besides, the garrison lost about 500 prisoners or deserters before the surrender, and about 700 killed and wounded.

**Port Republic (Va.), Battle of.**—June 9, 1862, the morning after the skirmish between the forces of Ewell and Frémont at Cross Keys, Jackson drew in Ewell, crossed the branch of the Shenandoah, and destroying the bridges cut off two brigades of Shields's advance from Frémont, defeated them in battle, and captured some 450 prisoners and 800 muskets.

**Port Royal, S. C.,** blockade of, removed by proclamation, 3290.

**Port Royal (S. C.), Expedition of.**—Oct. 29, 1861, a strong naval and military expedition left Hampton Roads under command of Commodore Samuel F. Du Pont and Gen. Thomas W. Sherman. The first was composed of the steam frigate *Wabash*, 14 gunboats, 22 first-class and 12 smaller steamers, and 26 sailing vessels. The land forces under Sherman consisted of 13 regiments of volunteers, forming 3 brigades and numbering 10,000 men. After a tempestuous voyage the fleet arrived off Port Royal, S. C., Nov. 3. Upon each side of the mouth of the Broad River is an island on which the Confederates had built forts. On Bay Point Fort Beauregard mounted 23 guns, and on Hilton Head, opposite, Fort Walker had 6, some of them of the largest caliber. A fleet of 8 steamers lay inside the harbor. The guns of the fort were fully manned by 1,700 South Carolinians, and a field battery with 500 men supported one of them. On the 7th Du Pont brought his gunboats into action. He maneuvered his fleet in a circle around the harbor between the forts, firing broadsides as he passed the Confederate batteries. His shells wrought havoc in the works, but the moving ships were little damaged. For 4 hours the battle raged, when the garrison retreated leaving everything behind. Forty-three guns were captured. Hilton Head was made the center of later naval operations.

- Portsmouth, Treaty of.**—A treaty of peace between Russia and Japan, at Portsmouth, N. H., Sept. 5, 1905, bringing to a close the war that had been waged between those two countries since Feb. 11, 1904. Shortly after the battle of the Japan Sea, May 27-29, 1905 (see Japan), President Roosevelt, after conference with the Russian Ambassador and the Japanese Minister, sent identical notes to the Governments of the two countries, urging them to begin direct peace negotiations with each other, and offering the services of the United States in bringing their envoys together. Japan accepted the proposition two days later, and Russia within a week. Various places were proposed for the meeting: Paris, The Hague, Chefoo, Geneva, and Washington. As the summer heat

**Portsmouth, Treaty of—Continued.**

made the latter place unsuitable, the United States Government offered the use of a building at the United States Navy Yard, at Portsmouth, N. H., and the offer was accepted. The envoys appointed were, on the part of Japan, Baron Komura, Minister of Foreign Affairs, and Kogoro Takahira, Minister to the United States; and on the part of Russia, Count Sergius Witte and Baron Rosen, Ambassador to the United States.

On Aug. 5 the envoys assembled on the United States cruiser, *Mayflower*, near Oyster Bay, L. I., and were introduced by President Roosevelt. The sessions of the conference began Aug. 9, when the Japanese presented their terms: I. Recognition by Russia of the preponderating influence of Japan in Korea; II. Simultaneous evacuation of Manchuria by Russia and Japan; III. Transfer to Japan of the Russian leases of Port Arthur and Dalny; IV. The return of Manchuria to China according to the previous agreement between Russia and China; V. The cession of Sakhalin Island to Japan; VI. The transfer to Japan of all public property in Port Arthur and Dalny, rights of private property to be respected; VII. The transfer to Japan of the Manchurian railroad between Port Arthur and Dalny and Harbin; VIII. Russia to retain the main line to Vladivostok; IX. The reimbursement of Japan for the expenses of the war; X. The surrender to Japan of the Russian warships interned at neutral ports; XI. Limitation of Russia's naval strength in the Pacific; XII. Fishing rights for citizens of Japan in Russian waters.

To some of these Russia agreed at once; but the questions of indemnity and the cession of the Island of Sakhalin still remained open, and by the 19th of August the negotiations seemed certain to end in failure. The pressure of neutral nations, brought to bear on both parties, and especially the influence of President Roosevelt, led to a compromise. Japan waived the question of indemnity, and withdrew her demand for the interned warships; while Russia consented to the surrender of the southern half of the island of Sakhalin. Each nation agreed to pay the cost of the maintenance of its prisoners of war, an arrangement much to the advantage of Japan. An agreement was reached Aug. 29th, and the formal treaty was signed Sept. 5, 1905.

Ratifications of the treaty were exchanged on Oct. 14, 1905. (See also Japan.)

**Portugal.**—A republic of western Europe. It extends from lat. 36° 58' to 42° 10' north and from long. 6° 10' to 9° 30' west. It is bounded by Spain on the north and east, and by the Atlantic Ocean on the south and west. The principal exports are wine, cork, fish, live stock, olive oil, dairy produce, fruit, and copper. The trade is mostly with Great Britain, Brazil, the United States, and France.

Portugal until Oct. 5, 1910, was a hereditary constitutional monarchy, the legislative power being vested in the Cortes. The territory was partly included in the ancient Lusitania. Portugal became a Kingdom under Alfonso I. in 1139, and was a great maritime power in the fifteenth and sixteenth centuries.

On Oct. 5, 1910, the old hereditary constitutional monarchy was abolished, the republic was proclaimed and sanctioned by the constituent assembly, which elected (Aug. 24, 1911) Manoel de Arriaga.

The colonial possessions of Portugal consist of the Azore Islands, 922 sq. miles, and the Madeira Islands, 314 sq. miles; besides Portuguese East Africa, or Mozambique, with an estimated area of 293,860 sq. miles, and Portuguese Guinea, of about 13,940 sq. miles.

**Portugal, Treaty with.**—A reciprocal commercial arrangement was made with Portugal in 1900. It provides for a preferential tariff on goods (chiefly wines, their products, and works of art) coming into the United States; and on certain classes of goods (chiefly food-stuffs, machinery, oils, tar, and pitch) entering Portugal, the Azores, and Madeiras from the United States. Should the United States at any time impose high duties on crude cork and coffee from Portugal, that country reserves the right to arrest the operation of this convention on three months' notice.

**Post, James D.;** b. Nov. 25, 1863, near Washington Courthouse, Fayette County, Ohio; his education was that acquired in the country school and at the National Normal University at Lebanon, Warren County, Ohio, at which institution he graduated in the summer of 1882, receiving the degree of bachelor of sciences; read law at night, and was admitted to the bar by the Supreme Court of Ohio in

June, 1887, and the United States District and Circuit Courts and Circuit Court of Appeals; elected to the Sixty-second Congress from Ohio.

**Post-Office Department, The.—History.**

—This Department of the Executive branch of the Government was established under the Constitution on Sept. 26, 1789, but the work then taken up by it had been in continuous operation from early colonial times. Up to 1693 the postal service was entirely carried on by the towns and villages. From that year until 1707 it was administered under the patent granted Thomas Neale by the King in 1691, Andrew Hamilton having been appointed Postmaster-General of America. He established a weekly service from Portsmouth, N. H., to Virginia, and so successful was his administration that he has been called "The Father of American posts." He was succeeded by his son, John Hamilton, in 1703.

In 1707 the entire American postal system came under the supervision of the General Post-Office in London, and John Hamilton was continued as Postmaster-General of America, with an annual salary of £200. He served until 1730 and was followed by Alexander Spotswood, 1730-39; Head Lynch, 1739-43, and Elliott Benger, 1743-53. In the latter year Benjamin Franklin and William Hunter were appointed joint Postmasters-General. Hunter was succeeded in 1761 by John Foxcroft, while Franklin served until 1774, when he was removed by the Crown. In 1763 the North American postal system was organized in two districts, the Northern and the Southern, the Postmasters-General named above, with head-

**Post-Office Department, The—Continued.** quarters in New York, serving the Northern district, and the following, with headquarters in Charleston, S. C., in the Southern: Benjamin Barrows, 1765-66; Peter de Lancey, June, 1766-71; and George Roupell, 1771-82. In the meantime great advances had been made in the service. Free delivery had been introduced in Philadelphia, and the great routes from Maine to Florida and New York to Quebec had been established. On Nov. 13, 1755, was begun the first regular monthly packet service between Falmouth, England, and New York, and the Atlantic mail system then created has never ceased. In 1773 the mail between New York and Philadelphia was carried every other day; and between New York and New Hampshire every third day. The movement towards an independent or American post-office was begun in 1773 when Paul Revere became a private post-rider in Massachusetts, and when William Goddard, of Baltimore, advocated an American rather than an English post.

On Dec. 25, 1774, Postmaster-General Foxcroft announced the end of the British postal system in North America, and on July 26, 1775, nearly a year before political independence was declared, the Continental Congress appointed Benjamin Franklin Postmaster-General of the Colonies. When Franklin was sent to Europe in 1776, Richard Bache, his son-in-law, was made Postmaster-General. In the passage of the postal ordinance of Oct. 18, 1782, which unified all previous postal acts, Congress required the payment of postage in silver or its equivalent, and newspapers were admitted to transportation in the mails. It was in this year that the Post-Office Department, in distinction from the postal service, was practically created, and from this time the modern American post-office dates its origin. In the same year Ebenezer Hazard was appointed Postmaster-General. Under his administration an American Atlantic service was established and the domestic service perfected and extended until, at the end of his term, 1789, there were 85 post-offices in the country and 2,399 miles of post-roads, the volume of business being about 300,000 letters a year. Up to this time the means of transportation had been almost entirely by horseback, but an act of Congress of Sept. 6, 1785, gave the Postmaster-General

power to make contracts for the transmission of mail by stage-coach. After the establishment of the Constitution, in 1789, the postal service was for a time carried on under the direction of the Treasury Department, although the postal ordinance of 1782 remained in force until 1792, when a new postal law reforming the postage tariff was passed.

The law permanently and definitely establishing the Department was passed May 8, 1799. In 1810 the office of Second Assistant Postmaster-General was created, a new postage tariff (8 to 25 cents, according to distance for single letters, and one cent each for newspapers not going beyond the State of publication) was established, and the various post-routes connected in one system. In 1811 the Department established a service between Baltimore and Philadelphia in coaches owned by the Government, and two years later the Postmaster-General was authorized to make use of steamboats in the transportation of mail.

The organic law of the Department was again changed in 1825, provision being made for the building of a General Post-Office at the seat of Government, and the Postmaster-General being given great powers in the conduct and development of the service. In 1827 the salary of the Postmaster-General was made \$6,000 a year, the same as that of heads of the other Executive Departments, and two years later he was called to a seat in the Cabinet. Up to 1836 the Postmaster-General had not only made all contracts for the carrying of the mail, but he had kept the accounts of the Department and received the money due it. By the act of July 2, of that year, however, the accounting was transferred to the Auditor of the Treasury for the Post-Office Department, and it was required that all revenues of the Department be paid into the United States Treasury. Until the passage of this act all postmasters had been appointed by the Postmaster-General, but from this time those whose commissions amounted to \$1,000 or more a year were to be appointed by the President, with the advice and consent of the Senate, for a term of four years. This act also created the office of Third Assistant Postmaster-General.

The money-order system was established on May 17, 1864; and the special-delivery system on Oct. 1,

**Post-Office Department, The—Continued.**

1883. The free rural-delivery system was begun in 1897, and two years later the registry system was extended in cities so that letters might be registered at the home of the sender. The duties of the Department as at present organized are divided among five principal offices, viz.: those of the Postmaster-General; First Assistant Postmaster-General; Second Assistant Postmaster-General; Third Assistant Postmaster-General, and Fourth Assistant Postmaster-General.

The Postmaster-General appoints all officers and employees of the Department except the four Assistant Postmasters-General and the Purchasing Agent, who are appointed by the President, the Senate concurring. He also appoints all postmasters whose compensation is not more than \$1,000 annually; makes postal treaties with foreign governments, with the advice and consent of the President; awards and executes contracts; and directs the management of the domestic and foreign mail service, including that of the insular possessions of the United States. The duties of the First Assistant Postmaster-General are divided among the following divisions: The Division of Appointments; the Division of Bonds and Commission; the Division of Salaries and Allowances; the Division of City Delivery and the Division of Correspondence to which are referred inquiries regarding the construction of the post-office law, etc. In the office of the Second Assistant Postmaster-General the transportation of all mail is cared for.

The various divisions of the office are: the Division of Railway Mail Service; the Division of Foreign Mails; the Division of Railway Adjustment; the Division of Contracts; the Division of Inspection, and the Division of Mail Equipment. In the office of the Third Assistant Postmaster-General are supervised all matters of postal finance. The divisions are the Division of Finance; the Division of Stamps; the Division of Money Orders; the Division of Registered Mails; the Division of Classification, and the Division of Redemption. The office of the Fourth Assistant Postmaster-General deals with rural free delivery and miscellaneous postal business; it is composed of the Division of Rural Delivery; the Division of Supplies; Division of Dead Letters, and the Division of Topography.

**Official Duties.**—The Postmaster-General is the executive head of the Federal postal service. He appoints all officers and employees of the Post-Office Department except the four Assistant Postmasters-General and the Purchasing Agent, who are Presidential appointees. With the exception of postmasters of the first, second, and third classes, who are likewise Presidential appointees, he appoints all postmasters and all other officers and employees of the service at large. Subject to the approval of the President, he makes postal treaties with foreign governments. He awards and executes contracts and directs the management of the foreign mail service. He is the executive head of the Postal Savings System and ex officio chairman of the board of trustees of that system.

**Chief Clerk.**—The chief clerk of the Post-Office Department is charged with the general superintendence of the clerical force of the department; the supervision of the preparation of estimates for the departmental and postal service; the keeping of the journals and order books; the supervision of the advertising; the supervision of expenditure of the appropriations for the departmental service; the preparation of contracts for the publication of the *Official Guide*, compilation of matter therefor, and supervision of its publication and distribution; the miscellaneous business correspondence of the Postmaster-General's Office; the care of the department and other buildings rented in connection therewith, and of all the furniture and public property therein; also the direction of the force of laborers and charwomen, and general superintendence of the watchmen through the captain of the watch; and the performance of such other duties as may be required by the Postmaster-General.

**Assistant Attorney-General for the Post-Office Department.**—The Assistant Attorney-General for the Post-Office Department is the chief law officer of that department. He is charged with the duty of giving opinions to the Postmaster-General and the heads of the several offices of the department upon questions of law arising upon the construction of the Postal Laws and Regulations, or otherwise, in the course of business in the postal service; with the consideration and submission (with advice) to the Postmaster-General of all claims of postmasters for losses

**Post-Office Department, The—Continued.**

by fire, burglary, or other unavoidable casualty, and of all certifications by the Auditor for the Post-Office Department of cases of proposed compromise of liabilities to the United States, and of the remission of fines, penalties, and forfeitures under the statutes; the keeping and preparation of all correspondence with the Department of Justice relating to prosecutions and suits affecting or arising out of the postal service; and with the consideration of applications for pardon for crimes committed against the postal laws, which may be referred to the department; with the preparation and submission (with advice) to the Postmaster-General of all appeals to him from the heads of the offices of the department depending upon questions of law; with the determining of questions as to the delivery of mail the ownership of which is in dispute; with the hearing and consideration of cases relating to lotteries and the misuse of the mails in furtherance of schemes to defraud the public; with the consideration of all questions relating to the mailability of alleged indecent, obscene, scurrilous, or defamatory matter; with the examining and, when necessary, drafting of all contracts of the department; and with such other like duties as may from time to time be required by the Postmaster-General.

**Purchasing Agent.**—The purchasing agent supervises the purchase of all supplies both for the Post-Office Department proper and for all branches of the postal service. He reviews all requisitions and authorizations for supplies, and if proper honors the same. He passes upon the sufficiency and propriety of all specifications for proposals for supplies; prepares the advertisements and forms for proposals necessary to the making of contracts for supplies; reviews the reports of the committees on awards and recommends to the Postmaster-General such action as in his judgment should be taken thereon.

**Chief Inspector.**—The chief inspector supervises the work of post-office inspectors and of the division of post-office inspectors. To him is charged the consideration and adjustment of accounts of inspectors for salary and expenses, the preparation and issue of all cases for investigation, all matters relating to depredations upon the mails and losses therein, the custody of money and property

collected or received by inspectors, and the restoration thereof to the proper parties or owners. To his office are referred all complaints of losses or irregularities in the mails and all reported violations of the postal laws.

**First Assistant Postmaster-General.**—The First Assistant Postmaster-General has charge of the following divisions, to which are assigned the duties specified:

**Postmasters' Appointments.**—The preparation of cases for the appointment of postmasters, and for the change of name of post-offices; the recording of appointments of postmasters, the supervision of their bonding, the obtaining, recording, and filing of their oaths, and the issuing of their commissions; the consideration of charges and complaints against postmasters; the granting of leaves of absence to postmasters; the regulation of hours of business at post-offices, and the handling of certain miscellaneous correspondence relating to postmasters and post-offices.

**Salaries and Allowances.**—The annual readjustment of presidential postmasters' salaries; the preparation of cases for allowances for clerk hire, rent, light, fuel, canceling machines, and miscellaneous items; the supervision and recording of the appointment, bonding, removal, and salaries of assistant postmasters and other post-office employees, except letter carriers; the fixing of the sites of presidential post-offices; the establishment of postal stations; the execution of leases, and the regulation of box rents and key deposits.

**City Delivery.**—The supervision of the establishment and extension of City Delivery Service; the preparation of cases for allowances for pay of letter carriers, and for horse hire, wagon-collection equipment, bicycles, and car fare; the supervision and recording of the appointment, bonding, removal, and salaries of carriers, and the control of schedules of deliveries and collections.

**Second Assistant Postmaster-General.**—The Second Assistant Postmaster-General is charged with the general supervision of matters pertaining to the transportation of the domestic and foreign mails by means of railroads, electric and cable cars, screen wagons and pneumatic tubes in cities, steamboats, steamships, mail messengers, and by star routes in Alaska; and his bureau comprises

**Post-Office Department, The—Continued.**  
five divisions with duties as herein-after indicated.

**Railway Adjustments.**—Has charge of the preparation of cases authorizing the transportation of mails by railroads; the establishment of railway postal car service and changes in existing service; prepares orders and instructions for the weighing of the mails on railroads; receives and tabulates the returns and computes basis of pay therefrom; prepares cases for adjustment of allowances to railroads for carrying the mails, and for postal cars; authorizes expenditures and credits for the weighing of the mails, and transportation by freight or express of postal cards, stamped envelopes, periodical mail matter, and mail equipment; examines reports as to the performance of mail service by railroad companies; prepares orders for deductions for nonperformance of service and for imposition of fines for delinquencies; prepares statements of amounts found upon administrative examination to be due the companies for transportation of the mails and for railway post-office car service, and forwards such statements to the Auditor for the Post-Office Department for audit and certification for payment; and prepares all correspondence relative to these matters.

**Miscellaneous Transportation.**—Has charge of the preparation of cases authorizing the transportation of mails by electric and cable cars, screen wagons, and pneumatic tubes in cities, and by mail messengers; also prepares advertisements inviting proposals for steamboat service, and all star service in the Territory of Alaska, and orders for awarding the contracts for such service and authorizing changes therein; examines reports as to the performance of mail service by contractors and carriers on the several classes of mail routes; prepares orders for deductions for nonperformance of service and for imposition of fines for delinquencies; prepares statements of amounts found upon administrative examination to be due the various public creditors for mail service, and forwards such statements to the Auditor for the Post-Office Department for audit and certification for payment; and prepares all correspondence relative to these matters.

**Foreign Mails.**—Is charged with the duty of arranging all details connected with the transportation of

foreign mails; the preparation of postal conventions (except those relative to the money-order system) and the regulations for their execution, as well as the consideration of the questions arising under them, and with the preparation of all correspondence relative thereto. Also has supervision of the ocean mail service, including the adjustment of accounts with steamship companies for the transportation of mails to foreign countries.

**Railway Mail Service.**—Is charged with the supervision of the Railway Mail Service and railway postal clerks; prepares cases for the appointment, removal, promotion, and reduction of said clerks; conducts correspondence and issues orders relative to the moving of the mails on railroad trains; has charge of the dispatch and distribution of mail matter in railway postal cars and post-offices; conducts the weighing of mails; and attends to all correspondence relative to these matters.

**Equipment.**—Is charged with the preparation of matters pertaining to the furnishing of mail bags, mail locks and keys, label cases, and mail-bag cord fasteners; the issuing of such articles for the use of the service, repairing of the same, the keeping of records and accounts pertaining thereto, and the preparation of correspondence incident to these duties.

**Third Assistant Postmaster-General.**—The Third Assistant Postmaster-General has charge of the following divisions:

**Finance.**—The financial operations, including the collection and deposit of postal revenues; the distribution of postal funds among the several subtreasuries so as to equalize, as far as possible, receipts and expenditures in the same section; the payment by warrant of all accounts settled by the auditor; the receipt and disposition of all moneys coming directly to the department; and the keeping of books of account showing the fiscal operations of the postal and money-order services.

**Stamps.**—The supervision of the manufacture and issuance to postmasters of postage stamps, stamp books, stamped envelopes, newspaper wrappers, postal cards, and postal savings stamps and cards by the various contractors; and the keeping of the accounts and records of these transactions.

**Money Orders.**—The supervision

**Post-Office Department, The—Continued.**

and management of the money-order service, both domestic and international; the preparation of conventions for the exchange of money orders with foreign countries.

**Registered Mails.**—The supervision and management of the registered-mail service; the establishment and control of all through registry exchanges; the instruction of all postmasters in registry matters; and the consideration of all claims for limited indemnity for lost registered matter.

**Classification.**—The general control of all business relating to the classification of domestic mail matter and the rates of postage thereon, including the determination of the admissibility of publications to the second class of mail matter and their right to continue in that class, the general supervision of those therein, and the instruction of postmasters relative thereto; also the use of penalty envelopes, the franking privilege, and the limit of weight of mail matter.

**Redemption.**—The receipt and disposition of damaged and unsalable stamped paper returned by postmasters for redemption and credit.

**Fourth Assistant Postmaster-General.**—The Fourth Assistant Postmaster-General has charge of the following divisions:

**Rural Mails.**—In this division all petitions for the establishment and extension of Rural Delivery Service are received and examined, and, if accepted, prepared for investigation. Through it all orders pertaining to the extension or change of existing service or establishment of new service are issued; also all orders pertaining to the appointment and discipline of rural letter carriers and all other correspondence incident to these matters, including requirements with reference to rural mail boxes. This division also prepares all advertisements inviting proposals for star-route service (except in the Territory of Alaska), receives proposals, prepares awards for execution of all contracts, and prepares all orders for establishment of or change in star routes. All matters pertaining to the establishment, discontinuance, the change of site of post-offices of the fourth class are also within the jurisdiction of this division.

**Supplies.**—Has custody of supplies for the postal service, and distributes the same upon proper requisition.

**Dead Letters.**—Has charge of the treatment of all unmailable and un-

delivered mail matter which is sent to it for disposition; the enforcement of the prompt sending of such matter according to regulations; the duty of noting and correcting errors of postmasters connected with the delivery or withholding of mail matter, and the investigation, by correspondence, of complaints made with reference thereto; the verification and allowance of claims for credit by postmasters for postage-due stamps affixed to undelivered matter; the examination and forwarding or return of all letters which have failed of delivery; the inspection and return to the country of origin of undelivered foreign matter; recording and restoration to owners of letters and parcels which contain valuable inclosures; care and disposition of all money, negotiable paper, and other valuable articles found in undelivered matter and correspondence, both foreign and domestic, relating to these subjects.

**Topography.**—Has charge of the making, printing, and distribution of post-route maps, including the maps of the Rural Free-Delivery Service.

**Director of the Postal Savings System.**—The Director of the Postal Savings System, under the direction of the Postmaster-General, has general supervision over postal savings depositories, the conduct of postal savings business at post-offices, the correspondence and records of the department pertaining to the postal savings system, and the administrative examination of the postal savings accounts of postmasters and other agents accountable to the Postmaster-General.

The following have been Postmasters-General under the Constitution: Samuel Osgood, Massachusetts; Timothy Pickering, Pennsylvania; Joseph Habersham, Georgia; Gideon Granger, Connecticut; Return J. Meigs, Jr., Ohio; John McLean, Ohio; William T. Barry, Kentucky; Amos Kendall, Kentucky; John M. Niles, Connecticut; Francis Granger, New York; Charles A. Recommending fourth-class, 6172.

**Post Roads.** (See Mail Routes.)

**Postage.**—The price established by law to be paid for the conveyance of a letter or other mailable matter by a public post. Rates of postage were fixed by the Continental Congress in 1789 as follows: Single letters under 60 miles, 7.4 cents; between 60 and 100 miles, 11.1 cents; between 100 and 200 miles, 14.8 cents, and 3.4 cents for each additional 100 miles. As early as 1794 a delivery system was inaugurated, a fee of 2 cents being required for each letter delivered. In 1814 the rates of postage were increased by 50 per cent, but the old rate was restored in 1816. Mails were first carried on horseback, later by stage coach, and in 1834 by railway. July 7, 1838, Congress declared every railroad to be a mail route.

In 1838 the act authorizing the Postmaster-General to make use of the railroads in the service was passed; and on March 3, 1845, laws were enacted placing the postage tariff on a weight basis (five cents for less than one-half ounce for distances not exceeding 300 miles); making it obligatory to let contracts to the highest bidder; curtailing the franking privilege; prohibiting private expresses from carrying mail matter; and extending the foreign mail service. In 1851 the price of postage was again reduced, being made three cents per half ounce for distances less than 3,000 miles. Since March 3, 1855, the prepayment of postage has been required, the use of postage stamps having been authorized by an act of Congress of March 3, 1847.

The next reduction in the rate of postage was on Oct. 1, 1883, when it was made two cents per half ounce on first-class matter. On July 1, 1885, the unit of weight was made one ounce instead of one-half ounce,

**Postage—Continued.**

and on second-class matter the rate was made one cent a pound instead of two cents. An act of March 3, 1853, provided for the appointment of the Assistant Postmasters-General by the President instead of by the Postmaster-General. The free delivery system was practically begun in 1825 when letters were delivered at certain places in the cities at a cost of two cents each. In 1830 newspapers and pamphlets were delivered for half a cent each and letters collected for two cents. In 1851 drop-boxes were first used, at a cost of two cents, and in 1863 branch post-offices in cities and free delivery from house to house were established. The railway mail service was extended in 1864 by assorting the mail while in transit.

In 1847 and 1848 post-offices were established at Astoria, San Diego, Monterey, and San Francisco. The rate of postage between the Atlantic and Pacific coasts was fixed at 40 cents. March 3, 1851, letter postage was reduced to 3 cents per half ounce for distances under 3,000 miles, postage prepaid. The domestic letter rate is now, (1909) 2 cents an ounce or fraction thereof, and it applies to the island possessions of the United States, the United Kingdom of Great Britain and Ireland, Cuba, Canada, Germany (sent by sea direct and not by way of either Great Britain or France), Mexico, Newfoundland, Shanghai (China), the Canal Zone, and the Republic of Panama. The foreign letter rate is 5 cents for the first ounce of each letter and 3 cents for every additional ounce or fraction thereof, and it applies to all other foreign countries in the Universal Postal Union.

Merchandise was first admitted to the mails in 1861. Registration was begun in 1855, and postal money orders were first issued in 1864.

All valuable letters and parcels, as well as those the delivery of which is of importance to the sender, should be registered if sent in the mails. An indemnity not to exceed \$25 will be paid for the value of lost domestic registered first-class mail matter and 50 francs (\$10) in case of the loss of a registered article addressed to a country in the Universal Postal Union, under certain conditions. Letter carriers are required to accept for registration all matter presented to them properly prepared.

The free-delivery system was es-

tablished in 1872 in cities of 50,000 population or over, and in 1887 the system was extended. In 1896 the experiment of free delivery in rural districts was tried and proved to be a success; since that date the principle has been adopted and is being extended all over the country. (See also Post-Office Department.)

Revenue derived from. (See Post-Office Department, revenues, etc., of.)

**Postage Stamps.**—An official mark or stamp affixed to or embossed on letters sent through the mails as evidence of the prepayment of postage. Adhesive stamps were made as an experiment by James Chalmers in his printing office in Dundee in 1834, but they were not made public till November, 1837. In February, 1837, Sir Rowland Hill proposed a postage stamp for prepayment of letter postage. In 1840 Mulready's envelope was introduced, bearing an allegorical design of England attracting the commerce of the world, but this was soon superseded by the adhesive stamp. Local stamps were in use in various cities in the United States as early as 1842—in New York, St. Louis, Baltimore, and Brattleboro. By act of May 3, 1847, the use of postage stamps was authorized, and issues of 5 and 10 cent stamps were made by the Government bearing, respectively, designs of the heads of Franklin and Washington. In 1851 three new values were added—1, 3, and 12 cents. From this time till 1860 a complete series was issued in values from 5 to 90 cents. In 1869 a new series was brought out in various designs, such as a horseman, a locomotive, eagle, steamship, landing of Columbus, Declaration of Independence, heads of Franklin, Washington, and Lincoln. The series of 1870-72 bore heads of Franklin, after Ruprecht's bust; Jackson, after Powers; Washington, after the bust by Houdon; Lincoln, after Volk; Stanton, from a photograph; Jefferson, after Powers's statue; Clay, after the bust by Hart; Webster, after the Clevenger bust; Scott, after the bust by Coffee; Hamilton, after Cer-

**Postage Stamps—Continued.**

rachi; and Perry, from Wolcott's statue.

At the International Postal Conference held at Berne, Switzerland, in 1874, the Universal Postal Union was formed, with rates of 5 cents per half ounce on all letters passing between the countries composing the union. In 1875 a 5-cent stamp was issued for this foreign service, bearing the head of Jackson, taken from a photograph, and in 1882 another of the same value with the head of Garfield. Stamped envelopes were issued in 1852 and postal cards in 1872.

**Postal Crimes, act relating to, etc., returned, 5204.****Postal Currency.**—During the Civil War, when silver became very scarce, a substitute for fractional currency was invented by Gen. Spinner, United States Treasurer under President Lincoln. It consisted of postage stamps pasted upon paper used for Government securities and representing different sums. These pieces of paper were circulated among the clerks of the Department and became for a while the medium of exchange in a small way.**Postal Matter, abuse of classification of, 6675.****Postal Notes.** (See Money-Order System.)**Postal Savings Banks.**—To encourage people of small means to deposit their savings where they would be immediately available in emergency, and at the same time be secure from misappropriation while earning a small interest, postal savings banks have been established in most other progressive countries, and in the United States the question has been frequently discussed.

President Roosevelt said, in his Seventh Annual Address, Dec. 3, 1907: "I commend to the favorable consideration of the Congress a postal savings bank system, as recommended by the Postmaster-General. The primary object is to encourage among our people economy and thrift and by the use of postal savings banks to give them an opportunity to husband their resources, particularly those who have not the facilities at hand for depositing their money in savings banks. Viewed, however, from the experience of the past few weeks, it is evident that the advantages of such an institution are still more far-reaching. Timid depositors have withdrawn their savings for the time being from national banks, trust companies, and savings banks; individuals have hoarded their cash and the workmen their earnings; all of which money has been withheld and kept in hiding or in safe-deposit box to the detriment of prosperity. Through the agency of the postal savings banks such money would be restored to the channels of trade, to the mutual benefit of capital and labor."

In continuation of Mr. Roosevelt's policy and in accordance with the declarations of the platform on which he was elected, Mr. Taft, in his Inaugural Address, March 4, 1909, said: "The incoming Congress should promptly fulfill the promise of the Republican platform and pass a proper postal savings bank bill. It will not be unwise or excessive paternalism. The promise to repay by the Government will furnish an inducement to savings deposits which private enterprise cannot supply and at such a low rate of interest as not to withdraw custom from existing banks. It will substantially increase the funds available for investment as capital in useful enterprises. It will furnish absolute security which makes the proposed scheme of government guaranty of deposits so alluring, without its pernicious results."

Postal Savings Banks—*Continued.*

Postmaster-General Meyer, in his annual report for the year ended June 30, 1908, urgently recommended that legislation be enacted permitting him to establish postal savings banks or depositories in connection with post-offices. Continuing, he argued:

"The deposits in savings banks of the United States as reported to the Comptroller of the Currency are as follows:

New England (6 States).....	\$1,257,537,895
New York.....	1,378,232,780
New Jersey.....	92,631,487
Pennsylvania.....	160,638,670
Maryland.....	78,469,584
Ohio.....	53,930,291
Illinois.....	181,361,054
Iowa.....	132,748,558
California.....	254,695,083

In 14 States (98.4 per cent.)..... \$3,590,245,402

In remaining 32 States and all

Territories (1.6 per cent.)..... 70,308,543

Total..... \$3,660,553,945

"In certain States, such as New York and Massachusetts, where special attention has been given to the establishment of mutual savings banks and where they are conducted on a very conservative basis prescribed by law, the wage-earners and people of moderate means have availed themselves of the opportunities offered. In Massachusetts the amount is \$706,940,596.

"The table also demonstrates that while the money in savings banks amounts to \$3,660,553,945, only 1.6 per cent, or \$70,308,543, is in 32 States. The 14 other States are fortunate in possessing savings bank deposits to the amount of \$3,590,245,402, or 98.4 per cent. This is of great advantage to the latter States, as it increases their financial resources and thus aids in their development.

"In the 32 States referred to there are many localities where there are no savings banks and in some cases no banks of any kind. It is there that considerable money is held in hiding, which is neither absolutely safe nor in circulation for the benefit of the community. It has been estimated that altogether fully half a billion dollars not to-day placed in any bank, due to want of opportunity or lack of confidence, might be brought back into circulation through the agency of postal savings banks.

"In Japan the total amount of deposits in postal savings banks is about \$46,000,000, an average of \$5.77 to each depositor. This money would not in all probability have found its way into the channels of

trade but for the postal savings banks.

"The additional opportunities for saving that can be afforded the people by postal savings banks in this country are made apparent by the fact that there are 60,624 post-offices, 40,000 of which are money-order post-offices.

"There has been apprehension in some quarters that postal savings banks would enter into serious competition with established banking institutions. The foregoing figures show conclusively that the postal banks would operate principally in a territory not now covered by private enterprise.

"As an evidence of the demand for postal savings banks we have reports from postmasters that they have been compelled to refuse to accept deposits offered by foreigners for safe-keeping, and also that our own people have bought postal money orders during the last year payable to themselves to the extent of \$8,104,447, on which amount fees of \$25,000 were paid. These money orders were bought to the greatest extent in the States of Arkansas, Colorado, Kansas, Missouri, Montana, Nebraska, Nevada, Oklahoma, Ohio, Oregon, Texas, and Washington.

"A post-office inspector has reported that one family residing near a small post-office in the State of Washington has \$11,000 on deposit in the postal banks of British Columbia.

"Under the bill now before the Senate with a favorable report from the Committee on Post-Offices and Post-Roads, the money would be widely distributed, as it would be placed in the national banks in the districts where the deposits were first brought to the post-offices. The Government would not go into the banking business. The national banks are to pay not less than 2½ per cent for the deposits, the Government in turn to pay the depositors 2 per cent, retaining one-fourth of 1 per cent in order that the system may be self-sustaining. No interest would be paid by the Government on deposits over \$500.

"The deposits would be guaranteed by the Government, as it would make itself responsible by receiving them.

"Postal savings banks would foster thrift and increase the habit of saving in many States and localities where opportunities for depositing savings do not now exist, and would

**Postal Savings Banks—Continued.**

in the end serve as feeders to the regular stock and mutual savings banks, where greater returns would be received. Thus they would be a real benefit not only to the people, but also to existing financial institutions. Practically all the leading nations, with the exception of the United States, have postal savings banks in successful operation. No one can justly say they are not needed in the United States, with its vast sections unequipped with facilities for the deposit of savings. With the experience of Canada in mind no one can justly say they can not be managed successfully in the United States."

Congress appropriated \$100,000, June 25, 1910, to start the postal savings system, and named as trustees the Postmaster-General, the Secretary of the Treasury, and the Attorney-General. On Jan. 2, 1911, a selected post-office in each of the 48 States was prepared to accept deposits. (See Banks, Postal Savings.)

**Prairie Grove (Ark.), Battle of.**—Sept. 19, 1862, President Lincoln directed that Missouri, Arkansas, Kansas, and the eastern portion of Indian Territory should constitute the Department of the Missouri, to be commanded by Brig.-Gen. Samuel R. Curtis. The only important engagement that occurred in this department while Curtis was in command was at Prairie Grove, Ark. The Confederate General Thomas C. Hindman was on his way north into Missouri with a large force when, on Dec. 7, 1862, he encountered the united forces of Generals James G. Blunt and Francis J. Herron. During the engagement which ensued the Federals lost 1,148 and the Confederates, 1,317. The latter retired during the night.  
**Pray, Charles N.;** b. Potsdam, St. Lawrence Co., N. Y.; elected prosecuting attorney in 1898, 1900, 1902, and 1904; elected to the 60th, 61st, and 62d Congresses from Montana.  
**Preachers of Discontent,** discussed by President Roosevelt, 7413.  
**Preble, Edward;** naval officer; b. Portland, Me., Aug. 15, 1761; made midshipman in navy, 1779; commodore of the Mediterranean squadron, 1803, in command of the *Constitution*; exacted from the Emperor of Morocco a renewal of the treaty of 1786; bombarded the city of Tripoli, 1804; for his services in the Mediterranean he

was voted a gold medal by Congress; died Portland, Me., Aug. 25, 1807.

**Preble, Edward:**

Energy and judgment displayed by, 365.

Medal presented to, March 3, 1805, for gallantry, mentioned, 352.

**Preble, George Henry;** naval officer; b. Portland, Me., Feb. 25, 1816; midshipman, Oct. 10, 1835; served in China and in the Mexican War; took part in the operations against New Orleans and the lower Mississippi as far north as Vicksburg and off Mobile Bay, in the Civil War; promoted rear-admiral, Sept. 30, 1876, and retired 1878; died Brookline, Mass., March 1, 1885.

**Preble, George H.:**

Commander in Navy, nomination of, and reasons therefor, 3354.

Thanks of Congress to, recommended, 3277.

**Precious Metals.** (See Coins and Coinage; Gold and Silver.)

**Preemption Laws.**—The first law regulating the preemption of and payment for public lands was passed March 3, 1801. It was a special act affecting the Symmes colonization scheme on the Miami River. A number of preemption laws were passed, most of them of a more or less special nature. The first general law was passed in 1830. The law of 1841 granted, in consideration of residence and improvement, freedom of entry upon 160 acres of public lands to any person over 21 years of age; 12 to 33 months were allowed for payment, and the amount to be paid varied with the situation and value of the tract preempted. (See Lands, Public.)

**Preemption Laws:**

Discussed, 1713, 1753, 3651, 4064, 5484.

Recommended, 1606, 2259.

Amendments to law recommended, 2408, 2500.

Repeal of preemption act recommended, 4770, 4837, 5107.

**President, The.**—Previous to the War of 1812 American commerce had suffered considerably at the hands of British cruisers, which hovered about our coasts and captured many United States vessels bound for France. These cruisers also made many impressments of sailors. In May, 1811, Commodore John Rodgers, commanding the American frigate *President*, was ordered to put to sea from Chesapeake Bay and protect our commerce. When 30 miles off Cape Charles, May 16, Rodgers gave chase

**President, The.—Continued.**

to the *Little Belt*, a British frigate. The latter fired upon the *President*, attempted flight, and failed to show her colors. The fire was returned by the *President*, and in 18 minutes the *Little Belt* was disabled. A dispute arose as to which of the commanders was at fault, but it was never decided, as the discussion was dropped by mutual agreement. In September, 1814, the *President*, under Decatur, was captured by the *Endymion*, and other British vessels.

**President of a State.**—Some of the earlier organized States provided for a president as the executive head. To avoid misunderstanding and confusion, this was afterwards changed to governor. The first constitutions of Pennsylvania and New Hampshire, adopted in 1776, provided for an executive council of which one member was president. Delaware, South Carolina, and the New Hampshire constitution of 1784 provided for a single head, but called him president. South Carolina in 1778, Pennsylvania in 1790, and Delaware and New Hampshire in 1792 altered the title to governor.

**President of United States.**—The title of the Chief Executive of the United States. In 1696 William Penn proposed a plan for a general government for the Colonies in America. The plan comprehended a chief executive with the title of president. The Albany Convention proposed that of president-general. The Continental Congress had its president. In the Convention of 1787 it was decided that there should be a single executive to whom the title of President was given. In order to be eligible, the President must be 35 years of age, a native-born citizen of the United States, and a resident within the United States for 14 years. He is elected for a term of 4 years by electors chosen by the different States. These electors are chosen by direct vote of the people, on ballot tickets usually headed by the names of the candidates voted for as President and Vice-President, followed by the names of the electors, who are pledged to vote for these candidates only. (See Electoral College.)

The President's duties and powers under the Constitution are to approve or veto bills; to grant reprieves and pardons for offenses against the United States, except in case of impeachment; to make treaties; to

nominate ambassadors and other public ministers, consuls, judges of the Federal courts, etc., and, by and with the consent of the Senate, appoint such officers; to fill vacancies that may occur during the recess of the Senate by granting commissions which shall expire at the end of the next session; to convene one or both Houses of Congress, and to adjourn Congress to such a time as he may deem proper in case it cannot agree upon an adjournment. He is also commander-in-chief of the Army and Navy and of the militia of the several States when called into the service of the United States. He is required to give information to Congress from time to time regarding the state of the Union and recommend to its consideration such measures as he shall judge necessary and expedient; receive ambassadors and other public ministers; see that the laws are faithfully executed, etc. He receives a salary of \$75,000 per annum. Up to the time of the ratification of the twelfth amendment (1804) the President and Vice-President were not separately voted for, but the candidate for President who received next to the highest number of votes was made Vice-President. Jefferson and J. Q. Adams were elected by the House of Representatives, as provided by the Constitution, neither Presidential candidate having a majority of the electoral vote.

**President of United States** (see also the several Presidents):

Act—

Fixing salary of, vetoed, 4334.

Of Congress approved but not signed, whether in force discussed, 856.

Of Congress duly certified and approved which had not passed discussed, 1353.

Providing for performance of duties of, in case of death, etc., of Vice-President and, returned, 5674.

Appointing power of. (See Executive Nominations.)

Appointment of members of House by, in whose election they have been officially concerned discussed, 1011, 1120.

Appointments of, referred to, 1965.

Arbitration of boundary dispute between Brazil and Argentine Republic submitted to. (See Cleveland, Grover.)

Arbitrator of claim of Italy against Colombia. (See Cleveland, Grover.)

- Presidential Electors** (see Electors; Electoral Colleges):
  - Constitutional amendment regarding selection of, recommended, 5644.
  - Method of appointment of, and effect of gerrymander discussed, 5643.
- Presidential Succession.**—The Constitution provides for the succession of the Vice-President in case of the death, removal, resignation, or disability of the President, and gives Congress power to provide what officer shall succeed in case of the death, removal, etc., of the Vice-President. In 1793 Congress enacted that in such case the President of the Senate should succeed, and then the Speaker of the House of Representatives. This was attended with some inconvenience and danger and there was some doubt of its consti-

tutionality. An act of Congress approved Jan. 19, 1886, provided that the succession should pass to the members of the Cabinet in the following order: Secretary of State, Secretary of the Treasury, Secretary of War, Attorney-General, Postmaster-General, Secretary of the Navy, and Secretary of the Interior. The Secretaries of the Department of Agriculture, and of the Department of Commerce and Labor, whose offices have been created since the passage of the Succession Act, are not eligible for Presidential Succession. The following Vice-Presidents have succeeded to the Presidency on account of the death of the President: John Tyler, Millard Fillmore, Andrew Johnson, Chester A. Arthur, and Theodore Roosevelt. (See Vice-Presidents, and Cabinet, also Atchison, D. R., in Index.)

**Presidential Primaries.**—The presidential primary is a device to enable the voters at large to record their choice for candidates for the presidency. It was little heard of previous to 1911, but in that year it became a leading topic of political discussion. Provisions for the presidential primary exist as statutes in six States—New Jersey, Wisconsin, Nebraska, North Dakota, Oregon, and California. The California law, which is typical of the others, provides that the name of any person may be put upon the ballot at the presidential primary election to be held in May, preceding an election for president, through the filing of a petition signed by one per cent of any party in each Congress district. The chief merit of such a primary, in the opinion of those who support it, would be the practical elimination of the national nominating conventions and the opportunity given the people at large of recording their choice for the presidency. The main objections urged by the opponents of the presidential primary are that it would intensify factional bitterness and add to the expense of elections. The presidential primary had its chief supporters in 1911 among the members of the progressive wings of both Democratic and Republican parties. An attempt was made to endorse the idea at the meeting of the National Republican Committee held in Washington in December, 1911, but it failed. In addition to the States which have provided for presidential primaries by statute South Carolina and Louisiana observe them

**Presidential Primaries—Continued.**

as party rules, and some other States have what is equivalent. Pennsylvania delegates to the National Conventions are elected by direct primaries and candidates for delegate are permitted to print on the ballot the name of the candidate for the presidency they wish to support.

**Presque Isle, Pa.:**

Obstructions to entrance of harbor of port of, 786.

Title to, proffered by marine hospital of Pennsylvania, 4735.

**Press, Freedom of.**—The first amendment to the Constitution, introduced in the First Congress, established freedom of speech, religion, and the press. Though the Federal Constitution was originally silent upon the subject, nearly all of the States inserted in their constitutions clauses permitting freedom of speech and publication to every citizen. Abuses of this liberty were punishable under the common law. New York and New Jersey made no provision in their first constitutions, but clauses were later embodied insuring the widest liberty of expression. During British rule of the Colonies this freedom was much restricted by the star chamber press censorship regulation of 1637, which was confirmed by Parliament in 1643.

**Pretoria, Republic of,** joint resolution relating to congratulations from, vetoed, 4384.

**Primaries.** (See Presidential Primaries.)

**Prince, George W.;** b. March 4, 1854, in Tazewell Co., Ill.; admitted to the bar in 1880; elected a member of the lower house of the general assembly of Illinois in 1888 and 1890; was elected to the 54th Congress to fill a vacancy and to the 55th, 56th, 57th, 58th, 59th, 60th, 61st, and 62d Congresses from Illinois.

**Prince of Wales,** visit of, to United States, 3171.

**Prince of Wales Island, Alaska,** referred to, 6735.

**Princeton, The,** construction of, referred to, 2130.

**Princeton (N. J.), Battle of.**—The beginning of the year 1777 found the British army of 7,000 or 8,000 men encamped at Princeton, N. J. On Christmas night, 1776, Washington had turned back his retreating army, recrossed the Delaware, overcome the Hessians at Trenton, and again crossed the Delaware into Pennsylvania. To relieve Cadwalader he again crossed the river and was ready to march upon Princeton. Cornwallis,

who had been sent by Howe from New York, advanced to meet him with most of his army. Washington skilfully passed around the left wing of Cornwallis's army, and on Jan. 3, 1777, encountered the British rear guard, consisting of 3 regiments and 3 troops. These were scattered, with the loss of about 500. The American loss was 25 or 30, besides officers. Cornwallis retreated to New Brunswick and Washington occupied a strong position at Morristown, remaining there until the latter part of May.

**Printing** executed by authority of the several Departments referred to, 2911.

**Printing Office.** (See Government Printing Office.)

**Prioleau, Samuel,** claim of representatives of, refused and reasons therefor, 2826.

**Prison Congress, International,** at—

**Private Armed Vessels:**

Depredations of, must be checked, 358.

Instructions were issued May 28, 1798, to commanders of armed vessels of United States to seize foreign vessels attacking those of the United States, especially those sailing under the flag of the French Republic. Issuance of commissions to, discussed, 779.

Referred to, 2774.

Proposition to forego resort to, in case of war discussed, 2809, 2945.

**Private Claims against United States:**  
Amount paid on, referred to, 1778, 1783.

Proceedings under act for payment of, suspended, 565.

Report of commissioners referred to, 566.

Settlement of, by commission recommended, 2627, 2673, 2714.

**Private Land Claims.** (See Court of Private Land Claims.)

**Private Property:**

Right to capture, at sea in time of war, 6869, 6870.

Seizure and confiscation of, referred to, 3831.

Shall not be taken for public use without just compensation, 435.

**Privateering:**

Abolition of, discussed, 2945.

**Privateering—Continued.**

Issuance of commissions to vessels for, discussed, 779, 2774.

Not to be resorted to by—

France in war with Spain, 779.

United States in war with Spain, 6474.

Referred to, 6312.

Proposition to forego resort to, in case of war discussed, 2809, 2945.

Referred to, 2909.

**Privateers.**—Armed vessels owned and officered by private persons, but acting under commissions from the government known as letters of marque. It was formerly the custom of all nations in time of war to legalize private vessels to assist the regular navy in blockading the ports of an enemy, intercepting supplies, and capturing prizes. Vessels so employed are called privateers and are supplied with letters of marque on condition of their conforming to the rules and usages of war. Herein lies the difference between privateers and pirates (q. v.). These vessels and crews may be hired or impressed by the government or they may be owned, officered, and sent to sea at private expense under government commission. The latter has been a favorite way of employing sailors and merchant ships when commerce has been hampered by war, and to a nation with a small navy it affords protection against formidable naval foes.

The practice of privateering has long been looked upon as an evil by the most advanced nations. At the Declaration of Paris in 1856 (q. v.) one of the rules of warfare subscribed to was that "privateering is and remains abolished." The United States refused to agree to this clause of the declaration on the ground that without privateers it would have no adequate sea force in time of war. As the agreement was only binding on parties thereto, American commerce was left a prey to the ships of all other nations. In 1861 Secretary Seward, on behalf of the United States, made an offer to England and France to come under the operation of the rules of war subscribed to in the Declaration of Paris, but the offer was refused on the ground that it would impose an international rule of warfare upon the Confederate States then in rebellion. In the colonial wars Great Britain derived much support from colonial privateers. Upward of 400 were fitted out and ravaged the French West In-

dies and made numerous captures along the coast of France.

In March, 1776, the Continental Congress accorded permission to citizens to fit out privateers against the British. During that year 342 British vessels fell a prey to privateers fitted out at Salem, Cape Ann, Newburyport, Bristol, and other seaports. This sort of warfare became so lucrative that sailors could hardly be induced to enter the regular service. Jan. 28, 1778, an American privateer surprised and captured the British fort of New Providence, in the Bahamas, and a 16-gun man-of-war. During the War of 1812 some 500 privateers were fitted out. They were mostly schooners or brigs of 200 or 300 tons and carried from 80 to 100 men. Of 400 British vessels captured in 1813 four-fifths were taken by privateers. Later in this war larger vessels, like the *Reindeer*, *Avon*, and *Blakeley*, were built. They did not confine themselves to merchant vessels, but attacked and frequently captured British war ships. They hung about the coasts of Great Britain, Ireland, and the Canary and West Indian Islands, and greatly aided the American cause.

**Prize Agents**, accounts of, referred to, 773, 816.

**Prize Courts.**—Courts which adjudicate the property in vessels captured at sea from a belligerent. The general rule is that when a captor brings home a prize the tribunal of his own country has sole jurisdiction over it and the decision rendered is binding everywhere. A prize court differs from other courts in that the property of foreigners is brought within its jurisdiction, not voluntarily, as in ordinary courts, but by force. During the colonial wars prize cases were adjudged by the admiralty courts held by colonial governors as vice-admirals, or by judges whom they appointed, with appeal to commissioners in England. With the outbreak of the Revolution the States established admiralty courts to hear prize cases. The Continental Congress established a court of appeals for such cases when in dispute between the States. Under the judiciary act of 1789 the United States district courts were made prize courts, with appeal to the Supreme Court.

**Prize Court (International)**, ratified by United States, 8050.

**Prize Money.**—A dividend from the proceeds of a captured vessel and her

**Prize Money—Continued.**

cargo, etc., paid to the captors. Prior to March 3, 1899, prize money in the United States was distributed according to an act of June 30, 1864. If the prize was equal or superior to the captor, it became the sole property of the latter. If inferior, the United States took half and the captors divided the remainder. Privateers with letters of marque kept the whole of the prize unless otherwise stipulated in their commissions. By the Navy personnel act of March 3, 1899, the law authorizing the distribution of prize money among the captors of vessels was repealed.

**Prize Money** referred to, 2570.

**Proclamations.** (See the several Presidents or the several subjects.)

**Proctor, Redfield**, resignation of, as Secretary of War and appointment as United States Senator from Vermont referred to, 5630.

**Products.** (See Agricultural Products; Animals and Animal Products.)

**Progressive Labor Party.**—At the annual session of the United Labor party held at Syracuse, N. Y., Aug. 19, 1886, the radical or socialistic element withdrew and formed the Progressive Labor party. They advocated a common inheritance of land, wealth, and industries and upheld all the tenets of extreme socialism.

**Progressive Party.**—Theodore Roosevelt having been defeated for the Republican nomination for President at the hands of the National Convention in June, 1912, called a convention of his own followers and people in general who were dissatisfied with the Republican party and its managers to meet in convention in Chicago in August, 1912. This convention formed the Progressive party and nominated Mr. Roosevelt for President and Hiram W. Johnson, of California, for Vice-President.

They adopted a platform declaring in favor of direct primaries; nationwide Presidential preference primaries; direct election of United States Senators; the short ballot and the initiative, referendum, and recall in the States; a more easy and expeditious method of amending the Federal Constitution; the bringing under effective National jurisdiction of those problems which expand beyond the reach of the individual States; equal suffrage for men and women; limitation of campaign contributions and expenditures, and publicity before as well as after primaries and elections; laws requiring the registration

of lobbyists, publicity of committee hearings, and recording of all votes in committee; prohibiting Federal appointees from taking part in political organizations and political conventions.

Popular review of judicial decisions on laws for securing social justice; the review by the Supreme Court of the United States of decisions of State courts declaring legislative acts unconstitutional; the reform of legal procedure and judicial methods; the prohibition of the issuance of injunctions in labor disputes when such injunctions would not apply if no labor dispute existed, and jury trial for contempt in labor disputes except when the contempt was committed in the presence of the court; effective legislation looking to the prevention of industrial accidents, occupational diseases, overwork, involuntary unemployment, and other injurious effects incident to modern industry; the fixing of minimum safety and health standards for the various occupations and the exercise of the public authority to maintain such standards; the prohibition of child labor; minimum wage standards for workingwomen, to provide a "living wage" in all industrial occupations; the general prohibition of night work for women and the establishment of an eight-hour day for women and young persons.

One day's rest in seven for all wageworkers; the eight-hour day in continuous twenty-four-hour industries; the abolition of the convict contract labor system; substituting a system of prison production for governmental consumption only, and the application of prisoners' earnings to the support of their dependent families; publicity as to wages, hours, and conditions of labor; full reports upon industrial accidents and diseases, and the opening to public inspection of all tallies, weights, measures, and check systems on labor products; standards of compensation for death by industrial accident and injury and trade disease which will transfer the burden of lost earnings from the families of working people to the industry, and thus to the community; the protection of home life against the hazards of sickness, irregular employment, and old age, through the adoption of a system of social insurance adapted to American use; the establishment of continuation schools for industrial education; industrial research laboratories; a De-

**Progressive Party—Continued.**

partment of Labor; the development of agricultural credit and cooperation; the encouragement of agricultural education; the establishment of a Country Life Commission; full and immediate inquiry into the high cost of living, and immediate action dealing with every need disclosed thereby.

A National Health Service; establishment of a strong Federal administrative commission to maintain permanent active supervision over industrial corporations, as the Government now does over National banks and, through the Interstate Commerce Commission, over railways; the strengthening of the Sherman Law by specific prohibitions; the enactment of a patent law to prevent the suppression or the misuse of patents in the interest of injurious monopolies; giving the Interstate Commerce Commission the power to value the physical property of railways; the abolition of the Commerce Court; prompt legislation for the improvement of the National currency system which shall give the Government full control over the issue of currency notes; the appointment of diplomatic and consular officers solely for fitness and not for political expediency; the retention of forest, coal, and oil lands, water and other natural resources in the ownership of the Nation; a vigorous good roads campaign through the construction of National highways; the extension of the rural free delivery service.

The retention of the natural resources of Alaska in ownership by the Nation, and their prompt opening to use upon liberal terms requiring immediate development; for Alaska the same measure of local self-government that has been given to other American territories; the comprehensive development of waterways; the operation of the Panama Canal so as to break the transportation monopolies now held and misused by trans-continental railways; a protective tariff which shall equalize conditions of competition between the United States and foreign countries both for the farmer and the manufacturer, and which shall maintain for labor an adequate standard of living; an immediate downward revision of the tariff; a non-partisan, scientific tariff commission; a graduated inheritance tax.

The ratification of the Amendment of the Constitution giving the Government power to levy an income

tax; introduction of judicial and other peaceful means of settling international differences; an international agreement for the limitation of naval forces, and, pending such an agreement, the maintenance of the policy of building two battleships a year; protection of the rights of American citizenship at home and abroad; governmental action to encourage the distribution of immigrants, and to supervise all agencies dealing with them, and to supervise and promote their education and advancement; a wise and just policy of pensioning American soldiers and sailors; a parcels post, with rates proportionately to distance and service; the rigid enforcement and extension of the Civil Service Act; a readjustment of the business methods of the National Government, and a proper coordination of the Federal bureaus; governmental supervision for the protection of the public from fraudulent stock issues.

At the presidential election the following November the party polled a popular vote of more than 4,000,000 votes, carrying the States of Michigan, Minnesota, Pennsylvania, and Washington, thus winning 72 electoral votes. This split of the Republican vote, resulted in the election of Wilson, the Democratic candidate, to the presidency.

**Prohibition.**—The prohibition of the manufacture and sale of alcoholic drinks has long been a subject of political discussion in America. Long before the Revolution the liquor traffic was taxed, and the Continental Congress advised the States to pass laws prohibiting the distillation of grain. Prohibition became a purely State political issue first in the Maine legislature in 1837, when a prohibitory bill was introduced and defeated. In 1846 a bill with the same purpose became a law, but did not serve the purpose and was succeeded in 1851 by a more effective measure drafted by Neal Dow. This law provided for search and seizure, but the Prohibitionists lost their majority and the law was repealed. Later a second law was passed which was made a part of the State constitution in 1884 and is still in force. Between 1849 and 1856 prohibitory laws were passed in the following States and were repealed or made inoperative as indicated below: Illinois repealed in 1853; Rhode Island repealed in 1863; Pennsylvania repealed in 1866; Delaware repealed in

**Prohibition—Continued.**

1867; Massachusetts repealed in 1868; Connecticut repealed in 1872; Michigan repealed in 1875; New York declared unconstitutional; Iowa amended in 1894 so as to be ineffective; Vermont repealed in 1902; New Hampshire repealed in 1903. North Dakota and South Dakota have prohibitory amendments in their constitutions.

**Prohibition Party.**—Prohibition first appeared as a national political issue in 1869, and since 1872 the Prohibition party has placed Presidential tickets in the field. The party candidates since 1872 with the popular vote polled have been as follows: 1872, James Black, of Pennsylvania, 5,608; 1876, Green Clay Smith, of Kentucky, 9,522; 1880, Neal Dow, of Maine, 10,305; 1884, John P. St. John, of Kansas, 150,369; 1888, Clinton B. Fiske, of New York, 249,506; 1892, John Bidwell, of California, 255,841; 1896, Joshua Levering, of Maryland, 131,312; 1900, John G. Woolley, of Illinois, 208,555; 1904, Silas C. Swallow, of Pennsylvania, 258,838; 1908, Eugene W. Chafin, of Illinois, 241,252. In 1896 the party split on the silver question, those favoring the free coinage of silver at the ratio of 16 to 1 forming the National party and nominating Charles E. Bentley, who received 13,968 votes.

**Prometheus, The,** firing into and seizure of, by British vessel, 2675, 2680.

**Property at Sea:**

International agreement to regard, as exempt from capture by belligerent powers, recommended, 6338.

**Property, Private:**

Seizure and confiscation of, referred to, 3831.

Shall not be taken for public use without just compensation, 435.

**Proprietaries.**—American territory was parceled out by the various crowned heads of Europe to personal friends or favorites or in recognition of some

useful service to the sovereign. Persons to whom these grants were made established what were known as proprietary governments. The proprietor appointed the governor, and in general performed all those acts of government which are usually the prerogative of the Crown. New York, New Jersey, Pennsylvania, the Carolinas, Delaware, and Maryland were proprietary governments. The laws of Pennsylvania and Delaware were subject to the supervision of the Crown, but those of Maryland were not.

**Prosperity, National,** discussed, 6749, 6750, 7024, 7353.

**Protection.**—In political economy the principle or system of imposing such duties on imported goods as will protect or foster domestic industries. Tariffs are either chiefly to produce revenue or to afford protection. Nearly all American tariffs previous to that of 1824 come under the former head. But the preamble of the first tariff act of 1789 declared that one of its objects was "the encouragement and protection of manufactures," and the principle of protection was ably advocated by Secretary Hamilton, in his elaborate report on manufactures, in 1791 and by many members of Congress from that time to the present. The tariff of 1816 was claimed as protective and opposed as such by Northern members, while Calhoun and other Southerners advocated it. Later the relative views of North and South were radically changed, and the North became protectionist, while Southern members (except Clay and his Whig followers) were for a low tariff for revenue only. The tariff bill introduced in the House of Representatives in 1820 by Representative Baldwin, of Pennsylvania, from the Committee on Manufactures was frankly stated to be a protective measure, and at that time the question of a protective duty was first suggested to be unconstitutional. This bill did not pass, but in 1824 a tariff bill became a law with average duties of 37 per cent. The protectionists claimed that many of the duties were too low for effective protection, and in 1828, after a prolonged commercial depression, a congress opposed to protection passed a high protective tariff, which satisfied neither party, and was denounced as "a bill of abominations." The failure of another act, passed in 1832, to sufficiently reduce the rates of the tariff of 1828 was the chief

**Protection—Continued.**

cause of the nullification movement (q. v.). The Clay-Calhoun tariff of 1833, known as the "Compromise of 1833," gradually reduced duties to a revenue basis. The act of 1842 was protective; that of 1846 (the Walker tariff) was strictly a revenue tariff. The Morrill tariff of 1861 and all subsequent tariff acts have been protective. The duties have been high, running from an average of 18 per cent to 48 per cent *ad valorem* on all dutiable articles.

In 1908, President Taft was elected on a platform which advocated a revision of the Dingley Tariff. Immediately after his election he called an extra session of Congress (7559) and recommended a reduction of duties. Congress, after deliberating nearly all summer, passed a tariff law, taking away all protection from hides, and making reductions of 10 to 15 per cent on leather, lumber, paper, coal, iron and steel sheets, and chemicals. (See Tariff.)

**Protection of Industrial Property Union,** acts of international conference, 8051.

**Protective Tariff.** (See Import Duties discussed.)

**Protestant Church at American embassy at Rome,** removal of, referred to, 3662, 3717.

**Protestant Episcopal Church in Alexandria, Va.,** act incorporating, vetoed, 474.

**Protests.**—The official papers of the Presidents as they are sent to Congress are properly designated "messages," but on several occasions the Chief Executives have sent papers known as "protests." They are sent in the customary message form, but contain the formal protest of the President against the action of Congress as a whole or of one or the other of the two Houses.

**Protests of President—**

Buchanan to proceedings of House, 3145, 3150.

Jackson to resolutions of Senate charging him with violating Constitution and laws, 1288.

Johnson to act depriving him of command of Army, 3670.

Tyler to action of House in adopting report assailing his official conduct, 2043.

**Proteus, The.**—The vessel in which Gen. Adolphus W. Greely, with 24 men, sailed from St. Johns, Newfoundland, July 7, 1881, and reached Discovery

Harbor (lat. 81° 44' north, long. 64° 45' west), Aug. 12, 1881, where he established his station. The *Proteus* was lost in Smith Sound, midway between Cape Sabine and Cape Albert, July 23, 1883, while attempting to reach Lady Franklin Bay with a relief party for Greely.

**Proteus, The,** loss of, and court of inquiry regarding, 4790.

**Prouty, Solomon Francis;** b. Delaware, Delaware County, Ohio, Jan. 17, 1854; moved to Marion County, Iowa, in 1855; educated in the public schools of Iowa and graduated at the Central University of Iowa in 1877, and now holds his degree of M. A. of that institution; attended the Simpson College at Indianola, Iowa, for two years; won the first prize in oratory in the oratorical State contest in Iowa in 1876, and won second prize in oratory in the interstate contest held at Madison, Wis., in 1877; elected professor of Latin in Central University of Iowa in 1877, a position he filled for four years; elected to the State legislature of Iowa in 1879; district judge of Des Moines, Polk County, Iowa, in 1890; married Ida E. Warren, daughter of Hon. R. B. Warren, in 1888; elected to the Sixty-second Congress from Iowa.

**Providence Plantations.**—In 1636 Roger Williams and his followers, who advocated complete separation of church and state and toleration for all creeds, were banished from Massachusetts Bay Colony. They journeyed southward and founded Providence. Two years later the followers of Anne Hutchinson founded Portsmouth, and in 1639 Newport was settled. In 1644 Williams obtained from the parliamentary commissioners a patent which associated the three towns in one community. Both Plymouth and Massachusetts claimed the territory, but failed to make their claims good. In 1663 a new charter was granted, which united Rhode Island to the Providence Plantations and remained substantially the fundamental law until 1842.

**Providence Plantations.** (See Rhode Island.)

**Provisions**, importation of, into foreign countries and rates of duty on, referred to, 5503.

**Prussia.**—A Kingdom of northern Germany. It is bounded on the north by the North Sea, Denmark, Oldenburg, and the Baltic, on the east by Russia, on the south by Austria, Saxony, etc., and on the west by Luxemburg, Belgium, and the Netherlands. In the northern and eastern portions the country is generally level, but in the south and southwest it is hilly or mountainous. The chief agricultural products are rye, wheat, oats, potatoes, barley, millet, fruit, beet root, tobacco, and maize. Prussia is very largely engaged in manufacturing. The government is a hereditary constitutional monarchy administered by a King and a Landtag consisting of two chambers.

Prussia is the principal State of the German Empire. It has 17 votes in the Bundesrath and 236 members in the Reichstag. Hanover, Frankfurt, Nassau, and some other States were acquired by Prussia in 1866. This resulted in forming the North German Confederation. As a result of the war between France and Germany, 1870-71, the German Empire was formed, with the crown hereditary in the Prussian dynasty.

The agricultural area of Prussia is 28,479,739 hectares, divided, in 1905, into 3,308,651 separate holdings or farms, about two-thirds of which were of less than ten hectares (25 acres) in area. These farms supported a population of 10,948,476. The chief crops were rye, hay, oats, potatoes, wheat, and barley. There were vineyards of 18,033 hectares, yielding 370,107 hectolitres of wine.

In 1905-6, 286 establishments consumed 12,596,787 metric tons of beet root in the manufacture of 1,861,970 metric tons of raw sugar and 260,859 metric tons of molasses; 4,326 breweries made 33,600,000 hectolitres of beer—90 litres per head for the population; 6,404 distilleries produced 3,722,032 hectolitres of alcohol.

Prussia yields about half of the

world's zinc; copper, lead and coal are also mined. During 1910 there were 663,534 persons employed in the mines and their wages were 800,392,890 marks. (German mark = 23.8 cents.)

The area of Prussia is 135,134 sq. miles, and the population (1910), 40,165,210.

**Prussia:**

American citizens in—

Expelled from, 3123.

Impressed into military service of.

Vessels of—

Application for rights regarding, 621.

Suspension of discriminating duties on, recommended, 969.

Vessels of United States, discriminating duties on, abolished by, 969.

**Prussia, Treaties with.**—Of the treaty of 1785 the only article that has survived is that on the neutrality of vessels. The treaty of amity and commerce of 1799 contained many articles which expired by limitation in 1810, and some others were revived by treaty of 1828. Contraband goods may be detained; vessels are to be distinctively marked for recognition in time of war by passport, charter-party, and other specified documents. The examination and search of vessels in time of war is to be conducted with ease, freedom from embarrassment and annoyance, according to specified methods. Vessels taken by an enemy and recaptured by one of the parties hereto are to be restored to the other of these parties. Humane treatment is to be extended in cases of distress on shipboard and in wrecks. Citizens of the one party are not to act offensively against the

**Prussia, Treaties with—Continued.**

other when at war with a third party. The neutrality of vessels and the principle that free ships make free goods are fully recognized. In case of war between the parties hereto, citizens of the one in the country of the other shall be fully protected in life, property and business. Prisoners of war are not to be sent to unsafe or unhealthy localities but are to be cared for humanely and with regard to safety of life and health.

The treaty of commerce and navigation of 1828 extended freedom of trade without discrimination in shipping charges or import duties by reason of the nationality of the carrying vessels. The coastwise trade is excepted from provisions. All commercial privileges are upon the basis of the most favored nation. The establishment of consuls and consular agents is permitted and prescribed with full powers regarding the arrest and detention of deserters and the administration of the affairs of deceased persons. (For extradition terms, see Extradition treaties.)

**Puebla (Mexico), Battle of.**—After Gen. Scott had proceeded on his march to the City of Mexico, Gen. Rea, a guerrilla chief, was joined by Santa Anna. Col. Childs, commandant of the Puebla garrison left by Scott, sent Capt. Blanchard with 33 men to capture a band of guerrillas. Blanchard and 22 men were ambuscaded and killed the latter part of August, 1847. Sept. 25 Santa Anna demanded the surrender of the forts at Puebla. Childs, who had only about 360 men, refused and maintained his position in spite of an almost continuous fire of the Mexicans, until relieved by reinforcements under Gen. Lane, on Oct. 12.

**Puerto Rico.**—The easternmost island of the Greater Antilles, lying between lat. 17° 54' and 18° 30' 40" north and long. 9° 45' and 11° 25' east from Washington. It is bounded on the north by the Atlantic, on the east and south by the Sea of the Antilles, and on the west by the Mona Channel. It is the fourth in size of the Greater Antilles and has an extent of about 3,688 sq. miles—43 miles broad and 108 miles long. It is of an oblong form, extending from east to west. Puerto Rico was discovered by Columbus in 1493, and the inhabitants were conquered by Ponce de Leon in 1508-1520. It is the first among the Greater Antilles in density of population and prosperity.

The eastern portion of the island is less populous than the western. The ground is very fertile, being suitable for the cultivation of cane, coffee, rice, and other products raised

**Puerto Rico—Continued.**

in Cuba, which island Puerto Rico resembles in richness and fertility. The climate is hot and moist, the maximum temperature often reaching 104°. Constant rains and winds from the east cool the heavy atmosphere of the low regions. On the heights of Central Cordillera the temperature is healthy and agreeable. Iron rusts and decays so that nothing can be constructed of this metal. In the mountains the inhabitants enjoy the coolness of spring, while the valleys would be uninhabitable were it not for the daily breeze, which blows generally from the northeast and east. At one place the thermometer is as high as 90°, while in another it is sometimes under 60°. Although the seasons are not so distinctly marked in this climate as they are in Europe (the trees being always green), yet there is a distinction to be made between them. The division into wet and dry season (winter and summer) does not give a proper idea of the seasons in this island, for on the north coast it sometimes rains almost the whole year, while sometimes for 12 or 24 months not a drop of rain falls on the south coast. However, in the mountains at the south there are daily showers. As in all tropical countries, the year is divided into two seasons—the dry and the rainy. In general the rainy season commences in August and ends the last of December, southerly and westerly winds prevailing during this period. The hurricanes that visit the island, and which obey the general laws of tropical cyclones, are one of the worst scourges of the country. Earthquakes are somewhat frequent, but not of much consequence. The shocks are sometimes violent, and are usually repeated, but, owing to the special construction of the houses, they cause no damage. The general relief of Puerto Rico is much inferior in altitude to that of the rest of the Great Antilles, and even some of the Lesser Antilles have mountain summits which rival it. A great chain of mountains divides the island into two parts, northern and southern, which are called by the natives Banda del Norte and Banda del Sur. The whole island may be said to form a continuous network of sierras, hills, and heights. Few countries of the extent of Puerto Rico are watered by so many streams.

Puerto Rico passed from the sovereignty of Spain to that of the

United States by the treaty of Paris in 1898. Civil Government was established on May 1, 1900, and on July 25, 1901, it became a Territory of the United States, but it differs from other territories in two important respects, namely, that citizens of Puerto Rico are not *ipso facto* citizens of the United States and that the territorial form of government is not considered to be a preliminary to statehood. President Roosevelt in a message to Congress in December, 1906 (7431), recommended the granting of United States citizenship to the Puerto Ricans. The Government of Puerto Rico is administered by a Governor and a Cabinet of six members appointed by the President of the United States; the Cabinet with five other persons constitutes the Executive council, of which five members must be natives of the islands. The house of delegates consists of 35 members, five from each province, elected by popular vote, the suffrage being restricted by a small property qualification and an easy educational test. The Supreme Court of five members is also appointed by the President, and the judges of the district courts by the Governor; the large majority of the justices are native Puerto Ricans. Agriculture is practically the only industry and 79 per cent of the population are engaged in it. Sugar, coffee, and tobacco are the chief products, although fruit and vegetables are raised in considerable quantities for export. The entire product of the tobacco fields comes to this country for manufacture, but the majority of the coffee is sold in the European markets. The mineral resources of the island are as yet undeveloped, although gold, silver, copper, mercury, and platinum are known to exist. For the year ending Dec. 31, 1908, the shipments of domestic merchandise from the United States to Puerto Rico were \$22,360,366. The exports of domestic merchandise to the United States were \$25,885,776. The foreign trade for the year ending Dec. 31, 1907, was: Imports, \$3,580,887; exports, \$4,899,372.

The census of 1900 reported the population at 953,243, of which 61 per cent are whites, Puerto Rico being one of the few islands in the Antilles where the whites predominate.

The Thirteenth Census, taken in 1910, showed a population of 1,118,012, as compared with 953,233 in 1900. The principal cities are San Juan, with a population of 48,716;

**Puerto Rico—Continued.**

Ponce, 25,005; Mayaguez, 16,563; Caguas, 10,354; Arecibo, 9,612, and Aguadilla, 6,315. There has been great advance in the industrial activities of the territory since the removal of the tariff. Sugar exports increased from 70,000 tons in 1909 to nearly 285,000 tons in 1910 and 323,000 tons in 1911. The production of fruit for external markets has become a leading industry, the shipments for 1911 exceeding \$2,000,000 worth of oranges, pineapples, and grapefruit. The growing of coconuts is increasing annually. The imports during the fiscal year 1911 were \$38,786,997, and the exports were valued at \$39,919,367. Of the imports \$34,671,958 were received from the United States and of the exports \$34,760,409 were sent to the United States.

**Puerto Rico:**

**Puget Sound.**—An arm of the Pacific extending into the State of Washington southward from the Strait of San Juan de Fuca, by which it is connected with the Pacific. The sound is divided into two parts—Puget Sound proper and Admiralty Inlet. The latter is to the north and the former to the south. Fine harbors are found along the sound, the water generally being quite deep. It is about 80 miles long.

**Quackenbush, Mrs. Roy L.,** mentioned, 6847.

**Quarantine.**—A term derived from the French word “*quarantaine*” (m. Lat. *quarantena*), meaning “forty days.” Passengers on vessels arriving at Venice from the Levant were formerly required to remain 40 days in the House of St. Lazarus or the Lazaretto. This regulation was afterwards adopted by other ports in southern Europe, and, with various changes in the period of detention, extended to travelers from all ports whence contagion might be carried. In the United States quarantine enactments were passed by the colonial legislatures and subsequently for many years by the States. The first national quarantine act was passed Feb. 23, 1799, and required Federal officers to aid in the execution of State or municipal quarantine regulations. In 1878, however, a national quarantine law was passed authorizing the establishment, in certain contingencies, of national quarantines. In March, 1883, \$100,000 was appropriated by the Federal Government for maintaining quarantine stations along the coasts, and the authority for declaring quarantine was conferred upon the President. Most of the quarantine stations are under State supervision. The mode of procedure is as follows: On the arrival of a vessel she is visited by the health officer, who examines her bill of health, musters the passengers and crew, and inspects the vessel in every part. If free from contagious disease, and if she does not hail from an infected port, she is allowed to proceed without further detention. If she hail from an infected port, she is detained until the expiration of the period of incubation of the disease prevalent at the port whence she sailed. If disease is found on board, or if the vessel is in an insanitary condition, the diseased persons are removed to a quarantine hospital and the vessel allowed to proceed after a thorough purification.

**Quarter Dollar.**—In 1786 the Continental Congress decided upon certain coins. Among these was a quarter dollar, to be made of silver. The United States Mint was established in 1792 and began coinage in 1793. It was not until 1796, however, that the silver quarter was issued. Its weight was fixed at 104 grains. It was reduced to 93 grains in 1853, and by the coinage act of 1873 was raised to 96.45 grains, or 0.200 of an ounce, the present weight, and 900 fine. The coin is legal tender to the amount of \$5. The quarter dollar of 1827 is one of the rare coins of the United States. There were no issues of this coin during the years 1798 to 1803, 1808 to 1815, nor during 1817, 1824, 1826, and 1830.

**Quarter Eagle.**—A gold coin of the United States authorized in 1792 and first coined in 1796. It is legal tender in any sum. The present weight of the coin is 0.134 ounce, or 64.5 grains, and the fineness 900. It is coined under an act of Congress of June 28, 1834.

**Quartering Acts.**—Certain acts of the British Parliament distasteful to the American colonists. The first was passed in 1765 and compelled the Colonies to provide the garrisons in America with fire, candles, vinegar, salt, bedding, cooking utensils, and liquors. This was the first act requiring the colonists to tax themselves for imperial objects. In 1774 an act was passed legalizing the quartering of imperial troops in Boston.

**Quartermaster-General of Army,** fire-proof building for records in office of, recommended, 4524.

**Quebec (Canada), Battle of.**—After taking Montreal Gen. Montgomery proceeded down the St. Lawrence River to Quebec, where on December 5, 1775, he joined the expedition which had been sent by way of the Kennebec and Chaudière rivers under Benedict Arnold. Their combined forces amounted to about 3,000 men, supported by about a dozen light guns. Carleton had for the defense of Quebec one company of regulars, a sloop of war, and a few marines, together with as many of the citizens as could be induced to enlist—in all something like 1,600 men. On the

**Quebec (Canada), Battle of—Continued.** night of Dec. 31 the city was attacked. Montgomery was killed, Arnold was wounded, and the troops retired in confusion. Three thousand troops were sent to reinforce Arnold, and 4,000 occupied Montreal, St. Johns and Chambly. May 6, 1776, 3 brigades of infantry, besides artillery, stores, ammunitions, transports, and men-of-war, arrived from England and the Americans retired, leaving Canada as it was before the invasion. (See also Montreal (Canada), Capture and Loss of.)

**Queen, Walter W.,** thanks of Congress to, recommended, 3277.

**Queen Anne's War.**—The name by which the War of the Spanish Succession was known in America. It broke out in 1702 and was ended with the treaty of Utrecht in 1713. The New England Colonies suffered from frequent inroads of French and Indians from Canada, but the New York Colony was protected by the barrier of the Six Nations of Indians, then at peace with the English. Aug. 10, 1703, Indians under French leaders attacked Wells, Cape Porpoise, Saco, Casco, Scarboro, Spurwink, and Purpooduck, completely destroying the last two. In 1704 and 1705 James Moore, of South Carolina, with 50 whites and about 1,000 Creek Indians, attacked and destroyed several Spanish settlements in Florida. Col. Church organized an expedition in Maine in 1704 and proceeded up the coast as far as the Bay of Fundy, destroying all the settlements and taking 106 prisoners, with the loss of only 6 men. Feb. 28, 1704, about 350 French Canadians and Indians burned the town of Deerfield, Mass., massacring 40 persons and taking 100 prisoners. After three attempts by the New England troops Acadia was finally captured. July 30, 1711, Gen. Nicholson left Albany with an army of 4,000 men and Hoven den Walker sailed from Boston with a fleet and 7,000 men, as well as a fine train of artillery, to attack Quebec and Montreal. The fleet was driven upon the rocks at the mouth of the St. Lawrence, losing 8 transports and more than 1,000 men. The survivors sailed for England and the army disbanded.

**Queenston Heights (Canada), Battle of.**—Early in October, 1812, Gen. Van Rensselaer resolved to invade Canada from western New York. His headquarters were at Lewiston, opposite Queenston, Canada. The American army consisted of 3,650 regulars

and 2,650 militia. The British force on the western bank of the Niagara River numbered 1,500, including about 250 Indians under John Brandt. Maj.-Gen. Brock, who had taken Detroit in August, had returned to the east and established his headquarters at Fort George. He posted batteries every mile along the river from there to Queenston. On the morning of Oct. 13, 1812, the invasion was begun prematurely, insufficient boats having been provided for transportation. Reinforcements came so slowly that the advance guard was forced to surrender. Gen. Brock was mortally wounded. Van Rensselaer was disabled and the American command fell upon Captain Wool. British reinforcements and Indians pressing hard upon the Americans, they were forced to surrender. About 900 Americans were taken prisoners, 90 were killed, and about 100 wounded. The British lost in killed, wounded, and captured about 130. The number of Indians killed is not known.

**Querétaro, Treaty of.** (See Guadalupe Hidalgo, Treaty of.)

**Quezon, Manuel L.;** b. Baler, Province of Tayabas, Aug. 19, 1878; received his primary and secondary education in the College of San Juan de Letran, obtaining the degrees of bachelor of arts and expert land surveyor; studied law in the University of St. Thomas, and was admitted to the Filipino bar in April, 1903. During the revolution was a major of the Philippine army, and was detailed, first, to Gen. Aguinaldo's staff and then as chief of staff of the general commanding the Department of Central Luzon; under the American Government he held the office of prosecuting attorney for the Province of Mindoro, and was subsequently transferred to the Province of Tayabas with the same office; after a year in the latter province he resigned and was elected provincial governor of Tayabas, holding this office from 1906 to July, 1907, when he also resigned to become a candidate for delegate to the Philippine Assembly from the first district of Tayabas and was elected; in the Philippine Assembly he was the floor leader of his party; May 15, 1909, the Philippine Legislature elected him Resident Commissioner of the Philippine Islands in the United States to succeed Hon. Pablo Ocampo de Leon.

**Qui-nai-elt Indians.** (See Indian Tribes.)

**Quids.**—A name applied to the anti-Madison faction of the Republican party, led by John Randolph from 1805 to 1811. Jefferson strongly favored the succession of Madison and the Quids declared war upon the administration, charging "backstairs" influence. They opposed the restrictive system and nominated Monroe in 1808.

**Quiggle, Chloe**, act granting pension to, vetoed, 5233.

**Quil-leh-ute Indians.** (See Indian Tribes.)

**Quint.**—One of the silver coins presented by Robert Morris to the Continental Congress in 1783 for consideration as a national coin. It weighed 5 pennyweights and 15 grains and was equal to about 35 cents. On the obverse was an eye, 13 points crossing (equidistant) a circle of as many stars, and the legend "Nova Constellatio"; on the reverse, "U. S. 500," surrounded by a wreath and the legend, "Libertas Justitia." This coin was not accepted and afterwards, with the mark, became known as the Nova Constellatio coinage.

**Quorum.**—A word adopted from the Latin, meaning in the original tongue "of whom." Legally it denotes a certain specified number out of a large number necessary to act for cer-

tain purposes. Business in charge of trustees or committees might often be retarded on account of the absence of one or more members if the actions of a quorum were not legal. Unless otherwise stipulated, a majority of the members of any body is considered a quorum. In parliamentary usage a quorum is the number that must be present in order that business may be transacted. It is sometimes less than 1 per cent of the members, as in the case of the British House of Lords, where 3 out of 450 members constitute a quorum. According to the Constitution, a majority of either branch of Congress constitutes a quorum. For the first fifty Congresses the presence of a constitutional quorum in the House was determined by a count of votes. No matter how many members were present, unless a majority voted it was considered there was not a quorum present. This sometimes led to obstructive tactics. In 1890, during the first session of the Fifty-first Congress, the Speaker of the House ruled that a quorum was present when enough members were visible to constitute a quorum, whether they voted or not. The Senate enforces the rule which requires a majority of the body to vote in order that a quorum may be counted.

Alexandria, La., Oct. 7, 1858; was admitted to the bar in 1883, and engaged in the practice of his profession until he entered Congress, December, 1899; elected district attorney of the eighth judicial district of Louisiana in April, 1884, which office he held for twelve years; after his election to Congress gave up the practice of law and devoted himself entirely to his Congressional duties and to his cotton-planting interests in East Carroll Parish; was one of the active leaders in reorganizing the National Rivers and Harbors Congress, and became its president; was elected to the 56th Congress to fill an unexpired term, and to the 57th, 58th, 59th, 60th, 61st, and 62d Congresses from Louisiana.

**Ransom, George M.**, thanks of Congress to, recommended, 3277.

**Raritan, The**, postponement of sailing of, referred to, 2129.

**Ratification of Constitution.**—The Constitution, by its terms, was not to become binding until ratified by nine of the thirteen States. It was signed by the delegates in convention Sept. 17, 1787, and by them submitted to Congress. Congress immediately ordered copies sent to all the States. Hamilton, Jay and Madison took leading parts in bringing about the ratification by the States. Gen. Washington's great influence was also thrown into the scale. The commercial classes in most of the States favored its adoption, but there was much opposition to it on all sides. Delaware was the first State to ratify the new document, taking favorable action thereon Dec. 7, 1787. It was then ratified by the other States in the following order: Pennsylvania, Dec. 12; New Jersey, Dec. 18; Georgia, Jan. 2, 1788; Connecticut, Jan. 9; Massachusetts, Feb. 6; Maryland, April 28; South Carolina, May 23; New Hampshire, June 21; Virginia, June 25; New York, July 26; North Carolina, Nov. 21, 1789, and Rhode Island, May 29, 1790. The Constitution went into effect March 4, 1789, before North Carolina and Rhode Island had ratified it.

**Ratification of Constitution.** (See Constitution.)

- Rauch, George Washington;** b. Warren, Huntington Co., Ind., Feb. 22, 1876; admitted to the bar in 1902, and began the practice of law at Marion, Ind.; elected to the 60th, 61st and 62d Congresses from Indiana.
- Rawlins, John Aaron;** soldier; b. East Galena, Ill., Feb. 13, 1831; after seeing much service in the field he rose by degrees to the rank of major-general by brevet in 1865; served as chief of staff to the general commanding the armies, and on the accession of Gen. Grant to the Presidency, he was appointed Secretary of War; died Washington, D. C., Sept. 9, 1869.
- Rawlins, John A.:**  
 Secretary of War, death of, announced and honors to be paid memory of, 3978.  
 Statue of, recommendations regarding erection of, 4124.
- Ray, James B.,** treaty with Indians concluded by, 931.
- Raymond (Miss.), Battle of.**—May 7, 1863, Sherman effected a junction with Grant, swelling the force about to proceed to the siege of Vicksburg to 50,000 men, including infantry, cavalry, and artillery. Grant immediately ordered a general movement on two parallel roads on the south-east of the Big Black River. McPherson, advancing on the road nearest the river, met two brigades of the enemy, under Gregg and Walker, at Raymond, 15 miles southwest of Jackson, on May 12, and after a sharp engagement defeated them. The Confederate loss was 103 killed and 720 wounded and missing. McPherson lost 69 killed, 341 wounded, and 32 missing.
- Rayner, Isidor;** b. Baltimore, April 11, 1850; educated at the University of Maryland, and the University of Virginia; admitted to the bar in 1870 and has held the following public offices: In 1878 he was elected to the Maryland legislature for two years; in 1885 he was elected to the State senate for four years; in 1886, to the 50th Congress, and later to the 52d and 53d Congresses; attorney-general of Maryland; 1889-1903, elected to the United States Senate from Maryland, for the term beginning March 4, 1905. Died Washington, D. C., Nov. 25, 1912, of neuritis after a lingering illness.
- Rear-Admiral.**—This is a naval grade created by act of Congress in 1862. This grade in the Navy ranks with that of major-general in the Army. Until the special acts creating the grades of admiral and vice-admiral, that of rear-admiral was the highest naval office. There are now 15 rear-admirals ranking with major-generals in the Army, and 9 rear-admirals ranking with brigadier-generals.
- Rear-Admiral,** rank of acting, conferred upon certain officers inquired into, 4848.
- Rebates,** apparent conflict of decisions by district judges concerning, 7404.

- Rebellion, War of.** (See Civil War.)
- Rebellions.** (See Illegal Combinations.)
- Rebello Vicenzo,** seizure of, at New Orleans, 4653.
- Reciprocal Trade Agreements.** (See Foreign Import Duties.)
- Reciprocity.**—Reciprocity is the granting by one nation of certain commercial privileges to another, whereby the citizens of both are placed upon an equal basis in certain branches of commerce. A reciprocity agreement between the United States and Canada was concluded in 1854 and terminated in 1866. A similar one was made with Hawaii in 1875. Other treaty arrangements of a reciprocal character were made from time to time. The subject derived the greatest interest from attention directed to it in 1888 and the final incorporation of the principle in the tariff of 1890. For many years previous to this time the anti-protection or tariff-reform party had attacked the existing tariff regulations on the ground that by levying high duties on the products of South American Republics those countries had not only to send their products elsewhere for sale, but, as a natural consequence, to purchase their goods in other markets than those of the United States; in other words that a vast trade was diverted from us to Europe because of the restrictions imposed upon commerce by our tariff.
- This discussion led to the adoption of a reciprocity arrangement with Central and South American countries. The first step toward this end was the calling of the Pan-American Congress (q. v.). Among the numerous subjects of mutual interest dis-

**Reciprocity—Continued.**

cussed at this congress was a recommendation for reciprocity treaties. In June, 1890, the Secretary of State, James G. Blaine, sent a letter to the President for transmission to Congress calling attention to the proposed scheme. He suggested a practical and prompt test of the reciprocity principle by an amendment to the McKinley tariff bill, then pending (see Tariff), authorizing the President to declare the ports of the United States free to all the products of any nation of the American hemisphere upon which no export duties are imposed whenever and so long as such nation shall admit to its ports, free of all national, provincial, municipal, and other taxes, certain specified articles from the United States. The "reciprocity section" was incorporated in the tariff law approved Oct. 1, 1890. This clause was held to be constitutional by the Supreme Court, and the first treaty negotiated under it was with Brazil, Feb. 5, 1891. Treaties were also negotiated with Spain (for Cuba and Puerto Rico); with England (for some of her West Indian possessions); with Santo Domingo, Guatemala, Salvador, Costa Rica, Honduras, Nicaragua, Germany, Austria-Hungary.

These treaties were abrogated by the passage of the Wilson bill (see Tariff) in 1894. The Dingley law of 1897 provided for reciprocity treaties, to be made by the President, with regard to a limited number of articles; and for broader treaties to be negotiated by the President, subject to the ratification of the Senate. Of the first class, agreements were made with France, Italy and Switzerland; of the second class, treaties were negotiated with France, Great Britain (for Jamaica, Turks and Caicos islands, Barbados, and British Guiana), Denmark (for the Danish West Indies), San Domingo, Nicaragua, Ecuador and the Argentine Republic, but none of them secured the ratification of the Senate. A reciprocity treaty with Cuba was ratified by the Senate in March, 1903, and the additional legislation necessary to put it in force was passed in December of the same year.

The tariff law passed in 1909 contained the maximum and minimum feature, which prescribed certain rates to be enforced for one year, at the end of which time 25 per cent.

*ad valorem* was to be added as the maximum duty. The President is then authorized to apply the minimum rates to the imports from a country which gives its best rates to the products of the United States, and which accords to the United States treatment which he considers reciprocal and equivalent. (See Tariff.)

On Jan. 26, 1911, President Taft sent to Congress a special message transmitting an agreement between the Department of State and the Canadian Government obligating both parties to attempt to secure legislation which will reciprocally lower tariff rates on about six hundred items. (See p. 7961.) In urging the passage of the treaty, the President recalled Canada's neighborliness and friendship as shown in the settlement of all disputes and in the co-operation between the boards of railway control on both sides the border, dwelt upon the necessity of conserving our own resources by buying those of our neighbor, pointed out the similarity in labor and transportation conditions here and there, mentioned the harm to Americans which will accrue if the "imperial preference" doctrine becomes a tenet of Canadian political faith, maintained that the accession of a new supply of raw materials would inure to the benefit of all sections and, in prophetic vein, characterized the agreement as a step toward closer friendship between peoples related by blood, common sympathies and identical moral and social ideas. Animals, poultry, food stuffs, products of farm, garden and dairy, fruits, fish, oysters, salt, mineral waters, lumber, machinery, minor metal manufactures, coal, meats, flour, meal, farming utensils, fruit trees and Portland cement are the articles on which the tax is to be lowered or entirely removed. The effect of the proposed treaty, according to 1910 figures, would be to decrease the revenue of the United States by \$4,849,933, and that of Canada by \$2,560,579. On July 26, 1911, the reciprocity measure, having been passed by both Houses, was signed by the President and became law. Sept. 1, 1911, the Canadian Parliament had not yet ratified the agreement. (See Reciprocity.)

**Reciprocity**, maximum and minimum feature of, expected to remove European discriminations, 7668.

**Reciprocity—Continued.**

Agreement with Germany discussed, 7502.

With Netherlands, 7339.

With Spain, 7344.

(See Canada, Reciprocity with.)

**Reclamation Service**, discussed, 6875, 7038. (See Irrigation.)

**Reconcentrados.**—The name given the agricultural inhabitants of Cuba who were by the edict of Feb. 16, 1896, of Captain-General Weyler concentrated within the lines of the Spanish armies and cities of that island. This resulted in great suffering to the persons thus herded together, many of them dying of disease and from starvation. The mortality was so frightful and their suffering so intense that their condition excited universal pity. On the suggestion of the President of the United States, Congress made an appropriation for their relief.

**Reconcentrados:**

Appropriation for, recommended, 6292.

Policy of Gen. Weyler regarding, discussed, 6256, 6283, 6284, 6308.

Revoked, 6285.

**Reconstruction.**—In American politics a term signifying the restoration of those States which had seceded of local self-government and normal relations with the Union. The period of reconstruction embraced the Administrations of Johnson and Grant and presented some perplexing problems to the statesmen of the reunited country: Were the States still in the Union, with no other disability than that of having no legal governments, or had their act of secession reduced them to the condition of territories subject to the Union? Did reconstruction mean their erection into new States or their restoration with their old names and boundaries? Did the power to reconstruct lie in the States themselves or in the General Government; and if in the General Government, did it lie with Congress or with the Executive? If it lay with the people of the disorganized State, who or what defined that people and decided who might and might not vote in the reorganization? If it lay with Congress, could the Executive without the authority of Congress proceed to reconstruct, simply leaving it to Congress to accept or reject the States so reconstructed? President Lincoln had proceeded upon the theory that nothing more was necessary than that a sufficient number of loyal citizens should form

a State government of which the officials were loyally desirous of maintaining constitutional relations with the Union (3423). President Johnson proceeded upon nearly the same theory.

The view held by the majority in Congress was that the Southern States could be readmitted only on such terms as that body should impose. The ground taken in support of this view was that the substantial results of the war respecting the civil rights of the negro could not be secured in any other way, because of the reluctance of some legislatures to accept these results. Before Congress met in December, 1865, President Johnson had recognized provisional governments in all the Southern States except one, on their acceptance of the thirteenth amendment. Congress then proposed the fourteenth amendment and insisted upon its acceptance as a prerequisite to readmission to the Union. The same body on March 2, 1867, passed over President Johnson's veto the military reconstruction bill introduced in the House by Thaddeus Stevens. Under this law the South was divided into five military districts under the command of generals of the Army, who were to effect a registration of voters, including negroes and excluding those persons who had been disqualified by the fourteenth amendment. These voters were to make and ratify a constitution and submit it to Congress, and if it was acceptable the State should be reinstated whenever its legislature had ratified the fourteenth amendment.

Tennessee was readmitted to the Union in 1866, Alabama, Arkansas, Florida, Georgia, Louisiana, North Carolina, and South Carolina in 1868, and Mississippi, Texas and Virginia in 1870. (See also Restoration.)

**Reconstruction Acts:**

Interpretation of, 3750.

Proceedings of President and Cabinet regarding, as set forth in National Intelligencer, discussed, 3725.

Repeal of, recommended, 3760, 3870. Vetoed. (See Reconstruction.)

**Reconstruction of Southern States** (see also Restoration):

Act providing for more efficient government of rebel States vetoed, 3696.

Acts supplementary to, vetoed, 3729, 3734.

# **Reconstruction of Southern States—** *Continued.*

- Assignments under, 3749, 3750, 3754, 3755, 3859, 3860, 3861, 3862, 3863, 3864, 3866, 3869.
- Expenses of carrying act into effect discussed, 3719, 3723, 3764.
- Joint resolution to carry act into effect approved and reasons therefor, 3719.

  - Report of, referred to, 4856.
- Red Cross, International,** proposition of Switzerland to extend compact of, in Spanish-American War, discussed, 6336.
- Red-Line Map.**—An early map of part of North America, discovered by Jared Sparks in the archives of Paris and sent to Daniel Webster during treaty negotiations with Great Brit-

ain over the northeastern boundary question. It had been executed in 1746 by D'Anville, and later (1782) sent to the French minister, Vergennes, by Franklin. A strong red line drawn near the ridge in which the Kennebec and Penobscot Rivers rise more than favored the English claims respecting the northeastern boundary of the United States. The map was displayed in a secret session of the Senate and before the Maine commissioners, and was, in part at least, the ground on which the Webster-Ashburton treaty was signed.

## **Red River:**

- Exploration of, 386.
- Unsuccessful, 396.
- Improvement of, progress made in, 1442.

**Redemptioners.**—A name applied to a class of indentured servants who came to the American Colonies under bond for a certain number of years in payment for their passage hither. Many were kidnapped and placed in forced slavery for a term of years. They usually served from 4 to 7 years. On their release these redemptioners were awarded 50 acres of land and became free citizens. The system was introduced into Virginia with the first colony in 1607, and in Massachusetts in 1631. It obtained also in Maryland, New York, Connecticut, and Pennsylvania, but was discontinued in 1750.

**Redfield, William C.;** b. Albany, N. Y., June 18, 1858; removed to Pittsfield, Mass., in 1867; educated in the grammar and high schools of that city; removed to New York City in 1877, thence to Brooklyn in 1883, engaging in the manufacture of iron and steel forgings, tools, ventilating, heating, and drying apparatus, engines, etc., being vice-president of the American Blower Co., of Detroit, Mich., and Troy, N. Y.; in 1902 was commissioner of public works for the Borough of Brooklyn, New York City; elected to the 62d Congress from New York.

**Reed, James A.;** b. Nov. 9, 1861, near Mansfield, Richland County, Ohio; moved to Linn County, Iowa, in 1864, and to Kansas City, Mo., in 1887; was educated at Cedar Rapids (Iowa) public schools and Coe College; admitted to the bar in 1885; appointed county counselor of Jackson County, Mo., in 1897; elected prosecuting attorney of Jackson County in 1898 and resigned the office to become mayor of Kansas City in April, 1900;

**Reed, James A.—Continued.**

reelected mayor of Kansas City in 1902; nominated by the Democrats for United States Senator Nov. 8, 1910, in a State-wide primary election; elected to the United States Senate for a term beginning March 4, 1911.

**Reed, Silas**, surveyor of Missouri and Illinois:

Nomination of, and reasons therefor, 1956.

Error in, corrected, 1957.

Official conduct of, referred to, 2212, 2214.

**Reed, Thomas Brackett** (1839-1902); politician; b. Portland, Me.; practiced law after 1865, and was active in politics in his native State; member of Congress, 1877-99, and Speaker of the House during the terms of 1889-91, 1895-97, and 1897-99; originator of the famous Reed rules, governing House procedure.

**Reed, William Bradford**; lawyer, diplomat; b. Philadelphia, Pa., June 30, 1806; attorney-general of Pennsylvania, 1838; United States minister to China, 1857 and 1858, and negotiated the treaty which was ratified in 1861; died New York City, Feb. 18, 1886.

**Reed, William B.:**

Commissioner to China, instructions to, referred to, 3015.

Dispatches of, regarding convention with China, referred to, 3071.

**Rees, Rollin R.;** b. Camden, Ohio, in 1865; his father, Victor D. Rees, was one of the early settlers of Ottawa County, Kansas; attended the Agricultural College at Manhattan, Kans.; after graduation he commenced the study of law and was admitted to the bar in 1887; twice elected county attorney of Ottawa County, and was sent to represent his county in the State legislature during the sessions of 1899 and 1901; elected judge in 1903 and was reelected four years later, and continued to serve until he resigned to become a candidate for Congress; married in 1896 to Hattie E. Merrick, and they have two children; president of the Citizens' National Bank of Minneapolis, Kans.; elected to the 62d Congress from Kansas.

**Reeves, Benjamin H.**, treaty with Indians concluded by, 889.

**Reform Schools.** (See District of Columbia.)

**Refunding.**—The process of substituting a series of low-interest-bearing bonds for those of a higher rate or for a floating debt not funded. Aug.

31, 1865, the debt of the United States amounted to \$2,845,907,626, of which sum only \$1,109,568,192 was funded. By December, 1867, the floating debt, compound-interest notes, seven-thirties, and United States notes had been converted into a funded debt of nearly \$700,000,000. The refunding act of 1870 authorized the issue of certain amount of 5, 4½, and 4 per cent. bonds to take the place of the existing bonds, most of which were bearing 6 per cent. interest. During the next 10 years this substitution was carried to an extent that decreased the annual interest charges from \$82,000,000 to \$62,000,000. In 1881 the annual interest was decreased nearly \$20,000,000 more by the Windom refunding scheme, which converted \$460,000,000 5 and 6 per cent. bonds into bonds bearing 3 and 3½ per cent. interest.

**Register of Debates.**—A record of the Congressional debates and proceedings from December, 1824, to October, 1837. It was a continuation of the Annals of Congress and contains many valuable State papers as well as the routine Congressional work. The Register of Debates was succeeded by the Congressional Globe. (See also Annals of Congress; Congressional Globe; Congressional Record.)

**Registration.**—A precaution taken in certain States to prevent frauds in elections. It consists of the preparation of lists of the electors of every precinct, voters being required to present themselves before the registrar on specified days prior to election to have their names recorded and to answer questions as to their qualifications as electors. These lists are open to inspection and scrutiny by the public.

**Registration Bureau** of naturalized citizens, recommended, 4828, 4921, 5090, 5370.

**Registry, American**, repeal of law denying, to ships built abroad and owned by Americans, recommended, 5985.

**Regular U. S. Army and Navy Union.**—A patriotic, fraternal, and beneficial organization, chartered under act of Congress, for soldiers and sailors' rights and benefits. Headquarters, 4 Warder Street, N. W., Washington, D. C. Membership is confined to regulars of the United States Army, Navy, or Marine Corps, whether discharged, retired, or in the service.

**Regulators.**—In 1768 the people of Orange County, N. C., oppressed by the unjust acts of Edmund Fanning,

**Regulators—Continued.**

clerk of the court of Orange, formed an association, headed by Herman Husbands and William Hunter, for regulating public grievances and abuse of power. They sent messengers to the governor with a statement of their grievances. The governor and council decided that the course of the Regulators tended to high treason, and on their reassembling in July to hear the report of the messengers, the governor, at the head of a body of troops, compelled them to take the oath of allegiance to the Crown and disperse. Some of the leaders of the Regulators were held to answer in the courts for their actions. The following year another petition was rejected. The Regulators offered an organized resistance to the troops, under Governor Tryon, and at Alamance, on the Haw River, they were routed by the governor and their leaders arrested. Some of these leaders were executed. Martin, the next governor, compromised with the Regulators.

**Reid, Samuel C.**, battle sword of father offered to United States by, 5119.

**Reid, Whitelaw**, journalist, author, diplomatist; b. Xenia, Ohio, Oct. 27, 1837. Worked as editor of the *Xenia (Ohio) News* in 1858 and 1859, and as legislative correspondent in 1860 and 1861 and then went to the front as a war correspondent in 1860 and 1861; went to Washington and represented the *Cincinnati Gazette* as correspondent from 1862 to 1868, during part of which time he served as librarian of the House of Representatives and as clerk of various committees. In 1868 he joined the editorial staff of the *New York Tribune*, becoming managing editor the next year, and later principal owner. April 26, 1861, he married Elizabeth, daughter of D. O. Mills. From 1889 to 1902 he was minister to France and was nominated for Vice-President of the United States in 1892. In 1905 he was appointed United States Ambassador to the Court of St. James. He has been honored with scholastic degrees by many colleges and universities and is the author of many literary and historical works.

**Reid, Whitelaw**, member of Spanish-American Peace Commission, 6322.

**Reilly, Thomas Lawrence**; b. Sept. 20, 1858, at New Britain, Conn.; educated in the common schools and Connecticut State Normal School, of New Britain, graduating in the class of '76; engaged in the newspaper

business for the last 30 years; mayor of Meriden since January, 1906, being elected three times, two-year terms; was elected to the 62d Congress from Connecticut.

**Reiter, George C.**, conduct of, in connection with arrest and killing of Gen. Barrundia, referred to, 5569.

**Relations, Foreign.** (See the several powers.)

**Relief Party.**—A political faction in Kentucky politics between 1820 and 1826. The party was composed of debtors and included a majority of the voters. It advocated relief of delinquent debtors and disputed the constitutionality of the replevin act. In 1823 the Supreme Court decided the replevin act to be unconstitutional and in 1824 the legislature of the State repealed the court of appeals act and organized a new court. The Relief party then became known as the New Court party. The Anti-Relief or Old Court party, securing a majority in the legislature in 1827, restored the old court, and the issue was not renewed.

**Religious Establishments:**

Baptist church in Mississippi Territory, act for relief of, vetoed, 475.

Protestant church at American embassy at Rome, removal of, referred to, 3662, 3717.

Protestant Episcopal church in Alexandria, Va., act incorporating, vetoed, 474.

Separation of church and state, recommendation to declare, 4310.

Value of church property, discussed and taxation of, recommended, 4288, 4310.

**Removals from Office.**—The Constitution gives the President power to make appointments to civil office by and with the advice and consent of the Senate, but is silent on the subject of removals. Debate on this point arose in Congress in 1789, and it was concluded to allow the power of removal to rest with the President alone. This continued to be the policy of the Government until 1867. In this year charges were preferred in the House of Representatives against President Johnson, alleging corrupt use of the appointing, pardoning, and veto powers, corrupt disposition of public property, and interference in elections. The charges were referred to the Judiciary Committee and a bill was prepared and passed over the President's veto providing that, with certain exceptions, every officer appointed by the President with the

**Removals from Office—Continued.**

concurrence of the Senate should retain his office until a successor should in like manner be appointed. This is known as the tenure-of-office act (q. v.). Johnson's suspension of Secretary Stanton in violation of this act led to his impeachment in 1868. The law was repealed in 1887.

**Removals from Office** (see also Executive Nominations):

Act regulating tenure of certain civil offices, vetoed. (See Tenure-of-Office Act.)

Discretionary authority of President regarding, discussed by President—

Cleveland, 4960.

Grant, 3992.

Jackson, 1351.

Johnson, 3690, 3767, 3820.

Tyler, 1905, 1941.

For partisan purposes, discouraged, 1941.

Partisan interference in elections cause of removal, 1905.

Referred to, 1796, 1911, 1912.

Resolution of Senate regarding, and reply of President Hayes, 4433.

**Rennels, Hiram G.**, receiver of public money, nomination of, 1040.

**Reno, Jesse L.**, major-general in Army, nomination of, and reasons therefor, 3362.

**Renshaw, William B.**, thanks of Congress to, recommended, 3277.

**Renwick, James**, report of, as commissioner on northeastern boundary. (See Northeastern Boundary.)

**Representatives.**—The constitutional designation of the members of the House of Representatives. They are elected by direct vote of the people, in representative districts fixed by State law, according to the apportionment made every 10 years by Congress as to the quota of each State. Representatives must be at least 25 years of age, residents of the State in which chosen, and citizens of the United States for 7 years previous to their election. (See also Congress; Apportionment; and House of Representatives.)

**Representatives:**

Appointment of, by President in whose election they have been officially concerned, discussed, 1011, 1120.

Appointments to office, relation of, to.

(See Executive Nominations.)

**Apportionment of—**

According to census of 1890 necessary, 5553.

Bill for—

Approved and reasons therefor, 2012.

Vetoed, 116.

Delay in making, referred to, 2681.

**Election of—**

Federal supervision of, recommended, 5490, 5562, 5766.

Gerrymander, discussed, 5643.

Law appointing day for, recommended, 3103, 3181.

List of, appointed to office, referred to, 591, 911, 1196, 2360.

Loyal Senators and, denied admission to seats in Congress, discussed, 3644.

President declines to give names of, applying for office, 1958.

**Representatives-at-Large.**—Representatives in Congress elected on general tickets, as distinguished from those elected on district tickets, in cases where the State has failed to redistrict after it has become entitled to additional representation in Congress. (See Apportionment; House of Representatives.)

**Representatives, House of.** (See Congress.)

**Republican Party.**—In the early days of the Republic Thomas Jefferson became the leader of a party opposed to the monarchical ideas of the Federalists. This party was first known as the Democratic-Republican, and the adherents were called both Democrats and Republicans, usually the latter, until the Jackson-Adams contest. The Republican party of later days was formed in 1854, with opposition to slavery as its chief tenet. The compromise of 1850 (q. v.) had disrupted the Whig party. The passage of the Kansas-Nebraska act materially influenced the general coalition that followed of Whigs, Free-Soilers, Abolitionists, and Know-Nothings. They assumed the name of Republicans and at once won a plurality in the House of Representatives. They held their first national convention in Philadelphia in 1856, and nominated Fremont and Dayton for President and Vice-President. At the election which followed they were defeated, but in 1859 again came into control of the House.

In 1860 they elected Mr. Lincoln to the Presidency. For the next 14 years the party was supreme. It enlarged the powers of Congress by a broad construction of the Constitution, carried on the Civil War, abolished slavery, reconstructed the governments of the seceding States, maintained a protective tariff, and refunded the national debt. The

**Republican Party—Continued.**

party nominees during this period were: 1860, Abraham Lincoln, of Illinois, and Hannibal Hamlin, of Maine; 1864, Abraham Lincoln, of Illinois, and Andrew Johnson, of Tennessee (Johnson becoming President on the death of Lincoln); 1868, Ulysses S. Grant, of Illinois, and Schuyler Colfax, of Indiana; 1872, Ulysses S. Grant, of Illinois, and Henry Wilson, of Massachusetts.

In 1872 those who opposed General Grant's administration left the party and formed the Liberal Republican party (q. v.). In 1874 the party lost control of the House of Representatives and did not regain it until 1880. In 1876 it elected Rutherford B. Hayes, of Ohio, and William A. Wheeler, of New York (see Electoral Commission). In 1880 James A. Garfield, of Ohio, and Chester A. Arthur, of New York, were elected (Arthur becoming President on the death of Garfield), but the party lost control of the House in 1882.

In 1884 James G. Blaine, of Maine, and John A. Logan, of Illinois, were defeated, but the party retained control of the Senate. In 1888 Benjamin Harrison, of Indiana, and Levi P. Morton, of New York, were the candidates and were successful on a tariff issue. The party also regained control of the House in that year. Dissatisfaction with the McKinley tariff law led to the loss of the House by the Republicans in 1890 and in the Presidential campaign of 1892 President Harrison (Whitelaw Reid, of New York, being the Vice-Presidential candidate) was defeated for reelection, and the party lost control of the Senate. In 1894 the Republicans again regained control of the House.

In 1896 the free coinage of silver appeared as an issue and the platform of the Republican convention at St. Louis declared against free coinage "except by international agreement with the leading commercial nations of the world" and favored the gold standard "until such agreement could be obtained." As a result of this opposition to the gold standard many western Republicans left the party and supported William J. Bryan, the Democratic candidate. The Republicans were successful, however, William McKinley, of Ohio, and Garret A. Hobart, of New Jersey, being elected, their popular vote being 7,111,607 and the electoral vote 271.

In 1900 the issues were "imperialism" (defined by the Democrats as the tendency of the Republic, under Republican rule, to move away from the old democratic practices and beliefs), silver, the tariff and trusts. The Republicans were again successful. William McKinley, of Ohio, and Theodore Roosevelt, of New York, being elected, receiving 7,208,244 popular votes and 292 electoral votes. President McKinley was assassinated Sept. 6, 1901, and died on the 14th of that month. Theodore Roosevelt then succeeded to the Presidency. During the administration of McKinley and Roosevelt the party passed the Dingley tariff law on protective lines (see Tariff); the Spanish War was carried to a successful conclusion; the rebellion in the Philippines extinguished and the islands given a stable civil government; Hawaii was annexed; and a currency bill establishing the gold standard was passed. During this administration also our new possessions in the far East brought the United States into the group of World Powers, the American soldiers taking part in the relief of the Legations at Peking (see Boxers); and Secretary Hay's diplomacy secured the "open door" in China.

In 1904 there were no well defined issues, the silver and tariff questions being in abeyance. The Republican candidates, Theodore Roosevelt, of New York, and Charles W. Fairbanks, of Indiana, were successful, the popular vote being 7,624,982, and the electoral vote 336.

Besides the suppression of slavery the Republican party has favored full citizenship to emancipated slaves, prompt payment of the national debt, tariff for protection as well as revenue, free ballot, generous pension legislation, increase of the Navy and the strengthening of the coast defenses, a system of national bank currency based on United States bonds deposited with the Secretary of the Treasury, a national circulating medium based on a gold standard, a vigorous foreign policy, a liberal interpretation of the Monroe Doctrine, national protection of timber, encouragement of irrigation, and the building of the Panama Canal by the United States.

In 1908 the National convention was held at Chicago, June 16 to 19. William H. Taft, of Ohio, was nominated for President, and James S. Sherman, of New York, for Vice-President. The platform adopted de-

**Republican Party—Continued.**

clared in favor of equality of opportunity; revision of the tariff; a more elastic currency; the establishment of postal savings banks; an employers' liability law; amending the rules of procedure in Federal courts; conserving the natural resources of the country; the extension of foreign commerce, etc. Taft and Sherman received a plurality of 1,233,494 of the popular vote, and a majority in the electoral college of 269.

The national convention of the party met in Chicago in June, 1912, and nominated President Taft for President and James S. Sherman for Vice-President. The platform adopted declared in favor of upholding the courts, for sound banking laws and the usual declaration in favor of the tariff. By the defection of ex-President Roosevelt and his followers, who formed the Progressive party, the Republican ticket was defeated in 1912, and a Democratic president and Congress was elected.

**Republican Party in Pennsylvania.**—A party organized in that State in the period before the adoption of the Constitution of the United States to advocate a stronger form of Federal government than that comprehended by the Articles of Confederation. It formed the germ of the Federal party in Pennsylvania. The Republicans were opposed by the Constitutionalists.

**Republican River,** bridge over, reconstruction of, recommended, 4777.

**Republican Valley Railroad,** right of way across Otoe and Missouri Reservation, Nebr., for, bill for, 4681.

**Repudiation.**—The refusal of a State or government to pay or to be bound by debts contracted by a previous administration. In 1790 the debts of all the States of the Union were assumed by the National Government, partly on the ground of justice, because they had been contracted in the prosecution of the Revolutionary War, and partly on the ground of expediency, as this action tended to strengthen the credit of the States. For 40 years thereafter the States remained almost free from debt. Bonds of the several States were easily disposed of abroad, and by 1840 an aggregate of \$200,000,000 had been sold. In that year Indiana found it impossible to pay the interest on her outstanding bonds, and it was only by strong efforts that Ohio managed to meet her obligations. In 1842 the Bank of Pennsylvania failed, and

soon afterwards Pennsylvania, Maryland, Mississippi, Michigan, Louisiana, Indiana, and Illinois found themselves almost bankrupt. They all suspended payment of interest on their debts, but Mississippi, Michigan, Louisiana, and North Carolina felt constrained to repudiate the capital as well as interest.

It was in Mississippi that the word "repudiation" originated in this connection. Governor McNutt, in a message to the legislature, suggested a plan for "repudiating the sale of certain of the State bonds on account of fraud and illegality." The bonds fell into default and an appropriation for their payment was overwhelmingly defeated at the polls in 1852. Michigan repudiated certain canal bonds. The Southern States came out of the Civil War with heavy indebtedness and diminished resources, and were in some instances almost bankrupt. In the years immediately following the close of the Civil War most of the Southern States compromised or readjusted their bonded indebtedness, and in some States the legislature declared certain bonds fraudulent, illegal, and void. During the depression following the panic of 1873 some cities, towns, and countries endeavored to repudiate their bonds, but the Supreme Court of the United States gave judgments against them.

The eleventh amendment forbids suits against the States. In 1903 certain of the repudiated bonds of North Carolina came into the possession of the State of North Dakota, and North Carolina was sued in the Supreme Court by the latter State for payment. The Supreme Court, by a decision of Feb. 1, 1904, held that North Carolina was liable for and must pay both principal and interest on the bonds in question. Some European countries have also at times repudiated their obligations.

**Requisitions.**—Under the Articles of Confederation the Continental Congress had only one means of raising money—by requisitions upon the States. Between 1782 and 1786 requisitions amounting to more than \$6,000,000 had been made. Only one-sixth of this had been paid by March, 1787. Under the Constitution the President may make requisitions upon the States for men to assist the National Government in time of war, but there is no provision for requisitions of money. Instead that instrument provides for the expenditures

**Requisitions—Continued.**

of the Government by duties on imports and taxes collected from the citizens.

**Resaca (Ga.), Battle of.**—March 14, 1864, Gen. Sherman was placed in command of the military Division of the Mississippi, which was composed of the Army of the Cumberland, under Maj.-Gen. Thomas; the Army of the Tennessee, under Maj.-Gen. McPherson, and the Army of the Ohio, under Maj.-Gen. Schofield, and numbered a total of 98,797 men and 254 guns. The Confederate forces under Gen. Johnston were estimated at 60,000. After the battle of Chattanooga the Confederates had retreated to Dalton, Ga., 39 miles southeast of Chattanooga and 99 miles northwest of Atlanta. May 4, Sherman made a demonstration in front of the Confederate position on Rocky Face Mountain, northeast of Dalton, while McPherson, with some 40,000 men, attempted to turn the Confederate left and occupy Resaca. Johnston thereupon, on May 13, evacuated Dalton and fell back upon Resaca. Polk was posted on Johnston's left, resting on the Oostanaula River, Hardee in the center, and Hood on the right. Sherman laid a pontoon bridge across the Oostanaula and sent a division across to threaten Johnston's connections with Rome, while the main body of the army pressed Resaca in front. May 14 an attack by a portion of Sherman's force was repulsed with a loss of 1,000 men. Johnston attempted to turn Sherman's left flank, which gave McPherson a good position, to recover which the Confederates fought stubbornly till 10 o'clock at night. Skirmishing was renewed the next morning and continued all day. During the night of the 15th Johnston again retreated. Sherman's losses during the two days were between 4,000 and 5,000 in killed, wounded, and missing. Johnston's losses aggregated 2,500.

**Resaca de la Palma (Tex.), Battle of.**

On May 9, 1846, the day following the battle of Palo Alto, Gen. Taylor's army of 2,200 proceeded on the way toward Fort Brown. When about three miles from the Rio Grande River, Arista's army of 5,000, which had been slowly retreating before the advancing Americans, halted in the valley of Resaca de la Palma (dry river bed of the palm) and prepared to give battle. At 3 o'clock in the afternoon the action began. Before dark the Mexicans were completely

routed. They fled in disorder across the river to Matamoros. Eight pieces of artillery, large quantities of ammunition, 3 standards, and about 100 prisoners, including Gen. La Vega and other officers, fell into the hands of the Americans. The total casualties in the Mexican army were 755. The American loss was 107.

**Resaca de la Palma, Tex.,** battle of, referred to, 2295, 2300, 2342.

**Reservations.** (See Indian Reservations; Lands, Indian; Military Reservations; Reservations, Public; Washington City.)

**Reservations, Public:**

Discussed, 6346.

Lands set apart as, by proclamation of President—

Cleveland, 5859, 5864, 6122, 6205, 6207, 6209, 6211, 6213, 6215, 6216, 6218, 6219, 6221, 6222, 6225, 6227.

Harrison, Benj., 5577, 5590, 5595, 5686, 5695, 5705, 5719, 5722, 5786, 5792, 5795, 5797, 5804, 5810, 5811, 5814, 5815.

**Resolute, The,** restoration of, to British Government, discussed, 2953.

**Restoration of Southern States** (see also Reconstruction):

Acts regarding, vetoed. (See Reconstruction.)

Discussed by President Johnson, 3551, 3570, 3593, 3643, 3696, 3729, 3734, 3756, 3781, 3846, 3848, 3870.

Provisional governor appointed for—

Alabama, 3521.

Florida, 3527.

Georgia, 3516.

Mississippi, 3512.

North Carolina, 3510.

South Carolina, 3524.

Texas, 3519.

**Resumption.** (See Specie Payments.)

**Returning Boards.**—Boards established in certain States for the purpose of canvassing the returns of an election. The reconstructed State governments of South Carolina, Florida, and Louisiana created by statute returning boards to canvass and certify to the returns of elections held in those States. In violation of the generally accepted principle of State government, these returning boards were clothed with judicial as well as ministerial powers. This subject is of interest chiefly in relation to the Presidential election of 1876, in which the result depended upon the action of these boards.

**Revenue-Cutter Service:**

Act relating to revenue cutters and steamers vetoed, 2219.

Land reserved for use of, 6741.

Organization of, 1088.

**Revenue-Cutter Service—Continued.**

Retirement of officers in, 6748.

Steam vessels in, employment of, recommended, 1121.

(See also Treasury Department of.)

**Revenue Flag.**—The last act of the Fourth Congress, March 2, 1799, was to pass a law to regulate the collection of duties and tonnage and to establish ports of entry. In order that the vessels of the collection officers might be easily recognized, Congress ordered that vessels in the revenue service carry a flag of 16 perpendicular stripes, alternate red and white, the union of the ensign bearing the arms of the United States in dark blue on a white field beneath a semicircle of 13 blue stars.

**Revenue Inspectors**, salary of, 127.

**Revenue Laws.** (See Revenue, Public.)

**Revenue Officers**, official conduct of, referred to, 912.

**Revenue, Public.**—In a political sense the revenue of a State is the annual income derived from taxation, customs, and other sources, to be appropriated to governmental expenditures. The principal sources of revenue of the United States are customs, internal revenue, sale of public lands, and miscellaneous receipts. Customs receipts have always formed the bulk of the revenue. In 1789 the total revenues of the Government amounted to \$4,410,000. This total gradually swelled to \$56,000,000 in 1860. Then the increased duties of all kinds, imposed as war measures, augmented the revenues to hundreds of millions, reaching the maximum of \$520,000,000 in 1866. Then it declined to an average of about \$350,000,000 between 1878 and 1898. In 1901 the revenue, increased by a Spanish-American War tax, was \$587,685,338. Since the war the public revenue has declined slightly, all the war taxes have been removed and the large revenue is due to the prosperous condition of the country. The ordinary receipts for the year 1908 amounted to \$601,126. This sum was increased by receipts of loans and treasury notes to \$807,017,367.

**Revenue, Public** (see also Finances; Import Duties; Taxation):

Act—

Designating and limiting funds receivable for, reasons for applying pocket veto to, 1501.

To provide for collection, safe-keeping, and distribution of, by fiscal corporation vetoed, 1921.

By direct taxation, 265, 268.

Collection and disbursement of, free

from defalcation, discussed, 5542, 5746.

Custody and distribution of, discussed by President—

Polk, 2352, 2406, 2498.

Tyler, 1896, 1937.

Van Buren, 1541, 1596, 1707, 1757, 1827.

Deposits of, in banks referred to, 1916.

Derived from public lands. (See Lands, Public.)

Diminution of, 461, 480, 675, 923.

Disbursements of, referred to, 1810.

Discussed. (See Finances Discussed.)

Duties for raising. (See Import Duties.)

Embezzlement of, referred to, 2212. (See also Defalcation.)

Expenses incurred in collection of, referred to, 2563.

Changes made in, productive of good results, 1247.

Evil effects of, discussed, 1459.

Tariff for raising. (See Import Duties.)

**Revised Statutes:**

Appointment of commission to prepare, recommended, 2671, 2714.

Preparation of, and recommendations regarding, 3250.

Referred to, 4687.

**Revolution.**—The overthrow of an established political system or a radical change of government effected by extra legal means is known as a political revolution. Among the most important revolutions of modern history are the English Revolution of 1642-1649, which culminated in the execution of Charles I and the establishment of the Protectorate under Cromwell; the second English Revolution, resulting from the Stuart tyranny after the Restoration known as the "Glorious Revolution of 1688," which, under William III, firmly established the principles of free constitutional government in Great Britain; the American Revolution which resulted in the establishment of the Republic of the United States in 1776; the French Revolution, which broke out in Paris in 1789 and was followed by a reign of blood and terror, terminating with the execution of Robespierre in 1794; the French Revolution of 1830, which exiled Charles X and elevated Louis Philippe to the throne; the uprising of the French people in 1848, which deposed Louis; the Italian Revolution of 1859-60, whereby the various minor sovereigns of the peninsula were driven into exile and the whole territory came

under the dominion of King Victor Emmanuel; the insurrections which established the third French Republic in 1870 and the Republic of Brazil in 1889.

**Revolutionary Convention.** (See Convention, Revolutionary.)

**Revolutionary Pensions.** (See Pensions.)

**Revolutionary War.**—The war for redress of grievances, and later for independence, waged by the thirteen American Colonies against the mother country, Great Britain. The Revolution had several causes. Increase in population in America naturally caused a desire for independence, especially after the expulsion of the French. In 1763 the Government of George III resolved to enforce more strictly the navigation act and other laws restricting American trade in the interest of England, to station garrisons in America, and to pay a part of the expense by a stamp tax. The Stamp Act aroused violent opposition, expressed through the Stamp Act Congress of 1765. Taxation without representation in Parliament was declared illegal and tyrannous. The British Government persisted in the principle, taxing various imports from 1767 to 1770 and tea thereafter. The Boston Tea Party led Parliament to pass acts retaliating on that city and altering the charter of Massachusetts. The Colonies were by this time united, through their committees of correspondence, in opposition to the Crown. Sept. 5, 1774, the First Continental Congress was convened in Philadelphia. It published a declaration of rights, protested to the King and Parliament, and entered into a non-importation agreement. April 19, 1775, Gen. Gage, the British commander in Boston, met with the first armed resistance at Lexington and Concord, and war was begun. The Colonists were assisted by France, Spain, and in the later years of the struggle, by the Netherlands.

Following are the principal events of the Revolution: Boston Massacre, March 5, 1770; Boston Tea Party, Dec. 16, 1773; First Continental Congress, Sept. 5, 1774; battles of Lexington and Concord, April 19, 1775; meeting of the Second Continental Congress and capture of Ticonderoga, May 10; Mecklenburg Declaration of Independence, May 20; battle of Bunker Hill, June 16 and 17; evacuation of Boston March 17, 1776; British repulse off Charles-

**Revolutionary War—Continued.**

ton, June 28; Declaration of Independence, July 4; battle of Long Island, Aug. 27; battle of White Plains, Oct. 28; loss of Forts Washington and Lee, retreat through New Jersey and battle of Trenton, end of 1776; battle of Princeton, Jan. 3, 1777; battle of Bennington, Aug. 16; battle of Brandywine, Sept. 11; battle of Stillwater, Sept. 19; battle of Germantown, Oct. 4; battle of Saratoga, Oct. 7; Burgoyne's surrender, Oct. 17; adoption of the Articles of Confederation, Nov. 15; treaty with France, Feb. 6, 1778; battle of Monmouth, June 28; storming of Stony Point, July 16, 1779; victory of Paul Jones, Sept. 23; British capture Charleston, May 12, 1780; battle of Camden, Aug. 16; Arnold's treachery exposed, Sept. 23; battle of King's Mountain, Oct. 7; battle of the Cowpens, Jan. 17, 1781; Articles of Confederation ratified by the last of the States, March 1; battle of Guilford Court-House, March 15; battle of Eutaw, Sept. 8; surrender of Cornwallis at Yorktown, Oct. 19; peace of Paris, Sept. 3, 1783; evacuation of New York, Nov. 25, 1783. The United States then comprised the territory from Canada to Florida and from the Atlantic Ocean to the Mississippi River. The total number of enlistments in the American army during the war was 368,410; the total cost was \$135,193,703.

**Revolutionary War:**

**Rhode Island.**—One of the thirteen original States of the Union and the smallest of the United States; nicknamed, "Little Rhody"; motto, "Hope." It lies between lat. 41° 18' and 42° 1' north (not including Block Island) and long. 71° 8' and 71° 53' west. It is bounded on the north and east by Massachusetts, on the south by the Atlantic Ocean, and on the west by Connecticut, and has an area of 1,250 square miles. It is an important manufacturing State, being first in proportion to its population in the manufacture of cotton, woolen, worsteds, etc., and second only to Massachusetts in the production of cotton goods.

It was visited by Verrazano in 1524 and probably by Norse navigators in the twelfth century. Roger Williams made the first permanent settlement at Providence in 1636. The first charter was granted in 1643 and a more liberal one in 1663. Rhode Island ratified the Federal Constitution in 1790. The official name of the State is "The State of Rhode Island, and Providence Plantations." Statistics of agriculture reported to the Federal Census bureau under date of April 15, 1910, place the number of farms in the State at 5,292, comprising 443,308 acres, valued, with stock and improvements, at \$32,990,739. The value of domestic animals, poultry, etc., was \$3,276,472, including 34,148 cattle, valued at \$1,309,088; 9,547 horses, \$1,424,177; 14,038 swine, \$123,647; 6,789 sheep, \$32,637; poultry, \$368,018. The yield and value of field crops in 1911 was: Corn, 11,000 acres, 495,000 bushels, \$470,000; oats, 2,000 acres, 58,000 bushels, \$34,000; potatoes, 5,000 acres, 550,000 bushels, \$583,000; hay, 61,000 acres, 61,000 tons, \$1,470,000. Stone is the principal mineral product of the State. Manufacturing made great progress during the decade ending in 1910 when the last census was taken. At the end of this period there were 1,944 estab-

**Rhode Island—Continued.**

ishments, with an aggregate capital of \$289,416,000, consuming raw materials which cost \$158,652,000, paying wages totalling \$18,130,000 to 112,565 employees, and selling the output for \$279,438,000. The leading industry is cotton spinning, 2,055,912 spindles, capitalized at \$42,527,584, producing an output of \$30,628,843. In worsted goods manufacture \$38,789,543 was invested, which produced \$44,477,596. Foundries capitalized at \$23,728,205 produced a finished product valued at \$13,959,283. The dyeing and finishing industry, closely allied with the textile manufactories, involved \$16,969,936 capital and added \$9,981,457 to the value of goods. Jewelry manufacture is capitalized at \$11,199,233, and produces an output selling at \$14,431,756. The manufacture of silverware is capitalized at \$8,552,489, and produces \$5,323,264. The latest industry to take on large proportions is the manufacture of rubber goods. The bonded debt of the State in 1910 was \$4,800,000. The real and personal property was valued at \$511,960,122. The receipts and expenditures of the State treasurer each vary between \$2,000,000 and \$2,500,000. The population, according to the federal census of 1910 was 542,610. **Rice.** (See Agricultural Products.)

**Rich Mountain (W. Va.), Battle of.**—Soon after the ordinance of secession

had been ratified by the State of Virginia, Maj-Gen. George B. McClellan, who had been assigned to the command of the Federal forces in the Department of the Ohio, issued an address to the loyal citizens of western Virginia. Many enlistments from that State followed, and he determined to occupy at least part of it with Federal troops. Accordingly, May 23, 1861, the First Virginia Regiment, 1,100 strong, which had been organized in Cincinnati by Virginians, crossed the Ohio with the Fourteenth and Sixteenth Ohio regiments and took possession of Parkersburg. The Confederates, commanded by Governor Wise under the immediate direction of Col. Porterfield, retired after several skirmishes to the base of Rich Mountain, near Beverly, in Randolph County. McClellan's forces in the neighborhood amounted to more than 30,000 men on July 4, while the Confederates could scarcely muster 10,000. July 11, Gen. Rosecrans made a detour of the mountain and forced the surrender of 600 men under Col. Pegram, and Gen. McClellan defeated the main body of the Confederates under Gen. Garnett. The Union losses in the actions at Rich Mountain were 11 killed and 35 wounded. The loss to the Confederates was 200 killed and 1,000 prisoners. Seven pieces of artillery also fell into the hands of the Union forces.

**Richardson, Harry Alden;** b. Camden, Del., Jan. 1, 1853; after the death of his father, in 1894, Mr. Richardson assumed control of a canning establishment, which he has since managed; elected to the United States Senate in January, 1907, to represent Delaware.

**Richardson, Israel B.,** major-general in Army, nomination of, and reasons therefor, 2697.

**Richardson, James D.,** resolution authorizing compilation of Messages and Papers of the Presidents by. (See Preface, Volume One.)

**Richardson, William,** b. Athens, Limestone Co., Ala.; was in the Confederate army; was severely wounded at battle of Chickamauga and paroled in April, 1865, in Marietta, Ga.; representative in the general assembly of Alabama, 1865-67; judge of the court of probate and county court of Madison Co., Ala.; elected to fill an unexpired term in the 56th Congress; elected to the 57th, 58th, 59th, 60th, 61st and 62d Congresses from Alabama.

**Richmond, James C.**, application of, for redress of wrongs, 2772.

**Richmond (Ky.), Battle of.**—After the Confederates had evacuated Corinth, Miss., in the summer of 1862, they began to concentrate in the vicinity of Chattanooga, Tenn. By the middle of August they had collected an army estimated at from 55,000 to 65,000 under Gen. Braxton Bragg. Gen. E. Kirby Smith, with about 20,000 men, passed up the Cumberland Mountains on the east, and, going through the gaps, invaded Kentucky. At Richmond he encountered Gen. Manson (Aug. 30), who was defending the place with a garrison of Buell's army. Manson was defeated and Smith proceeded to Frankfort. Loss, about 5,000 on each side.

**Richmond, Va.**, Government of Confederate States transferred to, 3225.

**Riddells, Bennett**, consul to Chihuahua, Mexico, nomination of, and reasons therefor, 2587.

**Riders.**—Objectionable legislative measures likely to be vetoed if passed as separate bills, but which are made part of important bills, such as appropriations for current expenses, etc., in order to insure Executive sanction. The rider is an encroachment on the independence of the Executive. In many of the States a rider has been made an impossibility by confining each bill to a single subject or by permitting the veto of single clauses of appropriation bills. It has never been prohibited in Congress. Riders were numerous during the anti-slavery contest, the Civil War, and the conflict with President Johnson. A number of important bills have been passed as riders, among them the bill increasing salaries in 1873. The first use of the rider of national importance was the joining in 1820 of the bill for the admission of Maine to that permitting slavery in Missouri, so as to compel the acceptance of both or neither. These were afterwards separated. The Army appropriation bill of 1856 as sent from the House to the Senate had a rider prohibiting the employment of Federal troops for the enforcement of Territorial law in Kansas. Riders were added to all appropriation bills by the Democratic majority in the House during the first session of the Forty-seventh Congress in 1879; but all these bills were vetoed by the President and were finally passed without riders. The Platt Amend-

ment (see Cuba) was a rider to the Army Appropriation Bill of 1901.

**Rifle Practice**, commended to attention of soldiers and civilians, 7450, 7616.

**Right of Asylum**, discussed by President—

Cleveland, 5961.

Johnson, 3883.

**Right of Search.**—Great Britain has always claimed the right to search vessels of other powers upon the high seas for deserting English sailors and for contraband goods in time of war. This has not been exercised with regard to the vessels of the United States since the War of 1812, though nothing was said in the treaty of Ghent about search and impressment of sailors. Before that war this right was exercised and search was made for deserting English sailors, and many American seamen were impressed as deserters from the English navy, and search was made for such goods as were declared subject to confiscation in accordance with the paper blockade of the continent and the orders in council. This was one of the grievances that brought on the War of 1812. The right of search for the purpose of suppressing the slave trade was carefully regulated by several treaties between Great Britain and the United States.

**Right of Search:**

**Riordan, Daniel J.;** b. in Hester street, New York City, 1870; elected to the State senate in 1902, 1904 and 1906; elected a member of the 56th Congress, to serve unexpired term, and to the 60th, 61st and 62d Congresses from New York.

**Biots at Chicago,** proclamation regarding, 5931.

**River and Harbor Bills.**—There has always been some objection to appropriations for the improvement of rivers and harbors on the ground that the benefits, while mostly local, are paid for out of the general Treasury. The first bill for harbor improvements in the United States was passed March 3, 1823. Since 1854, appropriations for the improvement of rivers and harbors were frequently inserted in the regular appropriation bill. Separate bills for this purpose were vetoed by Presidents Tyler (2183), Polk (2310), Pierce (2789), and Grant (4336). In 1870 a \$2,000,000 appropriation was made. This was the largest up to that time. After this they gradually increased until they reached nearly \$19,000,000 in 1882-83. President Arthur vetoed the bill carrying this appropriation (4707), but it was passed over his veto. Biennial appropriations have since been the rule.

The appropriation for 1891 was \$25,000,000. The expenditures of 1896, including the direct appropriations of about \$30,000,000 and the contracts for future expenditures, amounted to a total of about \$80,000,000. The bill carrying this amount was vetoed by President Cleveland (6109), but was passed over his veto. River and harbor bills have since been passed in 1899, 1900, 1902, and 1905.

**River Crow Indians.** (See Indian Tribes.)

**River Raisin (Mich.), Battle of.**—After Col. Lewis had occupied Frenchtown, Mich., Jan. 18, 1813, with 650 men, he was reinforced by Gen. Winchester with about 300 from the latter's camp on the Maumee River. These were stationed along the river outside the town. Before daylight on the morning of Jan. 22 they were attacked by 500 British under Col. Proctor, and 600 Indians under Round Head and Walk-in-the-Water. Some 200 Americans were killed or wounded in battle or massacred after their surrender and Winchester and 700 men were made prisoners. Only 33 of Winchester's detachment which arrived at Frenchtown are known to have escaped. The British lost 24 killed and 158 wounded.

**Rivera, Luis M.,** b. Barranquitas July 17, 1859, and educated in the public schools; early in life he engaged in cigar manufacturing and general business; at the age of 20 his writings were already published by the most progressive papers of the country; at 30 he founded *La Democracia*, a daily newspaper in Ponce, for the purpose of opposing the Spanish colonial régime; subjected to persecutions by the Government, because of his patriotic activities; in 1896 he was sent to Madrid as a special representative of his party, for the purpose of consummating an agreement with the Liberal Party of Spain for the establishment of home rule for Porto Rico; founded the Liberal Party in 1897; during this year Queen Maria Christina decreed an ample system of self-government for the island, and he was appointed secretary of state, and subsequently president of the cabinet; when American sovereignty was declared in 1898 he was serving in this latter capacity; he presented his resignation to Gen. Brooke, military governor, who declined to accept it, and he continued in the cabinet until 1899, when that system of self-

**Rivera, Luis M.—Continued.**

government was changed by Gen. Henry, who succeeded Gen. Brooke; then he came for the first time to Washington as the representative of his party and of the farming interests of the islands, in order to procure free-trade relations between the United States and Porto Rico; returning to Porto Rico in 1900, he organized the Federal Party; one year later he came to New York and established *The Puerto Rico Herald*, which paper was published in that city for a period of four years; at the dissolution of the Federal Party in 1904, he organized the Unionist Party; three times he was chosen to the lower house of the legislature in Porto Rico; in 1910 he was elected Resident Commissioner to Washington from Porto Rico.

**Roads, Post.** (See Mail Routes.)

**Roads, Public.**—The Sixty-second Congress made an initial appropriation of \$500,000 to aid the States in im-

proving public highways and an additional sum of \$25,000 was voted for a committee to investigate the subject of federal aid in State road-building. This appropriation makes available about \$8,000 to each State that shall appropriate twice the amount from its own funds for the purpose. It is not intended to construct new roads, but to improve existing ones upon a uniform plan and to connect the highways of each State with those of its neighbors, so that the result may become a network of interstate highways.

While the agricultural population will be the greatest beneficiaries the enterprise has been promoted largely by the automobile owners. It has been stated that more than a thousand automobiles travelled across the country during 1912, incidentally distributing \$1,000,000 in patronage.

The first American road law was passed by the General Assembly of Virginia in 1632, and the first American road built by white men was at Jamestown, a few years later; in New England the path between Boston and Plymouth was begun in 1639; in the Province of New York laws for road building were passed in 1664; two years later the first Maryland road law came into existence and Pennsylvania followed in 1692, with a road act, placing the control of highways in the hands of townships, and this State is credited with the first important macadam road built in America—the Lancaster turnpike, from Lancaster to Philadelphia—which was constructed in 1794.

The earliest authentic record of permanent roads is found in Egypt. A little to the east of the great pyramid were discovered the remains of the Giant Causeway more than a mile in length. This is supposed to be a portion of the great highway built by King Cheops for the purpose of affording a passage across the sand for the transportation of the stone used in the construction of the great pyramids. This is doubtless the road on which Herodotus tells us the Great King employed 100,000 men for a period of ten years. It was built of massive stone blocks ten feet thick and was skirted on each side with mausoleums, temples, porticos and statues.

The Persians probably learned the art of road building from the Babylonians, who built the first stone bridges and constructed a system of military roads throughout their em-

**Roads, Public—Continued.**

pire. There were two branches of a great road leading from Babylon to Syria, and historians say that a moderate toll was exacted.

The Romans were the first systematic road builders of the world. The first of their great roads was constructed from Rome to Capua, a distance of 142 Italian miles by Claudius Appius, about 312 B. C., and is known as the Appian Way, or "The Queen of Roads." This road was later extended to Brundisium, about 360 miles, and was probably completed by Julius Caesar. About 220 B. C. the Flaminian Way was built. This road is of great interest because of its stone arch bridge across the River Nar, 60 miles from Rome. The central arch had a span of 150 feet and a rise of 100 feet, and has been pronounced the stateliest ruin in Italy. After the completion of the Flaminian Way road building progressed rapidly until Rome reached the height of her glory, when there were twenty-nine great military roads centering in the city. They represented the visible efforts of a nation for the preservation and extension of her national glory.

The majority of the main Roman highways were built by contract at public expense. They were maintained in part by the labor of soldiers and convicts or slaves, or by enforced service, which, in some instances, took the form of taxation. But in whatever form the maintenance, it was at the expense of the district through which the road passed. Tolls as a means of repairing highways were unknown to the Romans. The supervision of the roads was intrusted to men of the highest rank. Augustus himself seems to have made those about Rome his special care. Cross roads were placed in charge of the local magistrates, although occasionally a portion of a road was assigned to some landowner to maintain at his own cost.

The present road system of France was founded by Napoleon. He built many roads through the empire, among them the road over the Simplon Pass, which was commenced in 1800 and required six years for completion. It was under him that the work was systematized and placed in the hands of a permanent body of engineers.

In 1775 Tresaguet, a French engineer, published a treatise on broken stone roads. His work preceded that

of Macadam and Telford by about forty years.

The first record of road legislation in England goes back as far as 1285, and it provides that the trees and bushes on both sides of all roads for a distance of 200 feet shall be cut away to prevent robbers from lurking therein and rushing upon victims un-awares.

In 1346 Edward III. authorized the first toll to be levied for the repair of roads. This commission was granted to the master of the Hospital of St. Giles and to John Holborn, authorizing them to levy toll on vehicles passing on the roads leading from the hospital to the old Temple of London, and also on an adjoining road called the Portal. In 1523 Parliament passed its first act relative to the repair of roads. But it was not until near the middle of the eighteenth century that highway legislation became active.

State highway construction and State aid for local highway improvements are being carried on by a number of States on a large scale. Massachusetts and New Jersey, which began State aid or work in the early nineties, continue to improve, while New York, Pennsylvania, Maryland and California are carrying on extensive operations, and altogether more than half the States of the Union have taken up highway improvement in some form. At the beginning of 1912 Massachusetts had built more than 880 miles of road at a cost of about \$9,000 per mile. In Delaware a State highway has been laid out from a point on the southern boundary to a point near Wilmington in the north, about a hundred miles. This road is to be built under the direction and at the expense of General Coleman Du Pont. New York State in 1912 voted an appropriation of \$50,000,000 for the purpose of road building.

**Roanoke Island (N. C.), Expedition to.**

—Butler's Hatteras expedition of Aug. 26, 1861, had opened Pamlico Sound and the Confederates had retired to Roanoke Island. This island is about 10 miles long and was the key to all the rear defenses of Norfolk. Four-fifths of the supplies for Norfolk passed its guns. It was defended by Gen. Wise with 3,000 men. Jan. 7, 1862, Gen. Burnside was ordered to unite with Flag Officer Goldsborough, in command of the fleet at Fortress Monroe, capture Newbern, reduce Fort Macon, and seize the Wilmington and Weldon

**Roanoke Island (N. C.), Expedition to.**  
—*Continued.*

railroad. On the night of Jan. 11 the expedition arrived off Hatteras and encountered a terrific storm. Several transports were lost and the *City of New York*, with her cargo, worth a quarter of a million dollars, went to pieces. By Feb. 7 the remainder of the expedition had crossed the bar and proceeded up Croatan Channel. The Confederate fleet was driven up the channel. Their flagship—the *Curtlew*—was set on fire by a shell and Burnside landed 10,000 men on Roanoke Island. The garrison of 2,675 officers and men was captured and the Confederate fleet pursued to Elizabeth City and destroyed. Burnside lost 250 men.

**Roanoke Island, N. C.**, thanks of President to forces capturing, 3305.

**Robert College**, establishment of, at Constantinople referred to, 3900.

**Roberts, Edmund**, treaty with Siam concluded by, 1272.

**Romeo, Matias,** Mexican minister to United States, mentioned, 4957.

**Roorback.**—A general term for political forgery, or a fictitious report for political purposes, generally promulgated before an election. The name comes from a certain political story circulated in 1844 as an extract from Baron Roorback's *Tour Through the Western and Southern States*.

**Roosevelt, Theodore,** (twenty-seventh President of the United States):

Roosevelt became President on the death of President McKinley, and took the oath of office Sept. 14, 1901. At the Republican National Convention, at Philadelphia, in 1900, President McKinley received the whole 730 votes in nomination for President, and Roosevelt received 729 (he not voting). Roosevelt was the fifth Vice-President to succeed to the Presidency by the death of the President in office, and the third to succeed by the death of the President by assassination. The Republican party in National Convention at Chicago, June 22, 1904, nominated President Roosevelt by acclamation. The platform of 1904 rehearsed the recent performances of the Republican administrations, the gold standard established, the results in the Philippines, the beginning of the Panama Canal, irrigation of arid lands, increase of the navy; pledged the enforcement of anti-trust laws; reaffirmed protection; favored extension of reciprocity; upheld the gold standard; urged the increase of the merchant marine; declared for a larger navy; endorsed the exclusion of Chinese labor; declared for civil service reform; favored international arbitration; urged inquiry into the constitutionality of negro enfranchisement; advocated equal laws for labor and capital; paid a tribute to the memory of President McKinley; and eulogized President Roosevelt. The Democratic National Convention at St. Louis, July 9, nominated Alton

**Roosevelt, Theodore—Continued.**

B. Parker on the first ballot over William R. Hearst. The Prohibition party, at Indianapolis, June 30, nominated Silas C. Swallow by acclamation. The People's party, at Springfield, Ill., nominated Thomas E. Watson by acclamation. The Socialist party, at Chicago, May 5, nominated Eugene Debs by acclamation. The Socialist Labor party, at New York, July 4, nominated Charles H. Corrigan by acclamation. The United Christian party, at St. Louis, May 2; the Continental party, at Chicago, Sept. 1; and the National Liberty (Negro) party, at St. Louis, July 7, placed candidates in the field. The popular vote ran: Roosevelt, 7,623,486; Parker, 5,077,971; Debs, 402,283; Swallow, 258,536; Watson, 117,183; and Corrigan, 31,249. The electoral vote gave Roosevelt 336 and Parker 140.

*Political Complexion of Congress.*—In the Fifty-seventh Congress (1901-1903) the Senate, of 91 members, was composed of 29 Democrats, 56 Republicans, 1 Populist, 1 Silver party, 1 Fusionist, and 2 vacancies; and the House of 357 members, was made up of 153 Democrats, 198 Republicans, 3 Populists, 1 Silver party, 1 Fusionist, with 2 vacancies. In the Fifty-eighth Congress (1903-1905) the Senate, of 90 members, was composed of 32 Democrats and 58 Republicans, and the House, of 382 members, was composed of 174 Democrats, 206 Republicans, 2 Union Labor, with 2 vacancies. In the Fifty-ninth Congress (1905-1907) the Senate, of 90 members, was composed of 32 Democrats and 58 Republicans; and the House, of 386 members, was made up of 136 Democrats and 250 Republicans. In the Sixtieth Congress (1907-1909) the Senate, of 92 members, was composed of 31 Democrats and 61 Republicans; and the House, of 386 members, was made up of 164 Democrats and 222 Republicans.

*Party Affiliation.*—President Roosevelt from his earliest connection with politics was attached to the Republican party. In his earliest days, as a representative to the State legislature of New York, he maintained a large degree of independence; yet he was chosen a delegate to the National Republican Convention in 1884, and was chairman of the delegation. He was an independent Republican in 1886, as a candidate for the mayoralty of the City of New York. His

identity with the Republican party became very close during the Harrison administration and as Assistant Secretary of the Navy under McKinley in 1897. In 1898 he was the Republican Governor of the State of New York.

*Tariff.*—President Roosevelt, in his First Annual Message (page 6650) said: "There is general acquiescence in our present tariff system as a national policy. The first requisite to our prosperity is the continuity and stability of this economic policy. . . . Our experience in the past has shown that sweeping revisions of the tariff are apt to produce conditions closely approaching panic in the business world. . . . Reciprocity must be treated as the hand-maiden of protection. Our first duty is to see that the protection granted by the tariff in every case where it is needed is maintained, and that reciprocity be sought for so far as it can safely be done without injury to our home industries." In his second Annual Message (page 6752) the President seeks to refute the argument that a reduction of the tariff would curb trusts. He says: "Many of the largest corporations, many of these which should certainly be included in any proper scheme of regulation, would not be affected in the slightest degree by a change in the tariff save as such change interfered with the general prosperity of the country. The only relation of the tariff to big corporations as a whole is that the tariff makes manufactures profitable, and the tariff remedy proposed would be in effect simply to make manufactures unprofitable. To remove the tariff as a punitive measure directed against trusts would inevitably result in ruin to the weaker competitors who are struggling against them." As a corrective to conditions, the President advises the extension of reciprocity treaties. "Wherever the tariff conditions," he says, "are such that a needed change can not with advantage be made by the application of the reciprocity idea, then it can be made outright by a lowering of the duties on a certain product." In his Special Session Message of Nov. 10, 1903, the President discusses the proposed reciprocity treaty with Cuba. In his Sixth Annual Message (page 7430) the President says: "I most earnestly hope that the bill to provide a lower tariff for or else absolute free trade in Philippine products will become a

**Roosevelt, Theodore—Continued.**

law. No harm will come to any American industry; and while there will be some small but real material benefit to the Philippines, the main benefit will come by the showing made as to our purpose to do all in our power for their welfare." In his Seventh Annual Message (page 7463) on tariff revision, the President says: "This country is definitely committed to the protective system and any effort to uproot it could not but cause widespread industrial disaster. . . . But in a country of such phenomenal growth as ours it is probably well that every dozen years or so the tariff laws should be carefully scrutinized so as to see that no excessive or improper benefits are conferred thereby, that proper revenue is provided, and that our foreign trade is encouraged. . . . This means that the subject can not with wisdom be dealt with in the year preceding a Presidential election, because, as a matter of fact, experience has conclusively shown that at such a time it is impossible to get men to treat it from the standpoint of public good. In my judgment the wise time to deal with the matter is immediately after such election." In the same message the President favored the incorporation of both income tax and inheritance tax as a part of the system of Federal taxation. On page 7479, the President says: "There should be no tariff on any forest product grown in this country, and in especial there should be no tariff on wood pulp."

**Civil Service.**—In his First Annual Message President Roosevelt (page 6670) urged appointment in all possible cases upon the merit system, which he maintained was the only fair test of fitness; "all applicants should have a fair field and no favor, each standing on his merits as he is able to show them by practical test. In my judgment," he says, "all laws providing for the temporary employment of clerks should hereafter contain a provision that they be selected under the Civil Service Law." In his Third Annual Message (page 6877) the merit system is reported as working most satisfactorily: "The completion of the reform of the civil service is recognized by good citizens everywhere as a matter of the highest importance, and the success of the merit system largely depends upon the effectiveness of the rules and the machinery provided for their

enforcement." In his Fifth Annual Message (page 7391) the President says: "The question of politics in the appointment and retention of the men engaged in merely ministerial work has been practically eliminated in almost the entire field of Government employment covered by the civil service law." In a special message of Feb. 5, 1909 (page 7556), the President urges that the employees engaged in the work of taking the thirteenth census be brought into the classified service and quotes Hon. Carroll D. Wright, who had charge of the census after 1890, as estimating that more than \$2,000,000 and over a year's time would have been saved had the force been so regulated.

**Public Debt.**—The public debt of the United States during the years of President Roosevelt's administration proper stood as follows:

July 1, 1905.....	\$989,866,772.00
July 1, 1906.....	964,435,686.79
July 1, 1907.....	858,685,510.00
Nov. 1, 1908.....	897,253,990.00

**Commerce.**—In his Gubernatorial Message to the legislature of New York, in 1899, Governor Roosevelt took his stand upon the principle of taxing and regulating corporations and others who enjoyed franchises. To properly adjust taxation and to apply effective restriction were to be attained by investigation of conditions. "The first essential," he said, "is knowledge of the facts—publicity." This sentiment led to the desire expressed in his First Annual Message (page 6647) for the appointment of a Secretary of Commerce and Labor. "It should be his province to deal," he said, "with commerce in its broadest sense; including, among many other things, whatever concerns labor and all matters affecting the great business corporations and our merchant marine." In his Second Annual Message (page 6752) he said: "I believe that monopolies, unjust discriminations, which prevent or cripple competition, fraudulent over-capitalization, and other evils in trust organizations and practices which injuriously affect interstate trade, can be prevented under the power of Congress to 'regulate commerce with foreign nations and among the several States' through regulations and requirements operating directly upon such commerce, the instrumentalities thereof, and those engaged therein." In speaking of the working of the Depart-

**Roosevelt, Theodore—Continued.**

ment of Commerce and Labor, the President said in his Third Annual Message (page 6859): "Publicity in corporate affairs will tend to do away with ignorance and will afford facts upon which intelligent action may be taken. Systematic, intelligent investigation is already developing facts the knowledge of which is essential to a right understanding of the needs and duties of the business world. The Department of Commerce will be not only the clearing house for information regarding the business transactions of the Nation, but the executive arm of the Government to aid in strengthening our domestic and foreign markets, in perfecting our transportation facilities, in building up our merchant marine, in preventing the entrance of undesirable immigrants, in improving commercial and other industrial conditions and in bringing together on common ground those necessary partners in industrial progress—capital and labor." In his Fourth Annual Message (page 7031) he said: "Above all else we must strive to keep the highways of commerce open to all on equal terms; and to do this it is necessary to put a complete stop to all rebates." In his Fifth Annual Message (page 7354) the President said: "I am in no sense hostile to corporations. This is an age of combination, and any effort to prevent all combination will be not only useless, but in the end vicious, because of the contempt for law which the failure to enforce law inevitably produces. . . . The corporation has come to stay, just as the trade union has come to stay. Each can do and has done great good. Each should be favored so long as it does good. But each should be sharply checked where it acts against law and justice." The President's Special Message of May 4, 1906, explicitly sets forth the conditions of the Standard Oil Company and the railroads as they appear to the Bureau of Corporations. Stock Yard and Packing House abuses are dealt with in his message of June 4, 1906.

In his Sixth Annual Message (page 7458) the President said: "Among the points to be aimed at should be the prohibition of unhealthy competition, such as by rendering service at an actual loss for the purpose of crushing out competition, the prevention of inflation of capital, and the prohibition of a corporation's mak-

ing exclusive trade with itself a condition of having any trade with itself."

Oct. 14, 1912, Mr. Roosevelt was shot by an assassin in Milwaukee, Wis., as he was leaving the Gilpatrick Hotel to make a political speech. The wound was supposed to be trifling, and Mr. Roosevelt proceeded to the hall and addressed a meeting for nearly an hour. The assassin, whose name was Schrank and who had been a saloonkeeper in New York, was seized immediately after the shooting and might have been lynched by the crowd had not Mr. Roosevelt protested against violence. The wound proved to be more serious than was at first supposed, and Mr. Roosevelt was taken to Chicago during the night and placed in a hospital and after a week's treatment removed to his home at Oyster Bay, Long Island, N. Y., where he recovered in time to engage in further activities in the campaign for president.

**Roosevelt, Theodore:**

Admonishes Cubans of insurrectionary habit, 7437.

Alaskan government reorganization needed, 7432.

Algeciras convention ratification urged, 7442.

- Roumania.**—A country in southeastern Europe, bounded on the north and west by Hungary, on the south by Bulgaria, and by Russia and the Black Sea on the east. The area is 50,720 square miles. The plains of Roumania constitute one of the most fertile regions in Europe, and they produce enormous crops of wheat and corn. Stock-raising is a flourishing industry, and salt and petroleum are extensively mined. Cereals and petroleum are the chief articles of export. The government is administered by a king and two chambers. The people are of Latin origin and speak a language strongly resembling Latin; they belong to the Greek Orthodox Church. Only one-half of the Roumanian nation live in Roumania, the rest of the nation being domiciled in Austria-Hungary. In 1829 Turkey conceded to Russia a protectorate over the provinces now forming Roumania; they became independent, but tributary to Turkey in 1861, and in 1866 the present king, Carol I., was elected; complete independence was gained as a result of the Russo-Turkish war of 1877-78. Population (1899), 5,912,520.

The peace strength of the Rouma-

Mississippi County, Mo., Aug. 23, 1854; educated in the public schools and in the Charleston Academy; graduated from law school, Missouri State University, in 1880, with degree LL. B.; elected prosecuting attorney in 1880 and 1882; in 1884 was a Cleveland elector for his district; in 1886 and 1888 elected to the State legislature, and in his last term was speaker of the house; in 1892 was a delegate to the Democratic national convention; judge advocate-general on Gov. Dockery's staff; permanent chairman of Democratic State convention in 1910; elected to the 60th and 62d Congresses from Missouri.

**Russell, Lord John**, letter of, regarding treaty of Washington referred to, 2884.

**Russia**.—The largest empire of Europe in population and area and, including its Asiatic possessions, the most extensive dominion in the world next to the British Empire. It comprises European Russia (including Russian Finland and Poland), Caucasia, Russian Central Asia, and Siberia. Russia occupies about one-seventh of the earth's total land surface, and extends from lat. 38° 20' to 77° 30' north and from long. 17° 38' east to 170° west. It has an extreme length from north to south of 2,300 miles and a width from west to east of 6,000 miles. It is bounded on the north by the Arctic Ocean, on the east by the Pacific, on the south by China, Independent Turkestan, Persia, Asiatic Turkey and the Black Sea, and on the west by Roumania,

Austria, Germany, the Baltic Sea, and the Scandinavian Peninsula. The surface of European Russia is one vast central plateau, drained by the largest rivers of Europe into the Arctic Ocean and Caspian, Baltic, and Black seas. It contains large forests and extensive fertile steppes, and the chief industry is agriculture, the principal crops being wheat, rye, and other cereals, hemp, flax, potatoes, and tobacco. There are manufactures of linen and woolen goods; gold, platinum, coal, iron, petroleum, copper, etc., are mined.

The government is a hereditary monarchy, vested in the Czar. Russia proper has 78 governments, and administration is committed to the council of the Empire, senate, holy synod, and ministry. The leading religion is the National Orthodox Church, an offshoot of the Greek Orthodox, with which it is in full communion. Russia has no foreign possessions. Parts of the country, including Poland, were known to the ancients as Sarmatia, and were inhabited by the Scythians. The Russian Slavs, at the beginning of their history (ninth century), were confined mostly to the Upper Dnieper, the sources of the Oka, Volga, Dwina, and Dniester. Under Oleg, about 880, Kieff became the center. The Mongol invasion and the conquest of all Russia except Novgorod occurred about 1240. Russia was freed from Mongolian rule in 1480. The title of Czar (or Tsar) was assumed by Ivan IV. in 1547. The date of the accession of the house of Romanoff, which still reigns, is 1613. The Empire was largely developed under Peter the Great (1689-1725), and St. Petersburg was built by him. Under his successors the territory of Russia steadily increased. The larger part of Poland was absorbed at its partitions in 1772 and 1793. The Crimea was taken from Turkey in 1780; Finland from Sweden in 1807; and in Asia a constant southward movement has occupied Independent Tartary and the Amur Valley. The attempt to Russianize the added territories, however, has been and is the cause of great disturbance and unrest, notably in Finland and Poland. The educated Russians are dissatisfied at the absolute rule of the Czar and the bureaucracy; while the peasantry, although their condition was somewhat improved by the emancipation of the serfs in 1861 by Alexander II., have suffered in several sea-

## Russia—Continued.

sons, notably in 1891, from famine; race quarrels and the defeats of the Russian armies in the Russo-Japanese War (q. v.) have added to the unrest. Strikes and riots in several sections, especially in Poland, St. Petersburg, and the region of the Caspian Sea, have emphasized the popular discontent, which has also shown itself by the murder of Russian officials, among them, Bobrikov, Governor-General of Finland (June 15, 1904), Von Plehve, Minister of the Interior (July 29, 1904), and the Grand Duke Serge (Feb. 17, 1905).

Feb. 22, 1905, a body of striking workmen, attempting to present a petition to the Emperor, were fired on by the troops and many were killed.

Aug. 19, 1905, an elective council (the Duma) was created, and on Oct. 30 the Czar published a decree establishing a form of constitutional liberty, based on the principles of inviolability of person; freedom of conscience, speech, assembly, and association, and establishing a rule that no law shall take effect without the approval of the Duma, and that to the people, through their elected delegates, shall be guaranteed participation in the control of the acts of the Czar's appointees.

March 6, 1906, the council of the Empire was established. It consists of members elected by districts, by the Church, Commercial, Scientific and Industrial bodies, and a number equal to the total so elected to be nominated by the Czar.

The Council of the Empire and the Duma have equal legislative powers. Every measure, before being submitted for the sanction of the Czar, must be passed by both the Duma and the Council of the Empire. Measures rejected by the Czar cannot be brought up again at the same session. The sittings of both houses are public.

The administration of the Empire remains vested in boards having extensive powers, such as the private Senate and the holy synod, as well as the ministry or heads of the departments of the government. The disturbed state of the country has seriously retarded the development of the government along the lines prescribed in the Czar's proclamation.

The area of Russia, together with all her provinces and possessions, is 8,647,657 square miles, and the population 163,807,700.

Whaling vessels of United States interfered with by, 3794.

**Russia, Treaties with.**—The convention as to the Pacific Ocean and the northwest coast of America was concluded in 1824. Free and unmolested fishing and trading rights in those parts of the Pacific Ocean as yet unoccupied are to be mutually enjoyed by both nations. Where stations are located, citizens of the one country may not resort for trade or fishing to the establishments of the other without express permission. Citizens of the United States may not erect any establishment on the northwest coast of America to the north of, nor shall Russia to the south of, fifty-four degrees and forty minutes of north latitude. Spirituous liquors and fire-arms and other munitions of war are declared to be prohibited articles of sale to the natives or to others within the territory covered by this convention. Punishment for infraction of this article to be at the discretion of the contracting powers or their officers.

The treaty of commerce and navigation of 1832 conferred freedom of commerce, reciprocal treatment of vessels without discriminating duties by reason of the nationality of the carrying vessel, freedom of export and import (excepting the coastwise trade), the appointment of consular officers in terms of the usual consular conventions, with powers over deserters from ships and in the administration of affairs of deceased citizens, and, in general, the extension of large commercial privileges upon the most favored nation terms. The conditions of the treaty were applicable to Poland in so far as possible.

As certain especial privileges had been extended to Sweden and Norway in regard to Poland and Finland, it is specified that such preferential

**Russia, Treaties with—Continued.**

conditions shall not extend to the United States.

The treaty of 1854 established the rights of neutrals at sea on the principle that free ships make free goods and that the property of neutrals on board an enemy's vessel shall not be subject to confiscation. The provisions of this treaty are to be extended to all powers formally recognizing the principles and expressing a desire to accede to the treaty.

The treaty of 1867 ceded Alaska to the United States. The details of the boundaries contained in the first article gave rise to the long disputes between the United States and Canada over the location of the boundaries which were the subject of later treaties with Great Britain. With the territory, Russia ceded all public property in Alaska with the records and archives of the government pertaining to affairs in Alaska, but reserved the right to make exact copies of them at any time. Citizens of Alaska who desired to retain their allegiance to Russia might return to that country within three years from the date of cession. The native tribes were to be subjected to such laws as the United States might in their interests and its own discretion make for their government. In consideration of the cession of territory and rights over it, the United States agreed to pay within ten months after ratification the sum of seven million two hundred thousand dollars in gold to Russia, at Washington. (For extradition agreements, see Extradition Treaties.)

In 1894 a *modus vivendi* was arranged in relation to the fur-seal fisheries in Bering Sea and the North Pacific Ocean, by which it was agreed that citizens of the United States might not fish within a zone of ten nautical miles from the shores of Russian possessions in Bering Sea and the Pacific Ocean, nor within thirty nautical miles of the Commander Islands and Robben Island. Vessels of the United States so infringing are to be seized by duly qualified Russian officers and handed over as soon as practicable to the United States authorities, who shall cause the cases to be tried by the ordinary courts. The Russian government agreed to limit the seal catch for the year 1894 in the vicinity of the islands named to thirty thousand

head. The provisions of this treaty are in nowise retroactive.

**Russian America.** (See Alaska.)

**Russian Colony,** desire of representatives of, to emigrate to United States discussed, 4207.

**Russo-Japanese War.**—Russia's occupation of Manchuria after the uprising of the Boxers (q. v.) was a matter of vital importance to Japan, as it endangered the independence of Korea, and brought Russia into dangerous proximity to Japan on the shores of the China and Japan seas. In April, 1902, Russia had promised to withdraw from Manchuria in eighteen months, but in September, 1903, she informed the Powers that it would be impossible for her to withdraw at the time specified.

In June, 1904, the Japanese Government opened negotiations with Russia looking to the latter's withdrawal from Manchuria; but, losing patience at what she regarded as the dilatory tactics of the Russian officials, on Feb. 6, 1904, Japan broke off diplomatic relations with Russia, and four days later attacked the Russian fleet at Port Arthur, damaging several ships and driving the Russians into the harbor.

From that time until the fall of the port, Jan. 2, 1905, the Japanese fleet under Admiral Togo blockaded and bombarded Port Arthur, losing 2 battleships and several smaller vessels, but inflicting still more damage on the Russians.

Japan formally declared war on Feb. 11, 1904, and China and the United States issued proclamations of neutrality. Japanese troops at once occupied Korea, and on May 1 forced the passage of the Yalu River. Three days later the Japanese began to land troops on the Liao Tung Peninsula, north of Port Arthur, and moving down the peninsula defeated the Russians at Nanshan Hill and Kinchau, seizing Dalny at the end of the month. A Russian force from the north under Stackelberg, attempting a diversion in favor of Port Arthur, was decisively defeated at Vafangow, June 15, and while Generals Kuroki and Oku followed up the retreating Russians, General Nogi after driving General Stoessel, the Russian commander, from his outlying positions, laid siege to Port Arthur at the end of July. On Aug. 10, the Russian fleet in the harbor of Port Arthur, finding its position desperate, attempted to break out, a part of the vessels succeeding in reaching neu-

**Russo-Japanese War—Continued.**

tral ports, but the greater number being driven back into the port. Four days later the Russian squadron from Vladivostok, which had been making desultory raids on Japanese commerce, was defeated by a Japanese fleet, under Admiral Kamimura, one Russian vessel being sunk and the rest badly damaged. On Aug. 16, General Nogi demanded the surrender of Port Arthur, and, on General Stoessel's refusal, began an unsuccessful general assault which cost the Japanese 14,000 men. While Nogi's forces pressed the siege of the fortress the Japanese armies in the north, under the command of Marshal Oyama, the Japanese commander-in-chief, drove the Russians under Kuropatkin from Liao-Yang (Sept. 4), and checked a last attempt to relieve the city by repulsing a Russian advance over the Sha River (Oct. 14). By assaults and siege operations the Japanese steadily advanced upon Port Arthur, the capture of 203-meter Hill (Nov. 30) enabling them to bombard the fleet in the harbor, and on Dec. 31 they broke through the inner line of defenses. On Jan. 2, 1905, General Stoessel surrendered the city with 47,000 men. The Japanese loss during the siege was 50,000; the Russian not less than 20,000. The fall of Port Arthur left Nogi's forces free to join the army of the north under Oyama. After repulsing a Russian forward movement at the Hun River (Jan. 28), the Japanese assumed the offensive and again defeated Kuropatkin in a fifteen days' battle (Feb. 23-March 10) near Mukden, the ancient capital of Manchuria, and entered the city. About 750,000 men were engaged in this battle, operating on a front eighty miles long. The Russian loss was 90,000 killed and wounded, and 40,000 prisoners, the Japanese loss being less than half that of the Russian.

Meanwhile the Russian Baltic fleet, under Admiral Rogestvensky—their

last naval resource, for the Black Sea fleet was confined within the Dardanelles by treaty stipulations, and demoralized by a mutiny of its sailors—had sailed from Libau (October, 1904), and was making its way to the East in several divisions by way of the Suez Canal and Cape of Good Hope. An attack on an English fishing fleet in the North Sea (Oct. 21)—the Russians mistaking the fishing boats for Japanese torpedo boats—nearly involved Russia in war with England, the affair being finally settled by arbitration; and the prolonged stay of the Russians off Madagascar and in Kamranh Bay, Saigon, led to a protest from Japan to the French Government.

On May 27th, the Russian fleet encountered the Japanese under Admiral Togo, at the entrance to the Sea of Japan, and was practically annihilated, only 1 cruiser escaping to Vladivostok, and 3 to Manila, where they were interned. Six battleships, a coast defense battleship, and 4 cruisers were sunk; 2 battleships and 2 coast defense battleships surrendered; many torpedo boats and smaller vessels were sunk or captured; Admirals Rogestvensky and Nebogatoff were taken, with 3,000 of their men; and 14,000 Russians perished. The Japanese losses were inconsiderable. Shortly after the battle a Japanese force occupied the Island of Sakhalin.

On June 11, President Roosevelt, after conference with the Japanese minister and the Russian ambassador, sent to Tokyo and St. Petersburg identical notes, urging the two governments to open direct peace negotiations with each other. This action resulted in the ending of the war by the treaty of Portsmouth (q. v.). Dissatisfaction with the result of the negotiations led to some rioting in Japanese cities.

**Sabine Cross-Roads (La.), Battle of.**—Gen. N. P. Banks's army, which had been concentrated at Alexandria, La., advanced up the Red River March 25, 1864, by way of Natchitoches, Pleasant Hill, and Mansfield, toward Shreveport. April 8, arriving at Sabine Cross-Roads, on the Sabine River, the Federals encountered a part of the Confederate army under Gen. Kirby Smith, commanded by Gen. Richard Taylor. The Confederates attacked and Banks was badly defeated, losing 3,000 in killed, wounded, and missing. The Confederates captured 19 guns and an immense amount of ammunition and stores. The Confederate loss was reported by Gen. E. Kirby Smith as over 2,000 killed and wounded.

**Sac and Fox Reservation, Okla.:**

Cession of portion of, to United States proclaimed, 5591.

British attack on, repulsed, 524.

**Sacketts Harbor (N. Y.), Attack on.**—

May 29, 1813, a British force of 1,000 or 1,200 regulars and a large body of Indians was convoyed from Kingston, Canada, to Sacketts Harbor, N. Y., by a squadron under Sir James Yeo, the whole expedition being under the command of Sir George Prevost, Governor-General of Canada. The Americans, mostly raw militia, were at first forced back, but later rallied and the British were driven to their boats, leaving their dead upon the field.

**Sackville, Lord**, British minister, interference of, in political affairs of United States and action of President Cleveland regarding, 5365, 5396.

**Sacramento Pass (N. Mex.), Battle of.**

—When Gen. Kearny had established the supremacy of the United States authority at Santa Fé he dispatched Col. Doniphan with 800 men to join Wool in an expedition against Chihuahua. Dec. 27, 1846, Doniphan reached El Paso del Norte, a town of about 5,000 inhabitants on the road to Chihuahua, at one of the principal crossings of the Rio Grande. Here he was joined by Wightman's artillery, consisting of 100 men. He then proceeded toward the Sacramento River. Where the road to Chihuahua crosses the river the Mexican General Heredia was posted with 1,575 men. Feb. 28, 1847, he was attacked by the Americans and driven from his position with a loss of 110 pieces of artillery. Col. Doniphan and his little army entered the city of Chihuahua March 1 and 2.

**Safety-Appliance Law:**

Discussed, 6877, 7027.

Judgment of Supreme Court on, 7362. Position of Government inspectors under, 7362.

**Safety Fund.**—Owing to the unstable character of the currency issued and the insecurity of deposits of State banks, the New York legislature in 1829, upon the suggestion of Martin Van Buren, passed a law known as the safety-fund act. Under the provisions of this law banks chartered by the State were required to pay into the State treasury a certain percentage of their capital stock to serve as a fund out of which the liabilities of any of them that might fail should be made good. This was the beginning of reform in the banking system. Under this law there were 10 bank failures, resulting in a loss of all their capital, amounting to \$2,500,000, which proved conclusively the inadequacy of the safety fund. In 1838 the free-banking system was adopted.

**Sailors Creek (Va.), Battle of.**—After the Confederate defeat at Five Forks and the retreat of Lee's army from Richmond and Petersburg, Lee made his way due west and reached the Danville Railroad at Amelia Court-

**Sailors Creek (Va.), Battle of—Continued.**

- House on April 4, 1865. Sheridan passed him and reached the railroad at Jetersville, 7 miles southwest. Lee, finding retreat cut off in this direction, moved westward toward Farmville. At Sailors Creek, April 6, Custer, joined by Crook and Devin, succeeded in piercing the Confederate column, took 16 guns, 400 wagons, and many prisoners. Ewell's corps and part of Pickett's division were thus cut off. The cavalry detained this force of between 6,000 and 8,000 until, having been surrounded by Wright with the Sixth Corps, Ewell surrendered. Five generals, more than 7,000 prisoners, several hundred wagons, and many guns were taken.

**St. Pierre,** destruction of city of, 6679.

**St. Regis, Capture of.**—At the outbreak of the War of 1812 it was agreed between the British and Americans that the village of St. Regis, on the boundary line between Canada and New York, occupied by Christian Indians, should remain neutral. In violation of this agreement the Canadian commander-in-chief put a garrison in the place and many of the Indians were induced to join the British army. On the morning of Oct. 22, 1812, Maj. Young with about 200 men, surprised this garrison and took 40 prisoners, some muskets, and a quantity of blankets, after killing 7 men. None of the American force was injured.

**St. Regis Indians.** (See Indian Tribes.)

**St. Thomas Island,** treaty with Denmark for cession of, to United States transmitted and discussed, 3777, 3779, 3796, 3886.

**Salaries, Congressional.**—Under the Articles of Confederation each State paid its own members of Congress, but the Convention of 1787 made the members independent of the States in this respect. The first clause of Article I, section 6, of the Constitution provides that "the Senators and Representatives shall receive a compensation for their services, to be ascertained by law and paid out of the Treasury of the United States." Members of the First Congress were paid \$6 per day and \$6 for each 20 miles of travel going and coming. The salaries have frequently been changed. From 1789 to 1815 they were \$6 per day; from 1815 to 1817, \$1,500 per year; from 1817 to 1855, \$8 per day; from 1855 to 1865, \$3,000 per year; from 1865 to 1871, \$5,000 per year; from 1871 to 1874, \$7,500 per year; from 1874 to 1903, \$5,000 per year. A mileage of 20 cents is allowed both. Senators and

**Salaries, Congressional—Continued.**

Representatives have received the same salaries except during 1795, when Senators received \$7 per day while members received but \$6. At present members of both houses receive \$7,500 per annum. The Speaker of the House receives \$12,000 per year.

**Salaries, Executive.**—Sept. 24, 1789, Congress fixed the salary of the President of the United States at \$25,000 per annum, at which figure it remained until 1873, when it was increased to \$50,000. The Constitution provides that the salary of the President shall not be diminished during his term of office, and for this reason that part of the "salary-grab" act of 1873, which increased his salary was not repealed in 1874 with the other provisions of that act. The salary of the Vice-President, placed at \$5,000 in 1789, was raised to \$8,000 in 1853, to \$10,000 in 1873, reduced to \$8,000 in 1874, and in 1908 increased to \$12,000, and the President's salary was fixed at \$75,000.

Of the Cabinet officers the Secretaries of State and the Treasury received in 1789 salaries of \$3,500 each, the Secretary of War \$3,000, the Attorney-General \$1,500, and the Postmaster-General \$2,000. In 1819 the pay of the four Secretaries (State, Treasury, War, and Navy) was made \$6,000, that of the Postmaster-General \$4,000, and that of the Attorney-General \$3,500. The Cabinet officers and Vice-President now receive \$12,000 per year. Washington at first declined to receive any pecuniary compensation as President. He asked that the estimates for his station be limited to such actual expenditures as the public good might be thought to require (45).

**Salaries, Judicial.**—In 1789, when the United States courts were organized, the Chief Justice of the Supreme Court was paid \$4,000 and the associate justices \$3,500 each. The district judges received from \$1,000 to \$1,800. These salaries have been increased from time to time. At the present time (1909) the Chief Justice of the Supreme Court receives \$13,000, the associate justices \$12,500, the circuit court judges \$7,000, and the district court judges \$6,000. The Chief Justice of the United States Court of Claims receives \$6,500 and the four associate judges \$6,000 each. The Constitution provides that the salaries of Federal judges may not be

diminished during their continuance in office.

**Salaries of Public Officers** (see also the several officers):

Commissions claimed by, referred to, 1730.

**Salary Grab.**—A popular name for the act of March 3, 1873, whereby the salaries of the President and Vice-President, members of Congress, justices of the Supreme Court and other Federal officials were materially increased. The provisions for the increase were introduced by Benjamin F. Butler, of Massachusetts, and made a rider to the appropriation bill. By this law the President's salary was increased from \$25,000 to \$50,000 per year; that of the Chief Justice from \$8,500 to \$10,500; those of the Vice-President, Cabinet officers, associate justices, and Speaker of the House from \$8,000 to \$10,000, and of Senators and Representatives from \$5,000 to \$7,500. Another act, passed the next day, made that part of the law relating to salaries of members of Congress retroactive, thus giving themselves \$7,500 instead of \$5,000 a year from March 4, 1871, to March 4, 1873, and following years. This excited the indignation of the people to such an extent that the laws were repealed the following year, except such provisions as related to the President and justices of the Supreme Court.

**Salter, William D.**, captain in Navy, nomination of, withdrawn, 1745.

**Salvador.**—The smallest but most thickly populated of the Central American Republics. It is often incorrectly referred to as San Salvador, which is the name of its capital. It is bounded on the north and east by Honduras, on the south and southwest by the Pacific Ocean, and on the northwest by Guatemala; the Gulf of Fonseca separates it from Nicaragua on the southeast. The main cordillera of Central America runs along the northern frontier. Parallel to this and about 30 miles farther south another mountain chain crosses from east to west. This is a volcanic range and contains about 30 craters, some of which are active. Between these two mountain ranges is an irregular plateau 2,000 feet in elevation. This is the main settled portion of the Republic. South of the volcanic range a strip of lowland skirts the Pacific coast for 200 miles. Volcanic and seismic disturbances are so common as hardly to be noticed. San Salvador has been destroyed 8 times by earthquakes.

Most of the inhabitants are engaged in agriculture, the principal products being coffee, indigo, sugar, rubber, tobacco, and balsam of Peru. There are considerable mineral deposits, but gold and silver only are worked, silver standing fourth on the list of exports. There are practically no manufactures.

The government is administered by a President, elected every 4 years, and a Congress consisting of one house, elected annually. Independence was proclaimed in 1821. There have been many wars and revolutions. The present constitution dates from 1886.

The area of the Republic is estimated at 7,225 square miles and the population in 1910 about one million. Mining operations are carried on by Salvadorean, United States and British companies. The trade is chiefly with United States, Germany and France. The chief imports are cottons, drugs, flour, hardware, silk goods and yarn. The outstanding foreign debt of the Republic in 1910 was £916,900. The gold debt on Jan. 1, 1910 (including external loan), was \$10,666,584 gold; the silver debt was \$6,207,059 silver. The estimated revenue for 1912 is \$13,129,750, and the estimated expenditures \$13,286,750.

**Samoan Islands.**—A group of 14 islands in the South Pacific Ocean. The principal islands are Savaii, Upolu, and Tutuila. The United States has a coaling station in the harbor of Pago-Pago, granted in 1872. The neutrality of the islands was guaranteed by the United States, Great Britain, and Germany in 1889 by treaty. This convention of treaty between the three countries provided for a foreign court of justice, a municipal council for the district of Apia, the chief town, with a foreign president thereof, authorized to advise the King; a tribunal for the settlement of native and foreign land titles, and a revenue system for the Kingdom. In 1899 the kingship was abolished, and by the Anglo-German agreement of Nov. 14, accepted Jan. 14, 1900, by the United States, Great Britain and Germany renounced in favor of the United States all rights in the Island of Tutuila and others of the Samoan group east of 171° east, the islands to the west of that meridian being assigned to Germany. The

**Samoa Islands—Continued.**

American population of Tutuila in 1909 was about 5,800. Area, 1,095 sq. miles; population (1900), 38,412, of whom 32,612 resided upon the German islands.

**Samoa Islands, Treaties with.—In**

1899 a convention was made between the United States, Germany, and Great Britain, relating to settlement of claims of American citizens, German, and British subjects, for damage sustained by unwarranted military action in Samoa. It was agreed that the King of Sweden and Norway should be invited to act as arbitrator therein, and that his decision in the premises be final, and that the three governments be bound to make good

the losses in accordance therewith. Oct. 14, 1902, Oscar II., King of Sweden and Norway, as arbitrator, rendered his decision, in which he found the action of the United States culpable in bringing back the Malietoans after deportation, and supplying them with arms and ammunition without the knowledge of the German consul. For this and for other reasons, King Oscar held the British and United States responsible for damages.

The convention of 1899 contained the renunciation by Germany in favor of the United States of all claims and rights in respect to the Island of Tutuila and all other islands of the Samoan group east of longitude 171 degrees west. The United States renounced all claims and rights in favor of Germany of the islands of Upolu, Savaii, and all other islands of the Samoan group west of longitude 171 degrees west. The three signatory nations continue to enjoy equal rights in respect of commerce and commercial vessels in the islands.

**Sampson, William Thomas;** naval officer; b. Palmyra, N. Y., Feb. 9, 1840; graduated U. S. Naval Academy, 1861; served in South Atlantic fleet during Civil War; stationed at the U. S. Naval Academy and at U. S. Naval Observatory, and became proficient in physics, mathematics, chemistry, metallurgy, and astronomy; at the outbreak of the War with Spain, he commanded the North Atlantic squadron, and planned the blockade of Santiago harbor; left the squadron in his flagship, *New York*, to confer with commander of land forces, July 3, 1898, and returned just in time to see the last of the Spanish fleet destroyed by his squadron; promoted rear-admiral, March 3, 1899; died Washington, D. C., May 6, 1902.

**San Juan, Cuba**, captured by American troops, 6317.

**San Juan de Fuca Explorations.**—Certain explorations on which are based the American claims to possession of territory bordering on the Pacific. The portion of the Pacific Coast between the parallels of lat. 40° and 50° north was visited on behalf of Spain in 1592 by a Greek pilot named De Fuca, in 1640 by Admiral Fonte, and subsequently by other explorers, and maps of the coast line had been made. The treaty of 1790 between Spain and Great Britain only gave the latter fishing and trading rights in the vicinity of Puget Sound. The discovery and exploration of Columbia River by Capt. Gray, an American; the purchase from France in 1803 of the Louisiana territory; the exploration of Columbia River by

Lewis and Clark, by order of the United States, in 1804-5, and the treaty of limits concluded with Spain in 1819, by which all the territory north of lat. 42° north was expressly declared to belong to the United States, were held to be sufficient proofs of the latter's title to the territory. Great Britain nevertheless claimed a large portion of the region, while the United States claimed the country to lat. 54° 40' north. In 1846 the boundary was settled at the forty-ninth parallel as far as the channel between Vancouver Island and the mainland, and from that point on a line through the middle of that channel and the Strait of Juan de Fuca to the Pacific. (See Northwestern Boundary.) Navigation of the channel was to be free to both countries. Under this treaty the United States claimed the Canal de Haro as the channel through which the boundary was to run, and Great Britain claimed Rosario Straits. San Juan and other islands were thus in dispute. To avoid conflict, the occupation by both nations of the Island of San Juan at opposite ends was agreed upon. The Emperor of Germany, who was selected as arbitrator of the dispute, decided in favor of the United States in 1872 (4140). (See also "Fifty-four Forty or Fight.")

**Sanders Creek (S. C.), Battle of.**—Generally known as the battle of Camden. In the summer of 1780 Gen. Gates had been appointed to the command of the Southern army, and, reinforced by Baron De Kalb, Armand's Legion, Porterfield's Virginia regiment, and Rutherford's North Carolina militia, his force numbered over 4,000, of whom less than 1,000 were regulars. Cornwallis, with about 2,000 British and Tories, of whom 1,500 were regulars, proposed to surprise Gates's army. Gates had determined to surprise Cornwallis. Both advancing, the two armies unexpectedly met at Sanders Creek, near Camden, S. C., on the night of Aug. 16, 1780. After some skirmishing hostilities were suspended until the morning, when, with the first British attack, the Virginia and South Carolina militia fled, after a feeble resistance, due in part to an imprudent order by Gen. Gates. Baron De Kalb bore the brunt of the battle and fell, being wounded 12 times. The American defeat eventually became a rout. Their loss in killed, wounded, and prisoners was upward of 2,000. The British lost 325 men, 68 of whom were killed. Previous to this action Sumter, with about 400 men, captured a British convoy with stores and 200 prisoners, but was himself surprised the next day by Tarleton, who recaptured the stores, killed 100 men, and took 300 prisoners. The British, in the Camden battle, came into possession of 7 pieces of artillery, 2,000 muskets, the entire baggage train, and nearly 1,000 prisoners, including Generals De Kalb, Gregory, and Rutherford.

**Sandy Creek (N. Y.), Battle of.**—May 19, 1814, while the British squadron on Lake Ontario was blockading

Sacketts Harbor, where Commodore Chauncey was fitting out a squadron for active service, certain heavy guns and cables destined for some of the American ships were yet at Oswego Falls. The blockade preventing their being conveyed by water to the harbor, Capt. Woolsey, commander of the *Oneida*, volunteered to transport them by way of the Big Sandy Creek, partly overland, to their destination. Sir James Yeo, of the blockading squadron, sent 2 gunboats, 3 cutters, and a gig to intercept Woolsey. The latter had detailed 130 riflemen and the same number of Oneida Indians to proceed along the banks of the creek to assist in repelling any possible attack. May 30 the British gunboats sighted Woolsey's flotilla and began firing. Within 10 minutes the British squadrons, with officers and men to the number of 170, were prisoners and prizes. Not a single American life was lost. The British loss was 18 killed and 50 wounded. The cannon and cables were safely landed at Sacketts Harbor.

**Santa Rosa Island (Fla.), Battle of.**—Oct. 9, 1861, a force of 1,500 or 2,000 Confederates landed on Santa Rosa Island, Pensacola Harbor, Fla., and surprised the camp of Wilson's Zouaves about a mile from the fort. Maj. Vogdes was sent to the relief of the camp with 2 companies. He was captured, but the assailants retired to their boats under the heavy fire of the regulars after setting fire to the camp. The Federal loss was 60 killed and wounded. The Confederate loss was not reported.

**Santa Ynez Forest Reserve,** mentioned, 6944.

**Santiago (Cuba), Battle of.**—On Monday, June 20, 1898, the American fleet of about 55 ships, including the naval convoy which had left Tampa, Fla., on June 7, came within sight of the town of Daiquiri, about 15 miles east of Santiago, which was the point selected for the landing. The debarkation was attended with serious difficulties, as there was no harbor there. With the aid of the small boats of the fleet and transports the landing was made, but not until after the surf had dashed to pieces several of the boats. Upon landing at Daiquiri, Gen. Wheeler's command of cavalry was ordered to take position on the road to Siboney. Gen. Young's brigade (about 964 men), during the night of June 23-24, passed Gen. Lawton's division, which was on the road from Siboney to Santiago. About 3 miles from the former place, near Las Guasimas, June 24, they encountered the enemy posted in a strong natural position. The Spanish forces occupied a range of hills in the form of obtuse angles, with the salient toward Siboney. The attack, says Gen. Young, of both wings was simultaneous, and the junction of the two lines occurred near the apex of the angle, on the ridge, which had been fortified with stone breastworks flanked by blockhouses. The Spanish were driven from their position and fled precipitately toward Santiago. The American forces numbered about 965, the Spanish 2,000 to 2,500. American losses, 1 officer and 15 men killed, 6 officers and 46 men wounded. Forty-two dead Spanish soldiers were found on the field, while the Santiago (Spanish) papers the day after the battle gave their loss as 77 killed.

Gen. Wheeler says in his report: "This engagement inspired our troops and had a bad effect upon the

spirits of the enemy." After this battle the Spaniards retired to the outer defenses of Santiago. These were the village of El Caney to the northeast, and the San Juan Hill extending south from that village and forming a natural barrier to the eastward of the city. July 1 these defenses were attacked by forces under Gen. Lawton, who was expected to take El Caney and then move toward Santiago and support the attack of Wheeler's and Kent's divisions upon the main Spanish army. The battle began at 6 A. M. and soon became general. The enemy fought with much obstinacy, but were slowly driven back. After Lawton had become well engaged, Grimes's battery, from the heights of El Poso, opened fire on the San Juan blockhouses, and Wheeler's and Kent's divisions moved forward, crossed the river, and formed for an attack on San Juan Hill. During this formation Col. Wikoff was killed. The command of the Second Brigade then devolved upon Lieut.-Col. Worth, who was soon severely wounded, and then upon Lieut.-Col. Liscum, who fell a few minutes later, and Lieut.-Col. Ewers took command. The enemy strongly intrenched upon the hills in front of the American forces, San Juan Hill and Fort San Juan, the latter position being a few hundred yards nearer Santiago.

The American forces charged up San Juan Hill in the face of a heavy fire, captured this point, crossed the plain below, and charged Fort San Juan, driving the enemy before them, and the battle of July 1 was won. At midnight of July 1 Gen. Bates arrived with reinforcements, and at daylight on the 2d his brigade was placed on the ridge to the left of the American lines. Gen. Lawton's forces were placed on the right. July 2 a brisk and almost continuous fire was kept up by the two armies throughout the day, part of the time in a drenching rain. At nightfall the firing ceased, but at 9 P. M. a vigorous assault was made all along the lines, which was repulsed, the Spaniards retiring to their trenches. The following morning firing was resumed and continued until near noon, when a white flag was displayed by the enemy and the firing ceased. The total losses of the American forces during the 3 days' fighting (July 1, 2, and 3) were: Officers killed, 13; men, 87; officers wounded, 36; men, 561; missing, 62. The entire strength of the

**Santiago (Cuba), Battle of—Continued.** command which fought the battle of San Juan was 362 officers and 7,391 men. The defenses of Santiago were constructed with much engineering skill, as were also the batteries in the harbor. The city was at once surrounded by the American army, so that the Spaniards could not escape. The ridge upon which the Americans were stationed was favorably located and overlooked the city. The fortifications and barbed-wire fences could easily be seen. The Spaniards seemed to realize that their condition was hopeless, and on Sunday morning, July 3, their fleet steamed out of the harbor. The destruction of this fleet was complete. (See Santiago Harbor (Cuba), Battle of.)

July 5 the Spanish commander, Gen. Toral, in reply to a demand of Gen. Shafter for the surrender of the Spanish army and of the city, proposed to withdraw all his forces from the eastern province of Santiago, provided it was stipulated that he should not be molested until he had reached the city of Holguin, about 70 miles to the northwest. This proposition was declined at Washington. From the 5th to the 10th the time was divided between flags of truce and some skirmishing along the entire line. The losses, however, were small. On the 13th Gen. Miles, commander of the United States Army, arrived. Generals Miles, Shafter, and Wheeler then had an interview with Gen. Toral on the subject of the surrender. Another interview was had the next day between the same officers. Some misunderstanding occurred at this interview as to terms of surrender, etc., so that other meetings were necessary; but on the 15th the agreement for capitulation was duly signed.

On the 16th Gen. Toral informed the American commander that the Spanish Government at Madrid had authorized the surrender, and thereupon final terms of absolute capitulation were duly signed. The conditions of surrender included all forces and war material in the division of Santiago. The United States agreed to transport, without unnecessary delay, all the Spanish troops in the district to Spain. Officers were to retain their side arms and officers and men their personal property. The Spanish commander was authorized to take the military archives of the district. All Spanish forces known as

volunteers, *mobilizados*, and *guerrillas* wishing to remain in Cuba were to be allowed to do so, under parole during the war. The Spanish forces were to march out of Santiago with honors of war and deposit their arms at a point to be mutually agreed upon, to await the disposition of the United States Government, etc. The troops surrendered and returned to Spain were about 24,000.

#### **Santiago Harbor (Cuba), Battle of.—**

This engagement, which is also known as the battle of July 3, was the decisive naval combat of the Spanish-American War. For 6 weeks the Spanish fleet under Rear-Admiral Pascual Cervera had been imprisoned in the harbor of Santiago by the American blockading squadron in command of Acting Rear-Admiral Sampson. On the morning of July 3, 1898, at about 9.30 o'clock, while the men of the American vessels were at Sunday quarters for inspection, the Spanish fleet, consisting of the *Infanta Maria Teresa*, *Vizcaya*, *Cristobal Colon*, *Almirante Oquendo*, *Pluton*, and *Furor*, attempted to escape. The ships, coming out of the harbor at the rate of 8 or 10 knots an hour, passed without difficulty the collier *Merrimac*, which had been sunk in the channel by Lieut. Hobson. Signals were at once made from the United States vessels, "Enemy's ships escaping," and general quarters was sounded. Rear-Admiral Sampson being about 7 miles from the scene of battle, the command of the American vessels during the engagement devolved upon Commodore Schley. Under his direction, the squadron closed in on the fleeing vessels, and in about 2 hours the entire Spanish fleet was destroyed. The Spanish losses were 600 killed and about 1,400 prisoners, including the admiral. The loss on the American side was 1 killed and 1 wounded, while not a vessel was materially damaged. From this crushing defeat Spain was unable to recover, and her effort upon the ocean ceased.

**Santo Domingo, or Dominican Republic.**

—A Republic occupying the eastern portion of the island of Haiti. It is often called San Domingo and sometimes the Black Republic. The surface is irregularly broken by mountains, and in the center is an extensive elevated plain. The inhabitants are of mixed Spanish, Indian, and negro blood, with some pure Africans. The language is principally Spanish, though French and English are spoken. The principal religion is the Roman Catholic, but other sects are tolerated. The principal industries are agriculture, stock raising, and timber cutting. Sugar, coffee, hides, and fine-grained woods are exported. It was separated from the remainder of Haiti by a revolution which ended with the establishment of the Republic in 1844. Between 1861 and 1865 it was under the dominion of Spain. The present constitution dates from 1887. Executive authority is vested in a President, who is elected every 4 years, and the Congress is composed of 22 members elected by restricted suffrage. The Republic claims an area of 18,045 sq. miles, and the population is estimated at 610,000.

The desirability of a coaling station for United States vessels at Santo Domingo led to a movement in 1869 looking toward the annexation of that Republic to the United States. President Grant sent Gen. Babcock to make an investigation into the condition of the island and the American interests there. Upon his making a favorable report a treaty was concluded Nov. 29, 1869, providing for annexation of the island and the leasing of Samana Bay and peninsula. The Senate rejected the treaty June 30, 1870. Grant per-

sisted in spite of the unpopularity of the scheme and Congress concurred in sending a second commission to examine the matter in 1871. They also reported favorably, but Congress still disapproved of annexation, and President Grant abandoned the enterprise in a special message, April 5, 1871 (4082).

In 1904, in consequence of intimations from Germany and Great Britain that they would be compelled to take action unless the just claims of their subjects received some recognition, the United States was compelled to interfere and it was arranged that the customs should be collected by the United States, one-third of the receipts being returned to carry on the Dominican Government and the other two-thirds being devoted to paying off the various creditors of Santo Domingo. This arrangement has worked very satisfactorily, the share received by the Dominican Government amounting to more than was received when the entire customs were collected by native officials.

During 1910 the exports were valued at \$10,849,623, and the imports at \$6,257,691, more than half of the trade being with the United States. The imports from the United States were \$7,661,303, or 70 per cent. of the total exports of the country, and of the imports the United States furnished \$3,739,025. The principal articles of trade were: Imports, cotton goods, iron and steel manufactures, provisions, rice, oils, breadstuffs, leather goods, lumber, bagging, fish, etc.; exports, tobacco, cotton, coffee, sugar, mahogany, logwood, gold, silver and other minerals.

There are about 15,500 square miles of cultivable soil. By an act of June 9, 1905, all government lands are thrown open to settlement, free for ten years, after which rent at the rate of about five cents per acre, upon filing a bond of \$2 per acre, Sugar growing is a flourishing industry, though cocoa and banana exports are on the increase. In 1907 22,384,028 pounds of cocoa were exported. American capital has been invested in banana growing and rice culture. The country is rich in mahogany, satinwood, logwood, cedar, and other valuable timber. Salt is found in abundance. Copper and other minerals are mined.

The leading imports in 1910 were: Cotton manufactures, \$1,481,344; iron and steel, \$863,334; rice, \$497,046; meat and dairy products, \$416,291;

**Santo Domingo, or Dominican Republic.***Continued.*

flour, \$410,705; oils, \$337,550; leather goods, \$208,587, more than two-thirds of which came from the United States. The principal exports were raw sugar, \$5,590,536; cocoa, \$2,849,585; tobacco, \$958,441; coffee, \$323,749; bananas, \$288,647; wax, \$148,804; hides, \$123,732; goatskins, \$86,084, more than half of which came to the United States.

The budget for 1912 estimated the revenue at \$4,250,000, and the expenditures at \$4,256,804. A treaty with the United States in 1905 authorized a loan of \$20,000,000 for the conversion of the debt, and established an American receivership of customs. Under American supervision the finances have progressed satisfactorily. Nov. 19, 1911, President Cáceres was shot and killed by an assassin, and Senator Eladio Victoria was elected provisional president.

**Savages Station (Va.), Battle of.**—One of the Seven Days' Battles before Richmond. June 29, 1862, Sumner and Heintzelman retired from Fair Oaks and took up a position near Savages Station, on the Richmond and York River Railroad. After destroying the supplies there, Heintzelman moved south across the swamp. Magruder, in pursuit, finding Fair Oaks abandoned, advanced to Savages Station and made an attack on Sumner's corps in the afternoon. The latter maintained his ground till dark. During the night he retreated into the White Oak Swamp, leaving 2,500 sick and wounded in the hospital at the station.

**Savannah (Ga.), British Occupation of.**—Nov. 27, 1778, Commodore Hyde Parker convoyed a fleet of transports to Savannah, which carried about 3,500 British soldiers. The troops landed at Tybee Island, 15 miles from Savannah, and captured the city Dec. 29. The American force under Gen. Robert Howe consisted of about 800 Continentals and 400 militia. The British loss was officially reported as 3 killed and 10 wounded. Eighty-three American dead and 11 wounded were found on the field. Some 450 were taken prisoners, while the others retreated up the Savannah River and reached South Carolina. Forty-eight cannon, 23 mortars, 94 barrels of powder, and a large quantity of provisions fell into the hands of the British.

**Savannah (Ga.), Fall of.** (See Fort McAllister, Ga.)

**Savannah (Ga.), Siege of.**—In 1779 Washington sent Gen. Lincoln to take command of the army in the South, and requested Count d'Estaing, in command of the French fleet in American waters, to cooperate in an effort to retake Savannah, Ga. Sept. 16, 1779, the latter appeared off Savannah with 33 vessels and 6,000 men. After the capture of 2 frigates and 2 storeships a regular siege was commenced by the allies. The city was defended by a force of about 3,000 British troops under Gen. Prevost. On the morning of Oct. 9, 1779, about 3,500 French and 850 Americans advanced to the attack. The fighting was fierce for nearly an hour, when the assailants gave way after a loss of nearly 1,000 men. Count Pulaski was killed and Count d'Estaing was wounded. The loss to the garrison was only 55 in killed and wounded. Next to Bunker

Hill this fight was the bloodiest of the war.

**Savannah River,** survey of, referred to, 1128.

**Savings Banks.** (See Banks, Savings.)  
**Sawtooth Forest Reserve, Idaho,** proclaimed, 7184.

**Saxony.**—A Kingdom of the German Empire, bounded on the north and east by Prussia, on the south by Bohemia, and on the west by Saxe-Altenburg, Saxe-Weimar-Eisenach, and Reuss. It is noted for its rich mines of coal, silver, tin, lead, iron, etc. For its size, Saxony is the busiest industrial State in the German Empire. It manufactures extensively machinery, textiles, tools, porcelain, glass, foundry products, beer and spirits. The government is a hereditary constitutional monarchy, administered by a King, an upper chamber, and a lower chamber of 82 deputies. Saxony sends four representatives to the Bundesrat and 23 to the Reichstag. It entered the North German Confederation in 1866 and became a State of the German Empire in 1871. Area, 5,787 square miles; population (1900), 4,508,601.

**Saxony,** convention with, 2267.

**Saxony, Treaties with.**—The convention of 1845 abolished the *droit d'aubaine* and all other taxes on emigration; provided for a period of two years in which an alien may close up the affairs of a legator from whom by alienage he is unable to inherit or hold property; settled questions of the disposal and holding of property by aliens, and the settlement of disputes concerning the same.

public schools of South Amboy and Seton Hall College, South Orange, N. J.; served three years as member of the board of education; was a Democratic presidential elector in 1908; mayor of South Amboy 1909-10; elected to the 62d Congress from New Jersey.

**Sea Witch, The**, wreck of, near Cuba, 2907.

**Seacoast Defenses.** (See Defenses, Public.)

**Seal Fisheries.** (See Alaska, Bering Sea Fisheries, Great Britain, claims against, and Russia, claims against.)

**Seal of United States.**—Immediately after the declaration of independence a committee was appointed to prepare a device for the great seal of the United States. The committee consisted of Benjamin Franklin, John Adams, and Thomas Jefferson. They reported various devices during several years. William Barton, of Philadelphia, was appointed to submit designs. Sir John Prestwich, an English antiquarian, suggested a design to John Adams in 1779. It was not until June 20, 1782, however, that a seal was adopted. This was by the Congress of the Confederation. It was a combination of the various designs of Barton and Prestwich, and consisted of: Arms—Paleways of 13 pieces argent and gules; a chief azure; the escutcheon on the breast of the American eagle displayed proper, holding in his dexter talon an olive branch and in his sinister a bundle of 13 arrows, and in his beak a scroll with the motto *E Pluribus Unum* (out of many, one). Crest—A glory or (gold) breaking through a cloud proper and surrounding 13 stars, forming a constellation argent (silver) on an azure field. Reverse—A pyramid unfinished, symbolizing the strength and growth of the States; in the zenith an eye in a triangle surrounded with a glory proper; over the eye, around the rim, the words *Annuit coeptis* (God has favored the undertaking); beneath the pyramid MDCCLXXVI and the words *Novus ordo saeculorum* (a new order of things). This seal has never been changed, and is in charge of the Secretary of State.

Accompanying the report and adopted by Congress, were the following remarks and explanation: "The escutcheon is composed of the chief and pale, the two most honorable ordinaries. The pieces pales represent the several States all joined in one solid compact entire, supporting a

**Seal of United States—Continued.**

chief which unites the whole and represents Congress. The motto alludes to this union. The pales in the arms are kept closely united by the chief, and the chief depends on that union and the strength resulting from it for its support, to denote the confederacy of the United States of America and the preservation of their union through Congress. The colors of the pales are those used in the flag of the United States of America; white signifies purity and innocence; red, hardness and valor; and blue, the color of the chief, signifies vigilant perseverance and justice. The olive branch and arrows denote the power of peace and war, which is exclusively vested in Congress. The constellation denotes a new State taking its place and rank among other sovereign powers. The escutcheon is borne on the breast of an American eagle without any other supporters, to denote that the United States of America ought to rely on their own virtue. The pyramid on the reverse signifies strength and duration. The eye over it and the motto allude to the many signal interpositions of Providence in favor of the American cause. The date underneath is that of the Declaration of Independence, and the words under it signify the beginning of the new American era which commences from that date."

**Secession.**—The act of going aside or withdrawing, as from a religious or political organization. The word has received world-wide notoriety from its use in connection with the secession of certain of the United States from the Union in 1860 and 1861. After the adoption of the Constitution in 1787 the idea of the sovereignty of the individual States remained familiar to the minds of many Americans. The Federalists of New England made threats of secession in 1811 and 1814, and secession was generally looked upon as an available remedy for Federal aggression. This claim has been advanced, directly or indirectly by many of the States in turn and has on such occasions usually been condemned by the others as treasonable. It was involved in or explicitly put forward by the Kentucky Resolutions, the Hartford Convention, and the South Carolina Nullification Ordinance (q. v.). While Jefferson condemned "secession," some of his writings admitted it to be a remedy of the last resort. As agitation against slavery became more intense secession was looked upon as the right and destiny of the Southern States. South Carolina was ready to secede in 1850. The Nullification Ordinance of 1832 and other measures passed by that State were early steps in that direction.

Gen. Jackson, then President, felt

**Secession—Continued.**

that such a power lodged in a State would be fatal to the Union and altogether unconstitutional. His emphatic opposition, as expressed in his military preparations, as well as his strong message and proclamation on nullification in 1833 (1166, 1203), checked this feeling for a time, but the postponement to a final test was perhaps chiefly due to the unpopularity of the nullification doctrine among the States-rights people themselves. Another reason why the South Carolina nullification movement was stopped was the adoption by Congress of the Clay-Calhoun compromise tariff bill, which gave satisfaction to the nullifiers and their States-rights friends in the South who did not accept nullification as a rightful or expedient remedy.

The secession doctrine was revived on the election of Lincoln in 1860. Many of the Southern people felt that the triumph of the Republican party meant the adoption of a policy of such interference with the institution of slavery as to make it impossible for the Southern States any longer to secure and enjoy their constitutional rights within the Union.

Accordingly, Dec. 20, 1860, after the election of Lincoln, South Carolina, by convention, passed an ordinance repealing her adoption of the Constitution in 1788, and reviving her independence. Mississippi seceded Jan. 9, 1861; Florida, Jan. 10; Alabama, Jan. 11; Georgia, Jan. 19; Louisiana, Jan. 26; Texas, Feb. 1; Virginia, April 17; Arkansas, May 6; North Carolina, May 20; Tennessee, June 8, all by conventions. Opposition to secession in many States was based rather upon the ground of inexpediency than unconstitutionality. The National Government never recognized the validity of the ordinances of secession adopted by the Southern States.

**Secession, right of States regarding,** discussed by President—

Buchanan, 3159, 3186.

Senator and member of Congress indicted on evidence secured by, 7606.

**Secretaries.**—By a series of acts passed in the early part of 1781 Congress organized the Government under several Departments, at the head of which were placed secretaries with duties similar to those of the secretaries of the British Government. The Secretary of the Navy was originally the Secretary of Marine. The Secretary of the Treasury was originally the Superintendent of Finance. Now all the heads of Departments, 9 in number, are denominated secretaries, except the Attorney-General and the Postmaster-General. (See also Cabinet; Presidential Succession, and Administration.)

**Secretaries.** (See the several Department Secretaries.)

**Seddon, James A.,** secretary of war of Confederate States, mentioned, 3797.

**Sedition Law.**—In 1798, when war between the United States and France was imminent, there were in the United States by estimate 30,000 Frenchmen organized into clubs, and 50,000 sympathizers with France, who had been English subjects. Many of the newspapers of the country at the time were controlled by aliens, mostly French, English, Irish, and Scotch refugees. Those alien residents who sympathized with France—the larger number—attacked the Government fiercely through the press for its attitude toward that country. In order to restrain this feeling, which excited bitter animosity among those Americans who resented the French attitude toward the United States, the Federalists in control of Congress passed the famous alien and sedition acts. The sedition act of July 14, 1798, was modeled on two English acts of 1795. It provided heavy fines and imprisonment for any who should combine or conspire against the operations of the Government, or should write, print, or publish any "false, scandalous, and malicious writings" against it or either House of Congress or the President, with intent to

**Sedition Law—Continued.**

bring contempt upon them or to stir up sedition. This, as well as the alien act, was regarded by the Republican party as unconstitutional and subversive of the liberty of press and speech. They called forth the Virginia and Kentucky resolutions (q. v.). The sedition act expired in 1801. (See also Alien and Sedition Laws.)

**Seed Distribution:**

Establishment of, discussed and recommended, 470, 878.

Power to establish should be conferred upon Congress, 587.

**Seminole Indians.** (See Indian Tribes.)

**Seminole Wars.**—After the War of 1812 the combined British and Indian stronghold known as the Negro Fort, on the Appalachicola River, was a constant menace to the Georgia settlers. During 1817 there were several massacres of whites. Gen. E. P. Gaines was intrusted with the task of subjugating the Indians. He destroyed an Indian village on the refusal of the inhabitants to surrender certain murderers, and the Indians retaliated by waylaying a boat ascending for Appalachicola with supplies for Fort Scott and killing 34 men and a number of women. Gen. Jackson took the field against the Indians in January, 1818, and in a sharp campaign of 6 months defeated them completely, destroying their villages and driving them from every stronghold. Among the prisoners taken were two English subjects, Arbuthnot and Ambrister, who were charged with in-

citing the Indians to hostilities. These were tried by court-martial and hanged.

Jackson pursued the Indians into Florida, which was then Spanish territory, captured Pensacola and St. Marks, deposed the Spanish government, and set up an American administration. This territory was later returned to Spain, but the outgrowth of the incident was the cession of Florida to the United States in satisfaction of the latter's claims, and the payment to Spain besides of \$5,000,000. The second Seminole war was the most stubborn and bloody of all the Indian wars. It originated in the refusal of part of the tribe to cede their lands to the whites and remove to the Indian Territory. Osceola, one of the chiefs opposed to immigration, was placed in irons by Gen. Thompson, an agent of the United States. Osceola regained his liberty, killed Thompson and others at Fort King, and cut to pieces a body of troops. Operations against Osceola and his warriors were conducted with great severity, but with varying success, under Scott, Call, Jesup, Taylor, and others. The Indians were supposed to be subjugated in 1837, but Osceola fled and renewed the struggle. He was taken by treachery in 1842 and the war ended.

**Senate.**—The upper branch of the legislature of the United States. The Senate is composed of 2 representatives from each State, chosen by the State legislature for a period of 6 years; accordingly the membership has varied in number, from time to time, from 22 members representing 11 States in the First Congress to 92 members representing 46 States in the 61st Congress. Senators must be 30 years of age, residents of the State they represent, and must have

**Senate—Continued.**

been citizens of the United States for at least 9 years; they receive a salary of \$7,500 per annum and a small allowance for stationery and mileage. Should a vacancy occur in the Senate during a recess of the State legislature, the Governor of the State makes a temporary appointment which is valid until the next meeting of the legislature. The Constitution provides that the terms of Senators shall so overlap that one-third of the members retire every 2 years. The presiding officer of the Senate is the Vice-President of the United States who votes only in case of the votes being equally divided. Besides the legislative functions, the Senate ratifies or rejects all treaties negotiated by the President; confirms or rejects all appointments to the higher Federal offices; exercises the functions of high-court of impeachment; and in case the electors fail to make a choice, elects the Vice-President of the United States from the 2 candidates receiving the largest number of electoral votes. The exercise of these wide powers given to it by the Constitution, has rendered the Senate more powerful than the House; the reverse being usually the case with upper houses. In the constitution adopted by Virginia in 1776 the name Senate was given to the Virginian upper chamber, but the term was not applied to the upper house of the Federal Congress until Aug. 6, 1787; which up to that time had been known as the "second branch." Since the name has been adopted in the Congress of the United States it has spread to all States whose legislatures are divided into two chambers.

The composition of the Senate is due to one of the most important proposals in the constitutional convention at Philadelphia, known as the "Connecticut Compromise" which was brought forward by Oliver Ellsworth and Roger Sherman. This compromise settled the conflicting claims of the large and small States by providing for equal representation of States in the Senate, the House being chosen on a population basis. Of late years the question of an amendment of the Constitution, to permit the election of United States Senators by direct popular vote, has gained considerable ground. Resolutions calling for a Constitutional Convention on this subject have been passed by the legislatures of 14

States and the question has been approved in one or other house in 13 other State legislatures. Several States, chiefly in the South, have already placed the names of candidates for the United States Senate upon the primary ballots, thus leaving to the legislature nothing more than the formal election.

**Senate.** (See Congress.)

**Senatorial Courtesy.**—In order that the dignity of the body may be preserved, the Senate gives considerable attention to the personal wishes of its members. In addition to the observance of courteous address, polite language, and the exercise of those acts of kindness which tend to lighten official duties and render social life a pleasure, there is a tacit understanding as to the conventional privileges to be accorded to each in the official deliberations. Should the name of any former member of the Senate be presented to that body by the President for their advice as to his appointment to a Federal office, Senatorial courtesy requires immediate confirmation without reference to a committee. The privileges of speaking as long as he may choose on any question before the Senate is a courtesy granted each Senator, and though it is charged that undue advantage has sometimes been taken of this privilege it has never been abridged. There is no previous question provided in the rules of the Senate.

**Senators of United States:**

**Servia.**—A constitutional hereditary monarchy of the Balkan Peninsula, in southeastern Europe. It is bounded on the north by Austria-Hungary (separated by the Save and Danube), on the east by Roumania (separated by the Danube) and Bulgaria, on the

**Servia—Continued.**

south by Turkey and Bosnia, and on the west by Bosnia (separated in part by the Drina). The surface is mountainous. Agriculture is the chief industry. The Byzantine governors were expelled and the title of king assumed in the eleventh century. After being twice under Turkish dominion, Servia became practically independent in 1817. By uniting with Russia against Turkey in 1877-78 the territory of the Kingdom was extended. In 1885 Servia invaded Bulgaria, but suffered disastrous defeats; peace was restored, by the intervention of Austria, early in 1886. During recent years, the vagaries of the last kings of the Obrenovich dynasty produced a very unsettled state of affairs; popular discontent finally reached a head when Queen Draga, wife of King Alexander, a woman of low origin and loose morals, succeeded in having her brother proclaimed heir to the throne. The king and queen were assassinated on June 11, 1903, and Prince Peter, of the Karageorgevich dynasty, was proclaimed king. It has now an area of 18,630 square miles and a population (1910) of 2,922,058.

In 1912 Servia joined the other Balkan States in a war against Turkey. (See Balkan Question.)

**Servia:**

Consular convention with, 4627, 4658.

Referred to, 4757.

Treaty with, 4658.

**Servia, Treaties with.**—The convention of commerce and navigation of 1881 provided for freedom of commerce, navigation, and trade upon full, equitable, and reciprocal bases; established the rights of real and personal property holders; conferred trade privileges; restricted the prohibition of imports; exempted citizens of the one country from enforced military service or contributions in the country of the other; granted terms of the most favored nation in matters of import and export duties; exempted goods from any form of transit duty; goods for the one country to be conveyed over the railroads of the other on terms equal to those of the citizens of the country. (For terms of the consular convention of 1881, see Consular Conventions. For terms of the extradition treaty of 1901, see Extradition Treaties.)

**Sessions of Congress.** (See Extraordinary Sessions of Congress.)

**Seven Days' Battles.**—A series of battles fought in the Peninsular campaign, in the vicinity of Richmond, Va., between the Army of the Potomac, under McClellan, and the Confederate army, under Lee. The first conflict occurred on June 25, 1862, and a battle was fought each succeeding day but one to July 1. June 25 McClellan's army before Richmond, numbering 115,102, received orders to advance. Lee's army on both sides of the Chickahominy aggregated 80,835. Hooker advanced beyond Fair Oaks and secured his ground. Meantime the Confederates had placed Richmond in a state of security and determined upon aggressive movements. Lee had succeeded Johnston in command, and it was determined to bring the mass of the army down the Chickahominy and threaten McClellan's communications with the York River. Jackson had moved out of the Shenandoah Valley and was at Hanover Court-House, ready to render what assistance might be required. Some Federal historians say that McClellan determined to change his base of operations to the James River, 17 miles south of Fair Oaks. The writers on the Southern side deny this. The retreat was accomplished with a loss to the Federal army of 15,249 men. The operations of the two armies are described under the headings Mechanicsville, Gaines Mill, Savage's Station, Frayser's Farm, and Malvern Hill. A few weeks later the Federal army was withdrawn from the James and the Peninsular campaign was ended.

**Seven Nations.** (See Indian Tribes.)

**Seven Pines and Fair Oaks (Va.), Battle of.**—From Williamsburg to Richmond, Va., the distance is about 50 miles. By May 30, 1862, Casey's and Couch's divisions of Keyes's corps of McClellan's army had crossed the Chickahominy and advanced respectively to Fair Oaks and Seven Pines, 6 and 7 miles, respectively, from Richmond. Heintzelman's corps had also crossed and was encamped several miles to the rear of Couch on the Williamsburg road, and Sumner was ready to make the passage of the stream when a heavy rain, which occurred on the night of May 30, rendered this impracticable. Joseph E. Johnston, who was in command of the Confederate forces, sent Generals Longstreet, Huger, D. H. Hill and Gustavus W. Smith to attack this advance guard of the invading army. The fighting began at 1 p. m., May

**Seven Pines and Fair Oaks (Va.), Battle of—Continued.**

31. The Federals gradually fell back. At 4:30 the arrival of Sedgwick's division of Sumner's corps turned the tide of battle. At sunset Gen. Johnston was severely wounded by a piece of shell, and the command devolved upon Gen. Smith. In the morning the Confederates renewed the attack. They were finally repulsed about noon. The Confederates lost 4,233. The Federals lost 5,739, of whom 890 were killed. Gen. Lee assumed command of the Confederate army the day following the battle.

**Sevier, Ambrose Hundley**; lawyer; b. Green Co., Tenn., Nov. 4, 1801; moved to Arkansas and was elected to the legislature, first in 1823, and again in 1825; from 1827 to 1836 he was a delegate in Congress from Arkansas, and when the Territory became a State, in 1836, he was elected to the United States Senate; died Little Rock, Dec. 21, 1848.

**Sevier, Ambrose H.**, commissioner of United States to Mexico:

Illness prevents departure of, 2427.

Instructions to, referred to, 2537.

President declines to transmit instructions to, to House, 2452.

**Sevier, John**; pioneer; b. Rockingham Co., Va., Sept. 23, 1745; founded Newmarket village in the Shenandoah Valley and took part in many fights with the Indians; removed with his two brothers to the Watauga county, beyond the Alleghanies, 1773; in 1784, when North Carolina proposed to transfer the territory west of the Alleghanies to the United States government, the citizens, led by Sevier, objected and organized the proposed State of Franklin, and elected Sevier governor; the scheme was abandoned in 1788; he represented North Carolina in the 1st Congress, 1790-91; served in the campaigns against the Creeks and Cherokees, and was chosen governor of Tennessee, 1796; and represented the State in the 12th and 13th Congresses; died near Fort Decatur, Ala., Sept. 24, 1815.

**Sevier Forest Reserve**, Utah, proclaimed, 7117.

**Sewall, Thomas**, consul to Santiago, Cuba, nomination of, withdrawn and reasons therefor, 2584.

**Seward, Frederick W.**, Acting Secretary of State, 3906, 4400.

**Seward, George Frederick**; diplomat; b. Florida, N. Y., Nov. 8, 1840; United States consul-general at Shanghai, China, 1861; minister to China, 1876, but recalled for his refusal to nego-

tiate a treaty for the restriction of Chinese immigration; author of "Chinese Immigration in Its Social and Economical Aspects."

**Seward, George F.:**

Decree prohibiting steamers sailing under American flag from using cannon on Yangtse River promulgated by, 3896, 3902.

Minister to China, charges against, referred to, 4313.

Instruction to, concerning immigration, referred to, 4691.

**Seward, William Henry** (1801-1872); statesman; b. in Florida, Orange Co., N. Y.; settled in Auburn, 1823, and practiced law; elected (anti-Masonic) State senator, 1830-34; defeated for governor, 1834, but elected by the Whig party in 1838; reelected, 1840, and served until Jan. 1, 1843; Whig, and later Republican, United States Senator, 1849-61; in a speech at Rochester, 1858, he characterized the struggle between freedom and slavery as "an irrepressible conflict"; candidate for the Republican nomination for President, 1860; Secretary of State, 1861-69; wounded by an accomplice of Booth, 1865; traveled extensively between 1869 and 1871; was a consistent supporter of Johnson's reconstruction policy; his diplomatic services to his country include a most tactful handling of the "Trent affair"; withdrawal of the French troops from Mexico; and the cession of Alaska to the United States by Russia in 1867.

**Seward, William H.:**

Correspondence regarding Dorr's Rebellion, 2151.

**Seymour, Horatio** (1810-1886); politician; b. at Pompey Hill, Onondaga Co., N. Y.; practiced law after 1832; elected to the New York States assembly, 1841; mayor of Utica, 1842; speaker of the State assembly, 1845;

**Seymour, Horatio**—*Continued.*

Democratic candidate for governor, 1850, and defeated; elected to the office for the term of 1853-55; defeated for governor, 1854, for having vetoed a prohibition bill in that year; reelected for the term of 1863-65; during this term the draft riots occurred in New York City, 1863; Democratic national chairman, 1864 and 1868; unsuccessful Democratic candidate for governor, 1868; nominated as the Democratic candidate for the Presidency to oppose Grant in 1868.

**Shackerly, Peter**, claims of orphan child of, 1693.

**Shackleford, Dorsey W.**; b. Aug. 27, 1853; elected to the 56th, 57th, 58th, 59th, 60th, 61st and 62d Congresses from Missouri.

**Shadrach Case.**—One of many exciting fugitive slave cases of ante-bellum days. In May, 1850, Frederic Wilkins, a Virginian slave, made his escape and found his way to Boston, where he obtained employment under the name of Shadrach. Subsequently he was arrested and imprisoned in the United States court-house, pending trial. He was liberated by a body of colored people and assisted to Canada. Intense excitement prevailed in Boston, which spread over the entire country when Congress turned its attention to the infringement of the law. Clay introduced a resolution requesting the President to inform Congress of the facts in the case. President Fillmore issued a proclamation (2645) announcing the facts and calling upon the people to prevent future disturbances.

**Shafter, William Rufus**; soldier; b. Galesburg, Mich., Oct. 16, 1835; enlisted in the Civil War, 1861, and mustered out brigadier-general of volunteers, March 13, 1865; entered the regular army, 1867, and upon the outbreak of hostilities with Spain, in 1898, given command of the expedition sent to Cuba; arrived at Daiquiri June 21, took Siboney, Guasimas, El Caney, and San Juan Hill, and finally, July 14, all the Spanish troops in Eastern Cuba surrendered to him, and he remained in possession till peace was declared; retired with the rank of major-general, Feb. 2, 1901.

**Shasta Forest Reserve**, proclaimed, 7334.

**Shawanese Indians.** (See Indian Tribes.)

**Shawnee Indians.** (See Indian Tribes.)

**Shays's Rebellion.**—An insurrection of some people of western Massachusetts against the State government in 1786-87, under the leadership of Daniel Shays. After the close of the Revolution much discontent and actual want prevailed throughout New England, especially in Massachusetts. The annual State tax amounted to \$1,000,000. Riots and armed mobs were frequent. The chief grievances complained of were that the governor's salary was too high; that the senate was aristocratic; that lawyers' fees were extortionate and the taxes burdensome. The relief demanded was the issue by the State of paper money. This was refused. Shays, at the head of 1,000 armed men, took possession of Worcester, Dec. 5, 1786, and prevented the session of the Supreme Court. The court having adjourned to Springfield, the same men attempted to prevent the session there, but were forestalled by the militia. In January, 1787, three bodies of insurgents, under Shays, Luke Day, and Eli Parsons, marched upon Springfield with the purpose of capturing the Continental arsenal. Shays's army, numbering about 1,000 was attacked by about 4,000 militia under Gen. Benjamin Lincoln, and was put to a flight with a loss of 3 killed and 1 wounded. Shays and some of his followers joined Parsons's force, but were dispersed by the militia at Petersham in February, 1787. Shays escaped, but 150 others were

**Shays's Rebellion.—Continued.**

captured and their leaders sentenced to death. All, however, were ultimately pardoned on laying down their arms.

**Sheep Husbandry**, report of Commissioner of Agriculture on, transmitted, 4462.

**Shenandoah, The.**—Notwithstanding the provisions of the British foreign enlistment act of 1819, which forbids the equipment of any land or naval forces within British dominions to operate against any friendly nation, the *Florida*, *Alabama*, *Georgia*, *Shenandoah*, and other Confederate vessels were allowed to escape in spite of the protest of the United States minister. The *Shenandoah* sailed from London as the *Sea King* Oct. 8, 1864, commanded by Capt. James Iredell Waddell, of the Confederate navy. Making for Madeira her name was changed to *Shenandoah*. From Madeira she sailed for Melbourne, destroying a number of United States merchant ships on the way. Thence she went to Bering Sea and did great damage to whaling vessels. At the close of the war the *Shenandoah* was surrendered to the British Government, and later turned over to the United States. The depredations of the *Shenandoah* were made a part of the Alabama claims against Great Britain. (See also Alabama Claims.)

Increase in Army, recommended by, 4330.

Lands set apart by, for refugees and freedmen, referred to, 3549.

Mentioned, 3812, 3816.

Report of, on conditions in Southern States, 3576.

Requested to proceed to Mexican frontier and communicate with American minister, 3641.

Referred to, 3654.

Thanks of President tendered, 3439.

Treaty with Indians concluded by, 3834.

**Sherman Act.**—A compromise financial measure introduced into Congress by Senator John Sherman, of Ohio, and passed July 14, 1890. It repealed the Bland-Allison Act of 1878 and directed the Secretary of the Treasury to purchase silver bullion to the amount of 4,500,000 ounces per month, at the

market rate, issuing Treasury notes in payment therefor. These notes were to be redeemed in coin at the Treasury on demand. The act also directed the coinage each month of 2,000,000 ounces of the bullion into standard silver dollars. The repeal of the Sherman Act was frequently urged. In the summer of 1893 the law was claimed to be a leading cause of the business depression, and President Cleveland summoned Congress to meet in special session Aug. 7. Congress, after a long debate, passed Nov. 1 the Voorhees bill, repealing the silver-purchasing clause of the Sherman Act, but affirming bimetallism as a national policy.

**Sherman Act:**

Discussed, 5548, 5628.

Repeal of purchasing clause of, discussed, 5875, 6073, 6074.

Recommended, 5833.

**Sherwood, Isaac R.**; b. Stanford, Dutchess Co., N. Y., Aug. 13, 1835; April 16, 1861, the day following Lincoln's call for volunteers, enlisted as a private and served with honor and distinction in the Civil War; made brevet brigadier-general by President Lincoln Feb. 16, 1865, for long and faithful service and conspicuous gallantry; after the war located in Toledo; was editor of the *Toledo Commercial*; later editorial writer on the *Cleveland Leader*; in 1868 he was elected secretary of state of Ohio, reelected in 1870, serving four years; organized the bureau of statistics of Ohio; elected to the 43d Congress; bought the *Toledo Journal* and edited it for nine years; author of "Army Gray Back" (illustrated poem); elected to the 60th, 61st and 62d Congresses from Ohio.

**Shields, Thomas**, arrest and imprisonment of, in Mexico, 4672, 4678, 4692, 4696.

**Shilling.**—The name of a coin in use in several European States, varying in its value. The English shilling is one-twentieth of a pound sterling, the Danish copper shilling is one-ninety-sixth of a rixdaler, and equal to one-fourth of a penny of English money. The Swedish shilling is twice the value of the Danish. In some parts of Germany the shilling is used as a fractional coin of the value of one penny sterling. In America this coin was first issued from the mint at Boston. The first struck were known as the New England shilling, Willow Tree, Oak Tree, and Pine Tree coins. One of the earliest coins used in America was the Bermuda shilling.

*Shilling—Continued.*

Lord Baltimore had shillings coined in London for use in Maryland. As money of account the shilling varied greatly in the Colonies.

**Shiloh, or Pittsburg Landing (Tenn.), Battle of.**—One of the most hotly contested battles of the Civil War. After the first line of Confederate defenses in the West had been broken by Grant, Gen. Beauregard was sent to establish another. He selected the line of the Memphis and Charleston Railroad. The Confederate army to the number of 45,000 was concentrated at Corinth, Miss., under command of Albert Sidney Johnston. Polk, Bragg, Hardee, and Breckenridge were there with their corps, and Van Dorn and Price were on the way from Arkansas with 30,000 more. After taking Fort Donelson, the Federal army under Grant proceeded up the Tennessee River to Pittsburg Landing, a point 219 miles from its mouth, on the west bank, near the intersection of the State lines of Alabama, Mississippi, and Tennessee, and about 20 miles from the Confederate camp at Corinth. Five divisions of Grant's army, under Generals W. T. Sherman, Hurlbut, W. H. L. Wallace, McClelland, and Prentiss, were here encamped, and, including Gen. Lew. Wallace's division, about 7 miles down the river, numbered 40,000 men. Buell's army of 40,000 was expected to reinforce them here, and it was the intention upon his arrival to proceed against Johnston at Corinth. The latter, however, without waiting for his own reinforcements, resolved to attack Grant before the arrival of Buell's forces. April 3, 1862, Johnston marched his army from Corinth and on the 6th attacked the Federal army. After a day's hard fighting Grant's army was driven back from the vicinity of Shiloh Church nearly to the river, a distance of three miles. A part of the expected reinforcements arrived just in time to help to check the last charge of the victorious Confederates. The battle was reopened on the morning of the 7th by Buell, who had arrived during the night with 20,000 men. The second day's fighting was as stubborn as the first had been, but the Confederates were outnumbered. At 2 P. M. Beauregard ordered preparations made for the retreat, which by 4 o'clock was under way. He was not pursued. The casualties were: Confederates—killed, 1,728; wounded, 8,012; prisoners, 959; total, 10,699.

Federals—killed, 1,735; wounded, 7,882; prisoners, 3,956; total, 13,573. Gen. Albert Sidney Johnston was killed on the first day of the battle and was succeeded by Gen. Beauregard in the command of the Confederate army.

**Shire.**—A division of the Kingdom of Great Britain, dating back to the time of the Saxon invasion. It is now taken to mean almost the same as county, as most of the English county names terminate in the word shire. The shire has been extended to Scotland and Wales. In 1643 the general court of Massachusetts Bay Colony ordered that the whole Colony, which then included the present State of New Hampshire, be divided into four shires—Essex, Middlesex, Suffolk, and Norfolk. The name was used for county in all the Colonies.

**Shively, Benjamin F.;** b. St. Joseph Co., Ind., March 20, 1857; educated at the Northern Indiana Normal School at Valparaiso and the University of Michigan; elected to the 48th Congress to fill a vacancy and elected a Representative to the 50th, 51st, and 52d Congresses; elected to the United States Senate from Indiana, 1909.

 Cruise of, around the world, referred to, 4693.

**Siam.**—A Kingdom in the peninsula of Indo-China, in southeastern Asia. It is bounded on the north by the Shan States, on the east by the French dependencies Annam, Tong-king, etc., on the south by the Gulf of Siam, and on the west by Burma. The chief products are rice, teak, and other cabinet woods, rubies, sapphires, and pepper. The government is vested in the King and a council of ministers. The religion is mainly Buddhism. Area, about 195,000 square miles; population, according to figures published in 1910, 6,687,000. The population can only be estimated, as the custom of the country is to count only the men. The area is variable, as the border lands are occupied by tribes more or less independent. The results of western civilization have been made apparent in recent years. The King has two American general advisers, a British judicial adviser, a French legislative adviser, and a Japanese legal adviser. A penal code has been adopted and many reforms introduced in the trial of suits of foreigners against natives. The metropolitan police force is superintended by Eng-

lish officers loaned by the Indian government, and the provincial police are under Danish inspection.

The chief product of the country is rice, which forms the principal article of food as well as the staple export. For the year ended March 31, 1910, the exports of rice amounted to 952,889 tons. In Bangkok there are twenty-six large rice mills. Fruits are abundant. The cultivation of rubber has been begun. Rubies and sapphires are exported. In the great forests in the north the teak industry is carried on mainly by British enterprise.

**Siam:**

American representative at coronation of King of, 8047.

Claim of United States against, 6184.

Adjustment of, 6336.

Diplomatic relations with, 6336.

Appropriation for, recommended, 4799.

Gifts received from, referred to, 3267.

Legation of United States in, premises for, presented by Government of, 4823, 4825, 4923.

Appropriation for erection of building on, recommended, 5494.

Liquor traffic in, agreement with, for regulation of, 4803.

Minister of United States to, mission created, 4718, 4761, 4825.

Treaty with, 1272, 1457, 1593, 2951, 3061, 3834.

**Siam, Treaties with.**—The convention of amity and commerce of 1833 was modified in some directions by the treaty of 1856. Freedom of commerce was extended to citizens of the United States except in importation of arms and munitions of war, and opium, and in the exportation of rice, which is prohibited. The duties payable on ships, it was agreed, should be those paid by the most favored nation; and should there be in the future any diminution in the same in favor of any foreign nation, the United States should share the favor. Humane treatment of shipwrecked mariners was provided for.

A subject of Siam in debt to a citizen of the United States or a citizen of the United States in debt to a subject of Siam shall be obliged to bring all of his goods for sale and apply the proceeds to the payment thereof; should the proceeds be insufficient, the debtor shall not be liable for the balance. Merchants from the United States may rent houses in Siam, but shall rent the

**Siam, Treaties with—Continued.**

king's factories and pay the usual rent therefor. Goods brought to Siam by merchants shall be reported in detail to the king, but no duty shall be charged thereon. Should any foreign country other than Portugal be privileged to appoint consuls at Siam, that privilege shall also be accorded to the United States.

The treaty of 1856 afforded full protection to merchants of the United States in Siam. As Siam has no ships of war, it was agreed that the vessels of war of the United States meeting a Siamese vessel at sea should render to it all possible aid not in violation of the laws of neutrality; and American consuls in foreign ports out of Siam shall render aid to the captains of Siamese vessels in such ports. Provision is made for the appointment of a consul at Bangkok. (See Consular Conventions.) American merchants may trade freely in any port of Siam, but shall reside permanently at Bangkok, where they may rent land, but may not purchase land within two hundred seng (four English miles) of the city walls until they have lived for ten years in Siam or have permission so to buy. Apart from this, American merchants may buy or rent houses anywhere within twenty-four hours' journey from Siam, measured at the rate of speed at which boats travel. Freedom of conscience is allowed to all.

Vessels of war of the United States may enter the river and anchor at Paknam, but only with special permission may proceed to the docks. On articles of import the duty shall be three per cent., payable either in money or in goods. Unsalable and re-exported goods shall be entitled to a drawback. Opium may be imported free of duty, but may not be sold to the opium farmer or his agents. It may be re-exported without impost or duty levied upon it. In times of threatened scarcity the Siamese government may prohibit the export of salt, rice, and fish, on thirty days' notice.

By an agreement of 1884 it is permitted to sell in Siam liquors of a strength allowed to be manufactured in Siam. Beers and wines may be sold on an import duty not to exceed ten per cent. The strength of liquors shall be tested by a Siamese official. The Siamese government may at any time stop the importation of liquors or spirits which, in their opinion,

prove deleterious to the health of the people.

**Silkworms**, memorial from Count de Bronno Bronski regarding introduction of, into United States, 2584.

**Silver.**—One of the precious metals and the one most in use during historic times, both in the arts and as a medium of exchange. In the earliest ages, even before there was a record, as in prehistoric Greece and Italy, silver mines were worked, and the refined metal obtained from the ores was employed in ornamental and useful arts. It was not so early used as a money metal, and when finally its use as such was begun it was made into bars or rings and sold by weight. Shekels, or pieces of silver, are alluded to in the book of Genesis.

**Silver—Continued.**

Abraham, in the land of Canaan, bought a field for sepulture and paid for it in silver. But the best authorities state that the first regular coinage of either gold or silver was in Asia Minor, in Phrygia or Lydia. The Egyptians did not have coins in the earliest times, although otherwise their civilization was advanced. In ancient times silver was plentiful in Spain. Hannibal, it is stated, obtained 300 pounds per day from the mines there during the Carthaginian occupation of that country. At a much earlier day the Athenians had valuable silver mines at Laurium, in the territory of Attica. Silver, as well as gold, was employed in the erection of Solomon's Temple at Jerusalem. Silver drinking cups and silver ornaments on horn or ivory drinking cups were in use among the Vikings. In fact, all the civilized and semicivilized nations and tribes of antiquity made free use of this metal. It was more common even than gold, and therefore less precious. At a later period the Incas in Peru, the Toltecs and Aztecas in Mexico, and the Mayas in Yucatan employed it for ornamental purposes and for objects of utility, both in their temples and palaces. Among modern civilized and enlightened peoples its use is so common as to require no special remark.

The metal itself is found in almost every part of the globe, usually in combination with other metals. Take the whole historical period and it is found that the South American mines are the richest. Mulhall is authority for the statement that Mexico has produced more silver since 1523 than any other country within the last 500 years. He values the total output there for the period at \$3,050,000,000. Mexico has also the largest annual output, producing 60,808,978 oz. fine, valued at \$35,269,200; the United States follows next with 57,682,800 oz. fine, worth \$33,456,000. Large masses have been found in nuggets, as one of 370 pounds at La Paz, Bolivia, in 1749; another of 560 pounds at Königsberg, Norway, and still another of 800 pounds at Huantaya, Peru. Sonora, Mexico, however, claims to have extracted a huge lump of silver weighing 2,700 pounds.

The ratio of silver to gold has varied greatly. 1000 B. C. it was 12 to 1, if the best figures obtainable are to be relied upon. At the Christian era it was 9 to 1. 500 A. D.,

just 24 years after the downfall of the Western Empire of Rome, the ratio was 18 to 1, but in 1100 A. D. it had fallen to 8 to 1. At the close of the seventeenth century it was 10 to 1, and at the end of the last century 15 to 1. In 1850 the ratio was 15.4 to 1; in 1879, 18.40 to 1; in 1893, 26.49, the present ratio (1909) being 35.70.

The subject has entered into American politics, the Democratic party in 1896 having declared for the free coinage of the metals at the former ratio of 16 to 1. The French ratio was at 15½ to 1. The repeal in 1873 of the law providing for the free and unlimited coinage of silver was the beginning of an agitation for the restoration of bimetallism. (See also Bland-Allison Act; Coinage Laws; Sherman Act.)

**Silver.** (See Gold and Silver.)

**Simmons, F. M.;** b. Jan. 20, 1854, in Jones Co., N. C.; graduated at Trinity College, that State, with the degree of A. B., in June, 1873; admitted to the bar in 1875; in 1886 was elected a member of the 50th Congress; received the degree of LL. D. from Trinity College, N. C., June, 1901; elected to the United States Senate for the term beginning March 4, 1901; reelected in 1907 to represent North Carolina.

**Simmons, James F.,** correspondence regarding Dorr's Rebellion, 2158.

**Simmons, James S.;** b. in Frederick Co., Md., Nov. 25, 1861; was educated at Liberty Academy and Frederick College; engaged in the real estate business during all of his business life; elected to the 61st and 62d Congresses from New York.

**Simpson, Edward,** member of Gun Foundry Board, 4748.

**Simpson, Slingsby,** vessel under, ordered from and forbidden to reenter waters of United States, 391.

**Sims, Thetus Willette;** b. April 25, 1852, in Wayne Co., Tenn.; graduated law department of the Cumberland University, at Lebanon, Tenn., June, 1876; elected to the 55th, 56th, 57th, 58th, 59th, 60th, 61st and 62d Congresses from Tennessee.

**Single Standard.** (See Monometallism.)

**Single Tax.**—The following statement of the single tax principle was written by Henry George, Sr.: We are in favor of raising all public revenues for national, State, county, and municipal purposes by a single tax upon land values, irrespective of improvements, and all the obligations of all forms of direct and indirect taxation. Since in all our States we now levy some tax on the value of land, the single tax can be instituted by the simple and easy way of abolishing, one after another, all other taxes now levied and commensurately increasing the tax on land values until we draw upon that one source for all expenses of government, the revenue being divided between local governments, State government, and the general government, as the revenue from direct tax is now divided between the local and State governments, or by a direct assessment being made by the general government upon the States and paid by them from revenues collected in this manner. The single tax we propose is not a tax on land, and therefore would not fall on the use of land and become a tax on labor. It is a tax not on land, but on the value of land. Then it would not fall on all land, but only on valuable land, and on that not in proportion to the use made of it, but in proportion to its value—the premium which the user of land must pay to the owner, either in purchase money or rent, for permission to use valuable land. It would thus be a tax not on the use and improvement of land, but on the ownership of land, taking what would otherwise go to the owner as owner, and not as user.

In assessments under the single tax all values created by individual use or improvement would be excluded, and the only value taken into consideration would be the value attaching to the bare land by reason of neighborhood, etc., to be determined by impartial periodical assessments. Thus the farmer would have no more taxes to pay than the speculator who held a similar piece of land idle, and the man who, on a city lot, erected a valuable building, would be taxed no more than the man who held a similar lot vacant. The single tax, in short, would call upon men to contribute to the public revenues not in proportion to what they produce or accumulate, but in proportion to the value of the natural opportunities they hold. It would compel them to pay just as much for holding land

idle as for putting it to its fullest use. The single tax, therefore, would: First. Take the weight of taxation off the agricultural districts, where land has little or no value irrespective of improvements, and put it on towns and cities, where bare land rises to a value of millions of dollars per acre. Second. Dispense with a multiplicity of taxes and a horde of tax-gatherers, simplify government, and greatly reduce its cost. Third. Do away with the fraud, corruption, and gross inequality inseparable from our present methods of taxation, which allow the rich to escape while they grind the poor. Land cannot be hid or carried off, and its value can be ascertained with greater ease and certainty than any other. Fourth. Give us with all the world as perfect freedom of trade, as now exists between the States of the Union, thus enabling our people to share through free exchanges in all the advantages which nature has given to other countries, or which the peculiar skill of other peoples has enabled them to attain. It would destroy the trusts, monopolies, and corruptions which are the outgrowths of the tariff. It would do away with the fines and penalties now levied on any one who improves a farm, erects a house, builds a machine, or in any way adds to the general stock of wealth. It would leave every one free to apply labor or expend capital in production or exchange without fine or restriction, and would leave to each the full product of his exertion. Fifth. It would, on the other hand, by taking for public use that value which attaches to land by reason of the growth and improvement of the community, make the holding of land unprofitable to the mere owner and profitable only to the user. It would thus make it impossible for speculators and monopolists to hold natural opportunities unused or only half used, and would throw open to labor the illimitable field of employment which the earth offers to man. It would thus solve the labor problem, do away with involuntary poverty, raise wages in all occupations to the full earnings of labor, make overproduction impossible until all human wants are satisfied, render labor-saving inventions a blessing to all, and cause such an enormous production and such an equitable distribution of wealth as would give to all comfort, leisure, and participation in the advantages of an advancing

**Single Tax—Continued.**

civilization, in securing to each individual equal right to the use of the earth. It is also a proper function of society to maintain and control all public ways for the transportation of persons and property, and the transmission of intelligence; and also to maintain and control all public ways in cities for furnishing water, gas, and all other things that necessarily require the use of such common ways.

**Sinking Fund.**—An account or fund set aside for the payment of a debt or obligation. It is formed by successively appropriating or setting aside sums for the designated purpose. Alexander Hamilton made an unsuccessful attempt under the Confederation to establish a sinking fund for the liquidation of the national debt. The first national sinking fund in this country was created by act of Congress Aug. 2, 1790. The present sinking fund to retire the national debt was established by an act of Feb. 25, 1862, and amended by later acts. It sets apart annually a special fund for the payment of interest on and for the purchase of a given per cent. of the national debt. Bonds so redeemed are to be canceled and deducted from the outstanding indebtedness of the Government. In addition there is to be purchased annually an amount of Government bonds equal to the annual interest on bonds previously bought for the sinking fund. The sinking fund is thus, as far as interest is concerned, in the position of any other holder of the Government's obligations receiving interest on the bonds that have been purchased for its account, except that the bonds belonging to it have been canceled and the debt considered reduced by that amount. An act of April 17, 1876, provides that fractional currency, redeemed by the Treasury, shall constitute a part of the sinking fund.

**Sinking Fund,** repeal of law recommended, 5754.

**Slaughterhouse Cases.**—A series of 5 cases bearing upon the creation of monopolies or trusts and defining the scope of the fourteenth amendment. The Crescent City Live Stock, Landing and Slaughterhouse Co. was incorporated by the Louisiana legisla-

**Slaughterhouse Cases—Continued.**

ture March 8, 1869. The Butchers' Development Association protested against this act of the legislature on the ground that it created a monopoly. Suit was brought against the State by Paul Esteben and others on the ground that their business was injured. It was claimed by the plaintiffs that the creation of a monopoly of this sort by the State legislature was in violation of the fourteenth amendment to the Constitution which prohibits State legislatures from enforcing laws "which shall abridge the privileges or immunities of the citizens of the United States." The Supreme Court of Louisiana decided that the law did not conflict with the amendment to the Constitution. The Supreme Court of the United States, April 14, 1873, and Jan. 24, 1887, affirmed the decision. In these celebrated cases the Supreme Court likewise decided that the fundamental character of the Government had not been changed in any way by the Civil War. The judgment of the Supreme Court of Louisiana was not entirely affirmed in the last case mentioned—that of the Crescent Live Stock Co. *vs.* Butchers' Union. That part which constituted a judgment against the Crescent City Live Stock, Landing and Slaughterhouse Co. solely, for damages for the malicious prosecution, was reversed and the case remanded for further proceedings. In that case Justice Matthews delivered the opinion, and there was no dissenting opinion. In the other cases Justice Miller rendered the court's judgment. Justice Field, for himself, and Justices Swayne and Bradley, delivered a dissenting opinion.

**Slave Representation.**—One of the most difficult problems encountered by the framers of the Constitution was the representation to be accorded in Congress to those portions of the country whose population consisted partly of slaves. It was contended, on the one hand, that, being persons, they should be represented, and, on the other hand, that, being property, they should be made the object of taxation. A compromise was finally reached providing that for purposes of reckoning a State's proportion of Representatives, as well as its direct taxes, its population should be "determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed,

three-fifths of all other persons"—i. e., slaves. This method of computing population was first suggested in 1783 by the Continental Congress as a basis for the apportionment of contribution from the States, to be agreed upon as an amendment to the Articles of Confederation. It remained in force until the abolition of slavery.

**Slave Trade.** (See African Slave Trade.)

**Slavery.**—A slave is defined as a person who is the chattel or property of another and is wholly subject to his will. Slavery probably originated at an early period of the world's history in the accident of capture in war. It existed in all the ancient Oriental nations of which we have any record. In the Homeric poems it was the ordinary destiny of prisoners of war. The prevalence of Christianity tended to ameliorate the condition of the slave. Laws respecting the sale of slaves in England were made by Alfred the Great. The English peasantry were commonly sold for slaves in Saxon and Norman times; children were sold in Bristol market like cattle for exportation, many being sent to Ireland and Scotland. In 1574 Queen Elizabeth ordered her bondsmen in the western countries made free at easy rates, and in 1660 serfdom was finally extinguished in England. By the decision of Lord Mansfield, of the Court of King's bench, in the *Somerset* case (q. v.), slavery was declared illegal in England. In Scotland bondage to the soil was not gotten rid of until the close of the last century.

Parliament abolished trade in negro slaves in 1807, and in 1833 an act was passed abolishing slavery throughout the British colonies. In pursuance of this act 770,280 negroes became free Aug. 1, 1834. About the time of the American Revolution societies of prominent men were formed for the purpose of ameliorating the condition of the negro slaves. Pennsylvania was the first State to organize such a society, in 1787, with Benjamin Franklin as president. New York followed with a similar society, John Jay as its first president and Alexander Hamilton as its second. Immediately after came Rhode Island, and Maryland in 1789, with such members as Samuel Chase and Luther Martin; Delaware, with James A. Bayard and C. A. Rodney; Connecticut, in 1790; Virginia,

**Slavery—Continued.**

1791, and New Jersey, in 1792. The most that was accomplished by these societies was the suppression of the slave trade in 1808. Pennsylvania provided for the gradual emancipation of her slaves in 1780; Massachusetts, by a bill of rights prefixed to her constitution, the same year; New Hampshire, by her constitution, and Connecticut and Rhode Island by enactment, in 1784; Vermont, by her constitution, and New York and New Jersey by gradual abolition, the former in 1799 and the latter in 1804. In 1817 New York enacted further legislation, decreeing total abolition on July 4, 1827. By this law 10,000 slaves were freed.

Following are some of the important steps leading to the Civil War in America, by which the institution of slavery was finally abolished: Passage of the ordinance for the government of the territory northwest of the Ohio containing the unalterable article forbidding slavery, 1787; Quakers present a petition to Congress praying for the abolition of slavery, 1794; important debate in Congress on the abolition of the slave trade, 1806; slave trade abolished, 1808; American Colonization Society organized at Washington to aid emigration to Africa, 1816; Missouri Compromise passed by Congress, 1820; antislavery societies organized in New York and Pennsylvania, 1833; passage of fugitive-slave law and compromise measures, 1850; negroes seized at Boston under fugitive-slave law, 1851; passage of Kansas-Nebraska bill, 1854; repealing of the Missouri Compromise; Kansas war, 1854; Dred Scott decision, 1857; John Brown's insurrection, 1859; election of Lincoln to the Presidency, 1860; secession of South Carolina, December, 1860, followed by other States in 1861; President Lincoln proclaims the abolition of slavery in all parts of the country in rebellion, Jan. 1, 1863 (3358); submission of the Southern armies in April, 1865, and official announcement of the final abolition of slavery Dec. 18, 1865.

**Smith, William Alden**; b. Dowagiac,

Mich., May 12, 1859; studied law, and was admitted to the bar in 1883; was honored with the degree of master of arts by Dartmouth College in June, 1901; is president and principal owner of the Grand Rapids *Herald*; elected to the 54th, 55th, 56th, 57th, 58th, and 59th Congresses, and was unopposed for a seventh term and unanimously reelected to the 60th Congress; elected to the United States Senate from Michigan for the term beginning March 4, 1907.

**Smith, William**, official acts of, in Virginia, declared null and void, 3535.

**Smith, William F.**, special commissioner to investigate administration in military division bordering on Mississippi River, appointed, 3474.

**Smith, William Robert**; b. Aug. 18, 1863, Smith Co., Tex.; studied law in Tyler, Tex.; admitted to the bar in 1885; appointed by the governor judge of the thirty-second judicial district of Texas, to fill a vacancy; reelected to the same office in 1898 and 1900, without opposition; elected to the 58th, 59th, 60th, 61st, and 62d Congresses from Texas.

**Smith, William S.**, district supervisor, nomination of, 91.

**Smith, W. H.**, correspondence regarding Dorr's Rebellion, 2147.

**Smithson, James.** (See Smithsonian Institution.)

**Smithsonian Institution.**—James Smithson, F. R. S., a natural son of the first Duke of Northumberland, and an eminent English chemist and mineralogist, died in 1829. He bequeathed £105,000 to the Government of the United States in trust to "found at Washington an establishment, under the name of the Smithsonian Institution, for the increase and diffusion of knowledge among men." This bequest became operative in 1835. In 1838 the United States Government received from the court of chancery of Great Britain \$515,169, which was increased by investment to \$703,000. After the discussion of numerous plans, Congress in 1846 created the present establishment. The Institution has devoted itself to the two lines of work marked out in the terms of the bequest—the prosecution of original research and the publication and distribution of memoirs on subjects relating to science. During its existence it has originated many important scientific undertakings, which have later been taken up by the Government and prosecuted on broader lines under the control of special bureaus, some un-

**Smithsonian Institution—Continued.**

der the direction of the Institution, others independently. Out of its meteorological service the Weather Bureau has grown; in connection with its work in ichthyology the Fish Commission was established.

Under the direction of the Institution are the National Museum, which is the legal custodian of all government collections, the Bureau of International Exchanges, the Bureau of American Ethnology, the Astro-Physical Observatory, and the Zoological Park. The Institution maintains a table at the biological station at Naples, Italy, to which it sends students to conduct investigations. From time to time the Institution sends scientific expeditions, the most recent being those to Alaska to discover remains of mammoths and other large mammals, and to British Columbia to investigate and explore the glaciers there situated. The Institution has a library of 250,000 volumes. The direction of the affairs of the Institution is vested in a Board of Regents, consisting of the Chief Justice, the Vice-President, 3 Senators, 3 Representatives, and 6 other citizens, 2 of whom shall reside in Washington. The President of the United States and his Cabinet are members of the Institution. The Secretary is elected by the Board of Regents. Joseph Henry, the first Secretary, served from the founding of the Institution in 1846, till his death in 1878; he was succeeded by Spencer F. Baird, and upon the latter's death in 1887, Samuel P. Langley was placed in charge of the work. He was succeeded as secretary by Charles D. Wolcott. The Institution is located in Washington City and occupies an ornate building of Seneca brown stone, situated in a prominent place in the Mall, which extends from the Capitol to the Washington Monument. In 1904, the remains of James Smithson, who, so far as it is known, had never visited this country, were brought from Geneva to Washington and placed in the Institution.

The entire consignment of pickled skins of animals killed in Africa by former President Roosevelt and his son, Kermit, was received at the Smithsonian Institution. Among the animals represented in this collection were rhinoceros, wild beeste, bush buck, eland, wart hog, water buck, Impali zebra, giraffe, hyena, lion, Grant's gazelle, leopard, cheetah, reed buck, Thompson's gazelle, stein-

buck, dik-ack, baboon, klipper springer and jackal.

**Smithsonian Institution:**

Bequest to United States by James Smithson for founding, 1406.

Fulfillment of objects of, suggested, 1723, 1942, 2124.

Prosecution of claim to, referred to, 1647, 1723.

Referred to, 1490, 6674, 6767, 7044.

Medium for interchange of official publications, 4718.

Organization of, recommended, 2751.

Request of regents of, for appropriation for National Museum commended, 4431, 4458.

**Smoke Abatement Exhibition** at London referred to, 4695.

**Smoot, Reed;** b. Jan. 10, 1862, at Salt Lake City, Utah; educated at the State University and Brigham Young Academy; is a banker and woolen manufacturer; elected to the United States Senate from Utah, March 5, 1903, and for the term of six years to begin March 4, 1909.

**Smuggling.**—In the United States the offense of smuggling is defined as "the act, with the intent to defraud, of bringing into the United States, or, with like intent, attempting to bring into the United States, dutiable articles without passing the same, or the package containing the same, through the custom-house or submitting them to the officers of the revenue for examination." The penalties which may be enforced are a fine of not less than \$50 nor more than \$5,000, or imprisonment for not more than 2 years, or both, seizure and condemnation of the vessel or vehicle used, and various other special penalties. The British navigation laws of the latter part of the seventeenth and first half of the eighteenth centuries induced bold and extensive smuggling into the Colonies. Merchants and prominent public men otherwise respectable felt no hesitation about cheating the revenue by illicit trade with pirates and West Indian merchants. New York was the principal port for smugglers, though Boston, Philadelphia, and Charleston were also enriched by smuggled goods. This led the British Government to enforce the acts of trade which did much to precipitate the Revolution.

**Smuggling:**

Pernicious practice of, should be prevented, 644.

Practice of, criminal in free governments, 480.

**Snake Indians.** (See Indian Tribes.)

**Sno-ho-mish Indians.** (See Indian Tribes.)

**Snoqualmoo Indians.** (See Indian Tribes.)

**Soc Indians.** (See Indian Tribes.)

**Socialist Party.**—This party was organized as the Social Democracy in 1897 by Eugene V. Debs, at Chicago. In 1898, the party's candidate polled, chiefly in Massachusetts, 9,545 votes. In 1900 Eugene V. Debs was the party's candidate for President and Job H. Harriman for Vice-President. The platform advocates State ownership of all means of production and distribution, with the public ownership of railways, mines, etc., also the initiative and referendum, and public work for unemployed. In that year the party vote was 84,003, many additions to the party being received from the Socialist Labor party (q. v.).

In 1901 at the Indianapolis convention the party formally united with the seceders from the Socialist Labor party, and took the name of Socialist party, except in some States, particularly in New York and Wisconsin, on account of certain provisions in the election laws of those States. In 1902 the party vote was 229,762.

In 1904 Eugene V. Debs and Benjamin Hanford were the Presidential and Vice-Presidential candidates, and received 406,442 votes. The Socialist party has at times elected local officers in several States, and at one time had representatives in the Massachusetts legislature. In 1908 Debs polled 448,453 votes for President.

**Socialist Labor Party, The.**—This party took its name at a convention held at Newark, N. J., in 1877. In 1883 a congress of Socialists met at Baltimore, Maryland, and organized a national party, but the growth of the organization was greatly retarded by the anarchistic outbreak in Chicago in 1886. The party was reorganized in 1889, formally assuming the name Socialist Labor party, and their first national convention was held in New York City, Aug. 28, 1892. Simon Wing, of Massachusetts, was nominated for President, and Charles H. Matchett, of New York, for Vice-President. The platform advocated public ownership of all railroads, telegraphs, and other public utilities, the initiative and referendum, the recall of representatives, and the abolition of the Presidency, Vice-Presidency

and Senate. In that year the party polled 21,532 votes.

In 1896 Charles H. Matchett was the candidate for President and Matthew Maguire for Vice-President. The platform advocated State ownership of all means of production. The vote in this year was 36,274. In 1898 the party in 18 States cast 82,204 votes. In 1899 the Socialist Labor party split, many of its members going to the Social Democratic party or Social Democracy (now the Socialist party).

The Socialist Labor party has since been on the decline. In 1900 Joseph F. Malloney, its candidate for President, and Valentine Rimmel for Vice-President, polled 39,537 votes. In 1902, in State and Congressional elections the party cast 53,763 votes. In 1904 Charles H. Corregan, its candidate for President, and William W. Cox for Vice-President, polled 28,943 votes. In 1908 the vote was 15,421.

**Society of American Florists,** act incorporating, vetoed, 6010.

**Society of Army of the Cumberland,** statue of Gen. Garfield to be erected in Washington by, 4795.

Unveiling ceremonies, order regarding, 5162.

**Society of Colonial Wars.**—Instituted in 1892 to "perpetuate the memory of these events and of the men who, in military, naval, and civil positions of high trust and responsibility, by their acts or counsel assisted in the establishment, defense, and preservation of the American Colonies, and were in truth the founders of the Nation. With this end in view it seeks to collect and preserve manuscripts, rolls, and records; to provide suitable commemorations or memorials relating to the American Colonial period, and to inspire in its members the paternal and patriotic spirit of their forefathers, and in the community respect and reverence for those whose public services made our freedom and unity possible." Eligibility is confined to an adult male descendant of an ancestor who fought in battle under Colonial authority, from the settlement of Jamestown, Va., in 1607, to the battle of Lexington, in 1775, or who served as Governor, Deputy-Governor, Lieutenant-Governor, Member of the Council, or as a military, naval, or marine officer in the service of the Colonies, or under the banner of Great Britain, or was conspicuous in military, official, or legislative life during that period.

**Society of Friends:**

Management of Indians committed to, 3992, 4063, 4106, 4154, 4206, 4254, 4307.

Paper to President, from, on Indian affairs, referred to, 4075.

**Societies of Spanish War Veterans.—**

Astor Battery Association.—Organized December, 1904. Composed of original members of the Astor Battery, which served in the Philippines campaign of 1898. Meets annually, Aug. 13, anniversary of the capture of Manila, at Reunion-Army of the Philippines, and at the annual national encampment of the United Spanish War Veterans.

Naval and Military Order of the Spanish-American War.—Instituted Feb. 2, 1899. Membership is composed of persons who served on the active list or performed active duty as commissioned officers, regular or volunteer, during the war with Spain, or who participated in the war as naval or military cadets. Membership descends to the eldest male descendant in the order of primogeniture.

Society of the Army of the Philippines.—Composed of American soldiers who fought in any of the campaigns in the Philippine Islands.

Society of the Army of Santiago de Cuba.—Organized in the Governor's Palace at Santiago de Cuba, July 31, 1898. Annual dues, \$1; life membership, \$25. No initiation fee. There are branch societies in Massachusetts, New York, Ohio, Michigan, Illinois, California, and the District of Columbia.

United Spanish War Veterans.—National Encampment United Spanish War Veterans.—Organized April 18, 1904, by the consolidation of the National Army and Navy Spanish War Veterans, National Association of Spanish-American War Veterans, and the Society of the Service Men of the Spanish War. Soldiers and sailors of the regular and volunteer army, navy and marine corps who served honorably during the war with Spain or in the insurrection in the Philippines are eligible to membership.

United Volunteer Association.—All white soldiers and sailors who served honorably in the military or naval service of the United States during the war with Spain or the incident insurrection in the Philippines are eligible to membership. This society was organized at Chattanooga, Tenn., Aug. 17, 1899, and has a membership

(1909) of nearly 38,000. It is national in scope and character.

**Society of the Army and Navy of the Confederate States**, in the State of Maryland.—Organized in 1871, "to collect and preserve the material for a truthful history of the late war between the Confederate States and the United States of America; to honor the memory of our comrades who have fallen; to cherish the ties of friendship among those who survive, and to fulfill the duties of sacred charity toward those who may stand in need of them." The membership is 925.

**Society of the Cincinnati.** (See Cincinnati, Society of the.)

**Societies of the Union Army of 1861-65.**—Society of the Army of the Tennessee: organized at Raleigh, N. C., April 14, 1865; the headquarters are at Cincinnati. Army of the Tennessee Association: organized at Washington, D. C., August, 1902; all who served in that army eligible to membership. Society of the Army of the Cumberland: organized in February, 1868, and its present membership is 350. Society of the Army of the Potomac: the Society was organized in 1868; the present membership is over 2,000. Association of the Thirteenth Army Corps: this Association was organized at Milwaukee, August, 1889.

**Societies of the War of 1812.**—The Veteran Corps of Artillery of the State of New York, Constituting the Military Society of the War of 1812. Instituted as a military society by the officers of the War of 1812, on Jan. 3, 1826, in the City of New York, and incorporated under the laws of the State of New York, by the surviving veteran members, Jan. 8, 1892. Consolidated Jan. 8, 1848, with the Veteran Corps of Artillery (instituted by officers of the Revolutionary War, Nov. 25, 1790). Hiram Cronk, last surviving Veteran member War of 1812, born April 29, 1800, died May 13, 1905. The original members comprise those who actually served in the military or naval forces of the United States during the War of 1812, or on vessels other than merchant ships which sailed under commissions of letters of marque and reprisals from the United States in that war. Eligibility to hereditary membership is confined by law to descendants of those who actually served in the War of 1812, and to descendants of former members.

**Societies of the War of 1812—Continued.**

General Society of the War of 1812, The.—Composed of federated State societies, in Pennsylvania, Maryland, Massachusetts, Connecticut, Ohio, Illinois, District of Columbia, New York, New Jersey, and Delaware, the members of each of which State Societies are borne upon the membership roll of the General Society. Any male person above the age of twenty-one years who participated in, or who is a lineal descendant of one who served during the War of 1812-14 in the army, navy, revenue marine, or privateer service of the United States, offering satisfactory proof to the State Society to which he makes application, and is of good moral character and reputation, may become a member. In case of failure of lineal descendants of an actual participant in said war, one collateral representative who is deemed worthy may be admitted to membership.

**Soils, Bureau of.** (See Agriculture, Department of.)

**Soldiers' Home:**

Erection of, recommended, 2559, 2624. Recommendations of board of commissioners regarding, 4777.

Should be under jurisdiction of War Department, 7609.

Site for, selected, 2668.

**Solicitor of the Treasury,** office of, established, 1090.

Operations of, referred to, 2539.

**Sommersett Case.**—A negro slave named Sommersett accompanied his master from Boston to London in October, 1769. He became ill and was turned adrift by his master. His condition aroused the compassion of Granville Sharp, who cared for him until he was restored to health. He was then claimed by his master and taken before Lord Mansfield, of the court of King's bench. Here he was discharged on the ground that in England slavery could exist only by positive law, and in the absence of such a law a person could not be deprived of liberty on the ground that he was a slave. This decision determined the future course of England in the delivery of fugitives.

**Sons of American Revolution.**—A patriotic society composed of lineal descendants of soldiers, sailors, and conspicuous patriots of Revolutionary times. The society was organized in California July 4, 1875. Another society of the same name was organized in New York in 1889 and quick-

ly outrivalled the older society; attempts to unite the two were made unsuccessfully in 1892 and 1897. The Eastern Society has 38 branches in the States and branches in the District of Columbia and Hawaii. The total membership is about 11,000.

**Sons of Liberty.**—A society organized by the younger and more ardent patriots of Connecticut in 1755, to advance colonial liberty. They advocated nonimportation, aided in the hanging in effigy of the stamp distributor Oliver in 1765, and in 1774 proposed the organization of a continental congress. The appellation is sometimes applied to the whole body of American patriots. Another organization calling themselves "Sons of Liberty" existed in 1862-1864 in Indiana and other States and actively opposed the efforts of the United States Government in the prosecution of the war for the preservation of the Union, and several leaders were tried and condemned by a military commission. (See also Milligan Case.)

**Sons of the Revolution.**—A society of the same nature as the Sons of the American Revolution. It was established in New York in 1875, and has now 31 State branches. The principal point of difference between the Sons of the Revolution and the Sons of the American Revolution is the matter of eligibility, which in both is dependent on hereditary descent. In the latter society membership is contingent upon lineal descent from patriots of the Revolution, while in the former it is extended to collaterals.

**Sons of Veterans, U. S. A.**—Camp No. 1, Sons of Veterans, U. S. A., was organized in the City of Philadelphia, Sept. 29, 1879. The organization is composed of lineal descendants, over eighteen years of age, of honorably discharged soldiers, sailors, or marines who served in the late Civil War. There are now about one thousand Camps, with a membership of fifty thousand, distributed among twenty-five Divisions, corresponding to States, the general society or national body constituting the Commandery-in-Chief. Each Camp has its own officers, the head officer being the Commander. The principal officer of the Division is the Division Commander. The Sons of Veterans Auxiliary is an association of women auxiliary to the above organization.

Vessels being built in New York for Spain forbidden to depart, 3987.

**South American Republics, Recognition**

of.—In 1817 Henry Clay endeavored to secure an appropriation from Congress for sending an accredited minister to Buenos Ayres, which had become a free and independent Republic.

Congress, however, refused.

March 8, 1822, President Monroe in a special message to Congress (685)

recommended the recognition of Buenos Ayres, Chile, Colombia, and other Republics, and the establishment of international relations with them.

This Congress agreed to. The commercial relations between the United States and these Republics have steadily improved since this action.

A conference, known as the International American Conference (q. v.), representing the United States and these Republics, met in Washington in 1889, to encourage closer business relations.

This resulted in the establishment of the Bureau of American Republics (q. v.).

The latest example of the recognition of a new republic by this country occurred in the year 1903, when the Republic of Panama proclaimed its independence of Colombia on Nov. 4 and received the recognition of the American government two days later.

**South Carolina.**—One of the thirteen original States. Nickname, "The Palmetto State"; motto, "Animis

**South Carolina—Continued.**

opibusque parati" ("Prepared in mind and resources"). It lies between lat. 32° 4' 30" and 35° 13' 2" north and long. 78° 28' and 83° 18' west. It is bounded on the north and northeast by North Carolina, on the southeast by the Atlantic Ocean, and on the southwest and west by Georgia (separated for most part of the distance by the Savannah River). It has an area of 30,570 square miles. The surface is level near the coast, undulating in the interior, and mountainous in the northwest. The State produces gold, porcelain, clay, phosphates, and other minerals, and is especially noted for the production of rice and sea-island cotton. It was partially explored by the Spaniards in 1525, who named it Chicora. An unsuccessful attempt to colonize was made by the French under Ribault in 1562. The first permanent settlement was made by the English in 1670. Charleston was founded in 1680. Charles II. gave the territory between lat. 29° and 36° 30' north, to eight of his favorites in 1663, and two years later he issued a charter placing the control of the colony in their hands. They employed John Locke, the philosopher, to draw up a constitution which should provide an ideal government. This "grand model" proved to be an attempt to set up the feudal system in America, and was abandoned by the proprietors in 1693. South Carolina became a royal colony in 1729.

The first constitution was adopted in 1776. The Federal Constitution was ratified May 23, 1788. The State seceded on Dec. 20, 1860, and was readmitted by act of Congress June 25, 1868.

Statistic. of agriculture reported to the Federal Census Bureau, under date of April 15, 1910, place the number of farms in the State at 176,434, comprising 13,512,028 acres, valued, with stock and improvements, at \$392,128,314. The average value of land per acre was \$19.89, against \$7.14 in 1900. The value of domestic animals, poultry, etc., was \$45,131,380, including 389,882 cattle, valued at \$7,888,259; 79,847 horses, \$10,147,178; 155,471 mules, \$23,830,361; 665,211 swine, \$2,552,344; 37,559 sheep, \$81,362, and poultry, \$1,206,615. The yield and value of field crops in 1911 was: Corn, 1,790,000 acres, 32,578,000 bushels, \$29,646,000; wheat, 83,000 acres, 946,000 bushels, \$1,164,000; oats, 345,000 acres, 7,038,-

000 bushels, \$5,067,000; rye, 3,000 acres, 30,000 bushels, \$44,000; rice, 10,000 acres, 117,000 bushels, \$88,000; potatoes, 10,000 acres, 700,000 bushels, \$854,000; hay, 64,000 acres, 69,000 tons, \$1,173,000; tobacco, 13,600 acres, 11,016,000 pounds, \$1,388,016, and cotton, 1,400,000 bales. The report of the State Treasurer for the fiscal year 1911 showed a balance Dec. 31, 1910, of \$648,730; receipts for year, \$3,208,790; expenditures, \$3,132,164; cash balance Dec. 31, 1911, \$725,356; public debt, \$6,528,485.

The industrial census of 1905 showed 1,399 manufacturing establishments, with a capital of \$113,422,224, in which 63,071 persons converted \$49,968,626 worth of raw material into finished stock worth \$79,376,262. These were cotton goods, lumber and timber products, cotton seed and oil cake, and fertilizers. There were 3,253 miles of steam railway, and 133 miles of electric lines in 1906.

The turpentine and rosin industries, for which the State was formerly noted, are dying out, because of the exhaustion of the pine forests. The imports at the harbor of Charleston for 1907 were \$3,528,553, and the exports \$1,082,466. The population, according to the census of 1910, was 1,515,400.

Copies of proclamations for executive clerks, 3756.

*Habeas corpus*, writ of, suspended in certain counties, 4090, 4093.

Revoked as to Marion County, 4092.

**South Carolina Inter-State and West Indian Exposition.**

—An industrial and educational fair, held at Charleston, S. C., from Dec. 1, 1901, to June 2, 1902. The site covered an area of 250 acres and the buildings were in the Spanish Renaissance style of architecture, covered with staff, tinted an ivory white. The United States and many of the individual States made exhibits, as well as Cuba, Porto Rico, and Guatemala. Notable original groups of historical statuary exhibited were "The Aztec," "The Negro," and "The Huguenot." The total attendance was 671,806. The cost of the exhibition was \$1,250,000, and the receipts \$313,000.

**South Dakota.**—One of the United States. Motto, "Under God the people rule." It lies a little north of the center of the continent, between lat. 45° 57' and 42° 28' north (extreme southeast point: west of the Missouri the southern boundary is 43° north) and long. 96° 26' and 104° 3' west. It is bounded on the north by North Dakota, on the east by Minnesota and Iowa, on the south by Nebraska, and on the west by Montana and Wyoming. It has an area of 77,650 square miles. The Missouri River divides the State into

two nearly equal portions. The eastern part is generally smooth and rolling. West of the river the country rises more rapidly and culminates in the Black Hills, an elevated region some 60 by 100 miles in extent, the central point of which is Harney's Peak, 9,700 feet high. The Bad Lands, in the southeastern part, is an interesting geological formation, consisting of a desert region abounding in canyons, depressions, walls, and castles of white earth, rich in soil-making chemicals and interesting fossils. The early history of the State is identical with that of North Dakota (q. v.), from which it was separated and admitted as a State in 1889. The total land area is 49,184,000 acres, of which 12,908,977 acres are reserved for the Indians. With the exception of the forests of the Black Hills the State is almost an arid plain. In 1902 about 12,107,114 acres were vacant land. In 1908 there remained unreserved and unappropriated 6,561,295 acres. About 40,000 acres are irrigated and the Federal plan of irrigation will reclaim 100,000 acres in the Belle Fourche Valley. United States Land offices are located at Aberdeen, Chamberlain, Lemmon, Mitchell, Pierre, and Rapid City.

The value of domestic animals, poultry, etc., in 1910 was \$128,202,000, including 612,000 horses, valued at \$64,260,000; 10,000 mules, \$1,210,000; 656,000 milch cows, \$21,648,000; 1,131,000 other cattle, \$28,832,000; 829,000 sheep, \$3,316,000; 805,000 swine, \$8,935,000. The yield and value of field crops in 1911 was: Corn, 2,310,000 acres, 50,820,000 bushels, \$26,935,000; wheat, 3,700,000 acres, 14,800,000 bushels, \$13,468,000; oats, 1,540,000 acres, 11,396,000 bushels, \$4,900,000; rye, 13,000 acres, 130,000 bushels, \$99,000; potatoes, 56,000 acres, 4,032,000 bushels, \$2,822,000; hay, 459,000 acres, 252,000 tons, \$2,142,000. The gold output in 1911 was 359,444 fine ounces, worth \$7,430,367, most of which was produced at the Homestake mine, at Lead, in the Black Hills. The silver produced the same year was 206,188 fine ounces, valued at \$113,403. Natural gas, lead, stone and clay products are also found. The manufactures of the State are confined mainly to flour, lumber and dairy products. The report of the State Treasurer for the fiscal year ended June 30, 1911, showed receipts for the year, \$3,760,213; expenditures, \$4,001,626; cash

Opened to settlement by proclamation, 5707, 6016, 6979.

Set apart as public reservation by proclamation, 6216, 6955, 6957, 7277.

**South Mountain, or Boonsboro (Md.),**

**Battle of.**—After driving the Union army back upon the fortifications around Washington, Lee's army crossed the Potomac into Maryland. The Confederate commander issued an address to the people offering them the protection of his government and calling for volunteer soldiers. He sent the greater part of his army, about 25,000 men, under Jackson, to capture the garrison at Harper's Ferry. As soon as it became known at Washington that Lee had crossed into Maryland, McClellan was ordered to follow him with all the troops not needed to defend Washington. Sept. 12, 1862, McClellan reached Frederick with a force estimated at from 80,000 to 90,000, just after it had been evacuated by Lee's army, which had passed west over the Catoctin Mountains toward South Mountain. The road from Frederick to Hagerstown, Md., passes through Turners Gap of this mountain. Here on Sept. 14, 1862, Gen. D. H. Hill, with a force of about 6,000 men, successfully resisted repeated assaults from Hooker's and Burnside's corps, fully 30,000 strong. At 3 p. m. Hill was reinforced by 1,900 men, and later in the day by Longstreet with 6 brigades, only 4 of which, numbering 3,000 men, were seriously engaged. The gap was contested from 8 a. m. until after dark. During the night the Confederates retired. Franklin took possession of Crampton's Gap, 6 miles below, held by the Confederates under Howell Cobb. The Federal loss at Turners Gap, South Mountain, was 328 killed and 1,463 wounded and missing, and at Crampton's Gap 115 killed and 418 missing. The Confederate loss at both aggregated 934.

**Southwest Territory.**—A region comprising portions of the present States of Tennessee, Kentucky, and Mississippi, together with a strip of land ceded to the General Government by South Carolina. Though never organized under one territorial government, it was known as the Southwest Territory. An unsuccessful attempt was made to organize a portion of this territory into a new State to be called Franklin (q. v.). With the admission of Tennessee and Kentucky and the organization of a Territorial government in Mississippi this territory went out of existence.

**Spain.**—A Kingdom of southwestern Europe. It is the Iberia and Hispania of the ancients. The earliest settlers are supposed to have been the progeny of Tubal, fifth son of Japhet. The Phenicians and Carthaginians successively planted colonies on the coasts as early as 350 B. C. The Romans conquered the whole country 206 B. C. The present kingdom is bounded on the north by the Bay of Biscay and France (separated by the Pyrenees Mountains), on the east and south by the Mediterranean Sea, and on the west by Portugal and the Atlantic Ocean. The southern coast terminates in the promontory of Gibraltar, separated from the north coast of Africa by the Strait of Gibraltar, 15 miles in width. Spain has very valuable mineral resources, especially iron, sulphur, coal, quicksilver, lead, copper, silver, salt, zinc, etc. The leading productions are wine, grapes, oranges, raisins, olive oil, cork, and fruits. The export trade is mainly with Great Britain, France, and Germany.

Christian kingdoms were founded in the eighth, ninth and tenth centuries. Castile and Aragon were united in 1479, and Granada was taken from the Moors in 1492. Spain reached its greatest power in the

sixteenth century. The Hapsburg dynasty ruled from 1516 to 1700, when the Bourbons succeeded them. The throne was given to Joseph Bonaparte in 1808. The Peninsular War lasted from 1808 to 1814. The first Carlist war was carried on from 1833 to 1840. A republic which had been formed in 1873 was overthrown in 1875, and the Bourbon dynasty restored. A second Carlist war was carried on from 1872 to 1876. War with the United States in 1898 resulted in the loss of Spain's West Indian possessions, the Philippine Islands and an island in the Ladrões. Spain was an ally of the United States from 1778 to 1782. In recent years the land has been subdivided into a larger number of smaller holdings. In 1800 the number of farms was only 677,520; in 1908 there were 3,426,083 separate assessments to the property tax. In 1906 3,762,898 hectares were sown to wheat, 1,468,000 hectares to barley, 1,398,770 hectares were under vines, and 1,345,578 hectares under olives.

Iron is abundant in some provinces; copper is the most profitably worked of the metals, \$12,781,453 worth being mined in 1907. There were 118,201 persons employed in mining and the total mineral output was valued at \$46,000,000. Cotton goods, paper, glass, and cork are important manufactures.

The area of Spain, including the Balearic and Canary Islands and the African possessions, amounts to 194,783 sq. miles, with a population (1908) of 19,712,585.

Spain, known for centuries as the most Catholic country in Europe, has in recent years developed a strong anti-clerical feeling. From the date of the Concordat, in 1851, which provided for three religious orders, the number of monks increased from 3,000 to nearly 70,000. In 1901 Minister Gonzalez ordered that all religious orders should register, and those having private industries should pay taxes. They refused to comply. Senor Canalejas formed a cabinet in 1910, and in addition to the decree of registration granted permission to Protestants to exhibit the symbols of their faith on their buildings and substituted a declaration upon honor for the religious oath. Finally he decreed that no more religious communities might enter Spain. This caused the final break with the Vatican. King Alfonso and Queen Victoria are in sympathy with the new

United States, preparations for, referred to, 376. (See also Spanish-American War.)

**Spain, Treaties with.**—The treaties with Spain prior to the treaty of Paris were expressly annulled and abrogated in 1902, except the treaty of Feb. 17, 1833, which was continued in force. It provided for the payment of claims of the United States by the issuance by Spain of a series of inscriptions. The commission to determine the claims (appointed by Congress, June 7, 1836) awarded the sum of \$549,850.28 to the claimants. The payment of the interest on this sum is made perpetual by the convention.

The treaty of peace of 1898, known as the Treaty of Paris, closed the Spanish-American War. By it Spain relinquished all authority and claim of sovereignty to Cuba and ceded Porto Rico and Guam to the United States. In consideration of the payment by the United States, within three months of the ratification of the treaty, of twenty millions of dollars, Spain ceded to the United States the archipelago known as the Philippines. It was agreed that the United States should for the space of ten years from the signing of the treaty admit Spanish ships and merchandise to the Philippines on the same terms as United States ships and merchandise. Spanish soldiers taken as prisoners of war at Manila were to be sent back to Spain at the expense of the United States, with their arms restored to them. Spain should evacuate the Philippines as speedily as possible, taking with her as her property, the movable munitions of war and arms, the larger arms to be left in position and purchased from Spain by the United States upon terms to be agreed upon. All prisoners of war to be released

**Spain, Treaties with—Continued.**

by both parties. No indemnity to be sought by either government from the other. The United States to settle all claims against Spain covered by the relinquishments of this treaty.

Spain relinquished to the United States all wharves, docks, barracks, and similar public property in Cuba, Porto Rico, Guam, and in the Philippines without prejudice to private interests therein. Provision was made for establishing the political status of subjects of Spain electing to remain within the ceded possessions. The right of establishing a consular office by Spain in any of the ceded districts was accorded by the treaty.

In 1900 an additional treaty was made to cover the cession of the outlying islands of the Philippines not specifically included in the treaty of 1898. These were particularly the islands of the Cagayan Sulu and Sibitu, for which cession the United States agreed to pay the sum of one hundred thousand dollars to Spain.

In 1902 a treaty of friendship and general relations was closed with Spain to cover largely the points in the treaties which had been abrogated by war. This treaty covered the points usual in treaties of commerce and navigation, and consular conventions.

**Spangler, Edward**, implicated in assassination of President Lincoln, proceedings of trial and verdict of military commission, 3532, 3533, 3534, 3540, 3545, 3546.

**Spanish-American Provinces.** (See South American Provinces; South American Republics.)

**Spanish-American War.**—In February, 1895, the natives of Cuba, being dissatisfied with the treatment accorded them by Spain and discontented with the government afforded them, determined to throw off the yoke of oppression, with all the unreasonable burdens which it imposed. They took up arms against the mother country, and quickly the entire island was in a state of insurrection. This insurrection, like previous revolutions which had occurred in the island, was not at first considered of sufficient importance to warrant interference or recognition on the part of the United States. A similar outbreak in the island occurred in 1868, during the Administration of President Grant.

In his message to Congress Dec. 6, 1869, President Grant said: "The

contest [in the island] has at no time assumed the conditions which amount to a war in the sense of international law, or which would show the existence of a *de facto* political organization of the insurgents sufficient to justify a recognition of belligerency" (3985). In a message of June 13, 1870, describing the conditions in the island, he said: "The insurrection itself, although not subdued, exhibits no signs of advance, but seems to be confined to an irregular system of hostilities, carried on by small and illy armed bands of men, roaming without concentration through the woods and the sparsely populated regions of the island, attacking from ambush convoys and small bands of troops, burning plantations and the estates of those not sympathizing with their cause" (4018). Again, Dec. 7, 1875, in a message to Congress he used the following language in respect to conditions in the island: "Considered as a question of expediency, I regard the accordance of belligerent rights still to be as unwise and premature as I regard it to be, at present, indefensible as a measure of right" (4293). President Cleveland entertained an opinion in regard to the insurrection in Cuba arising in 1895 similar to those expressed by President Grant in regard to the insurrection of 1868, and in his message of Dec. 2 of that year he said: "Whatever may be the traditional sympathy of our countrymen as individuals with a people who seem to be struggling for larger autonomy and greater freedom, deepened, as such sympathy naturally must be, in behalf of our neighbors, yet the plain duty of their Government is to observe in good faith the recognized obligations of international relationship" (6068). He insisted that belligerent rights should not be accorded to the insurgents, because of peril and injury to our own interests. He said in his message of Dec. 7, 1896: "Imperfect and restricted as the Spanish government of the island may be, no other exists there, unless the will of the military officer in temporary command of a particular district can be dignified as a species of government" (6151).

The foregoing expressions of opinion prove unmistakably that there was no reaching out on the part of the United States to interfere with the Spanish rule in Cuba. When President McKinley was inaugurated

**Spanish-American War—Continued.**

the insurrection described by his immediate predecessor still existed, and the grave questions which had confronted the latter were now presented for his consideration. He declined to interfere in the troubles in the island in any way and expressly refused to recognize the independence of Cuba. He announced that Spain would be given reasonable time in which to apply the reforms promised. In pursuance of Spain's promise autonomous administrations were established in some of the larger cities, but subsequent developments demonstrated the futility of such action and the failure of the newly formed governments. The revolution dragged on, sapping the substance of the people as it progressed and rendering destitute the poorer classes. Crimes were committed on every hand, while desolation and disorder reigned.

To add to the horrors and atrocities of the struggle, the Captain-General of the island, Valeriano Weyler, Feb. 16, 1896, issued an edict initiating a cruel policy called "reconcentration." By this edict the agricultural inhabitants were herded into the cities, their lands laid waste, and their homes destroyed. The results in suffering and cruelty have been unprecedented in modern times. The mortality among the reconcentrados was frightful and distressing. Crowded within the cities and lines of the Spanish armies, the non-combatant men, women, and children, with scarcely any protection from the weather, poorly fed and clad, died from disease and starvation in untold numbers. The shocking cruelties thus practiced and the indescribable horrors of the situation attracted the attention of the civilized world and excited universal pity. Reports of the conditions in Cuba were from time to time brought to the United States, and the public mind throughout the country was greatly stirred. While this state of affairs existed the second-class battleship *Maine*, which had been dispatched to Cuban waters on a friendly mission, was on the night of Feb. 15, 1898, blown up in the harbor of Havana. In this catastrophe 2 officers and 258 sailors and marines perished (6295). A thorough investigation of this disaster was immediately instituted, and at its close a report was made to the effect that the destruction of the ship had been wrought by an explosion from with-

out, produced by a submarine mine (6281).

The tension of the public mind, already great, was increased by this report and by the suspicion in the minds of many as to the cause of the disaster. The people could not much longer be held in check, and to those who were even casually observant it was apparent that a crisis in our affairs with Spain was imminent. Conservatism became unpopular, the feeling that war was necessary grew rapidly, and forbearance could not longer be tolerated. Congress was in session and unanimously appropriated \$50,000,000 for the national defense. This provision was timely. The coasts of the United States were poorly defended, the Navy needed ammunition and supplies and an increase in vessels, while the Army required enlargement in men and munitions. April 6 the continental powers, through their envoys in Washington, gave expression to the hope that an amicable adjustment of the impending troubles might be reached. The President replied to their representations, and with them shared the hope that peace might be preserved. Negotiations with Spain continued for a brief period, but were barren of results. The President in his message of April 11, 1898, announced the failure of diplomacy to bring about a satisfactory settlement of the difficulties and recommended to Congress forcible intervention (6281).

April 19, after refusing to recognize the government of Cuba, Congress with much unanimity declared the island independent of Spain and authorized forcible intervention (6297). The resolutions met with the approval of the Executive, and he signed them the next day. Spain regarded this act on the part of the United States as "equivalent to an evident declaration of war." The ministers of the two countries were recalled and diplomatic relations terminated. April 22 a blockade of Cuban ports was proclaimed (6472), and the following day a call was made for 125,000 volunteers (6473). A formal declaration of war was recommended by the President, and April 25 Congress declared the existence of war from and including April 21. Due notification of the existence of war was given to the various governments April 25, nearly all of which immediately responded with proclamations of neutrality.

**Spanish-American War—Continued.**

May 25 there was a second call for volunteers, 75,000 in number (6477). Like the initial call for 125,000, this was responded to without delay. The Regular Army was largely increased, as was the enlisted force of the Navy. Over 100 vessels were added to the Navy by purchase. The coast defenses were rapidly strengthened, additional guns placed in position, and an auxiliary navy was created. About 1,500 submarine mines were placed at the most exposed points on the coast. Cable, telegraph, and telephone lines were constructed in many places. In addition to the national-defense fund of \$50,000,000, which was expended in large part by the Army and Navy, Congress provided further means for prosecuting hostilities by the war-revenue act of June 13, authorizing a 3 per cent. popular loan not to exceed \$400,000,000 and levying additional imposts and taxes. Of the authorized loan \$200,000,000 was offered and promptly taken, the subscriptions far exceeding the call.

The first encounter occurred April 27, when a detachment of the blockading squadron made a reconnoissance in force at Matanzas, Cuba, shelled the harbor forts and demolished several new works in course of construction. The next engagement occurred May 1, at Manila, in the Philippine Islands. The American squadron at Hongkong, under Commodore George Dewey, had been instructed to proceed to the Philippine Islands and to capture or destroy the formidable Spanish fleet assembled at Manila. At daybreak of May 1 Dewey's fleet, successfully passing over the submarine mines, entered Manila Bay and after a few hours' engagement destroyed the entire fleet of 10 warships and 1 transport, captured the naval station and forts at Cavite, and completely controlled the bay of Manila, with the ability to take the city at will. On the American side not a life was lost, the wounded numbering only 7, and not a vessel was materially injured. The Spanish loss in killed and wounded exceeded 400. Thus the first great battle of the war was a victory for the United States magnificent in effect and extraordinary in detail, standing unequalled in the achievements of naval warfare. The effect of this remarkable victory gave a prestige of invincibility to the United States which, though long deserved,

had never been appreciated by the great naval powers of the earth. Reinforcements, under Maj.-Gen. Wesley Merritt, were hurried to the Philippine Islands and firmly established within sight of Manila, which lay helpless before the American guns. The first expedition sailed from San Francisco May 25 and arrived off Manila June 30. Other expeditions soon followed, until the total force landed at Manila consisted of over 15,000 officers and men.

In the meantime, large forces were assembled at various points along the coast of the United States to invade Cuba and Puerto Rico. San Juan, Puerto Rico, and the forts at the entrance to Santiago Harbor, Cuba, were shelled by the American squadrons, but none of the attacks had any appreciable result. On the night of June 3, in an attempt to blockade the mouth of Santiago Harbor, Assistant Naval Constructor Richmond P. Hobson, accompanied by 7 men from the American squadron, sank the collier *Merrimac* across the narrow channel. This unparalleled act of heroism thrilled not only the hearts of the American people, but challenged the admiration of the world. Under the protection of a portion of the American fleet a landing of 600 marines was effected at Guantanamo Bay on June 10. This port was taken and held after severe fighting by the marines, who were the first organized forces of the United States to land in Cuba. By June 16 additional forces had been landed. June 22 the advance of the American army under Maj.-Gen. William R. Shafter, landed at Daiquiri, about 15 miles east of Santiago, and the next day began the movement against the city. The first serious engagement in which the American troops lost heavily occurred at Las Guasimas June 24. By nightfall of that day ground within 5 miles of Santiago was won. The outworks of Santiago were taken July 1 after a severe battle, and on the next day El Caney and San Juan were captured after a desperate struggle. The investment of the city was now complete. The naval forces cooperated, shelling the town and the coast forts. On the following day, July 3, occurred the decisive naval combat of the war. The Spanish fleet under Rear-Admiral Pascual Cervera, which had been confined in the harbor of Santiago for 6 weeks by the blockading squadron under acting Rear-

**Spanish-American War—Continued.**

Admiral William T. Sampson, attempted to escape. The Spanish vessels were intercepted and utterly destroyed by the American fleet under the immediate direction of Commodore Winfield S. Schley, who assumed command during the temporary absence of Rear-Admiral Sampson. The Spanish loss was 600 killed and about 1,400 prisoners, including the admiral.

Spain was unable to recover from the catastrophe, and her efforts upon the ocean virtually ceased. The capitulation of Santiago, which embraced the entire eastern end of Cuba, soon followed. July 17 the American army occupied the city. The number of Spanish soldiers surrendered was 22,000. An expedition against Puerto Rico, consisting of about 3,500 men, under command of Maj.-Gen. Nelson A. Miles, was immediately fitted out, and landed at Guanica July 25. Gen. Miles's force was subsequently increased to about 17,000. With the exception of a few slight engagements, there was no serious resistance, and the middle of August found much of the island in the possession of the American troops. As early as July 26 Spain made overtures for peace through M. Jules Cambon, the French ambassador at Washington. Aug. 12 the peace protocol was signed, by which hostilities were brought to an end. Aug. 15, the news of the signing of the protocol not having reached the Philippines, the battle of Manila was fought, and the last scene of the war was enacted when, after a brief assault by the American land and naval forces, the city was compelled to surrender. The total casualties in killed and wounded during the war were: Army, officers killed, 23; enlisted men killed, 257—total, 280; officers wounded, 113; enlisted men wounded, 1,464—total 1,577. Navy, killed, 17; wounded, 67; died as result of wounds, 1; invalided from service, 6—total, 91. In the entire campaign by land and sea the United States did not lose a flag, gun, ship, or transport, and, with the exception of the crew of the *Merimac*, not a soldier or sailor was taken prisoner.

Aug. 7 the American troops in Cuba began to embark for home, and the entire force was returned to the United States by Aug. 24, after an absence of only 2 months. A treaty of peace was signed at Paris by the commissioners of the two countries

Dec. 10, 1898. It was ratified on the part of the United States Feb. 6, and on the part of Spain March 19, 1899. By the treaty it was provided that Spain relinquish all claim of sovereignty over and title to Cuba; that Puerto Rico and other West Indian islands of Spain, one island in the Ladrões, and the entire Philippine group be ceded to the United States, and that Spain be paid \$20,000,000. The ratifications of the two Governments were exchanged in Washington April 11, 1899, and on the same day President McKinley issued the following proclamation: "Whereas a treaty of peace between the United States of America and Her Majesty the Queen Regent of Spain, in the name of her august son, Don Alfonso XIII, was concluded and signed by their respective plenipotentiaries at Paris on the 10th day of December, 1898, the original of which, being in the English and Spanish languages, is word for word as follows: [Here the full text of the treaty is inserted.] And whereas the said convention has been duly ratified on both parts and the ratifications of the two Governments were exchanged in the city of Washington on the 11th day of April, 1899: Now, therefore, be it known that I, William McKinley, President of the United States of America, have caused the said convention to be made public, to the end that the same and every article and clause thereof may be observed and fulfilled with good faith by the United States and the citizens thereof."

**Speaker.**—The title of the presiding officer of the House of Representatives. The Constitution provides that "the House of Representatives shall choose their Speaker and other officers." It is doubtful, however, if the framers of the Constitution contemplated vesting the Speaker with the power he now enjoys. The system of legislation by committees which has gradually grown up, carrying with it the prerogative of the Speaker to

name them, has greatly extended his influence. The first Speaker of the modern sort—more of a leader of the House than a presiding officer—was Henry Clay. As the representative of the House the Speaker presides over the deliberations of that body, appoints its committees, supervises its journal, certifies to the amount of compensation due its members, signs the bills, resolutions, warrants, subpoenas, etc., and has the right, as a member to participate in debate after calling another member to the chair. The Speaker rarely avails himself of this privilege. He is chosen by the House from among the members.

Following is the list of the Speakers of the House: Frederick A. C. Muhlenberg, Pennsylvania; Jonathan Trumbull, Connecticut; Jonathan Dayton, New Jersey; Theodore Sedgwick, Massachusetts; Nathaniel Macon, North Carolina; Joseph B. Varnum, Massachusetts; Henry Clay, Kentucky; Langdon Cheves, South Carolina; John W. Taylor, New York; Philip P. Barbour, Virginia; Andrew Stevenson, Virginia; John Bell, Tennessee; James K. **Specie Circular.**—An order drafted by Senator Benton, of Missouri, and issued by the Secretary of the Treasury July 11, 1836, by order of President Jackson (6329). It was designed to check speculative purchases of public lands. In it the officials were directed to receive nothing but gold and silver in payment for public lands. The circular was issued in opposition to the sentiment of Congress, which at the next session passed a bill to rescind the order, but Jackson defeated the bill by a pocket veto. The President's action aroused much indignation and, it is claimed, hastened the panic of 1837.

**Specie Payments.**—The United States suspended specie payments Jan. 1, 1862, and Congress authorized the issue of large quantities of United States notes to be a legal tender. In this action the Government had been preceded by most of the banks of the country, following the example of the New York banks. Jan. 14, 1875, the act authorizing the resumption of specie payments of Government contracts to begin Jan. 1, 1879, was approved by President Grant in a special message (4268). To this end the purchase of bullion and the manufacture of subsidiary coin was at once begun. The mints were run overtime to supply the demand for specie, and resumption became an accomplished fact.

**Spoils System.**—The policy of bestowing public offices upon members of the party in power as rewards for political services. These official rewards once secured, the beneficiaries found it incumbent upon them to assist in keeping in power the party to which they owed their positions, not only by a strict attention to the duties of their offices, but also by making friends and votes for their superior officer. Under the spoils system, it is charged, official duties are often made secondary to partisan obligations. This system is not confined to American politics, but is carried on in England, where Parliament has created a patronage secretary, who takes charge of the apportionment and keeps regular accounts with the members of Parliament of the positions which have been filled upon their recommendation. In the United States the system developed first in New York and Pennsylvania. Tammany Hall made effective use of the system in its fight against the Clintons in the first quarter of the present century. It was extended to State politics by the "Albany Regency," established by Martin Van Buren in 1818. It was not until Jackson's time, however, that it became a feature of Federal politics. The spoils system derived the name commonly applied to it from a sentence used in a speech made by Senator William L. Marcy, of New York, while urging the Senate to confirm the nomination of Martin Van Buren as minister to England. In defense of the charge against Van Buren that he had introduced the custom of removal from office for opinion's sake, Mr. Marcy, speaking for the Democrats of New York, Jan. 25, 1832, declared that "they see nothing wrong in the rule that to the victor belongs the spoils of the enemy." It has since been a regular

**Spooner Act**, mentioned, 7402.

**Spottsylvania Court House (Va.), Battle of.**—After 2 days' fighting in the Wilderness, south of the Rapidan River, in Virginia, Grant attempted to turn Lee's right flank and advance toward Richmond by way of Spottsylvania Court-House. This resulted in a series of battles. Lee discovered the movement of Grant's army and reached Spottsylvania first. By May 9, 1864, Grant had his army concentrated near Spottsylvania. Hancock commanded the right, Warren the center, and Sedgwick the left. The latter was killed while placing his artillery on the 9th, and Wright succeeded him in command of the Sixth Army Corps. May 10 and 11 there was desultory fighting, skirmishing, and maneuvering for positions. Grant's losses during the 10th are supposed to have exceeded 10,000 men, and Lee's are also supposed to have been severe. The morning of May 12 opened with an advance by Hancock's column, which surrounded and captured with the salient an entire division (Gen. Edward Johnson's) of 3,000 Confederates, including 2 generals and between 30 and 40 guns. The fighting of this day was as severe as any during the war. Lee made 5 furious assaults in quick succession, with the view of dislodging Hancock and Wright from the captured salient. From dawn till dusk the battle raged. The Federal assault on the Confederate line was checked. It was renewed without success on the 18th. After several days of maneuvering and having received reinforcements enough to make up for his losses, Grant, on the 20th and 21st of May, moved southward toward the North Anna River. The Federal losses in the battle of

Spottsylvania Court-House, including the conflicts at Todd's Tavern, Corbin's Bridge, Alsop's Farm, Laurel Hill, Po River, Ny River, the angle of the salient, Piney Branch Church, Harris's Farm, and Guiney's Station, between May 8 and 21, 1864, were officially reported as 2,725 killed, 13,416 wounded, and 2,258 missing, a total of 18,399. The Confederate losses only partially reported, were (Ewell's, Johnson's, and McGowan's divisions), 4,001 killed and wounded.

**Sprague, William**, correspondence regarding Dorr's Rebellion, 2158.

**Springfield (N. J.), Battle of.**—June 6, 1870, Generals Sterling, Knyphausen, Mathews, and Tryon left Staten Island with 5,000 men to attack Washington's army at Morristown, N. J. Sterling was killed and Knyphausen took command. He advanced to within half a mile of Springfield, harassed all the way by the settlers and militia. Sir Henry Clinton returned to New York on June 17 from Charleston, S. C., and prepared to join Knyphausen. On June 23 the British advance was made in two columns. The American outposts were forced back upon Springfield, which the British burned, and then retreated to Staten Island. The British loss amounted to about 150, the American to 83.

**Stamford Harbor, Conn.**, survey of, referred to, 1043.

**Stamp Act.**—An act of the British Parliament passed in 1765 and put into effect in the American Colonies Nov. 1 of that year. It levied on British subjects in America specific sums for each of the common transactions of business. Deeds, bonds, notes of hand, indentures, insurance policies, leases, contracts of sale, etc., were not to be enforced by courts unless written on stamped paper bought of the officers of the Crown. Without stamped wills testamentary dispositions would be void; without stamped receipts debts could not be acquitted; vessels at sea without clearances written on stamped paper were liable to seizure and confiscation if they fell in with one of the King's ships; only stamped newspapers could be exposed for sale; without stamped certificates marriages could not lawfully be contracted; unstamped writs and executions had no force or effect; in short, the American citizen must have been daily paying money into the British treasury at its stamp office or in respect to much of the protection which society undertakes to afford he was an outlaw. Under this act business was suspended. The people absolutely refused to use the stamps. Benjamin Franklin presented a petition of the colonists to the House of Commons, and on March 18, 1766, the stamp act was repealed. The agitation resulting from the act was one of the leading causes in effecting the Revolution.

**Stamp-Act Congress.**—A body which met at New York Oct. 7, 1765, composed of delegates from all the Colonies except Virginia, North Carolina, New Hampshire, and Georgia. There were 26 members, including 4 from New York, 2 each from Rhode Island and Delaware, and 3 each from Massachusetts, Connecticut, New Jersey, Pennsylvania, Maryland, and South Carolina. Timothy Ruggles, of Massachusetts, was chosen president. The manifestoes issued by this congress were "A Declaration of the Rights and Grievances of the Colonists of America," an address to the King, a memorial to the House of

Lords, and a petition to the House of Commons, all of a loyal and respectful tone. The congress adjourned Oct. 25.

**Stanbery, Henry**; lawyer; b. New York City, Feb. 20, 1803; graduated Washington (Pa.) College, 1819; moved to Ohio and engaged in practice of law, 1824-46, and became the first attorney-general of Ohio, 1846-51; appointed Attorney-General in Cabinet of President Johnson, 1866; died New York City, June 25, 1881.

**Stanbery, Henry:**

Counsel for President Johnson in impeachment proceedings, 3924.

Special commissioner to investigate administration in military division on Mississippi River, 3474.

**Standard Oil Case.**—Charges of dishonesty and unfair business methods have frequently been made against the Standard Oil Company. These were discredited or silenced by technical denials until it was found that the Standard Oil Company was trying to gain possession of the new and rich oil fields of Eastern Kansas and Northern Oklahoma, which had been opened during the winter of 1904-5. Many independent companies had been formed, both for producing oil and refining it, and the savings of thousands of people were invested in the business. It soon became apparent, however, that the Standard Oil Company was endeavoring to control the field. Freight rates were so advanced that it was impossible to ship oil to refineries at Kansas City, and the producers were told that if they sold any oil to independent refiners, the Standard would refuse to take any surplus they might have. This seemed to indicate that the Standard was determined to crush all business rivals, as it was charged with having done in the Eastern oil fields. Congressman Campbell, of Kansas, introduced a resolution on the subject and in February, 1905, an investigation of the company was ordered by the Bureau of Corporations. Commissioner Garfield submitted a report May 17, 1906. This showed that the Standard Oil Company had an advantage over all independent companies in the shipment of oil. The report says: "The Standard Oil Company has habitually received and is now receiving, secret rates and other unjust and illegal discriminations. Many of these discriminations were clearly in violation of the interstate commerce laws, and others, whether technically illegal or not, had the same effect

**Standard Oil Case—Continued.**

upon competitors. These discriminations have been so long continued, so secret, so ingeniously applied to new conditions of trade, and so large in amount as to make it certain that they were due to concerted action by the Standard Oil Company and the railroads."

A second investigation of the Standard Oil Company was undertaken by the Interstate Commerce Commission at the request of Congress, and their report was submitted Jan. 28, 1907. It stated: "The sworn testimony before us abundantly confirms the conclusions reached by the Commissioner of Corporations. The ruin of competitors has been a distinct part of the policy of the Standard Oil Company in the past, systematically and persistently pursued. It has maintained a system of espionage over the shipments of its rivals; it has ruined competitors by means of local competition, that is, by reducing prices in the field of operation of its rivals, while maintaining prices elsewhere; it has pursued the policy of molding public opinion by purchasing space in newspapers and printing innocent looking articles setting forth the benefits conferred by the Standard Oil Company; it has induced the railroads to purchase all their lubricating oil from it at a double price, thus securing a profit very much like a rebate; it has paid employees of its rivals for information, and has sold different grades of oil out of the same barrel."

Herbert Knox Smith, Commissioner of Corporations, presented a report May 20, 1907, dealing mainly with the Standard Oil pipe lines. It showed these lines to consist of 40,000 miles of trunk lines and feeders; and it pointed out that, while the Standard Oil Company had no monopoly in the production of oil, it transported through its pipe lines 90 per cent. of the oil from the Pennsylvania, Indiana, and Ohio fields, and 98 per cent. of that from the Kansas-Oklahoma fields. Its monopoly was also shown to consist in the fact that it refined about 86 per cent. of all the oil refined in the United States. The extent of these pipe lines was believed to prevent the construction of rival pipe lines. Commissioner Smith estimated that a charge of 20 cents per barrel would cover the cost of transportation from Lima, Ohio, to the seaboard, and yield 10 per cent. on the investment. The actual charge

was shown to be 53½ cents per barrel.

Early in 1907 the Attorney-General of the United States brought suit against the Standard Oil Company of Indiana, in the District Court at Chicago, under the Elkins law forbidding discrimination and the giving of rebates by common carriers engaged in interstate traffic. The action was based on the report of Commissioner Garfield, mentioned above, which related to the shipments of oil from the great refineries of Whiting, Indiana, to the southwestern market, by way of East St. Louis, Illinois, where the oil came into competition with the product of the Kansas and Oklahoma fields.

This region was reached by three competing railroads, the Chicago and Eastern Illinois, the Chicago, Burlington and Quincy, and the Chicago and Alton. Each road had filed with the Interstate Commerce Commission and kept posted at its freight offices a class rate of 18 cents per 100 pounds, but their books showed that they had given the Standard Oil Company a commodity rate on oil of 6 or 6¼ cents per hundred. Each company had its own methods of concealing the true charge. Commissioner Garfield stated that the "whole scheme of the 6 cent rate, including both the failure to file tariffs with the Interstate Commerce Commission and the secret methods of billing, were devised at the suggestion and with the knowledge of the Standard Oil Company and primarily for the purpose of concealing the extraordinarily low rates from its competitors."

The defense plead that "these rates were not solicited nor accepted knowingly with the intention of violating the law; that the law did not forbid a shipper to take directly from a carrier a rate less than the published rate, the purpose of the law being to prevent indirect methods and secret devices; the company could have secured rates as low as those accepted over the Chicago, Burlington and Quincy, or over the Chicago and Eastern Illinois, and that the Elkins law, under which the suit was brought, was nullified by the Hepburn law, subsequently passed. The case was based specifically on the transit of a car of oil from Whiting, Indiana, over the Chicago and Alton Railroad, at the 6 cent rate. April 13, after deliberating two hours, the jury returned a verdict of

**Standard Oil Case—Continued.**

guilty on 1,462 counts. Before determining the amount of the fine Judge Landis demanded evidence of the actual ownership of the Standard Oil Company of Indiana. This was shown to be the Standard Oil Company of New Jersey. Judge Landis then, on August 3, imposed the maximum fine of \$20,000 on each count, an aggregate of \$29,240,000. The defendant company appealed the case to the Circuit Court of Appeals for the seventh circuit, and on July 22, 1908, Judge Peter L. Grosscup, of Illinois, two other judges concurring, handed down an opinion reversing the finding of the District Court, holding that the court below erred in its ruling that a shipper may be convicted of reaccepting a concession from the lawful published rate, even though it was not shown that the shipper knew what the lawful published rate was; its ruling that the number of offenses is the number of carloads of property transported, irrespective of the question whether each carload is the whole or only a part of a single transaction; and its ruling that the largeness of the fine imposed was due to the effect to reach and punish a party that was not before the court.

Judge Grosscup declared the fine imposed by Judge Landis "an abuse of judicial discretion." The validity of the courts' reasoning was universally discussed. President Roosevelt pronounced the ruling of Judge Grosscup "a gross miscarriage of justice." The Government applied to the Circuit Court of Appeals for a rehearing, which was denied, and on Nov. 20, 1908, Attorney-General Bonaparte petitioned the United States Supreme Court for a writ of certiorari. This petition was dismissed Jan. 4, 1909, leaving the case to be retried in the District Court.

**Star Routes.** (See Postal Service.)

**Star Spangled Banner.**—A patriotic song written by Francis Scott Key, of Baltimore (q. v.) on the night of Sept. 13, 1814, during the bombardment of Fort McHenry by the British. Key had gone under a flag of truce to solicit the release of some friends who had been seized by the English Admiral Cochrane during the attack on the city of Washington. Upon Key's arrival the British fleet was about to begin the attack on Fort McHenry, and though his request for the release of his friends was granted, Admiral Cochrane refused to allow him or his friends to leave the ship before the battle. During the excitement of the bombardment Key wrote the famous song on the back of a letter. It was published and sung at the theaters to the tune of "Anacreon in Heaven."

**Stars and Bars.**—The flag of the Confederate States of America. The first provisional Senate recommended that "the flag of the Confederate States shall consist of a red field with a white space extending horizontally through the center and equal in width to one-third the width of the flag." The Union was a blue square extending across the upper red and the white stripe. In the blue square 9 stars were arranged in a circle. The bars were, by their colors, red

**Stars and Bars—Continued.**

and white, intended to express the qualities of courage and purity. The blue field of the union expressed fortitude, and the 9 stars represented the number of States in the Confederacy. It was first displayed March 4, 1861, simultaneously with the inauguration of Lincoln, being unfurled over the statehouse at Montgomery, Ala. In 1863 the Stars and Bars too closely resembling the Stars and Stripes, the Confederate congress adopted a white flag with one blue star in the center. Another variation commonly used was a white field with blue diagonal stripes and white stars, and a piece of fringe at the outer edge. Some of the army corps adopted a battle flag with a red ground, blue diagonal cross, and white stars.

**Stars and Stripes.** (See Flag.)

Repudiation of contracts referred to, 1962.

**State, Department of.—History.**—The Department of the Executive Government had its origin in the Committee of Correspondence, appointed Nov. 29, 1775, to invoke foreign aid in behalf of the American Colonies. This committee was succeeded by the Committee of Foreign Affairs which was created by an act of the Continental Congress on April 17, 1777. "A plan for the Department of Foreign Affairs" was reported to Congress in January, 1781, and the Department was organized on Aug. 10 of that year; Robert R. Livingston was made Secretary and he filled the position until June 4, 1783. On the retirement of Livingston the Department of Foreign Affairs practically ceased to exist for about a year, Congress managing the foreign relations of the country through the committees.

On Sept. 21, 1784, however, John Jay was appointed Secretary and the functions of the office were revived. After the acceptance of the Constitution Congress passed a law entitled "an act for establishing an Executive Department to be denominated the Department of Foreign Affairs." This became a law on July 27, 1789, and John Jay, being in charge of the

old Department, was continued temporarily in charge of the new one. The existence of this Department, however, was destined to be brief, for on Sept. 15 following, an act of Congress was approved which provided that "the Executive Department denominated the Department of Foreign Affairs, shall hereinafter be denominated the Department of State and the principal officer shall hereafter be called the Secretary of State." On Sept. 26 Thomas Jefferson was made Secretary. Beside the care of the foreign correspondence, the Secretary of State was required, among other duties, to receive and publish the laws of the United States; to become the medium of correspondence between the President and the governors of the several States; and to be the custodian of the seal of the United States.

The scope of the Department was so materially enlarged that it became the most important of the government offices under the President, a position which it has ever since held. Many of the functions originally given to the Department of State have since been transferred to other Departments. According to the law of April 10, 1790, the Department was given charge of the patent business, which it retained until 1849, when the work was given over to the new Department of the Interior. A law passed May 31, 1790, made the Department of State the repository of maps, charts, and books for which copyright might be granted by United States district courts, but in 1859 these records were turned over to the Department of the Interior and later to the Library of Congress, where the business is now conducted. From 1790 until 1850 the Department also cared for the enumeration of the census, but in the latter year that work was given to the Department of the Interior, from which, in 1903, it was transferred to the Department of Commerce and Labor. Territorial affairs were also under the care of the Department of State until the organization of the Department of the Interior in 1849. In 1853 an Assistant Secretary of State was provided by law with power to act as Secretary during the latter's absence or during an interregnum.

A Second Assistant Secretary was provided for in 1866, and in 1875 the office of Third Assistant Secretary was created. In 1848 the office of Examiner of Claims was created,

**State, Department of—Continued.**

whose duties were to examine claims of our citizens against foreign governments and of foreigners against our Government, but when the Department of Justice was formed, in 1870, this office passed under its jurisdiction, while the duties of the incumbent remained a part of the functions of the Department of State. In 1891 the title of this office was changed to Solicitor for the Department of State. In 1856 the Statistical Office of the Department of State was established; in 1874 the title was changed to Bureau of Statistics, and a year later it was again changed to the Bureau of Foreign Commerce. This Bureau was, in 1903, transferred to the Department of Commerce and Labor and made a part of its Bureau of Statistics. The Bureau of Indexes was established in 1870; the Bureau of Accounts in 1873; and the Bureau of Rolls and Library in 1874. Work originally done by the Home Bureau (1834) has since been given to the Passport Bureau and the Bureau of Appointments. Other important Bureaus are the Diplomatic Bureau (1834), which has charge of all correspondence between the Department and our diplomatic agents abroad and foreign diplomatic agents in the United States, prepares treaties, etc.; and the Consular Bureau (1834). The Bureau of Trade Relations was established in 1903 to manage the work of the consular officials in obtaining reports for the Department of Commerce and Labor.

*Official Duties.*—The Secretary of State is charged, under the direction of the President, with the duties appertaining to correspondence with the public ministers and the consuls of the United States, and with the representatives of foreign powers accredited to the United States; and to negotiations of whatever character relating to the foreign affairs of the United States. He is also the medium of correspondence between the President and the chief executives of the several States of the United States; he has the custody of the Great Seal of the United States, and countersigns and affixes such seal to all Executive proclamations, to various commissions, and to warrants for the extradition of fugitives from justice. He is regarded as the first in rank among the members of the Cabinet. He is also the custodian of the treaties made with

foreign States, and of the laws of the United States. He grants and issues passports, and exequaturs to foreign consuls in the United States are issued through his office. He publishes the laws and resolutions of Congress, amendments to the Constitution, and proclamations declaring the admission of new States into the Union.

*Assistant Secretaries of State.*—The Assistant Secretary of State becomes the Acting Secretary of State in the absence of the Secretary. Under the organization of the department the Assistant Secretary, Second Assistant Secretary, and Third Assistant Secretary are charged with the immediate supervision of all correspondence with the diplomatic and consular officers, and are intrusted with the preparation of the correspondence upon any questions arising in the course of the public business that may be assigned to them by the Secretary.

*Director of the Consular Service.*—The Director of the Consular Service is charged with the general supervision of the consular service and such other duties as may be assigned to him from time to time by the Secretary.

*Chief Clerk.*—The chief clerk has general supervision of the clerks and employees and of departmental matters; charge of the property of the department.

*Diplomatic Bureau.*—Diplomatic correspondence and miscellaneous correspondence relating thereto.

*Division of Latin American Affairs.*—Diplomatic and consular correspondence, on matters other than those of an administrative character, in relation to Mexico, Central America, Panama, South America, and the West Indies.

*Division of Far Eastern Affairs.*—Diplomatic and consular correspondence, on matters other than those of an administrative character, in relation to Japan, China, and leased territories, Siberia, Hongkong, French Indo-China, Siam, Straits Settlements, Borneo, East Indies, India, and in general the Far East.

*Division of Near Eastern Affairs.*—Diplomatic and consular correspondence, on matters other than those of an administrative character, in relation to Germany, Austria-Hungary, Russia, Roumania, Servia, Bulgaria, Montenegro, Turkey, Greece, Italy, Abyssinia, Persia, Egypt, and

**State, Department of—Continued.**

colonies belonging to countries of this series.

Division of Western European Affairs.—Diplomatic and consular correspondence, on matters other than those of an administrative character, in relation to Great Britain (Canada, Australia, New Zealand, and British colonies not elsewhere enumerated), Portugal, Spain, France, Morocco, Belgium, the Kongo, Switzerland, Norway, Sweden, the Netherlands, Luxemburg, Denmark, and Liberia.

Consular Bureau.—Consular correspondence and miscellaneous correspondence relating thereto.

Bureau of Trade Relations.—Preparation of instructions to consular officers for reports to be printed by the Department of Commerce and Labor; revision and transmission of such reports to said department and to other branches of the Government Service; and compilation of commercial information for the use of the Department of State.

Bureau of Appointments.—Custody of the great seal and applications for office, and the preparation of commissions, exequaturs, warrants of extradition, Departmental Register, diplomatic and consular lists, and consular bonds; correspondence and other matters regarding entrance examinations for the foreign service.

Bureau of Citizenship.—Examination of applications for passports, issuance of passports and authentications; receiving and filing duplicates of evidence, registration, etc., under act of March 2, 1907, in reference to expatriation of citizens and their protection abroad; keeping of necessary records thereunder; conduct of correspondence in relation to the foregoing.

Bureau of Indexes and Archives.—Recording and indexing the general correspondence of the department; charge of the archives.

Bureau of Accounts.—Custody and disbursement of appropriations and indemnity funds, and correspondence relating thereto.

Bureau of Rolls and Library.—Custody of the rolls, treaties, etc.; promulgation of the laws, treaties, Executive orders and proclamations; care and superintendence of the library and public documents; care of papers relating to international commissions.

Division of Information.—The preparation and distribution to the foreign service of diplomatic, commercial, and other correspondence and

documents important to their information upon foreign relations; editing "Foreign Relations" of the United States.

Office of the Law Clerk.—Editing and indexing the laws, resolutions, public treaties, and proclamations for publication in the Statutes at Large.

Superintendent of Building.—The superintendent of the State, War, and Navy Department Building is the executive officer of the commission created by Congress, consisting of the Secretaries of State, War, and Navy, for the government of this building. He has charge of, care, preservation, repairing, warming, ventilating, lighting, and cleaning of the building, grounds, and approaches, and disburses the special appropriations for this purpose; he has charge of all the employees of the building proper, and appoints them by direction of the Secretaries.

The following have been Secretaries of State under the Constitution: Thomas Jefferson, Virginia; Edmund Randolph, Virginia; Timothy Pickering, Pennsylvania; John Marshall, Virginia; James Madison, Virginia; Robert Smith, Maryland; James Monroe, Virginia; John Quincy Adams, Massachusetts; Henry Clay, Kentucky; Martin Van Buren, New York; Edward Livingston, Louisiana; Louis McLane, Delaware; John Forsyth, Georgia; Daniel Webster, Massachusetts; Hugh S. Lagaré, South Carolina; Abel P. Upshur, Virginia; John C. Calhoun, South Carolina; James Buchanan, Pennsylvania; John M. Clayton, Delaware; Edward Everett, Massachusetts; William L. Marcy, New York; Lewis Cass, Michigan; Jeremiah S. Black, Pennsylvania; William H. Seward, New York; Elihu B. Washburne, Illinois; Hamilton Fish, New York; William M. Evarts, New York; James G. Blaine, Maine; Frederick T. Frelinghuysen, New Jersey; Thomas F. Bayard, Delaware; John W. Foster, Indiana; Walter Q. Gresham, Indiana; Richard Olney, Massachusetts; John Sherman, Ohio; William R. Day, Ohio; John Hay, District of Columbia; Elihu Root, New York, and Philander Chase Knox, Pennsylvania.

Four months of this time he spent in Cuba; in 1902 he was chosen county superintendent of schools of Peoria County; in 1909 he was chosen president of the association of county superintendents of schools of the State; is State historian of the United Spanish-American War Veterans; studied law, was admitted to the bar, and formed a partnership with Judge L. O. Eagleton; married in 1902 to Miss Genevieve C. Francis; elected to the Sixty-second Congress from Illinois.
- Stone River, or Murfreesboro (Tenn.), Battle of.**—Oct. 30, 1862, Gen. Buell was succeeded in the command of the

**Stone River, or Murfreesboro (Tenn.),  
Battle of—Continued.**

Army of the Ohio by Gen. William S. Rosecrans. During December the Federal army of 41,421 infantry, 3,266 cavalry, and 2,223 artillery, with 150 guns, lay at Nashville, Tenn. The recent invasion of Kentucky by the Confederates under Gen. Bragg having proven unsatisfactory to the Confederate government, he was again ordered to the north soon after he had reached Chattanooga. By Christmas he was posted near Murfreesboro, about 30 miles southeast of Nashville, with an army of 37,000 men. Rosecrans had planned to assail the Confederate right early on the morning of Dec. 31, in front of Murfreesboro. Bragg, anticipating his design, attacked McCook on the Federal right and drove him from his position with considerable loss, including 3,000 prisoners and 28 guns. Some Federal accounts represent the Confederates as repulsed four times after their successful charge. Both armies rested on Jan. 1, 1863. On the 2d Rosecrans resumed his efforts to turn the Confederate right. Some statements are to the effect that Bragg attacked unsuccessfully. The one here followed says the Federals advanced, were forced back across Stone River, but later recovered the ground and threw up breastworks. Bragg retired from his position on the 3d and occupied Murfreesboro, which he evacuated on the 5th. He then fell back about 25 miles to Duck River. The Federal loss in the fighting about Murfreesboro was 1,723 killed, 7,245 wounded, and over 3,000 prisoners—a total of about 12,000. The loss of the Confederates was about 11,000 men in killed, wounded, and missing. This battle is called by the Confederates the battle of Murfreesboro. It was one of the bloodiest of the Civil War.

**Stone, William**, report of, on slaughter of American citizens in South Carolina, transmitted, 4329.

**Stone, William J.**; b. May 7, 1848, in Madison County, Ky.; graduated from Missouri University, which later conferred upon him the degree of LL. D.; admitted to the bar in 1869; prosecuting attorney of Vernon County; Representative in the Forty-ninth, Fiftieth, and Fifty-first Congresses; governor of Missouri, 1893-1897; elected to the United States Senate from Missouri for the term beginning March 4, 1903, and reelected in 1909.

**Stone, William Joel**; b. May 7, 1848, in Madison Co., Ky.; graduated from Missouri University, which later conferred upon him the degree of LL. D.; admitted to the bar in 1869; Representative in the 49th, 50th, and 51st Congresses; governor of Missouri, 1893-1897; elected to the United States Senate from Missouri, for the term beginning March 4, 1903, and reelected in 1909.

**Stono Ferry (S. C.), Battle of.**—In the early summer of 1779 the British under Gen. Prevost advanced upon Charleston and demanded its surrender. They were driven off by the vigorous action of Pulaski, Rutledge, Moultrie, Laurens, and others. In his retreat toward Savannah Gen. Prevost left a detachment in charge of Stono Ferry, 10 miles below Charleston on the Stono River. June 20 these were attacked by Gen. Lincoln. In the absence of concerted action the assault failed and the Americans withdrew after losing 146 in killed and wounded.

**Stony Creek (Canada), Battle of.**—When the British were driven from Fort George, on the Niagara River, they fled westward under command of Gen. Vincent as far as Stony Creek, 6 miles southeast of the present city of Hamilton, and about 50 miles from Niagara River. Here they made a stand, having been reinforced by troops from Kingston. They were closely followed by 1,300 Americans under Generals Chandler and Winder. At midnight June 5, 1813, Vincent, with about 800 men, started for the American camp. The attack was made before daylight, and the combatants were unable to distinguish friend from foe. Chandler and Winder were both captured and Vincent was lost in the woods. The British command then devolved upon Col. Harvey, who, despairing of driving the Americans from their position, withdrew from the attack while it was yet dark. The Americans fled to Forty-Mile Creek, where they were joined by 400 reinforcements. The total casualties of the battle were: Americans, 154; British, 178.

**Stony Point (N. Y.), Storming of.**—With a view to regaining possession of the Hudson, Gen. Clinton in June, 1779, occupied and fortified Verplanck's Point and Stony Point, garrisoning the latter with 600 men. To circumvent his movements Washington sent for Anthony Wayne and asked him if he could take Stony Point. His reply is said to have

# **Stony Point (N. Y.), Storming of—** *Continued.*

been: "I will storm hell if your excellency will plan it." Accordingly, Washington planned the assault, and on the night of July 16, 1779, Wayne, with about 800 men selected from three regiments of infantry, a detachment from West Point, and Col. Lee's light-horse, made a sudden assault upon the fort. The plans were carefully executed, the guns were carried off, and the works destroyed. The British casualties were 20 killed, 74 wounded, 58 missing, and 472 prisoners—a total loss of 624. The total American loss was only 15 killed and 83 wounded. Among the latter was Gen. Wayne. This, the boldest exploit of the Revolution, was initiated by the capture and gagging of a sentinel, the countersign having been obtained by a negro strawberry vender and by him communicated to the Americans. While the negro chatted with the sentry the latter was seized by the American advance party.

**Streight's Raid.**—In the spring of 1863, about the time Col. Grierson's flying column of cavalry was organized at Memphis, Tenn., Col. A. D. Streight, of the Fifty-first Indiana, was permitted by Gen. Rosecrans to take a body of 1,800 cavalry from Tusculum, Ala., to attempt the destruction of railroads and other property in northern Alabama and Georgia. The raiders started out April 12 and were captured May 3, 1863, near Rome, Ga., having accomplished nothing. The capture was made by Forrest's cavalry.

Discussed, 4064.

Information regarding, transmitted, 4958.

## **Subsidies to Steamships:**

Discussed, 4151, 4306, 4938.

Views of Postmaster-General regarding, 3561.

**Subsidy.**—Derived from the Latin *subsidium*, originally the troops stationed in reserve in the third line of battle, from *subsistere*, to sit down. In Europe, after the period of its first use, it meant a sum of money paid to an ally to aid in carrying on war. In England it was a special tax levied upon persons and not upon property. It has now come to mean money paid by a government to individuals or companies, such as steamship or railway, in excess of the value of services rendered and in aid of individual enterprise. Railways in the United States have been assisted by State and municipal subscriptions to their bonds. National aid to railways, with the exception of the Union and Central Pacific, has been in the form of land grants. In the case of the Pacific roads, in addition to 33,000,000 acres of land, the company was granted a money subsidy of more than \$25,000 a mile.

The first subsidized steamships were those of the Cunard Line, which in 1838 were allowed an annual subsidy of £81,000 by Great Britain. Two years later agitation was begun in the United States to have steamship mail lines established on the subsidy plan, and in 1845 the Postmaster-General was authorized to make contracts for carrying foreign mail in steamships sailing under the American flag. In 1847 an act was passed requiring the Secretary of the Navy to arrange for United States steamships to carry the mail from New York to Liverpool, to the West Indies and Gulf ports, and from Panama up the Pacific coast. By 1852 the Government was paying \$2,000,000 a year for foreign mail service, but Congress soon after put an end to all mail subsidies. An act of March 3, 1891, directed the Postmaster-General to pay \$4 a mile run for first-class vessels for carrying foreign mails and in consideration of their use as auxiliary naval vessels. In 1892 the International Navigation Company made an arrangement for first-class European service in connec-

**Subsidy—Continued.**

with the American registry of the *Paris and New York*.

In 1898 Senator Hanna introduced into the Senate a comprehensive bill to provide subsidies for all classes of American shipping. The bill passed the Senate in March, 1902, but failed to pass the House, although several small subsidies have been granted both before and since that date.

**Subtreasury System.**—The subtreasury system of the United States is an outgrowth of the panic of 1837. In his special session message to Congress that year President Van Buren strongly recommended such a system (1541). Silas Wright, of New York, introduced a bill in Congress in accordance with the President's recommendations. It prohibited Government agents from receiving anything but gold and silver. In 1840 the bill became a law and subtreasuries were established at New York, Boston, Charleston, and St. Louis, the mint at Philadelphia and the branch mint at New Orleans having been also made places of deposit. The law was repealed in 1841, and reenacted in 1846. The subtreasury at Charleston has been suspended, but subtreasuries have been established at Baltimore, Chicago, Cincinnati, and San Francisco.

**Subtreasury System:**

Condemnation of, referred to, 1898.

Van Buren, 1541, 1596, 1706, 1751, 1757, 1827.

Modifications in, recommended, 2556.

**Suffrage.**—The privilege of participating in the government of a State or Nation by voting at an election of officers or on a change in the fundamental law. Suffrage under the Constitution of the United States is exercised by such electors in each State as have the qualifications necessary for electors of the most numerous branch of the State legislature (15). The Constitution does not guarantee the suffrage to any citizen, but by the fourteenth and fifteenth amendments the States are forbidden to abridge the privileges or immunities of United States citizens or to deny or abridge the right of suffrage on account of race, color, or previous condition of servitude. The age of 21 is universally fixed upon as that when suffrage may be exercised.

In some States ability to read and

write is required, some a small property qualification or tax is imposed, while in others aliens who have declared their intention to become citizens are allowed to vote. Until the present century suffrage was greatly restricted in America. Massachusetts and New Haven Colonies for a long time allowed none but church members to vote. There have been periods in the history of nearly all the Colonies when only freeholders were allowed to vote. When the States in the Federal Union first framed their constitutions some of them retained the church-membership qualification, while others permitted suffrage to freeholders only. In 1798 Georgia abolished the property qualification, and was followed by Maryland in 1801, Massachusetts and New York in 1821, Delaware in 1831, New Jersey in 1844, Connecticut in 1845, Virginia in 1850, North Carolina in 1854, South Carolina in 1865, and Rhode Island, except in municipal elections, in 1888. The new States have mostly provided for manhood suffrage from the first. Several of the Southern States have adopted methods, varying from each other, but all with the single expressed purpose of excluding negroes from the franchise and yet avoiding the constitutional consequences of discriminating "on account of race, color, or previous condition of servitude."

In four States women possess suffrage on equal terms with men, namely, in Wyoming, Colorado, Utah, and Idaho. In Kansas women can vote in school and municipal elections. Women possess school suffrage in 17 States; namely, in Arizona, Connecticut, Illinois, Massachusetts, Michigan, Minnesota, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oregon, South Dakota, Vermont, Washington, and Wisconsin. In addition to school suffrage Montana and Iowa permit women to vote upon the issuance of municipal bonds; while Louisiana gives to women tax-payers the right to vote on all questions concerning the expenditure of public money. A modified and restricted form of suffrage is also granted in Kentucky and Texas, so that women have either full or partial franchise in 27 States of the Union. (See also *Woman Suffrage*.)

Peckham, New York; Joseph McKenna, California; Oliver Wendell Holmes, Massachusetts, and William R. Day, Ohio. The court as at present (1909) constituted, consists of the Chief Justice and Judges Harlan, Brewer, Brown, White, McKenna, Holmes, Day, and Moody.

**Supreme Court Justices:**

Salaries of, increase in, recommended, 3996.

Should be exempted from other duties, 830.

**Supreme Court Reports.**—The opinions and decisions of the Supreme Court are recorded in 214 volumes, including the cases decided up to October, 1908. They comprise its work from its first session in 1790 to the present time. They begin with the volume numbered 2 Dallas and include 3 volumes by Dallas, covering the period between 1790 and 1800; 9 volumes by Cranch, 1800 to 1815; Wheaton, 12 volumes, 1816 to 1827; Peters, 16 volumes, 1828 to 1842; Howard, 24 volumes, 1843 to 1860; Black, 2 volumes, 1861 to 1862; Wallace, 23 volumes, 1863 to 1875. Up to that date the reports had reached 89 volumes by the different compilers. Since 1876 the reports have been styled 90 U. S.; 91 U. S., etc.; 90 U. S. was reported by Wallace; 91 to 107 U. S.

was reported by William J. Otto, from 1875 to 1882; 108 to 186 U. S., between 1882 and 1902, by J. C. Bancroft Davis, and the remainder by Charles Henry Butler.

**Surgeon-General of Army:**

Building for library of, recommended, 4657, 4833.

Ordered to accompany ex-President Jackson home, 1540.

**Surplus Revenue, Distribution of.**—In his annual message of Dec. 1, 1834 (1316), President Jackson announced the extinguishment of the public debt. The compromise tariff measure of 1832, while it made some reduction in the revenue derived from import duties, produced a surplus in the Treasury. Jackson advocated the distribution of this surplus among the States rather than the appropriation of it to other purposes. A bill providing for such disposition of the surplus was attached to the bill regulating public deposits and passed by Congress in 1836. Under this law all the money in excess of \$5,000,000 in the Treasury, Jan. 1, 1837, was to be deposited with the States in proportion to their representation in the electoral college, and in four installments. The States were required to give certificates of deposit payable to the Secretary of the Treasury on demand. None of the banks selected by the Government as the custodians of public funds was under any kind of official supervision by the States which chartered them or by the General Government. The sum to be divided was \$37,468,859. Three installments of the money were paid to all the States except the few that had refused to accept it on the conditions imposed. The return of these loans of the States has never been demanded.

**Surplus Revenue in Treasury.** (See Treasury.)**Surratt, John H.:**

Discovery and arrest of, referred to, 3657, 3659.

**Suspending Bridge, N. Y.**, proclamation granting privileges of other ports to, 2859.

**Susquehanna, The**, repair of, referred to, 2764.

**Susquehanna Company**.—An organization, composed mostly of Connecticut farmers, formed in 1754 for the purpose of colonizing the Wyoming country. This was the name given to a strip of land bought by Connecticut from the Plymouth Company in 1631. Under the charter granted by James I. to the Plymouth Company in 1620, their territory extended from the Atlantic to the Pacific and from lat. 40° to 46° north. The grant of Charles II. to William Penn extended to 42° north, thus overlapping the Plymouth grant to more than the extent of the territory sold to Connecticut, which extended to 41° south. In 1754 the Susquehanna Company made a treaty with the Six Nations of Indians, securing the right to settlement upon their purchase. Charles II. confirmed the sale to Connecticut, and Pennsylvania, though disputing the sale, made no effort to prevent a settlement. The first settlers in the disputed territory were driven off by the Indians in 1763. In 1769 some 40 more settlers arrived in the Wyoming region and were arrested by Pennsylvania officials. For the next six years a sort of civil warfare was kept up between the settlers of the disputed tract, and only suspended during the Revolution, after which the dispute was arranged between the States and the titles to the land confirmed. (See also Wyoming Controversy.)

**Susquehanna, or Conestoga Indians**. (See Indian Tribes.)

**Sutherland, George**, b. March 25, 1862, in Buckinghamshire, England; studied law at the University of Michigan, being admitted to practice in the supreme court of that State in March, 1883; State senator in the first State legislature of Utah; elected to the 57th Congress; declined renomination to the 58th; elected to the United States Senate by the Utah legislature for the term beginning March 4, 1905.

**Sutro Tunnel**, referred to, 4148.

**Swanson, Claude A.**; b. Swansonville, Pittsylvania County, Va., March 31, 1862; attended public school until he attained the age of 16, then attended the Virginia Polytechnic Institute for one session; matriculated at Randolph-Macon College, Ashland, Va., and remained there three sessions, graduating with the degree of A. B. in 1885; studied law at the University of Virginia, graduating with the degree of B. L. in 1886; practiced law at Chatham, Va., until he was nominated and elected to the Fifty-third Congress; reelected to the Fifty-fourth, Fifty-fifth, Fifty-sixth, Fifty-seventh, Fifty-eighth, and Fifty-ninth Congresses; was a candidate in the Democratic primary for governor of the State of Virginia in 1905; was nominated, and elected in November, 1905; resigned his seat in Congress and was inaugurated and served as governor of Virginia until Feb. 1, 1910; on Aug. 1, 1910, he was appointed by Gov. William Hodges Mann to fill the vacancy in the United States Senate occasioned by the death of Senator John Warwick Daniel for the remainder of his unexpired term, ending March 3, 1911; reappointed by Gov. Mann from March 4, 1911, until the meeting of the General Assembly of Virginia; elected to fill the unexpired term beginning March 4, 1911, and ending March 4, 1917.

**Swanton, Vt.**, proclamation granting privileges of other ports to, 2859.

**Swartwout, Samuel**, crimes charged against, 405.

Default of, referred to, 1709, 1723.

Thanks of Congress to, recommended, 3277.

**Sweden**.—A kingdom in the eastern part of the Scandinavian peninsula, in Europe. It is bounded on the north and west by Norway, on the east by Finland, the Gulf of Bothnia, and the Baltic Sea, and on the south and southwest by the Baltic and the Cattegat and Skager Rack channels. It extends from lat. 55° 20' to 69° 3' north and from long. 11° 6' to 24° 8' east. It has an area of 172,876 sq. miles. The surface is generally hilly and contains many lakes and rivers. Sweden was one of the prominent European powers in the seventeenth century. It took a leading part in the Thirty Years' War under Gustavus Adolphus and his successor. In 1814 Sweden united with the independent kingdom of

**Sweden—Continued.**

Norway, King Karl XIII. becoming Sovereign of both countries, each, however, keeping a separate government, constitution and code of laws. The union was dissolved by Norway in 1905, and Prince Charles of Denmark was elected King of Norway under the title of Haakon VII., and King Oscar II. continued to reign in Sweden till his death, Dec. 8, 1907, when he was succeeded by his son, Gustav V.

The mining and furnace products in 1909 were 3,886,000 tons of iron ore, 444,764 of pig iron, 308,823 of bar iron, 1,721 tons silver and lead ore, 9,562 tons copper ore, 43,760 tons zinc, 5,212 tons manganese, 16,104 tons sulphur pyrites, 246,808 tons coal. The amount of gold produced was 14,083 kilograms; silver, 511.5; lead, 165,588; copper, 2,374,657. There were 29,157 persons engaged in mining. The public forests of Sweden, mostly crown lands, have an area of 7,125,844 hectares, and yielded, in 1906, 2,650,000 cubic yards of timber; and 1,377 saw mills and planing mills, with 40,347 working people, turned out dressed lumber to the value of 162,345,970 kroner; 502 furniture factories, with 11,906 employees, turned out goods to the value of 26,346,502 kroner. Other products of the forest were wood pulp, paper and pasteboard. Flouring mills employed about 1,500 persons and put out flour worth 97,000,000 kroner. The principal trade is with Germany, Great Britain getting a good share. (One crown=26.8c.) The population in 1911 was 5,521,943.

Vice-Consul of, to United States, exequatur of, revoked, 3627.

Revocation annulled, 3630.

**Sweden and Norway, Treaties with.**

The treaty of amity and commerce of 1783 expired in 1796 by its own limitations. Some of its sections were revived by the treaty of 1816, which, in turn, expired by its own limitations in 1826, and was replaced by the treaty of commerce and navigation of 1827. By it freedom of commerce and trade was accorded to both nations, and for the ships of the island of St. Bartholomew, which was included. Equable imposition of charges, tolls, dues, and imposts was secured for the vessels of both nations; imports were to be taxed without regard to the nationality of the carrying vessel; and the coastwise trade was excluded from the terms of the treaty.

The consular office was created and provided for as in consular conventions. Humane provisions were made for the relief of the shipwrecked and for ships in distress. (For the extradition terms of the treaty of 1893, see *Extradition Treaties*.)

**Sweet, Edwin F.;** b. Dansville, N. Y., Nov. 21, 1847; graduated from Yale University in 1871 with degree of A. **Swiss Confederation.** (See Switzerland.)

**Switzer, Robert M.;** b. March 6, 1863, near Gallipolis, Ohio, and his education consisted of instruction in the country district schools, a few terms at the Gallia Academy, and about five terms at Rio Grande College, all in his native county; has always lived in Gallia County, Ohio, at or near Gallipolis; was admitted to the practice of law in the courts of Ohio in 1892, and has been continuously engaged in the practice of law at Gallipolis, Ohio; elected prosecuting attorney; elected to the Sixty-second Congress from Ohio.

**Switzerland.**—A confederation of 22 Cantons, whose general government is vested in a Federal Assembly of 2 chambers, which jointly elect the federal council of 7 members and also the President of the Swiss Confederation, who serves for one year. Switzerland is bounded on the north by the provinces of Alsace and Baden, on the northeast and east by the Lake of Constance, Vorarlberg, and Tyrol, on the south by Italy and France, and on the west and northwest by France. The chief wealth of the country lies in its excellent pasture lands; rye, oats and wheat are grown, and the production of cheese and condensed milk is an important industry. The manufactured products include textiles, leather, paper, wood work, watches and jewelry. Numbers of persons are supported by the tourists who flock to the country in large numbers both in summer and winter. It is one of the oldest of existing republics and dates from Aug. 1, 1291, when three of the present Cantons entered into a defensive league. In point of age it is only surpassed by the tiny republics of San Marino and Andorra. It has maintained its unique position among the empires of continental Europe not by military power, population, or extent of territory, but by reason of the jealousy of its neighbors. It has an area of 15,976 sq. miles, and the population in 1910 was 3,753,293.

**Switzerland, Treaties with.**—The convention of friendship, commerce, and extradition of 1850 ran until 1899, when notice was given of intention to terminate some of its provisions. Others were terminated by the treaty of 1900. Those which persist provide for personal and property privileges of the citizens of the one country residing and trading in the country of the other, with all of the rights, privileges, and immunities of the citizens of the country. Freedom of conscience is granted to all; the right to hold, possess, acquire, and to alienate property, immunity from military service, and enforced military contributions, and free and open access to courts of justice are secured.

The taxes upon citizens shall be equitable. Passports shall be supplied in order to establish the character and the citizenship of persons traveling between the two republics.

**Switzerland, Treaties with—Continued.**

The disposal, acquisition, and inheritance of property shall be free, easy, and unhindered. When an heir to property is disqualified from holding it by reason of his alienage, the heir or other successor shall be granted the time permitted by the canton in which the property is situated to dispose of the same. Consuls shall be appointed under conditions common to consular conventions. (For terms of the extradition treaty of 1900, see Extradition Treaties.)

**Taft, Lydia A.**, act granting pension to, vetoed, 6106.

**Taft, William H.**, Administration of:

The platform of the Republican party in the Presidential campaign of 1908 on which Judge Taft based his candidacy declared for a downward revision of the Dingley Tariff Law; for statutory reform in injunction procedure so as to provide notice before the issuance of the writ; for Federal incorporation of interstate commerce corporations; for postal savings banks; for the settling of constitutional questions regarding the income tax; for the encouragement by mail subsidies of Pacific and South American lines; for the regulation of railroad stock and bond issues by the Interstate Commerce Commission, and the incidental physical valuation of railroads; for the legalizing of rate agreements when sanctioned by the Commission; for the reorganization of certain Bureaus so as to facilitate the execution of the Interstate Commerce and Anti-trust Laws; and for the continuance of the Roosevelt policies regarding the conservation of our natural resources. Summarizing his purposes, Judge Taft said: "The practical constructive and difficult work, therefore, of those who follow Mr. Roosevelt is to devise the ways and means by which the high level of business integrity and obedience to law which he has established may be maintained and departures from it restrained without undue interferences with legitimate business."

**Tariff Revision.**—The first work to which the new administration addressed itself was tariff revision. Until Aug. 5, 1909, Congress in special session wrestled with its intricacies. The Payne-Aldrich Bill, passed on that date, was a downward revision, though in the President's estimation not sufficiently downward, and by its creation of a Court of Customs appeals and a Tariff Board was a distinctively progressive measure. The provision for an income tax on corporations with its incidental assurance of control and surveillance was the answer to

the President's message of June 16, 1909 (p. 7769). The attacks on the measure drew from the President his speech at Winona, Minn. (p. 7773), the most careful and thorough discussion of the subject which has appeared. (See Tariff; Income Tax.)

**Postal Savings Banks.**—The Postal Savings Banks were established, one in each of the forty-eight States, on Jan. 1, 1911, under the law passed June 25, 1910. The success of the plan has led the Postmaster-General to recommend extending the system to five hundred localities. (See Postal Savings Banks.)

**Reform in Injunction Procedure.**—The President urged upon Congress in his Inaugural Address and in his First and Second Annual Messages the passage of a law which would forbid the issuing of an injunction by any Federal Court without previous notice and hearing of the parties to be enjoined, unless in the Court's discretion the requisite delay would result in irreparable injury to the complainant (pp. 7758, 7811, 7904). (See Injunctions; Boycott.)

**Federal Incorporation.**—In his Message on the anti-trust law (p. 7821), the President discussed the causes of the tendency of modern business to amass in ever-growing units, analyzed the beneficial and baneful effects of such amalgamation, defined direct and indirect restraint of trade, outlined the true intent and scope of the Sherman law as affecting monopolistic combinations but not those actuated merely by desire to reduce production cost, condemned the Knight Sugar Trust decision, argued against amending the law, mentioned the inquiry into companies suspected of violations of the law which was contemplated by the Department of Justice if funds became available, and recommended the enactment of a law which would provide Federal charters for interstate commerce corporations and assure governmental supervision and control. (See Interstate Commerce.)

**The Income Tax.**—On the question of the income tax the President in his Message of June 16, 1909 (p. 7769), recommended that, though he was convinced of the constitutionality of such a tax, it would be wiser not to contradict the Supreme Court by reenacting a law which in the Pollock case it had declared unconstitutional, but by a two-thirds vote

Taft, William H.—*Continued.*

to submit to the States an amendment to the organic law expressly conferring the requisite power. The amendment is now (1911) before the legislatures of the various States, ten or more having favored it. (See Income Tax and Income Tax Cases.)

*Interstate Commerce Law.*—To make the Interstate Commerce Law a "complete and effective measure for securing reasonableness of rates and fairness of practices in the operation of interstate railroads, without undue preference to any individual or class over any others," adequate to "prevent the recurrence of many of the practices which have given rise in the past to so much public inconvenience and loss," the President on Jan. 7, 1910 (p. 7821), sent to Congress a special message in which he recommended the creation of a new Court, to be called the United States Court of Commerce and to have jurisdiction over proceedings brought by carriers to nullify orders of the Interstate Commerce Commission. The President pointed out that carriers by injunctions could and did suspend the commission's orders for months and even years, and that few orders of any consequence escaped such tactics. By means of the new Court such proceedings could be promptly and consistently disposed of by Judges deeply versed in the intricacies of the subject. Its decisions were to be final excepting review by the Supreme Court, and even if appealed from the order could not be stayed except by the Supreme Court. The President recommended that the Commission be empowered to commence proceedings on its own initiative; that the law be amended so as to permit the changing of rates only after submission of the schedule to the Commission, in order that, if unsatisfactory, the proposed change might be stayed pending investigation; that its duties be confined to quasi-judicial functions, utilizing the Department of Justice to prosecute and defend suits under the law. By an act passed June 18, 1910, Congress put on the statute books the recommendations above summarized, but rejected two other suggestions of the President, first, that the issue of railroad securities be made subject to the commission, and second, that rate agreements under certain circumstances be permitted. (See In-

terstate Commerce; Common Carriers.)

*Conservation.*—In the President's speech at St. Paul, Minn. (p. 7935), he took the high ground that, as the successor to Theodore Roosevelt, he could not be other than an earnest advocate of every measure calculated "to prevent the continuance of the waste which has characterized our phenomenal growth in the past." But "conservation is national. It affects every man of us, every woman, every child. What I can do in the cause I shall do, not as President of a party, but as President of the whole people. Conservation is not a question of politics, or of factions, or of persons. It is a question that affects the vital welfare of all of us, of our children and our children's children." The President's conservation address, like his tariff speech, is replete with definite and detailed recommendations showing a minute study of the subject. The agricultural and mineral land laws should be left unchanged; the funds available for reclamation should be concentrated on selected projects, \$20,000,000 in bonds having been authorized for engineering purposes; the States severally must control the handling of the 75 per cent of existing forests which is privately owned; withdrawals had been legalized by a definite statute; oil, gas and phosphate lands, and the coal fields of Alaska should be conserved by a leasing system; and water-power sites should be conserved by leasing the Federal Government's riparian rights to users or transferring such rights to the States so as to complete their title to and control of both stream and site. (See Lands, Public; Conservation Commission.)

*Ship Subsidy.*—In President Taft's Inaugural and two Annual Messages he discussed the question of subsidizing steamship lines to South America under conditions assuring publicity by giving to them the profit on mail carried by them, urging that if action were not immediately taken we would be the only nation unable to avail ourselves of the Panama Canal when completed and that should war come we would find ourselves destitute of sailors and shipping, without which the navy is like arms without a body. The question of the subsidy was vigorously discussed in the last session of the Sixty-first Congress, but no action was taken. (See pp. 7754, 7815,

**Taft, William H.—Continued.**

7883.) (See Subsidy; Merchant Marine.)

*Navy Personnel Improved.*—In order to match the superb vessels of the navy with efficiency in the personnel, Congress passed measures submitted and urged by President Taft in his Message of Feb. 25, 1910, which will reduce the ages at which line officers become captains and rear-admirals. (See p. 7850.) (See Navy; Navy, Dept. of.)

*Canadian Reciprocity.*—On Jan. 26, 1911, the President sent to Congress a special message transmitting an agreement between the Department of State and the Canadian Government obligating both parties to attempt to secure legislation which will reciprocally lower tariff rates on about six hundred items. (See p. 7961.) In urging the passage of the treaty (which, as effecting tariff legislation, will have to pass both Houses) the President recalled Canada's neighborliness and friendship as shown in the settlement of all disputes and in the cooperation between the boards of railway control on both sides the border, dwelt upon the necessity of conserving our own resources by buying those of our neighbor, pointed out the similarity in labor and transportation conditions here and there, mentioned the harm to Americans which will accrue if the "imperial preference" doctrine becomes a tenet of Canadian political faith, maintained that the accession of a new supply of raw materials would inure to the benefits of all sections and, in prophetic vein, characterized the agreement as a step toward closer friendship between peoples related by blood, common sympathies and identical moral and social ideas. Animals, poultry, food stuffs, products of farm, garden and dairy, fruits, fish, oysters, salt, mineral waters, lumber, machinery, minor metal manufactures, coal, meats, flour, meal, farming utensils, fruit trees and Portland cement are the articles on which the tax is to be lowered or entirely removed. The effect of the proposed treaty, according to 1910 figures, would be to decrease the revenue of the United States by \$4,849,933, and that of Canada by \$2,560,579. (See Reciprocity.)

Turning to matters of administration, he has taken judicial appointments of our politics; has made the taking of the thirteenth census non-

political (p. 7919); has recommended and by executive order effected the extension of the civil service (pp. 7804, 7929); has instituted a vigorous inquiry into the government service in the interest of economy and efficiency, which so far has resulted in a \$52,000,000 saving in the 1911 estimates (pp. 7804, 7930); has advocated as an improvement of efficiency the giving of pensions to superannuated clerks (pp. 7805, 7931); and has, in his message regarding the rivers and harbors bill of 1910, declared his intention of vetoing any future bill which does not concentrate the moneys thereby provided on a certain few projects which may then be carried to completion instead of diffusing at great cost temporary and futile activity over a multitude of projects (p. 7869).

Minimum ad valorem rate should be 35 per cent, 8127.

Must offset difference in cost of production here and abroad, 8126.

Proposed reduction of, would work injury to wool trade, 8128.

Reduction in accordance with report of Tariff Board would give sufficient protection to industry, 8128.

Wool tops and yarn, low tariff on, would disrupt industry, 8127.

Woolen goods, low tariff on, would destroy fine goods industry, 8127.

Workmen's Compensation, appropriation for organization of conference on, asked, 7922.

Zelaya, misrule of Nicaragua by, and overthrow of, 7880.

**Taggart, Joseph;** b. Allamakee County, Iowa, June 15, 1867; his early education was acquired in a district school; attended a private academy conducted by John W. Hinchon, a teacher celebrated for his ability and learning; at the age of 17 went to California, and after a season of hard work at various employments returned east as far as Salina, Kans., and began a career as student and teacher; having acquired a university education, devoted three years to the study of law and was admitted to the bar in 1893; in 1894 removed to Kansas City, Kans., and a short time later began the practice of his profession; elected county (prosecuting) attorney of Wyandotte County, Kans., in 1906; reelected in 1908 and 1910; acquired a reputation throughout the State as a prosecutor and trial lawyer, it having been his duty to conduct a number of celebrated trials for murder; was married in 1908 to Miss Elsie Dorothy Mills, a niece of Gov. John A. Martin, of Kansas; at a special election held Nov. 7, 1911, was elected to the Sixty-second Congress from Kansas, to fill the vacancy caused by the death of Hon. Alexander C. Mitchell.

**Tahoe Forest Reserve,** proclaimed, 7307.

**Talcott, Charles A.;** b. June 10, 1857; attended public schools and Utica Free Academy; graduated Princeton in 1879, receiving the degree of A. B.; was city counsel of Utica in 1886; member of Board of Police and Fire Commissioners of Utica, 1888 to 1892; mayor of the city of Utica; elected to the Sixty-second Congress from New York.

**Talladega (Ala.), Battle of.**—After the destruction of Tallasahatchee, Jackson was informed that 160 friendly Creek warriors, with their families, were hemmed in at Talladega, in Lashley's fort, by 1,000 hostile Indians. Nov. 8, 1813, Jackson set out with 1,200 infantry and 800 cavalry to raise the siege. By 4 o'clock the next morning he had surrounded the

**Talladega (Ala.), Battle of—Continued.** enemy, who, 1,080 strong, were concealed in the thickets. At daylight the battle began. It resulted in the complete rout of the savages. As many as 290 dead warriors were found and many others doubtless perished in the woods of the surrounding mountains. The number of the wounded could not be ascertained, but was large. The loss to the whites was 15 killed and 85 wounded.

**Tallasahatchee (Ala.), Battle of.**—The massacre at Fort Mims spread consternation throughout the region inhabited by the Creeks, and hardy volunteers came forward thirsting for vengeance. Gen. Jackson led the Tennessee militia across the line into Alabama. Upon his arrival at the Coosa he was informed that the Creeks were assembled at Tallasahatchee, a town in an open woodland, not far from the present village of Jacksonville, the county seat of Benton County, Ala., on the southeast side of the Tallasahatchee Creek. Jackson sent Gen. Coffee with 1,000 horsemen to destroy the town. Nov. 3, 1813, Coffee's men surrounded the place and the Indians came out to meet them. The battle was short, sharp, and desperate. The victory for the whites was complete. Every warrior was killed. None asked for quarter, and each fought to the death. At the close of the battle 186 bodies were counted on the plain. It is believed that 200 were killed. Eighty-four women and children were made prisoners. The loss to the whites was 5 men killed and 41 wounded.

**Tammany.**—In 1789 the Columbian Order was organized in New York City by William Mooney, as a counter move against the foundation of the so-called Aristocratic Society of the Cincinnati. In 1805 it was incorporated under the name of Tammany Society. This was in memory of Tammany, an aged, wise and friendly chief of the Delaware Indians. At this time charitable societies were also organized in Philadelphia and other cities and named in his honor. The only one of the number that survives is that in New York. William Mooney was the first grand sachem of Tammany, and was assisted by 13 sachems, representing the governors of the thirteen States. The members wore Indian insignia. In 1811 the society built the original Tammany Hall, fronting on City Hall Park. Since then a local political party, fa-

vored by a majority of the members of the Tammany Society, has always had its headquarters in the house of the society, and has been popularly known as "Tammany Hall." In theory the Tammany Hall general committee has no relation to the Tammany Society save as tenant of the latter's edifice, yet in practice they are coordinate branches of one political system, the society being in effect the citadel of the controlling spirits of the Tammany Hall party. Tammany Hall claims to be the regular Democratic organization of the city and county of New York, though that claim has often been contested. By means of a thoroughly organized system of Tammany clubs and assembly district associations it has usually held a paramount place in city politics.

**Taliaferro, James Piper;** b. Orange, Va., Sept. 30, 1847; educated in Virginia, leaving school to volunteer in the Confederate army, in which he served until the war ended; elected April 19, 1899, by the Florida legislature to the United States Senate, and reelected in 1905.

**Taney, Roger Brooke (1777-1864);** jurist and cabinet officer; b. Calvert Co., Md.; began the practice of law 1799 and became a leading Federalist; attorney-general of Maryland 1827; changed his politics and supported Andrew Jackson, who made him attorney-general 1831-1833; as secretary of the treasury he removed the deposits from the United States Bank, which his predecessor, William J. Duane, had refused to do; when Congress assembled it refused to sanction his appointment; his nomination as associate justice of the Supreme Court was not confirmed by the Senate; on the death of John Marshall, in 1836, Taney was appointed chief justice of the Supreme Court of the United States, where, in 1857, he gave his famous decision in the Dred Scott case; he was for long the main bulwark of slavery throughout the Union.

**Taos (N. Mex.), Battle of.**—Feb. 3, 1847, Col. Price, with about 400 Americans, arrived at the town of Don Fernando de Taos, on the top of the Taos Mountain, which had been the scene of the murder of Governor Bent and his party. The Mexicans, numbering 600, had taken refuge in a stone church and two other large buildings. They resisted the American assaults during Feb. 4 and on the morning of the 5th surrendered. The American loss was 54

**Taos (N. Mex.), Battle of—***Continued.*  
killed and wounded; that of the Mexicans 152 killed and many wounded.

**Tappan, Samuel F.,** treaty with Indians concluded by, 3834.

**Tariff.**—The word "tariff" is generally applied to the customs duties levied by Congress on merchandise imported. Tradition identifies the word with the town of Tarifa, Spain. Here, during the Moorish occupancy of the country about Gibraltar, all vessels passing through the strait were compelled to put in and pay such duties as were demanded by the chiefs in possession. Among the Greeks and Romans a duty similar to the tariff of the present day was known, and in England, as early as 980, during the reign of Ethelred, duties on ships and goods were levied, to be paid at Billingsgate. Charles II. established a regular schedule of rates in 1663. After 1846 England gradually abolished her tariff duties, beginning with the repeal of the corn laws and continuing until 1891-92, when revenue duties alone were collected, and those upon less than twenty articles.

In the United States the First Congress passed a tariff law levying on an average less than 8 per cent *ad valorem* on imports. This was approved by Washington July 4, 1789. Madison opened the discussion of this measure in Congress. South Carolina and Georgia favored a rate of 5 per cent, Pennsylvania one of 12 or more, while New England and Virginia succeeded in getting the rate raised a little above what the far South asked for, but placed it lower than the chief manufacturing States desired. The tariff of 1816 imposed duties of about 25 per cent on certain leading manufactures, under protest from the leading agricultural States of the South. In 1824 a new tariff act was passed, increasing among the changes made, duties on metals and agricultural products. Jan. 31, 1828, the "tariff of abominations," as it was named by its enemies, was introduced in the House. It embodied in part the recommendations of a national convention of manufacturers held at Harrisburg, Pa., but satisfied neither the friends nor the opponents of protection. This bill proposed a 41 per cent rate and was favored by Daniel Webster, who reversed his position of 1824. South Carolina protested against the proposed measure as unconstitutional

and unjust and oppressive. North Carolina also protested, and Alabama and Georgia denied the power of Congress to lay duties for protection. July 14, 1832; President Jackson approved a bill reducing the tax on iron, increasing that on woollens, making some raw wools free, and leaving cotton unchanged. This bill retained the protective feature of the law of 1828, but reduced the taxes somewhat. South Carolina passed an ordinance nullifying this act (see Nullification) but her ordinance was rescinded after the approval of the compromise tariff of 1833. This measure, introduced by Clay and supported by Calhoun, provided for a gradual reduction of duties to a uniform rate, to be reached in 1842. It secured a revenue tariff by successive reductions. In 1842, the Whigs being in a majority, Congress enacted a protective tariff, which President Tyler vetoed (2033).

July 30, 1846, a tariff law was enacted which subordinated the principle of protection to that of revenue. It passed the House by a vote of 114 to 95 and the Senate by the casting vote of Vice-President Dallas. The average rate of duty was fixed at about 25 per cent. This was lowered to about 20 per cent by an act of 1857. In 1861 the principle of protection was reasserted in the Morrill Act, which increased the rates of 1857 about one-third. During the Civil War the tariff rates were repeatedly raised to meet the expenses of Government and stimulate manufacture. These rates were continued long after the cessation of hostilities. In 1882 a tariff commission was appointed to visit different sections of the country in the interest of tariff revision. The commission recommended a reduction of 20 per cent in rates.

President Cleveland, in his message of Dec. 8, 1885 (4926), recommended a reduction of the tariff, and his message of Dec. 6, 1887 (5165), was devoted exclusively to this topic. From this time on, party lines began to be drawn on the tariff question, most of the Republicans favoring protection and the majority of the Democrats advocating a revision in the direction of lower duties. The Mills bill, framed largely in accordance with President Cleveland's views, passed the House, but failed in the Senate, where a bill embodying the ideas of the protectionists on tariff revision was substituted for it by the Republi-

**Tariff—Continued.**

can majority. In the Fifty-first Congress, the Republicans being in control, passed the McKinley tariff act of 1890 raising the duties to an average of 48 per cent. By the elections of 1890 and 1892 the Democrats came into power, and in the Fifty-third Congress the House passed the Wilson bill providing for substantial reductions, especially on raw materials. Amendments were added in the Senate which essentially changed its character and the bill became law in 1894 without the President's signature. It provided for an income tax which was, however, declared unconstitutional by the Supreme Court.

The elections of 1894 and 1896 returned the Republicans to power, and in 1897 the Dingley law was passed, which imposed the highest rates of duty ever known in our history. It has been revised so far as concerned the Philippines in 1905, when a lower tariff came into force, and again in 1906, when the islands were given practically free trade with this country; of the few articles excepted, the most important were sugar, coffee, and tobacco.

The revision of the Dingley Tariff in 1909 is discussed by President Taft in his address at Winona (7773), which was evoked by the furious storm of criticism to which the tariff and its sponsors were subjected. This discontent produced a rupture in the Republican ranks, "insurgent" Congressmen lining up against "standpatters." The Federal patronage was employed to awaken insurgents to a sense of duty to the party, but without avail. Public sentiment on the question was expressed in the Democratic victory of 1910, the insurgent Republicans being mostly reelected.

In the 1910 tariff, provision was made for the application of a maximum or minimum schedule of rates to the imports of a foreign country in accordance as it discriminates against or in favor of American goods; for a corporation tax of one per cent of net earnings; for a revised tariff establishing free trade with the Philippines; for a Customs Court of Appeals consisting of five judges and six attorneys to prosecute customs cases before the Court; and for a tariff board.

The tariff board was conceded to be an advance, but its best friends were the foremost in terming it ineffectual. The kind of tariff board

desired by President Taft is outlined in a bill introduced, Jan. 5, 1911, by Representative Longworth of Ohio, which provides for a permanent commission of five members to be appointed by the President and confirmed by the Senate, who, by the use of \$250,000, shall, in sittings here or abroad, investigate the cost of production of tariff-taxed goods, particularly as regards labor, for which purpose they are to be vested with the power of issuing subpoenas, administering oaths, and taking testimony (Congress to act on cases of non-compliance with subpoenas), and, on demand expressed in a joint resolution, they shall report to Congress, or, on his demand, shall report to the President, 7999. (See also Foreign Import Duties; Import Duties.)

**Tariff:**

Bill to reduce duty on wool vetoed by Taft, 8125.

Board of three members appointed to investigate maximum and minimum clauses, 8056.

Engines and machine tools, reduction of rates on, vetoed, 8131.

Finished articles should not be put on free list when raw materials are dutiable, 8131.

Iron and steel, manufactures of, rates compared, 8130.

Iron and steel, manufactures of (Schedule C), vetoed, 8129.

Low rate on woollen goods would destroy fine goods industry, 8127.

Low rate on tops and yarn would disrupt industry, 8127.

Machine tools should be defined before being put on free list, 8131.

Minimum ad valorem rate should be 35 per cent, 8127.

Permanent board appointed, 8057.

Proposed reduction on wool would injure trade, 8128.

Rate on wool must offset difference in cost of production here and abroad, 8126.

Reduction of on wool in accordance with report of Tariff Board would give sufficient protection to industry, 8128.

Reduction of, should be based on non-partisan study of facts, 8131.

Schedule K (wool), 8057.

Wool, reduction of duty on, recommended, 8057.

Wool (Schedule K), 8057.

**Tariff Board.**—Section 2 of the Tariff act of 1909 provides that "from and after March 31, 1910, except as otherwise specially provided for in this section, there shall be levied, collected and paid on all articles when

**Tariff Board—Continued.**

imported from any foreign country into the United States or into any of its possessions (except the Philippine Islands, Guam and Tutuila) the rates of duty prescribed by the schedules and paragraphs of the dutiable list of Section 1 of this act, and in addition thereto 25 per centum ad valorem, which rates shall constitute the maximum tariff of the United States. \* \* \* To secure information to assist the President in the discharge of the duties imposed upon him by this section, and the officers of the Government in the administration of the customs laws, the President is hereby authorized to employ such persons as may be required."

Under this authorization President Taft on Sept. 15, 1909, appointed the following persons to be members of the Tariff Board and to perform the duties required by the act:

Henry Crosby Emery, Professor of Political Economy at Yale University, Chairman; James Burton Reynolds, Assistant Secretary of the Treasury; Alvin H. Sanders, Editor of the *Breeders' Gazette*, of Chicago.

On March 4, 1911, the President appointed two additional members of the Tariff Board, as follows:

William M. Howard, former Member of Congress from Georgia; Thomas W. Page, Professor of Economics in the University of Virginia.

The Board met, with the first three members above named, for organization in the office of the Secretary of the Treasury at Washington on Sept. 24, 1909. It has since been actively engaged in the work assigned to it. The main investigation of the industrial effects of the tariff has been divided into three main parts, requiring three sets of investigators of different types. The first part is the collection of facts regarding each dutiable article, showing the character and localization of its production at home and abroad, statistics of output, imports and exports, rates of duty reduced to ad valorem terms, and the like. The second part is the collection of data regarding costs of production at the mill. The third consists of obtaining information from the best experts available regarding home and foreign prices, local variations in each industry, and the general conditions of competition at home and abroad.

The force engaged in the investigations besides the members of the board, the executive secretary, the

statistician, and the purely administrative employes, consists of an office staff of trained investigators and necessary clerical force, and a staff of men in the field getting actual cost figures and wage and efficiency data from the books of individual producers.

**Tax, Income.** (See Income Tax.)

**Tax, Inheritance.** (See Inheritance Tax.)

**Tax, Poll.** (See Poll Tax.)

**Taxation.**—The exaction of money from the individual for the use of the State is a function of all forms of government. The generally accepted theory of taxation in America is that money to be used in the service of all the citizens of the State is justly raised by taxation; that a tax which does not bear equally upon all or which, bearing equally upon all, is used only for the benefit of a few is unjust. The direction taken by all efforts at tax reform is toward self-annexation—i. e., the community as a whole to decide what is required of each individual for the public expense. Out of this principle grew the doctrine that no tax can be levied save by the representatives of the people who must pay it. It was in defense of this principle that the American colonists objected to the stamp tax imposed by Parliament and raised the claim that "taxation without representation is tyranny." The tax levied by a conquering nation upon a vanquished foe is tribute. Direct taxation is authorized by the Constitution in proportion to the population.

The first direct tax was for \$2,000,000, and was levied *pro rata* upon the

**Taxation—Continued.**

sixteen States existing in 1798. Others have since been levied, notably that of 1861, when \$20,000,000 was levied in this manner for prosecuting the war. Three-fourths of this amount was by act of March 2, 1891, refunded to the States. Congress is forbidden by the Constitution to lay any tax or duty on exports (20). States are forbidden to lay duties on either exports or imports, but may resort to direct taxation. Until the Civil War the Federal Government relied chiefly upon duties upon imports for its revenue, but since that time an internal-revenue tax has been collected. State taxation is direct and is assessed upon real and personal property, upon privileges, and upon individuals or polls. Before 1800 most of the States passed laws to regulate taxation. All except Delaware levied a tax on land, and nine of the original thirteen States collected a poll tax. The systems of county, State, and municipal taxation are numerous and constantly changing. According to the contention of those who favor the single-tax theory, taxation should be solely upon land values, exclusive of improvements.

Well-digested system of, recommended, 514.

**Taxes, Direct.**—Section 8 of Article I. of the Constitution authorizes Congress to lay and collect taxes. During the history of the Government it has not been deemed necessary to lay direct taxes but five times—in 1798, 1813, 1815, 1816, and 1862. The

last time was during the Civil War, when a direct tax of \$20,000,000 was levied, to be proportionately assessed against all lots of ground with their improvements and dwelling houses. The operation of the act was suspended July 1, 1872, and by an act of March 2, 1891, \$15,000,000 of this amount was refunded to the States. The earlier direct taxes were levied on houses, lands, and slaves. (See also Income Tax.)

**Taylor, David,** claim of, referred to, 2678.

**Taylor, Edward Livingston, Jr.;** b. Aug. 10, 1869; admitted to practice law in 1891, and elected prosecuting attorney of Franklin County in 1899 and 1902; elected to the 59th, 60th, 61st and 62d Congresses from Ohio.

**Taylor, Edward Thomas,** b. Metamora, Woodford Co., Ill., June 19, 1858; moved to Leadville, Colo., and graduated from the law department of the University of Michigan in 1884, receiving the degree of LL. B.; 1896 was elected State senator, and served twelve years in that capacity, and has the reputation of having been the author of more important laws and constitutional amendments than any person that ever sat in any legislature of any State in the Union during the entire history of this Government—over forty general statutes and five separate constitutional amendments that were adopted by a general vote of the people; elected to the 61st and 62d Congresses from Colorado at large.

**Taylor, George Washington,** b. Jan. 16, 1849, in Montgomery Co., Ala.; was admitted to practice law at Mobile, Ala., November, 1871; entered the army as a Confederate soldier at the age of 15 years, in November, 1864, being then a student at the academy in Columbia, S. C., and served till the end of the war; elected to general assembly of Alabama in 1878, and served one term; elected to the 55th, 56th, 57th, 58th, 59th, 60th, 61st, and 62d Congresses from Alabama.

**Taylor, Robert Love,** lawyer; b. July 31, 1850, at Happy Valley, Carter Co., Tenn., at the place on the Watauga

**Taylor, Robert Love—Continued.**

River where the first fort was established by John Sevier; elected to the 46th Congress in 1878; elected governor of Tennessee 1886, and reelected 1888; elected governor for a third term in 1896; represented the district in Congress represented before him by his father, Nathaniel G. Taylor, and after him by his brother, Alfred A. Taylor, the latter of whom he defeated for governor in 1886; nominated for United States Senate in the Democratic primary election, May, 1906, and elected in January, 1907.

**Taylor, Zachary** (twelfth President United States):

Taylor was elected by the Whig party, Nov. 7, 1848. He was nominated at the Whig National Convention at Philadelphia, June 7 and 8, 1848. Clay was the next most popular candidate for nomination. The platform endorsed General Taylor's candidacy, proclaimed Washington's administration as the model, supported the Mexican War, and solicited the support of the Whig party.

The Free-Soil Convention or Barnburners, and the Abolitionists supported Van Buren. At the Free-Soil Convention at Buffalo, Aug. 9 and 10, Van Buren was formally nominated on a platform maintaining the rights of free labor against the slave power and the securing of a free soil for a free people, proposing no Federal interference with slavery, citing the Jefferson proviso of 1800 against the extension of slavery, advocating the prohibition of slavery in all new territory, demanding freedom in Oregon, cheap postage, and government retrenchment, supporting internal improvements, recommending free grants of land to settlers, and advising rapid payment of the public debt. The Democratic National Convention at Baltimore, May 22-26, 1848, nominated Lewis Cass on a platform which included the platforms of 1840 and 1844, endorsed and justified the Mexican War, expressed sympathy with the republicans of France, denounced monopolies and exclusive legislation, and heartily endorsed the policies of Polk.

The popular vote cast by thirty States gave Taylor, 1,360,601; Cass, 1,220,544; and Van Buren, 291,263. The electoral vote, counted on Feb. 14, 1849, gave Taylor 163 and Cass 127.

**Party Affiliation.**—Taylor's continuous service in the army of the

United States left him entirely free from party or sectional attachments. When his name was brought forward for nomination at the Whig convention, several resolutions were offered seeking to bind Taylor to the support of such Whig policies as the non-extension of slave territory, no more foreign acquisition by conquest, the protection of American industries, and opposition to the usurpation of authority by the Executive. But these resolutions were ruled out of order. Upon all of these questions, and upon Whig policies generally, Taylor had never distinctly declared himself. He was the only man available who could heal the breach in the party and unite all the discordant elements with possible hope of success. Although the Whigs had opposed the Mexican War with vehemence, they nevertheless chose as their candidate a man who had played the most important part in the prosecution of the war.

**Political Complexion of Congress.**—

In the Thirty-first Congress (1849-1851), the Senate of 62 members was composed of 35 Democrats, 25 Whigs, and 2 Free-Soil; and the House of 227 members was made up of 116 Democrats and 111 Whigs. In the Thirty-second Congress (1851-1853), the Senate of 62 members was composed of 36 Democrats, 23 Whigs, and 3 Free-Soil; and the House of 233 members was made up of 140 Democrats, 88 Whigs, and 5 Free-Soil.

**Foreign Policy.**—The ratification of the Clayton-Bulwer Treaty (see Great Britain, Treaties with) took place during the administration of President Taylor. The question of the Panama railway, upon which it bore, was referred to in President Taylor's First Annual Message (page 2555) and again in the message (page 2580), presenting the Clayton-Bulwer Treaty to the Senate for ratification. In expressing his reasons for the conclusion of this treaty, he says: "At the time negotiations were opened with Nicaragua for the construction of a canal through her territory I found Great Britain in possession of nearly half of Central America, as the ally and protector of the Mosquito king."

**Finances.**—The public debt on July 1, 1849, amounted to \$63,061,858.69. In speaking of the increase, President Taylor said (page 2555): "The extraordinary expenses of the Mexican War and the purchase of California and New Mexico exceed in

**Taylor, Zachary—Continued.**

amount this deficit, together with the loans heretofore made for these objects. I therefore recommend that authority be given to borrow whatever sum may be necessary to cover that deficit. I recommend the observance of strict economy in the appropriation and expenditure of public money." He leaves the matter of the subtreasury system to the wisdom of Congress, and adds: "If continued, important modifications of it appear to be indispensable."

**Tariff.**—In his First Annual Message (page 2556), President Taylor advocated a revision of the tariff so as to increase the revenue. He said: "I do not doubt the right or duty of Congress to encourage home industry, which is the great source of national as well as individual wealth and prosperity. I look to the wisdom and patriotism of Congress for the adoption of a system which may place home labor at last on a sure and permanent footing and by due encouragement of manufactures give a new and increased stimulus to agriculture and promote the development of our vast resources and the extension of our commerce." He strongly recommends the placing of specific duties instead of *ad valorem*, and suggested the fixing of duties high enough "to afford substantial and sufficient encouragement to our own industry and at the same time so adjusted as to insure stability."

Neutrality laws observed by, 2548.

Portrait of, 2541.

Proclamations of—

Exequatur issued consul of Spain, revoked, 2588.

Military expedition against provinces of Mexico, 2545.

Ports of delivery constituted, 2588.

Remains of, removal of, referred to, 2611.

State of the Union, discussed by, 2547.

Subtreasury system, discussed by, 2556.

Tariff discussed by, 2556.

Veto power of President, discussed by, 2561.

**Tea:**

Duties on—

Recommended by President—

Grant, 4303.

Hayes, 4422, 4511.

Polk, 3047, 3086.

Repeal of, recommended, 4061.

Growth and culture of, recommended, 4578.

**Tehuantepec, Isthmus of, transit way across:**

Discussed by President—

Buchanan, 3117.

Cleveland, 4912, 4956.

Fillmore, 2617, 2656, 2702.

Pierce, 2766, 2901.

Polk, 2388.

Taylor, 2554, 2580.

Measures for protection of American citizens and property in, recommended, 3048, 3069, 3100.

Referred to, 2693, 3018.

Treaty regarding, with—

Great Britain, 2580, 2617, 2903, 2943, 3117.

Mexico, 2642, 2656.

Ratification of, opposed by President Pierce, 2766.

Rejection of, by Mexico, discussed, 2702.

**Telegraph, The, outrages committed on,** 1695.

**Telegraph Lines** (see also Atlantic Telegraph; International Ocean Telegraph):

Contract for use of, by Post-Office Department, recommended, 5562, 5634.

Government control of, discussed by President—

Arthur, 4728, 4769.

Grant, 4104, 4152, 4204.

Harrison, Benj., 5562, 5634.

Inclusion in postal system opposed, 8112.

Military possession of, taken by United States, 3309.

Operation of, discussed, 4297.

Pacific telegraph, referred to, 3329, 3382, 3445.

Proposed overland, between America and Europe, discussed, 3445.

Union of Postal system and, discussed. (See Government control of, *ante*.)

**Ten-Hour System.** (See Hours of Labor.)

**Tennessee.**—One of the United States. Nicknames: "The Volunteer State"; "The Big Bear State"; motto: "Agriculture; Commerce." It lies between lat. 35° and 36° 35' north and long. 81° 37' and 90° 15' west. Tennessee is bounded on the north by Kentucky and Virginia, on the east and southeast by North Carolina (separated by the Great Smoky and Bald ranges of the Alleghanies), on the south by Georgia, Alabama, and Mississippi, and on the west by Arkansas and Missouri (separated by the Mississippi River). The area is 42,050 sq. miles.

The eastern portion of the State is mountainous, while the extreme western part, bordering on the Mississippi River, consists of a flat alluvial plain, where vegetation grows with almost tropical luxuriance. Between these two extremes are the valley of the Tennessee in its southern course, an important agricultural region, and the Cumberland Plateau, a table-land with an elevation of 2,000 feet. Extending from this plateau to the Tennessee River in its northern course through the State lies the great central basin, sometimes called the Garden of the State. West of the Tennessee Valley rises another fertile plateau before the descent to the lowlands of the Mississippi. The leading productions are corn, wheat, cotton, and live stock. Tennessee produces some of the finest tobacco grown in the United States. Manufactures of cotton goods and iron have grown up since the Civil War. The capital, Nashville, is one of the

greatest educational centers in the South.

The first permanent settlement was made in 1769 at Wautauga by immigrants from North Carolina. When North Carolina proposed to cede this territory to the General Government these settlers objected and organized a State under the name of Franklin (q. v.). This government was overthrown and a Territory was organized in 1790. The State was admitted to the Union June 1, 1796. In January, 1861, a proposal to secede from the Union was defeated by popular vote, but carried in the election of June 8 of the same year. The State was the scene of some of the fiercest battles of the Civil War, including those of Island No. 10, Nashville, Lookout Mountain, Murfreesboro, Fort Donelson, Shiloh, Missionary Ridge, etc. It was readmitted into the Union in 1866.

Statistics of agriculture reported to the Federal Census Bureau under date of April 15, 1910, place the number of farms in the State at 246,012, comprising 20,041,657 acres, valued, with stock and improvements, at \$612,520,836. The average value of land per acre was \$18.53 against \$9.93 in 1900. The value of domestic animals, poultry, etc., was \$110,706,078, including 996,529 cattle, valued at \$20,690,718; 349,709 horses, \$39,320,044; 275,855 mules, \$35,100,810; 1,387,938 swine, \$7,329,622; 795,033 sheep, \$3,009,196; poultry, \$3,757,337. The yield and value of field crops in 1911 was:

Corn, 3,400,000 acres, 91,120,000 bushels, \$55,583,000; wheat, 720,000 acres, 8,280,000 bushels, \$7,949,000; oats, 315,000 acres, 6,142,000 bushels, \$3,071,000; rye, 19,000 acres, 226,000 bushels, \$224,000; potatoes, 38,000 acres, 1,558,000 bushels, \$1,683,000; hay, 400,000 acres, 400,000 tons, \$6,680,000; tobacco, 77,000 acres, 62,370,000 pounds, \$5,301,450, and cotton, 420,000 bales. The State is a large producer of copper, the output of 1910 being 16,691,777 pounds. The coal output was 7,121,380 short tons.

The coal fields of the State have an extent of 4,400 sq. miles.

The industrial census of 1905 showed 3,175 establishments, with a capital of \$102,439,481, in which 65,482 persons converted \$79,351,746 worth of raw material into finished goods worth \$137,960,476. The earnings of industrial employees aggre-

**Tennessee—Continued.**

gated \$27,886,057. The population in 1910 was 2,184,789.

**Tennessee** (see also *Confederate States*; *Memphis*):

Amendment to Federal Convention, ratification of, referred to, 249.

Commanding officers in, instructions to, as to conduct of war, 3476.

East Tennessee Relief Association. Address regarding relief for people in eastern section of, discussed, 3405.

Home of Andrew Jackson tendered Government by, 2654.

Insurrection in, declared suppressed by proclamation, 3515.

Joint resolution restoring, to Union, approved and discussed, 3593.

Major-General Jackson conducts operations against Indian allies of Great Britain, 533.

Murders committed by Indians in, 6269.

Ratification of amendment to Federal Constitution by, referred to, 240.

Relief for people in eastern section of, and address of East Tennessee Relief Association regarding, discussed, 3405.

**Volunteers of—**

Expenses incurred by, recommendation that Government pay the, 1454, 1474.

Number of, in Indian wars, greater than her proportion in general apportionment, 1453.

Operation of, under Maj.-Gen. Jackson against Indian allies of Great Britain, 533.

Recommendation that Government pay expenses incurred by, 1454, 1474.

**Tennessee Bond Cases.**—A series of 17 cases decided by the United States Supreme Court in 1885. In 1852 the Tennessee legislature passed an act making certain railroad bonds a statutory lien upon the property on which they were issued. Holders of State bonds afterwards brought suit to establish their lien upon the property in question. The Supreme Court held that the lien was created for the benefit of the State and not of the holders of State bonds issued under that act.

**Tennessee Centennial.**—An exposition held in Nashville, Tenn., from May 1 to Oct. 30, 1897, to celebrate the one hundredth anniversary of the admission of the State into the Union. The site covered about 200 acres and a notable feature was a lawn of blue-grass, a characteristic of the region. There were more than one hundred

buildings, containing exhibits of art, education, and progress in the various industries, as well as forms of amusement. The total attendance was 1,786,714. The total receipts were \$1,101,285, and the disbursements, \$1,101,246.

**Tennessee River:**

Canal from the Altamaha to, referred to, 1027.

Survey of, referred to, 1128.

**Tenure-of-Office Act.**—Under the terms of the Constitution the power of making appointments is vested in the President, to be exercised with the advice and consent of the Senate. In the course of his disputes with Congress, President Johnson was charged with a corrupt use of the power of appointment and removal, and on the first day of the second session of the Thirty-ninth Congress a bill was introduced "to regulate the tenure of certain civil offices." It was passed over the President's veto March 2, 1867, and was repealed in 1887. This act provided that, with certain exceptions, every officer appointed with the concurrence of the Senate should retain his office until a successor should be in like manner appointed. Johnson was impeached for violating the act in 1868 with regard to Secretary-of-War Stanton.

**Tenure-of-Office Act:**

Discussed by President—

Cleveland, 4965.

Johnson, 3767.

Interpretation of, referred to, 3721.

Repeal of, recommended, 3871, 3992, 4557.

Vetoed, 3690.

**Tenure of Office in Civil Service, 8135.**

**Terceira**, claims of United States against Portugal arising out of blockade of, 1098, 1113, 1243.

**Terrill, William R.**, brigadier-general in Army, nomination of, and reasons therefor, 3362.

**Territorial Expansion:**

Annexation discussed. (See *Alaska*; *California*; *Cuba*; *Florida*; *Gadsden Purchase*; *Hawaiian Islands*; *Louisiana Purchase*; *New Mexico*; *Philippine Islands*; *Puerto Rico*; *St. John Island*; *St. Thomas Island*; *Santo Domingo*; *Texas*; *Yucatan*.)

**Territories.**—At the close of the Revolutionary War several of the States had claims to extensive tracts of land beyond their western borders. The claim was set up that these territories belonged to the United States, as having been won by all in common. Between 1781 and 1802 all these outlying tracts passed by acts of cession under the jurisdiction of the United States. Subsequent additions have been made by purchase or treaty. (See Alaska, California, Florida, Gadsden Purchase, Louisiana Purchase, Oregon, Texas, etc.) The Continental Congress resolved that the western territory to be ceded to the United States "shall be settled and formed into distinct republican States, which shall become members of the Federal Union and have the same rights of sovereignty, freedom, and independence as the other States." The Northwest Territory was organized in 1787, the Southwest in 1790. Arizona, Hawaii, and New Mexico are the only remaining organized Territories; Alaska is not organized as a Territory. The Federal District of Columbia is governed directly by Congress, through a commission. An organized Territory has a governor, appointed by the President, by and with the advice and consent of the Senate, for four years, and a legislature composed of a coun-

cil and a house of representatives chosen every two years by the people. A delegate to Congress, who may speak but not vote, is elected by the people for two years. Territorial legislation is subject to Congressional control. Territorial courts are provided for, the judges of which are appointed by the President for four years and confirmed by the Senate, and over which the United States Supreme Court has appellate jurisdiction. Alaska has a form of government similar to that of the organized Territories, but has no legislature. (See also District of Columbia.)

**Territories** (see also the several Territories):

**Texas.**—The largest of the United States; nickname, "The Lone Star State." It lies between lat. 25° 51' and 36° 30' north and long. 93° 27' and 106° 40' west. It is bounded on the north by Oklahoma, on the northeast by Arkansas, on the east by Arkansas and Louisiana, on the south and southeast by the Gulf of Mexico, on the south and southwest by Mexico, and on the west by New Mexico. It has an area of 265,780 sq. miles. It consists of a low coast region in the southeast, west of this a prairie country, a hilly region, elevated plains to the north and west, and a mountainous country west of the Pecos River. It is an important agricultural State, the leading products being cotton, corn, live stock, sugar and rice. The manufacture of lumber and timber products, cotton seed oil, and grist and flour mill products are the chief industries. The discovery and development of the oil fields has added to the wealth and population of the State.

La Salle made a landing at Matagorda Bay and built a fort in 1685. By the treaty of 1819-1821 with Spain the United States surrendered her claim that Texas was included in the Louisiana Purchase. Meanwhile Mexico had declared her independence of Spain, and Texas with Coahuila formed a State of the Mexican Republic. Texas seceded from Mexico, proclaiming her independence March 2, 1836. After the defeat of the Mexican forces under Santa Anna, by General Houston in the battle of San Jacinto, April 21, 1836, the Republic of Texas was recognized by England, France, Belgium, and the United States. Annexation was accomplished by a joint resolution of Congress Dec. 29, 1845.

The dispute over the western boundary led to the Mexican War. On March 25, 1850, Texas ceded to the United States all claims to territory outside her present limits, receiving therefor \$10,000,000. An ordinance of secession was passed Feb. 1, 1861. The State was readmitted to the Union March 30, 1870.

In the eastern part of the State are valuable yellow-pine forests, and there are oyster and other fisheries on the coast.

Statistics of agriculture reported to the Federal Census Bureau under date of April 15, 1910, place the num-

ber of farms in the State at 417,770, comprising 112,435,067 acres, valued, with stock and improvements, at \$2,217,645,164. The average value of farm land was \$14.53 per acre against \$4.70 in 1900. The value of domestic animals, poultry, etc., was \$318,646,509, including 6,934,586 cattle, valued at \$132,985,879; 1,170,068 horses, \$84,024,635; 675,558 mules, \$73,979,145; 2,336,363 swine, \$11,639,366; 1,808,709 sheep, \$6,301,364; poultry, \$4,806,642. The yield and value of field crops for 1911 was: Corn, 7,300,000 acres, 69,350,000 bushels, \$55,480,000; wheat, 700,000 acres, 6,580,000 bushels, \$6,580,000; oats, 737,000 acres, 18,499,000 bushels, \$9,989,000; rye, 2,000 acres, 20,000 bushels, \$21,000; rice, 238,300 acres, 8,174,000 bushels, \$6,539,000; potatoes, 50,000 acres, 2,850,000 bushels, \$3,591,000; hay, 606,000 acres, 606,000 tons, \$7,211,000; tobacco, 300 acres, 195,000 pounds, \$39,000, and cotton, 4,280,000 bales. Texas ranks first among the States in the production of cotton. Petroleum to the extent of about 9,000,000 barrels was produced in 1911, showing a gradual decrease in the last few years. The coal mined was 1,892,176 short tons, valued at \$3,160,965.

In 1905 there were 3,158 manufacturing establishments, with a capital of \$115,664,871, employing 54,759 persons, who converted \$91,603,630 worth of raw material into finished product valued at \$150,528,389. The chief products were lumber and timber, cotton seed oil and cake, refined petroleum, flour and feed, dressed meats, machinery, cars, and iron ore. The population in 1910 was 3,896,542.

- Texas Fever** among cattle, discussed, 5887, 5957.
- Texas vs. White et al.**—A case before the Supreme Court of the United States in which the acts of secession of the Southern States were declared void and the rights of a State of the Union held to be unimpaired by the acts of a revolutionary government within the State.
- In 1851 the United States issued to the State of Texas 5,000 coupon bonds for \$1,000 each, payable to the State of Texas or bearer, with interest at 5 per cent semiannually, in settlement of certain boundary claims. Some of these bonds were seized by the officers of the State government during the Civil War and sold to White & Chiles and others of New York. The bonds were payable only when indorsed by the governor. The State convention in 1866 passed an ordinance looking to the recovery of these bonds. An act passed in October of that year authorized the governor to proceed in his discretion to carry out this intention. The agent

appointed by the executive procured the filing of a bill the same year asking for an injunction and the recovery of the bonds in question. The case came before the Supreme Court of the United States at the December term, 1868, on the original bill. The injunction was granted on the general ground that the action of a revolutionary State government did not affect the right of Texas as a State of the Union having a government acknowledging her obligations to the Federal Constitution. The court pronounced the act of secession void, Chief Justice Chase rendering the opinion. Justice Grier dissented on all the points raised and decided. Justices Swayne and Miller concurred in dissenting on the capacity of the State of Texas, "in her present condition," to waive on an original suit. On the merits of the case they united with the majority.

Further hearing was accorded to certain parties, and both complainant and defendants were granted liberty in the decree to apply for further directions in its execution. In one place in the court's opinion the Chief Justice said it was a historical fact that in 1862 the government of Texas in control was its only actual government, its acts in almost all respects valid, though unlawful and revolutionary as to the United States. December, 1869, the additional part of this celebrated case, known in the reports as *Texas vs. Hardenberg*, arose, the Chief Justice deciding for the court that upon the whole case the decree must be for the complainant as to be bonds claimed by *Hardenberg*.

Further decisions of the Supreme Court on additional portions of the case are as follows, briefly: December, 1870, *In re Paschal*, Justice Bradley delivering the court's judgment, it was ordered that the motion to compel George W. Paschal to pay to the clerk of the court the money received by him be denied. An order was granted to discharge him as solicitor and counsel for the complainant in the second case. October, 1874, *In re Chiles*, Justice Miller rendering the court's opinion, Justices Field and Hunt dissenting, it was ordered that Chiles pay a fine of \$250 and the costs of the proceeding and stand committed to the marshal's custody until the same be paid. This was for contempt in disobeying the court's decree.

**Thacher, John M.**, report of, on International Patent Congress referred to, 4215.

**Thames (Canada), Battle of.**—After Perry's victory over the British fleet on Lake Erie, Gen. Harrison completed his preparations for the invasion of Canada. Sept. 21, 1813, the embarkation of the army on Perry's transports began. On the afternoon of the 27th the Army of the Northwest, consisting of 5,000 men, under the immediate command of Gen. Harrison and Gen. Shelby, governor of Kentucky, landed at Amherstburg (Malden), but found that Proctor's army, about 800 regulars and 1,200 Indians, had fled inland. Harrison started in hot pursuit. In response to the repeated demands of Tecumseh the British made a stand about 8 miles north of the river Thames. Here they were attacked on Oct. 5 by about 3,000 Americans. A short but decisive battle took place, in which the British and Indians were completely routed and Chief Tecumseh was killed. The precise number of casualties in this battle is not known. The American loss was probably about 15 killed and twice that number wounded. The British lost about 18 killed, 26 wounded, and 600 taken prisoners, of whom 25 were officers. Proctor made his escape. Thirty-three dead Indians were found upon the field after the battle.

Trial and sentence of, referred to, 2677.

**Three-Cent Piece.**—A small silver coin authorized by Congress in 1851. It was coined from 1851 to 1873, inclusive, with the exception of the year 1857. Its weight was originally 12.375 grains, but in 1853 this was reduced to 11.52 grains. The 3-cent coin was legal tender to the amount of 30 cents. March 3, 1865, Congress authorized another 3-cent piece, to be made of an alloy of copper and nickel. With the exception of the year 1877, this piece was coined continuously till 1890. Its weight was 30 grains.

**Three-Dollar Piece.**—A gold coin of the United States, authorized in 1853. Its coinage was begun the next year and continued till 1890. The weight of the coin was 77.4 grains, and it was legal tender to an unlimited amount.

**Thurston, Lorin A.:**

Hawaiian minister to United States, recall of, discussed, 6065.

**Thurston, Lorin A.—Continued.**

Member of commission concluding treaty for annexation of Hawaiian Islands, 5783.

Representative of provisional government of Hawaiian Islands, referred to, 5906.

**Ticonderoga, The**, cruise of, around the world, 4693.

**Ticonderoga (N. Y.), Capture of.**—As soon as the events of Lexington and Concord became known it was decided by the Americans to seize the British fort at Ticonderoga, at the junction of Lakes George and Champlain. The place was garrisoned by 44 men under Capt. Delaplace. On the night of May 10, 1775, Col. Ethan Allen, with other officers and 270 Green Mountain boys, gained an entrance to the fort and Allen demanded its surrender, as traditionally reported, "in the name of the Great Jehovah and the Continental Congress." Finding resistance useless, Delaplace surrendered the garrison and 120 cannon, with muskets, ball, and powder. The surprise was so complete that not a man was lost.

**Tigre, Island of**, seizure and occupation of, by Great Britain referred to, 2570, 2601.

**Tilden, Samuel Jones** (1814-1886); lawyer and statesman; b. New Lebanon, N. Y.; after his admission to the bar, in 1841, he entered politics as a Democrat; elected to the assembly of New York, 1845; member of the constitutional convention, 1846; professed Free-Soiler views, 1848; defeated as the Democratic candidate for attorney-general, 1855; chairman of the Democratic State committee, 1866; opposed the "Tweed Ring"; Democratic governor of New York, 1875-76; foremost in the reform of canal management; ran as Democratic candidate for the presidency against Hayes, 1876, and received a plurality of 25,224 over Hayes, who was declared elected by the Electoral Commission.

**Tillinghast, Joseph L.**, correspondence regarding Dorr's Rebellion, 2158.

**Tillman, Benjamin Ryan**, b. Edgefield Co., S. C., Aug. 11, 1847; received an academic education; quit school in 1864, to join the Confederate army; began the agitation in 1886 for industrial and technical education, which culminated in the establishment of the Clemson Agricultural and Mechanical College, at Calhoun's old home, Fort Hill; the demand for educational reform broadened into a demand for other changes in State af-

fairs, and he was put forward by the farmers as a candidate for governor in 1890, and was elected; reelected in 1892; elected Senator in 1895 from South Carolina; reelected in 1901 and 1907.

**Tilson, John Quillin**, b. Clearbranch, Tenn., April 5, 1866; graduated from the Yale Law School in 1893; served in the Spanish-American War as lieutenant of volunteers; in 1904 he was elected a representative in the Connecticut general assembly; was reelected in 1906, and was speaker of the Connecticut house of representatives during the session of 1907; elected to the 61st and 62d Congresses from Connecticut.

**Timber-Culture Act.**—An act passed by Congress March 3, 1873, for the promotion of forestry. It granted to settlers 160 acres of treeless land on condition that they plant and cultivate a certain number of forest trees.

**Timber-Culture Act:**

Act respecting repeal of, returned, 6182.

Repeal of, recommended, 4770, 4837, 5107.

**Timber Lands.** (See Lands, Public.)

**Time, Regulation of.** (See International Meridian Conference.)

**Tippecanoe, Battle of** (Nov. 7, 1811).—In 1806, Tecumseh, chief of the Shawnee Indians, and his brother Elksawatana, called the Prophet, formed a plan for a great confederacy of all the western and southern Indians against the whites. Their doctrine was opposed to tribal rights, and they claimed that no part of the territory could be sold by any tribe to the whites without the consent of all the Indians.

William Henry Harrison, who had been on the staff of General Anthony Wayne at the battle of Maumee Rapids, and Secretary to General Arthur St. Clair, Governor of the Northwest Territory, was appointed in 1801, Governor of the Indiana Territory, from which was later formed the States of Indiana, Illinois, Michigan and Wisconsin. By the close of 1805 Harrison had extinguished Indian titles to 46,000 acres of land in the territory. Sept. 30, 1809, he concluded a treaty by which, for \$10,550, he secured nearly 3,000,000 acres along the Wabash and White Rivers. Tecumseh and the Prophet told the Indians they were cheated by the treaties, and appealed to their savage nature to turn against the whites. About 1808 Tecumseh

**Tippecanoe, Battle of—Continued.**

established his council fire on the banks of the Tippecanoe River in Tippecanoe County, Indiana, near the site of the present village of Battle Ground. Harrison was aware of the hostile feeling among the Indians over the treaties of Vincennes and Fort Wayne, which he had negotiated, and began preparations for defense. While building a stockade on the site of the present city of Terra Haute, Oct. 11, 1811, one of the white sentinels was killed by an Indian in ambush. This determined Harrison to march against the camp at Tippecanoe. On the night of Nov. 6, 1811, he encamped within a mile of the Indian village, and the Prophet had agreed to a conference on the following day. Harrison's party consisted of about 800, including 500 Indians and Kentucky militiamen. The hostile Indians were estimated by Harrison at 700. They were under the command of White Loon, Stone Eater, and Winnemac, Tecumseh being then on a mission to the Creeks and Cherokees to induce them to join his confederacy. Without waiting for the promised conference or even the dawn of day, the savages made a furious assault on Harrison's camp, which they maintained with ferocious bravery for two hours. It was after daylight when the last of the Indians were driven from the field, leaving forty of their number dead on the battleground. The loss to the whites was 37 killed and 151 wounded. The entire loss of the Indians was never ascertained. Next day Harrison advanced to the town, found it deserted, destroyed it and returned to Vincennes. This disaster broke the power of Tecumseh.

**Tipton, John**, treaty with Indians concluded by, 931, 964.

**Titles.** (See Lands, Public.)

**Tobacco.** (See Agricultural Products.)

**Tobago, Island of**, duties on vessels from, suspended by proclamation, 5598, 6502.

**Tod, David**, minister to Rio de Janeiro, mentioned, 2562.

**Toledo, Ohio**, proclamation granting privileges of other ports to, 2859.

**Toledo War.**—A bloodless dispute between Ohio and Michigan in 1835 over the territory which contained the city of Toledo. Just previous to Michigan's making application for admission to the Union, Ohio proposed to assume control of the dis-

puted tract. Michigan passed an ordinance making the occupation of Toledo by Ohio authorities a penal offense and appealed to the Federal Government to sustain the action. The militia were called out on both sides. When armed hostilities became imminent, Michigan was admitted as a State and awarded the Upper Peninsula in exchange for the Toledo tract in dispute.

**Toledo War**, controversy regarding boundary between Ohio and Michigan known as, 637, 1173, 1404, 1407.

**Tompkins, C. H.**, member of court to try assassins of President Lincoln, etc., 3534.

**Tompkins, Daniel D.** (1774-1825); statesman and sixth Vice-President of the United States; b. Scarsdale, N. Y.; began the practice of law, 1797; associate justice of the New York Supreme Court, 1804-1807; governor of New York, 1807-17; prorogued the legislature for 10 months to prevent the establishment of the Bank of North America in New York City; was an ardent supporter of the War of 1812; greatly furthered the abolition of slavery in his State, 1817; twice elected Vice-President of the United States, 1817-25.

**Tompkins, Daniel D.**, governor of New York, accounts of, referred to, 789, 802, 809.

**Tonawanda Indians.** (See Indian Tribes.)

**Tonga Islands:**

Treaty between Germany and Great Britain and, referred to, 5121.

Treaty with, 5121.

**Tonga, Treaties with.**—The treaty of amity, commerce, and navigation of 1886 provides privileges to the citizens of the one country in that of the other equal to those of the most favored nation. Trade privileges, except in the case of laborers, shall in no case be more restrictive than those granted to others. Shipping charges shall be no higher than those paid by the national ships in home ports.

Ships-of-war of either power shall have free access to any of the ports; and to facilitate repairs the government of Tonga agrees to sell to the United States land on the islands to provide a coaling or other station. Mail steamers from the United States crossing the Pacific Ocean shall have full harbor privileges on payment of one-third the customary shipping charges, so long as the vessels so partaking of this privilege shall carry the Tonga mails free of charge. Whaling and fishing vessels are

**Tonga, Treaties with—Continued.**

granted large privileges in the islands free of harbor charges so long as they do not trade or barter spirituous liquors, arms, or ammunition to the Tongans.

No United States citizen residing in Tonga shall be compelled to do military service, or to pay higher or other license fees than do the subjects of Tonga. Deserters are to be apprehended by the local authorities upon application from the consul or, when such is deficient, from the master of the vessel. Consular officers may be appointed in terms customary in consular conventions. Freedom of conscience is extended to all citizens of the United States in Tonga.

**Tonkawa Indians.** (See Indian Tribes.)**Tonnage Duties.** (See Vessels, Foreign.)**Tonto Forest Reserve,** proclaimed, 7323.

**Topeka Constitution.**—The enactment of the Kansas-Nebraska bill, which, it has been claimed, in effect repealed the Missouri Compromise forbidding slavery north of 36° 30', left the question of slavery to be decided by the people of the Territories before admission. The proslavery and antislavery advocates at once began a struggle for supremacy. Oct. 23, 1855, a constitutional convention representing the anti-slavery population of Kansas met at Topeka. This convention adopted the boundaries set by the Kansas-Nebraska bill, prohibited slavery after July, 1857, and conferred the right of suffrage on "white male citizens" and on "every civilized male Indian who has adopted the habits of the white man." This convention was dispersed by Federal troops. The bill to admit Kansas into the Union under the provisions of the Topeka constitution was introduced in the House of Representatives by Daniel Mace, of Indiana, April 7, 1856, and in the Senate by Lewis Cass, of Michigan, March 24. The bill passed the House, but failed in the Senate. (See also Lecompton Constitution; Wyandotte Constitution.)

**Topeka Constitution.** (See Kansas, Government of.)**Topographical Corps:**

Adoption and construction of, discussed, 5759.

Appropriation for trial with, recommended, 4304.

**Tortugas.** (See Dry Tortugas.)

**Tory.**—The terms "Whig" and "Tory" had been in use in English politics for a great many years anterior to the American Revolution. The term "Whig" designated the party opposing the royal prerogative and who were generally in favor of reforms; the term "Tory," the party upholding the prerogative and adhering to old institutions. In our colonial days the term "Tory" was applied to those who were adherents of the Crown, and the term "Whig" to the opponents thereof, and so the American sympathizers were known as Whigs, the supporters of England as Tories.

**Totten, Joseph G.,** correspondence regarding water supply for Washington and Georgetown, 2698.

**Tousig, Simon,** claim of, to protection of United States, 2761.

**Town.**—A word derived from the Anglo-Saxon word "tun," meaning "a place inclosed." The suffix still clings to the names of many English towns. In the United States the word has a varying signification. In Pennsylvania it is applied to any municipal government. In New York, Wisconsin, and most of the Western States a town is a subdivision of a county, and is often called a township (q. v.), but the town is not necessarily always coextensive with the latter. In New England the town is the unit of civil organization, a county being simply an aggregation of towns.

**Towner, Horace M.;** b. Belvidere, Ill., Oct. 23, 1855; educated at the public and high schools of Belvidere, Chicago University, and Union College of Law; married to Harriet Elizabeth Cole in 1887; admitted to the bar in 1877, and practiced law in Corning until 1890; elected judge of the third judicial district of Iowa in 1890, and served until Jan. 1, 1911; for 10 years lecturer on constitutional law in the State University of Iowa, from which he received the degree of LL. B.; served as president of the Iowa State Bar Association; elected to the Sixty-second Congress from Iowa.

**Town Meeting.**—A peculiarly democratic institution of New England and some of the newly formed Western States. It is a meeting of the citizens to legislate for the town, levy

**Town Meeting—Continued.**

taxes, elect the officers, usually a town clerk, selectmen, a treasurer, assessors, constables, overseers of the poor, and school commissioners. In some of the States the cities, by their aldermen, are authorized to transact the business formerly attended to by the town meeting. That it still has a legal existence was demonstrated as recently as 1881, when the Labor Reform Society of Boston secured a writ of mandamus to compel the city authorities to call a town meeting on petition, as required by its charter.

**Towns, Seaport,** protection for. (See *Defenses, Public, provision for.*)

**Townsend, Charles Elroy;** b. Concord, Jackson Co., Mich., Aug. 15, 1856; admitted to the Jackson bar to practice law in 1895; elected to the 58th, 59th, 60th, and 61st Congresses from Michigan; nominated for United States Senator at the primaries in 1910 and elected by the legislature in 1911 for the term which will expire March 3, 1917.

**Townsend, E. D.,** Asst. Adj.-Gen., signed order for release of Clement C. Clay, Jr., April 17, 1866.

**Townsend, Edward W.,** b. Cleveland, Ohio, Feb. 10, 1855; received a public and private school education in that city; author of a number of novels, plays, books of short stories, and a textbook on the Constitution of the United States; elected to the Sixty-second Congress from New Jersey.

**Townshend Acts.**—At the instance of Charles Townshend, chancellor of the exchequer, two acts were passed by the British Parliament providing for the appointment of commissioners to enforce more effectually the laws relating to taxes in the Colonies. They authorized writs of assistance and increased the duties on many articles already taxed, besides imposing others on glass, paper, colors, and tea. The object of these taxes was to support the civil government in the territories.

**Township.**—In the older United States counties are divided, without reference to their inhabitants, into townships varying in size from 5 to 10 miles square. When in 1802 Col. Mansfield surveyed the Northwest Territory he divided the entire public domain into land districts, made up of a varying number of tracts each 6 miles square. These were called townships. These townships were again divided into 36 equal squares, called sections, of 1 sq. mile

each and containing 640 acres. A civil township may include more or less than 1 township in area.

**Towson, Nathan,** appointment of, to artillery discussed, 681.

Rejection of, discussed, 695, 702.

**Tracy, Benjamin F.,** Secretary of Navy, mentioned, 5759.

**Trade Dollar.**—A silver coin issued by the United States from 1874 to 1878. It was coined for use in trade with China in competition with the Spanish and Mexican dollars. It was not intended for general circulation in the United States, though it was made a legal tender to the amount of \$5 at the time of issue. The legal-tender provision was repealed in 1876. The weight of the trade dollar was 420 grains, while the standard American silver dollar weighed 412½ grains. An act of March 1, 1887, authorized the Treasurer to redeem in standard silver dollars all trade dollars presented during the following 6 months.

**Trade of Foreign Powers.** (See *Commerce of Foreign Powers.*)

**Trade Unions.**—Combinations of working men to enable each member to secure the conditions most favorable to labor. The accumulations of the capitalist, it is claimed, afford him an advantage which the laborer without association does not possess. The history of trades unionism in America began with the formation of the International Typographical Union in 1852, followed in 1859 by the Machinists' and Blacksmiths' International Union and the Iron Moulders' Union of North America, and later by various other unions and organizations. The Knights of Labor, a secret order, was formed in 1869 in Philadelphia. It is in the nature of a trades union and includes all branches of labor. The American Federation of Labor, formed at Columbus, Ohio, in 1886, is one of the

**Trade Unions—Continued.**

largest labor organizations in the world, uniting the trades and occupations in the United States. To it are affiliated 116 national and international unions representing approximately 27,000 local unions, with an approximate paid-up membership of 1,540,000. There are also 13 large national unions not affiliated to the American Federation.

**Trans-Mississippi Exposition.**—From June 1 to Oct. 31, 1898, an exhibition of the resources of the Middle West was held at Omaha, Neb. The site covered about 200 acres and the buildings were grouped around a court which extended through the middle of the grounds and surrounded a lagoon or canal which terminated in a lake, adorned by an electric fountain. The grounds were ornamented with trees, shrubs and flowers, and the buildings were covered with white staff. A special feature of ethnologic interest was the gathering of 500 Indians, representative of twenty-five tribes. The total attendance was 2,613,508, and the receipts \$1,924,077.

**Treason.**—The Constitution of the United States declares that "treason against the United States shall consist only in levying war against them, or in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason unless on the testimony of two witnesses to the same overt act or on confession in open court" (24). The penalty is death. Conspiracy alone does not constitute treason. A motion to give Congress the sole power of defining the crime of treason failed in the Convention of 1787. An act of Congress of July 17, 1862, provided for the liberation of the slaves of a person convicted of treason. At the close of the Civil War there were no prosecutions for treason. Most of the State constitutions contain provisions similar to that of the National Constitution. A notable instance of treason against a State was Dorr's Rebellion (q. v.) in Rhode Island in 1840-1842. Dorr was convicted, but was pardoned in 1852. A celebrated

case of trial for treason is that of Aaron Burr, in 1807, which occurred at Richmond, Va., and resulted in the acquittal of Burr.

**Treasury Board.**—Feb. 17, 1776, the Continental Congress appointed a standing committee of five members on ways and means. They were given power over the Treasury office of accounts, the committee of claims, and some minor bureaus and officials. This committee was known as the Treasury Board. Two years later provision was made for a building in which to transact the business of the board, and the Treasury office of accounts was superseded by a Comptroller, an Auditor, and a Treasurer, thus forming the germ of the present Treasury Department. The office of Superintendent of Finance (q. v.) was created to take the place of this

**Treasury Board—Continued.**

board in 1781. After a trial of 3 years this office was abolished and the board reestablished and continued until 1789, when it was succeeded by the present Department.

**Treasury, Constitutional.** (See Constitutional Treasury System.)

**Treasury Department.—History.**—After the Department of State the most important executive branch of the National Government. It is more complex and extensive than any other Department, and its head officer, though ranking second to the Secretary of State, is not inferior in influence and responsibility to that Secretary. The Treasury Department was virtually created on Feb. 17, 1776, when the Continental Congress resolved: "That a standing committee of five be appointed for superintending the Treasury." On April 1 of that year a Treasury Office of Accounts was established to be carried on under the direction of the standing committee. On Sept. 26, 1778, Congress established the offices of Comptroller, Auditor, Treasurer, and two Chambers of Accounts, to consist of three commissioners each, all of whom were to be appointed annually by Congress. On Feb. 11, 1779, the office of Secretary of the Treasury was established (the holder to receive a salary of \$2,000 annually), but on July 30, following, this office was succeeded by a Board of Treasury consisting of five commissioners and an Auditor-General assisted by six Auditors. Again, on Feb. 7, 1781, it was resolved by Congress that the finances of the Confederation should be under a Superintendent of Finance (see Finance, Superintendent of), who was later assisted by a Comptroller, a Treasurer, a Register and Auditors; and on May 24, 1784, the Superintendent of Finance was superseded by the Board of Treasury, consisting of three commissioners. This ended the effort to organize the Treasury Department under the Confederation.

As at present constituted this De-

partment was established on Sept. 2, 1789, during the first session of Congress under the Constitution; and the act, drawn by Alexander Hamilton, was constructed with such precision and comprehensiveness that few radical changes have since been found necessary. The act provided that: "There shall be a Department of the Treasury in which shall be the following officers, namely, a Secretary of the Treasury, to be deemed the head of the Department; a Comptroller; an Auditor; a Treasurer; a Register; and an Assistant to the Secretary of the Treasury. On May 8, 1792, the office of Assistant to the Secretary of the Treasury was superseded by the office of Commissioner of Revenue, whose duties were to collect internal revenue and direct taxes. This office was abolished by an act of Congress April 6, 1802, reestablished July 24, 1813, and again abolished Dec. 23, 1817. The General Land Office, whose head was a Commissioner, was created in the Department of the Treasury April 25, 1812, and was transferred to the Department of the Interior in 1849. As at present organized, the work of the Department is divided among nineteen principal offices, bureaus and divisions. As head of the Department the Secretary is charged by law with maintaining the revenue for the support of the public credit; superintending the collecting of the revenue and directing the forms of keeping and rendering public accounts; granting of warrants for all moneys drawn from the Treasury in pursuance of appropriations made by law, and for the payment of moneys into the Treasury; and annually submitting to Congress estimates of the probable revenues and disbursements of the Government. He also controls the construction of public buildings and the coinage and printing of money. There are three Assistant Secretaries. Up to 1817 the Comptroller of the Treasury revised the reports of the Accountants of the other departments, but an act passed March 3, of that year, created the offices of Second, Third, Fourth, and Fifth Auditors, whose duty it was to perform this work. A Sixth Auditor was added in 1836. In 1894, however, the designations and duties of the auditors were changed and definitely established as follows: That of the First Auditor, to Auditor for the Treasury Department; Second Auditor, to Auditor for the War Department;

**Treasury Department—Continued.**

Third Auditor, to Auditor for the Interior Department; Fourth Auditor, to Auditor for the Navy Department; Fifth Auditor, to Auditor for the State and other Departments; Sixth Auditor, to Auditor for the Post-Office Department. Previous to 1894 the accounts of the various Departments passed from the hands of the auditors to the office of one of the Comptrollers, but since that time the auditors' examinations and decisions have been final except when formally appealed from. According to the act of 1894 the offices of First and Second Comptroller (the latter was established by the act of 1817) were succeeded by the office of Comptroller of the Treasury, whose principal duties are the rendering of decisions in cases of appeals from Auditors, heads of Departments or other officials, and the prescribing of forms for the keeping of public accounts.

The Treasurer of the United States, whose office is a part of the Treasury Department, receives and disburses all public moneys deposited in the Treasury, subtreasuries (q. v.) and in national banks that are United States depositories; is trustee for bonds that secure the national bank circulation and public deposits; has the custody of the Indian trust-fund bonds, and other public trusts; is fiscal agent for paying the interest on the public debt; and is ex-officio commissioner of the sinking fund of the District of Columbia. The duties of the Treasurer's office are distributed among eleven divisions. Until 1894 the chief duty of the Register of the Treasury was the recording of the receipts and expenditures of the Government and the office was organized in several divisions, but in that year the number of divisions was reduced to two, viz., the Division of Loans and the Division of Notes, Coupons and Currency, the books relating to the recording of the receipts and expenditures of the Government being transferred to the Division of Book-keeping and Warrants, of the Secretary's office. At present the office of the Treasury is charged with the issue, exchange, transfer, and redemption of bonds and the receiving and registering of redeemed notes, certificates, coupons, etc. The office of Comptroller of the Currency was established in 1863, its chief function being supervision of the national banks, their organization, and the is-

sue and redemption of their notes. There have for many years been included in the Treasury Department several offices and divisions whose duties were not germane to the finances of the country.

*Revenue-Cutter Service.*—The Revenue-Cutter Service is a military arm of the Government attached to and under the direction of the Treasury Department. The Service was organized in 1790 and constituted the original naval force of the country. There being at that time no Navy Department, the Service was placed under the Treasury Department, where it has remained ever since. It is charged with the enforcement of the navigation and customs laws of the United States, the assistance of vessels in distress, the protection of the sealing industry in Alaska, the enforcement of the quarantine laws, the destruction of derelicts and other floating dangers to navigation, and numerous other duties appropriate to its class of vessels. Each winter, by direction of the President, a number of the cutters patrol the coast for the special purpose of assisting vessels in distress. The Service cooperates with the Navy when directed by the President and has so cooperated in every war in which the United States has been engaged. The officers of the Service are commissioned by the President and hold rank by law with officers of the Army and Navy as follows:

Captain-Commandant with Colonel in the Army and Captain in the Navy; Senior Captains and Engineer-in-Chief with Lieutenant-Colonels in the Army and Commanders in the Navy; Captains with Majors in the Army and Lieutenant-Commanders in the Navy; First Lieutenants with Captains in the Army and Lieutenants in the Navy; Second Lieutenants with First Lieutenants in the Army and Lieutenants (Junior Grade) in the Navy; Third Lieutenants with Second Lieutenants in the Army and Ensigns in the Navy.

There are now in the Service 241 commissioned officers and cadets on the active list, and 1,500 petty officers and enlisted men. Commissioned officers of the line are appointed from Cadet graduates of the School of Instruction at New London, Ct. The Cadet course covers three years and embraces professional and academic subjects. Cadets are appointed after competitive examinations, conducted

**Treasury Department—Continued.**

by boards of commissioned officers of the Revenue-Cutter Service.

Appointments to the Engineer Corps are made after competitive examination, and successful candidates are appointed Cadet Engineers for a period of six months prior to being commissioned Third Lieutenants of Engineers in the Service. Candidates for the Engineer Corps must be not less than twenty-one nor more than twenty-six years of age.

The present Commandant of the Service is Captain-Commandant Ellsworth P. Bertholf, U. S. R. C. S., and Engineer-in-Chief Chas. A. McAllister, U. S. R. C. S., is head of the Engineer Corps.

There are forty-five vessels attached to the service.

*Secret Service.*—The Secret-Service Division of the Treasury Department is under the direction of John E. Wilkie, chief of the division. The service is principally engaged in detecting and prosecuting makers and dealers in counterfeit paper money and coin, although its operations include the detection of all violations of the laws of the United States. Details are also furnished for the protection of the President of the United States, and in the frequent journeyings of the present President he is always accompanied by one or more secret-service men.

The arrests of counterfeiters number about 400 annually; other arrests are for bribery, impersonating United States Government officers, perjury, and violating Sections 5,392, 5,414, 5,415, 5,424, 5,432, 5,438, 5,440, 5,459, and 5,479 of the United States Revised Statutes.

The Secret-Service Division was created in 1861, but from 1862 until 1865 it was under the State Department. In the latter year it was permanently organized as a division of the Treasury Department. It is chiefly concerned with the detection of counterfeiting and of other frauds and crimes against the Government, but in time of war the scope of its duties is somewhat enlarged. The office of Supervising Architect, charged chiefly with the erection and maintenance of Government buildings, was created in 1864. Since 1853 this work had been done by a Division of Construction with an officer of the Engineer Corps of the army at its head. The work of the Bureau of Public Health and Marine-Hospital Service was established in 1798 but

was reorganized and the office of Surgeon-General created in 1872. This official has supervision of the health of seamen, the quarantine service, and the weekly publication of "Public Health Reports of the United States." The Life-Saving Service has existed since 1873, its present organization dating from 1878. Other unrelated offices formerly included in the Treasury Department, that were transferred to the Department of Commerce and Labor on its establishment in 1903, are the Coast and Geodetic Survey, established in 1807; the Steamboat-Inspection Service, established in 1871; the Light-House Board, created in 1852; the Bureau of Immigration, established in 1891; and the Bureau of Statistics (q. v.), established in 1866. (For other offices similarly transferred from the Treasury Department, see Commerce and Labor, Department of.) Other important offices of the Treasury Department are Commissioner of Internal Revenue, established in 1862; the Bureau of Printing and Engraving; and the Director of the Mint.

*Official Duties.*—The Secretary of the Treasury is charged by law with the management of the national finances. He prepares plans for the improvement of the revenue and for the support of the public credit; superintends the collection of the revenue, and directs the forms of keeping and rendering public accounts and of making returns; grants warrants for all moneys drawn from the Treasury in pursuance of appropriations made by law, and for the payment of moneys into the Treasury; and annually submits to Congress estimates of the probable revenues and disbursements of the Government. He also controls the construction and maintenance of public buildings; the coinage and printing of money; the administration of the Life-Saving, Revenue-Cutter, and the Public Health and Marine-Hospital branches of the public service, and furnishes generally such information as may be required by either branch of Congress on all matters pertaining to the foregoing.

Assistant Secretaries of the Treasury.—To the Assistant Secretary in charge of customs is assigned the general supervision of the Division of Customs and of all matters pertaining to the customs service. To the Assistant Secretary in charge of fiscal bureaus is assigned the general supervision of all matters relating to

**Treasury Department—Continued.**

the following bureaus, offices, and divisions: The Bureau of the Mint; the Bureau of Engraving and Printing; the Office of the Treasurer of the United States; the Office of the Comptroller of the Currency; the Office of the Comptroller of the Treasury; the Auditors of the several Departments; the Register of the Treasury; the Secret-Service Division; the Division of Public Moneys; the Division of Loans and Currency; the Division of Bookkeeping and Warrants; the Division of Printing and Stationery and the office of the disbursing clerk. To the Assistant Secretary in charge of miscellaneous divisions of the Treasury Department is assigned the general supervision of all matters relating to the following bureaus and divisions: Internal Revenue, Public Health and Marine Hospital Service, Supervising Architect, the selection of sites for public buildings, Revenue-Cutter Service, Life-Saving Service, Appointments, and the Bond Division.

**Chief Clerk.**—The chief clerk is the chief executive officer of the Secretary, and under the direction of the Secretary and assistant secretaries, is charged with the enforcement of departmental regulations, general in their nature; is by law superintendent of the Treasury Building, and in addition superintends the Winder, Cox, and Butler Buildings; has direct charge of horses, wagons, etc., belonging to the department; the direction of engineers, machinists, watchmen, firemen, laborers, and other employees connected with the maintenance and protection of the Treasury Building and annexes; the expenditure of appropriations for contingent expenses; the disbursement of appropriations made for Government exhibits at various expositions; the supervision and general administration of purchases under the general supply committee; the custody of the records, files, and library of the Secretary's office; the custody of all sites for proposed public buildings in Washington; the checking of all mail relating to the personnel of the Treasury Department; the handling of requests for certified copies of official papers and the charge of all business of the Secretary's office unassigned.

**Supervising Architect.**—Subject to the direction and approval of the Secretary of the Treasury, the duties performed by the Supervising Archi-

tect embrace the following: Securing cessions from States of jurisdiction over sites and the payment for the same; preparation of drawings, estimates, specifications, etc., for, and the superintendence of the work of, constructing, rebuilding, extending or repairing public buildings; securing plans for public buildings under the provisions of the act of Feb. 20, 1893 (Tarsney Act); the care, maintenance, and repair of public buildings, and the supply of furniture, carpets, lighting fixtures, mechanical equipment, safes, and miscellaneous supplies for use of custodians' and engineers' forces in the care of public buildings.

**Comptroller of the Treasury.**—The Comptroller of the Treasury, under the direction of the Secretary of the Treasury, prescribes the forms of keeping and rendering all public accounts except those relating to postal revenues and the expenditures therefrom. He is charged with the duty of revising accounts upon appeal from settlements made by the auditors. Upon the application of disbursing officers, the head of any executive department, or other independent establishment not under any of the executive departments, the comptroller is required to render his advance decision upon any question involving a payment to be made by them or under them, which decision, when rendered, governs the auditor and the comptroller in the settlement of the account involving the payment inquired about. He is required to approve, disapprove, or modify all decisions by auditors making an original construction or modifying an existing construction of statutes, and certify his action to the auditor whose duties are affected thereby. Under his direction the several auditors superintend the recovery of all debts finally certified by them, respectively, to be due the United States, except those arising under the Post-Office Department. He superintends the preservation by the auditors of all accounts which have been finally adjusted by them, together with the vouchers and certificates relating to the same. He is required, on his own motion, when in the interests of the Government, to revise any account settled by any auditor. In any case where, in his opinion, the interests of the Government require, he may direct any of the auditors forthwith to audit and settle any particular account pending before the

**Treasury Department—Continued.**

said auditor for settlement. It is his duty to countersign all warrants authorized by law to be signed by the Secretary of the Treasury.

Auditor for the Treasury Department.—The Auditor for the Treasury Department receives and settles all accounts of the Department of the Treasury, including all accounts relating to the customs service, the public debt, internal revenue, Treasurer and assistant treasurers, mints and assay offices, Bureau of Engraving and Printing, Revenue-Cutter Service, Life-Saving Service, Public Health and Marine-Hospital Service, public buildings, and Secret Service.

Auditor for the War Department.—The Auditor for the War Department receives and settles all accounts of the Department of War, including all accounts relating to the military establishment, armories and arsenals, national cemeteries, fortifications, public buildings and grounds under the Chief of Engineers, rivers and harbors, the Military Academy, and the Isthmian Canal Commission.

Auditor for the Interior Department.—The Auditor for the Interior Department receives and settles all accounts of the Department of the Interior, including all accounts relating to the protection, survey, and sale of public lands and the reclamation of arid public lands, the Geological Survey, Bureau of Mines, Army and Navy pensions, Indian affairs, Howard University, the Government Hospital for the Insane, the Columbia Institution for the Deaf and Dumb, the Patent Office, the Capitol and grounds, and the Hot Springs Reservation.

Auditor for the Navy Department.—The Auditor for the Navy Department receives and settles all accounts of the Department of the Navy, including all accounts relating to the naval establishment, Marine Corps, and the Naval Academy.

Auditor for the State and Other Departments.—The Auditor for the State and other Departments receives and settles all accounts of the Departments of State, Justice, Agriculture, and Commerce and Labor, including all accounts relating to the Diplomatic and Consular Service, the judiciary, the United States courts, judgment of the United States courts and of the Court of Claims relating to accounts settled in his office, together with the accounts of the Executive Office, Civil Service Commission,

Interstate Commerce Commission, District of Columbia, Court of Claims, Smithsonian Institution, Territorial governments, the Senate, the House of Representatives, the Public Printer, Library of Congress, Botanic Garden, and all boards, commissions, and establishments of the Government not within the jurisdiction of any of the executive departments.

Auditor for the Post-Office Department.—The Auditor for the Post-Office Department receives and examines all accounts of the Office of the Postmaster-General and of all bureaus and offices under his direction; all postal and money-order accounts of postmasters and foreign administrations; all accounts relating to the transportation of mails and to all other business within the jurisdiction of the Post-Office Department; and certifies the balances arising thereon to the Postmaster-General for accounts of the postal revenue and expenditures therefrom, and to the Secretary of the Treasury for other accounts. He also receives and examines reports and accounts of postmasters operating postal savings banks, and accounts for expenditures from the appropriation for continuing the establishment, maintenance, and extension of the postal savings depositories. He registers, charges, and countersigns the warrants upon the Treasury issued in liquidation of indebtedness; superintends the collecting of debts due the United States for the service of the Post-Office Department and all penalties imposed; directs suits and all legal proceedings in civil actions; and takes all legal measures to enforce the payment of money due the United States for the service of the Post-Office Department, and for this purpose has direct official relations with the Solicitor of the Treasury, Department of Justice. He receives and accepts, with the written consent of the Postmaster-General, offers of compromise under sections 295 and 409 Revised Statutes.

Treasurer of the United States.—The Treasurer of the United States is charged with the receipt and disbursement of all public moneys that may be deposited in the Treasury at Washington and in the subtreasuries, and in the national-bank depositories; is redemption agent for national-bank notes; is trustee for bonds held to secure national-bank circulation and public deposits in national banks; is custodian of miscellaneous trust

**Treasury Department—Continued.**

funds; is fiscal agent for paying interest on the public debt and for paying the land-purchase bonds of the Philippine Islands, principal and interest; is treasurer of the board of trustees of the postal savings system; and is ex officio commissioner of the sinking fund of the District of Columbia.

**Register of the Treasury.**—The Register of the Treasury signs all bonds of the United States, the bonds of the District of Columbia, the Philippine Islands, the city of Manila, the city of Cebu, and the Porto Rican gold loan, and keeps records showing the daily outstanding balances thereof. He examines, counts, and prepares for destruction the upper halves of all redeemed paper money, except national-bank notes, received from banks through the Office of the Treasurer of the United States for redemption, all paid interest coupons, and all other United States securities redeemed.

**Comptroller of the Currency.**—The Comptroller of the Currency, under the general direction of the Secretary of the Treasury, has supervision of the national banks; the organization and examination of national banks; the preparation, issue, and redemption of their circulation; and the abstracting and consolidation of their reports of condition.

**Director of the Mint.**—The Director of the Mint has general supervision of all the mints and assay offices of the United States. He prescribes the rules, to be approved by the Secretary of the Treasury, for the transaction of business at the mints and assay offices, receives daily reports of their operations, directs the coinage to be executed, reviews the accounts, authorizes all expenditures, superintends the annual settlements of the several institutions, and makes special examinations of them when deemed necessary. All appointments, removals, and transfers in the mints and assay offices are subject to his approval. Tests of the weight and fineness of coins struck at the mints are made in the assay laboratory under his charge. He publishes quarterly an estimate of the value of the standard coins of foreign countries for customhouse and other public purposes. Two annual reports are prepared by the Director, one giving the operations of the mint service for the fiscal year, printed in the Finance Report of the

Secretary of the Treasury, the other giving the statistics of the production of the precious metals for the calendar year.

**Commissioner of Internal Revenue.**—The Commissioner has general superintendence of the collection of all internal-revenue taxes, the enforcement of internal-revenue laws; employment of internal-revenue agents; compensation and duties of gaugers, storekeepers, and other subordinate officers; the preparation and distribution of stamps, instructions, regulations, forms, blanks, hydrometers, stationery, etc.

**Public Health and Marine-Hospital Service.**—The act approved July 1, 1902, "An act to increase the efficiency and change the name of the United States Marine-Hospital Service," provides for a Bureau of Public Health and Marine-Hospital Service at Washington, comprised of seven divisions. The operations of these divisions are coordinated and are under the immediate supervision of the Surgeon-General. Through the Division of Scientific Research and Sanitation are conducted the scientific investigations of the Service and the operations of the Hygienic Laboratory at Washington, established for the investigation of contagious and infectious diseases and matters relating to the public health. The advisory board of the Hygienic Laboratory consists of eight scientists eminent in laboratory work in its relation to public health, detailed from other departments of the Government and appointed from endowed institutions. The board may be called into conference with the Surgeon-General at any time, the meetings not to exceed ten days in any one fiscal year. The Surgeon-General is required by law to call a conference of all State and Territorial boards of health or quarantine authorities each year, the District of Columbia included, and special conferences when called for by not less than five of said authorities, and he is also authorized to call additional conferences when, in his opinion, the interests of public health demand it. He is charged with the enforcement of the act of July 1, 1902, "An act to regulate the sale of viruses, serums, toxins, and analogous products in the District of Columbia, to regulate interstate traffic in said articles, and for other purposes." He has supervision of special investigations upon leprosy, conducted in

**Treasury Department—Continued.**

Hawaii under the act of July 1, 1905. Through the Division of Foreign and Insular Quarantine and Immigration the Surgeon-General enforces the national quarantine laws and prepares the regulations relating thereto. He has control of 44 Federal quarantine stations in the United States and others in the Philippines, Hawaii, and Porto Rico, and supervises the medical officers detailed in the offices of the American consular offices at foreign ports to prevent the introduction of contagious or infectious diseases into the United States. Under section 17 of the act approved Feb. 20, 1907, he has supervision over the medical officers engaged in the physical and mental examinations of all arriving aliens. Through the Division of Domestic (Interstate) Quarantine is enforced section 3 of the act of Feb. 15, 1893, relating to the prevention of the spread of contagious or infectious diseases from one State or Territory into another. This includes the suppression of epidemics. Through the Division of Sanitary Reports and Statistics there is collected information of the sanitary condition of foreign ports and places and ports and places within the United States, including the existence of epidemics. This information with morbidity and mortality statistics, domestic and foreign, are published in the weekly *Public Health Reports* and transmitted to State and municipal health officers and other sanitarians and to collectors of customs. Through the Division of Marine Hospitals and Relief professional care is taken of sick and disabled seamen at 23 marine hospitals and 123 other relief stations. The beneficiaries include officers and crews of registered, enrolled, or licensed vessels of the United States and of the Revenue-Cutter Service and Light-House Service; seamen employed on vessels of the Mississippi River Commission and of the Engineer Corps of the Army; keepers and surfmen of the Life-Saving Service. A purveying depot for the purchase and issuance of supplies is maintained at Washington. Physical examinations of keepers and surfmen of the Life-Saving Service, of officers and seamen of the Revenue-Cutter Service, and the examinations for the detection of color-blindness in masters, mates, and pilots are conducted through this division. In the Division of Person-

nel and Accounts are kept the records of the officers and of the expenditures of the appropriations. Through the Miscellaneous Division the various Service publications are issued, including the annual reports, public health reports and reprints, public health bulletins, bulletins of the Hygienic Laboratory and Yellow Fever Institute, and the transaction of the annual conferences with State health authorities. The medical evidences of disability in claims for benefits against the Life-Saving Service are reviewed.

**Revenue-Cutter Service.**—The Captain-Commandant of the Revenue-Cutter Service is Chief of the Division of Revenue-Cutter Service and has charge, under the direction of the Secretary of the Treasury, of the organization and government of the Revenue-Cutter Service.

**Bureau of Engraving and Printing.**—The Bureau of Engraving and Printing designs, engraves, prints, and finishes all of the securities and other similar work of the Government printed from steel plates, embracing United States notes, bonds, and certificates, national-bank notes, internal-revenue, postage, and customs stamps, Treasury drafts and checks, disbursing officers' checks, licenses, commissions, patent and pension certificates, and portraits authorized by law of deceased Members of Congress and other public officers.

**General Superintendent of the Life-Saving Service.**—It is the duty of the general superintendent to supervise the organization and government of the employees of the service; to prepare and revise regulations therefor as may be necessary; to supervise the expenditure of all appropriations made for the support and maintenance of the Life-Saving Service; to examine the accounts of disbursements of the district superintendents, and to certify the same to the accounting officers of the Treasury Department; to examine the property returns of the keepers of the several stations, and see that all public property thereto belonging is properly accounted for; to acquaint himself, as far as practicable, with all means employed in foreign countries which may seem to advantageously affect the interest of the service, and to cause to be properly investigated all plans, devices, and inventions for the improvement of life-saving apparatus for use at the stations which may appear to be meritorious and

**Treasury Department—Continued.**

available; to exercise supervision over the selection of sites for new stations the establishment of which may be authorized by law, or for old ones the removal of which may be made necessary by the encroachment of the sea or by other causes; to prepare and submit to the Secretary of the Treasury estimates for the support of the service; to collect and compile the statistics of marine disasters, as contemplated by the act of June 20, 1874, and to submit to the Secretary of the Treasury, for transmission to Congress, an annual report of the expenditures of the moneys appropriated for the maintenance of the Life-Saving Service and of the operations of said service during the year.

Following is a list of the Secretaries of the Treasury from the establishment of the Department: Alexander Hamilton, New York; Oliver Wolcott, Jr., Connecticut; Samuel Dexter, Massachusetts; Albert Gallatin, Pennsylvania; George W. Campbell, Tennessee; Alexander J. Dallas, Pennsylvania; William H. Crawford, Georgia; Richard Rush, Pennsylvania; Samuel D. Ingham, Pennsylvania; Louis McLane, Delaware; William J. Duane, Pennsylvania; Roger B. Taney, Maryland; Levi Woodbury, New Hampshire; Thomas Ewing, Ohio; Walter Forward, Pennsylvania; John C. Spencer, New York; George M. Bibb, Kentucky; Robert J. Walker, Mississippi; William M. Meredith, Pennsylvania; Thomas Corwin, Ohio; James Guthrie, Kentucky; Howell Cobb, Georgia; Philip F. Thomas, Maryland; John A. Dix, New York; Salmon P. Chase, Ohio; William P. Fessenden, Maine; Hugh McCulloch, Indiana; George S. Boutwell, Massachusetts; William A. Richardson, Massachusetts; Benjamin H. Bristow, Kentucky; Lot M. Morrill, Maine; John Sherman, Ohio; William Windom, Minnesota; Charles J. Folger, New York; Walter Q. Gresham, Indiana; Daniel Manning, New York; Charles S. Fairchild, New York; Charles Foster, Ohio; John G. Carlisle, Kentucky; Lyman J. Gage, Illinois; Leslie Mortimer Shaw, Iowa; George Bruce Cortelyou, New York; Franklin Macveagh, Illinois.

Appropriations for, transferred, 1254, 1404, 1612, 1772, 1904, 1943, 2125.  
Efficiency and economy in, 8063.  
Vacancy by death of head of, 5568.

**Treasury Notes.**—To meet the expenses of the War of 1812, \$36,000,000 in Treasury notes bearing 5½ per cent interest were issued. They were receivable for all duties to the Government, but were not legal tender. Beginning with the panic of 1837 and extending through the Mexican War, \$73,000,000 were issued, and following the panic of 1857 there was an issue of \$53,000,000. The exigencies of the Civil War required the issue of Treasury notes in large amounts. An act of Feb. 25, 1862, authorized the issue of \$150,000,000 of such notes with a legal-tender character and not bearing interest. These were called greenbacks (q. v.). The United States seven-thirties, of which \$830,000,000 were issued, were a variety of Treasury note. Treasury notes were issued to pay for the monthly purchase of bullion authorized by the Sherman Act of 1890.

**Treasury Notes:**

Appropriation to meet outstanding, recommended, 3073.

Issuance of, 549, 2119.

Additional, discussed, 3350.

Recommended, 2989.

Vacancy occasioned by death of, recommendations regarding filling of, 5568.

**Treasury, Solicitor of,** office of, established, 1090.

Operations of, referred to, 2539.

**Treaties.**—The modern definition of a treaty is an agreement or covenant between two or more nations or sovereignties formally signed by duly authorized commissioners and solemnly ratified by each. In ancient times terms of treaties were dictated rather than contracted. A conqueror with an army at the gates of a capital stated his terms and declared his intention of remaining and inflicting

*Treaties—Continued.*

such punishment as he saw fit until he received satisfactory assurances that his wishes would be carried out. In the fifteenth century a jurisprudence of political treaties began to grow and was closely connected with the development of European statecraft. The treaty of Westphalia, which ended the Thirty Years' War, marked the turning point between ancient and modern diplomacy. Up to this time treaty negotiations had been based upon rights which had once existed and were recognized before rupture. After the treaties of Münster and Osnabrück, the object of diplomacy was to establish a political equilibrium at the expense of preexistent rights and to maintain the *status quo*. The efforts of European diplomats during the early part of the nineteenth century were directed toward the suppression of the revolutionary spirit and the curbing of monarchical ambitions. Later the maritime rights of neutrals, suppression of slave trade, and the international emancipation of trade, navigation, arts, and labor became leading subjects for diplomatic consideration.

The popularity of the principle of arbitration marks the latest step in diplomatic progress. The proposition made by the Czar of Russia in 1898 for the general disarmament of the world and the settlement of international disputes by a court of arbitration points to a culmination of the science of diplomacy.

The first treaties of the United States were conceived before the Declaration of Independence was signed. Nov. 29, 1775, the Continental Congress appointed a committee on secret correspondence, charged with ascertaining whether, if the Colonies should be forced to form themselves into an independent State, France would enter into any treaty or alliance with them. On Feb. 6, 1778, two treaties were concluded in Paris with France—a treaty of alliance and a treaty of amity and commerce. On Oct. 8, 1782, a treaty of amity and commerce was concluded with the Netherlands, and April 3, 1783, a similar treaty with Sweden. On Jan. 20, 1783, an armistice with Great Britain was arranged, followed Sept. 3 by a definitive treaty of peace. Other treaties concluded before the adoption of the Constitution were a treaty of amity and commerce with Prussia, Dec. 10, 1785; a treaty of peace and friendship with Morocco in

January, 1787, and a consular convention with France, Nov. 14, 1788.

In the United States the right of making and of ratifying treaties is, by Article II., Section 2, of the Constitution, vested in the President under the advice and with the concurrence of two-thirds of the Senate. The right of changing the terms and conditions of a treaty before ratification is claimed by the Senate.

International law or the law of nations is very clear upon the question of treaties and of all the interpretations of its conditions. No treaty may be made which will in any way or in the slightest degree override the Constitution, or which will bind either nation to any terms or conditions that flagrantly sacrifice the interests of either, or cause the nation to do anything morally wrong in the fulfillment. A treaty becomes binding at the time of signature by duly authorized commissioners, and if the ratification is delayed, such ratification becomes retroactive; though it may be specified in the treaty that its terms become operative only upon ratification. Where an ambiguity of expression or possibility of other construction of the terms of a treaty exists, no strained interpretation is permitted and the common use of the words is followed unless this leads to an absurdity. Where two meanings are possible, that one is chosen which confers the least benefit upon the party who sought or demanded the insertion of the doubtful clause. When clauses impose hard conditions upon either party these are to be interpreted strictly so as to minimize the hard conditions; and where justice, equity, and humanity are favored by the doubtful clauses they are interpreted with broad construction, so as to confer the fullest benefits.

The term "convention" is limited to agreements which deal with subordinate questions. Treaties are classified as treaties of peace, alliance, truces, commercial treaties, extradition treaties, conventions and protocols—a name given to less formal agreements between nations. Defensive treaties are designed to defend the parties mutually against the encroachments of others. Offensive and defensive treaties or alliances obligate the parties to aid one another at all times during conflict of either of the parties against the encroachments of other nations. Treaties of neutrality obligate the

**Treaties—Continued.**

contracting parties to take no part in conflicts between other nations.

When Washington was called to the Presidency he found the northern frontier of the United States occupied by British military posts and Spain making encroachments on the south. With the outbreak of the French Revolution, Spain joined England, and French sympathizers in America were attempting to fit out privateers to prey upon Spanish and English commerce. Washington was urged to cast the fortunes of the United States into one side of the struggle. To avoid any entangling alliances he sent John Jay, Chief Justice of the United States, as a special envoy to London (146). Nov. 19, 1794, Jay concluded the treaty which has since borne his name. In consequence of the irritating conduct of Genêt, the French minister at Washington, Congress in 1798 abrogated the treaties and consular conventions with France. Another treaty was made in 1800, and in 1803 three conventions were signed, including the one ceding Louisiana. One of the most enduring treaties made by the United States was that of Oct. 27, 1795, with Spain, which stood for more than 100 years. This was the only treaty not swept away by the Napoleonic wars.

The treaty of Ghent, signed in 1814, was important as settling some disputed boundary questions, as well as concluding peace between the United States and England. No mention was made of the right of search and the impressment of American seamen, though these were the especial causes of the war. Other notable treaties made by the United States were the Webster-Ashburton treaty, signed at Washington in 1842, defining the northeastern boundary between Canada and the United States, and the treaty of Guadalupe Hidalgo, in 1848, concluding the Mexican War, by which Mexico ceded territory now comprising Nevada, Utah, most of Arizona, a large part of New Mexico, parts of Colorado and Wyoming, and all of California. The treaty with Japan in 1854 secured humane treatment for American sailors shipwrecked on the coast of Japan and the right to appoint a consular agent; it also led to the establishment of important trading privileges with the United States and Great Britain in 1858.

The treaties of Tientsin, concluded

in 1858, and the Burlingame treaty of 1868 opened China to foreign travel and gave protection to Christians within her borders. The treaty of Washington was signed in 1871, and settled questions pending between the United States and Great Britain. It submitted the Alabama claims to a commission of arbitration and adjusted the fisheries question on a reciprocity basis. There was also a concession of important privileges by each of subjects of the other in America, and the question of the northwestern boundary of the United States was submitted to the arbitration of the German Emperor.

At the close of the Spanish-American War, in 1898, Spain was forced to relinquish her sovereignty in Cuba and cede to the United States the island of Puerto Rico, together with the Philippine Islands and Guam. Under the Constitution treaties are made a part of the supreme law of the land and they have a legal status similar to that of contracts. Numerous treaties have been made with the Indians and with various countries on the subject of extradition. (See Foreign Relations.)

**Treaties** (see Indians); for treaties with foreign nations, see the respective countries, using list "Nations."

**Trent Affair.**—In the autumn of 1861 the government of the Confederate States sent J. M. Mason and John Slidell as commissioners to Great Britain and France, respectively. They went first to Havana, where they took passage on the British merchant ship *Trent* for St. Thomas, on their way to England. Nov. 8 the vessel was stopped in the old Bahama Channel by the U. S. S. *San Jacinto*, Capt. Wilkes. The Confederate commissioners were seized and taken to Boston as prisoners. Wilkes's act

**Trent Affair—Continued.**

was in violation of the rights of neutral nations, for which the United States had always contended. The British Government promptly instructed its minister at Washington to withdraw from the United States unless the prisoners were set at liberty and an apology tendered within 7 days. The United States disavowed the act of Capt. Wilkes and set the prisoners free.

**Trent, The,** removal of Confederate envoys from. (See Mason and Slidell.)

**Trenton, The,** loss of, at Samoan Islands, 5479.

**Trenton (N. J.), Battle of.**—Washington's retreat through New Jersey left him with scarcely 3,000 men on the west bank of the Delaware River on Dec. 8, 1776. On the night of Dec. 13, Gen. Charles Lee was taken prisoner at Baskingridge by the British, and his army added to that of Washington gave the latter some 6,000 able-bodied soldiers. On the night of Dec. 25, 1776, Washington, with about 2,500 men, crossed the Delaware River and on the morning of the 26th attacked an outpost of 1,500 Hessians at Trenton under Col. Rahl and captured about 1,000 of them and killed 40. The American casualties were 2 killed, 2 frozen to death, and 3 wounded. The effect of this victory and that of Princeton following it was electrical. The Americans were uplifted and the British discouraged.

**Trescot, William Henry;** diplomat; b. Charleston, S. C., Nov. 10, 1822; grad. Charleston Coll., 1840, and admitted to the bar in 1843; appointed secretary of legation at London, 1852, and in 1860 was made assistant secretary of state; commissioner to revise the treaty with China in 1880, and to negotiate a commercial treaty with Mexico in 1882; died Pendleton, S. C., May 4, 1898.

Special envoy extraordinary to Peru, Chile, and Bolivia, referred to, 4694.

**Trianon Decree.**—A secret edict issued by Napoleon at the Grand Trianon Palace, at Versailles, Aug. 5, 1810. It placed a duty of 50 per cent on colonial products and ordered the immediate confiscation of all American vessels and merchandise brought into French ports prior to May 1, 1810, the date of the approval of the act excluding French vessels from American waters. It also ordered that until Nov. 1 American vessels were

to be allowed to enter French ports, but not to unload without his permission, offering at the same time to revoke the Milan and Berlin decrees Nov. 1. The revocation was not carried into effect, and American ships and cargoes availing themselves of the promised protection were confiscated. (See also Berlin Decrees; Embargo; Milan Decree; Orders in Council.)

**Tribble, Samuel J.,** b. in Franklin County, Ga.; received college and legal education at the University of Georgia; located in Athens, Ga., engaged in the practice of law; elected to the Sixty-second Congress from Georgia.

**Tripoli.**—A province of the Turkish Empire in northern Africa. It is bounded on the north by the Mediterranean Sea, on the east by Egypt, on the west by Tunis and on the south by the Desert of Sahara. Its exports consist mainly of products of the Sudan brought across the Sahara by caravan. The Oasis of Fezzan and some smaller oases are within its borders. It anciently belonged to Carthage and at a later date to Rome. It was overrun and conquered by the Arabs in the seventh century and by the Turks in the sixteenth century. It became an independent State in 1713, but was reconquered by the Turks about 1835. A war occurred between Tripoli and the United States, 1801-1805 (q. v.). **Area,** 398,900 sq. miles, the population is estimated at 1,000,000.

Treaty with, 235, 378.

War with. (See Tripolitan war.)

**Tripoli, Treaty with.**—The treaty of peace and amity of 1805 closed the Tripolitan War. By its terms freedom of commerce was granted to citizens of the United States upon conditions of the most favored nation. The Bashaw of Tripoli agreed to deliver to the commander of the American squadron all Americans in his hands in return for all of his subjects in the hands of the Americans. As the Americans to be released numbered about three hundred, and the Tripolitans in the hands of the Americans only one hundred, the United States agreed to pay the Bashaw of Tripoli the sum of sixty thousand dollars in compensation for the difference. The United States land forces should be immediately withdrawn without supplies; and the United States agreed to use her best offices to induce the brother of the Bashaw, her ally, to withdraw also. But the United States agreed not to employ force to bring this about. Should the brother acquiesce, the Bashaw agreed to return his wife and child, held as hostages.

Passports should be granted to vessels of both nationalities, and provisions were made to render examination of passports and other papers as easy as possible. Humane provisions were made for a supply of food, repairs, and relief to distressed or shipwrecked sailors or vessels. The commerce, protection of merchants, and appointment of consuls in Tripoli were provided for on terms of the most favored nation. Freedom of conscience was guaranteed to all citizens of the United States.

**Tripolitan War.**—A war between the United States and Tripoli, 1801-1805.

During the latter part of the eighteenth century the United States, following the custom of the leading European nations, paid an annual tribute to the rulers of the various Barbary States as the price of immunity from their piratical depredations. In consequence of a refusal on the part of the United States to increase the tribute the Bashaw of Tripoli, June 10, 1801, declared war (314). In anticipation of this event the United States had already sent a squadron to the Mediterranean. In October, 1803, the frigate *Philadelphia*, Capt. Bainbridge, while chasing a corsair into the harbor of Tripoli, struck a sunken rock and was captured with all on board. Commodore Decatur, of the *Intrepid*, ran his vessel into the harbor of Tripoli on the night of Feb. 16, 1804, and under the fire of the shore batteries burned the *Philadelphia*. Between July and September, 1804, Commodore Edward Preble made a series of attacks on the fortifications of Tripoli. Meantime Gen. William Eaton, United States consul at Tunis, joined Hamet, the rightful Bashaw of Tripoli, in an expedition against his usurping brother. Marching from Egypt across the desert, they took Derne April 27, 1805. The success of this expedition made it possible to extort a highly favorable treaty from the Bashaw June 4, 1805, the United States agreeing to pay \$60,000 ransom for the officers and crew of the *Philadelphia* and Hamet being induced to retire.

**Trust.**—In modern commercial usage an organization for the control of several corporations or establishments under one direction or in one combination, the object being to enable the trustees or managers to direct and govern all the corporations or establishments, so as to control and suspend at pleasure the work of any, and thus to reduce expenses, regulate production, and defeat competition. In later years these combinations or trusts have greatly multiplied and increased, both in number and capital involved. The first anti-trust enactment was a provision in the constitution of Georgia, passed in 1877 and directed against the formation of pools among railroads. The Interstate Commerce (q. v.) law passed by Congress in 1887 also prohibited the formation of railroad pools. In 1889 several States passed anti-trust laws, and in 1890 Congress passed what is known as the Sherman Anti-trust law. This declared combinations in restraint of trade among the several States or with foreign powers illegal and fixed a penalty of \$5,000 or one year's imprisonment. The operation of the Sherman law was not entirely satisfactory, and in 1903, on Attorney-General Knox's recommendation, Congress passed laws for expediting cases instituted under the Sherman Act, made the Interstate Commerce (q. v.) Act more effective and created the Bureau of Corporations in the new Department of Com-

merce and Labor (q. v.) to investigate corporations other than railroads engaged in interstate or foreign commerce.

The decision of the United States Supreme Court, March 14, 1904, in the Northern Securities case prevented the combination of the Great Northern and Northern Pacific Railroads, declaring that a corporation organized to vote the majority of the stocks of the two railroads was not a mere holding company but a combination in restraint of trade, and ordered it dissolved. On July 1, 1905, five corporations and seventeen individuals engaged in the meat-packing industry were indicted at Chicago by the Federal Grand Jury for violation of the Sherman Anti-trust law, and later pleaded guilty and were fined. The largest trust is the United States Steel Corporation, organized in 1901, which in 1908 had securities outstanding to the amount of \$1,432,597,873.31, and assets aggregating \$1,703,168,118.40. Moody's "Manual of Corporations" mentions some 1,500 trusts, and states that 440 large industrial and transportation trusts are active, and have a floating capital of \$20,379,162,511.

**Tunis.**—A French protectorate in northern Africa. It is one of the Barbary States. Tunis is bounded on the north and northeast by the Mediterranean Sea, on the southeast by Tripoli, on the south and southwest by the Desert of Sahara, and on the west by Algeria. It produces grain and fruits (principally dates and olives), and has important fishing interests. It is peopled by Arabs, Berbers, and Jews. Tunis formed a part of ancient Carthage, and later, as Roman Africa, it became the leading seat of Latin Christianity. It

**Tunis—Continued.**

passed successively under the dominion of the Vandals, Greeks and Arabs. It was made a Turkish province in 1575. For a long time it was noted as a piratical State. It became a French protectorate in 1881. Area, 45,779 sq. miles; estimated population, 1,500,000.

**Tunis:**

Blockade of Tripoli, 388, 389.

Claims of, against United States, 388, 389.

Condolence of Bey of, on death of President Lincoln, 3565.

Treaty with, 192, 253, 359, 821, 833, 852.

War with, threatened, 388.

**Tunis, Treaties with.**—The treaty of amity, commerce, and navigation of 1797 was in some respects modified by the later treaty of 1824. Both, in turn, were superseded by the treaty with France regarding Tunis of May 9, 1904. By this latter the consuls of the United States residing in Tunis are no longer governed by the conditions of the former treaties, but are to be regulated in all cases by international law. The government of France agrees by this treaty to accord to the said consuls all of the rights, privileges, and immunities so provided.

**Turin, Italy, Hygienic Congress at,** 4626.

**Turkey.**—An Empire with possessions in southeastern Europe, northern Africa, and southwestern Asia. The Asiatic possessions include Asia Minor, Armenia, and Khurdestan, Mesopotamia, Syria, and Arabia; and in Africa, Tripoli. Turkey also possesses a nominal sovereignty over Cyprus, Samos and Egypt. The chief pursuits of the people are agriculture and stock raising. The leading exports are silk, mohair, opium, raisins, wheat, cotton, wool, coffee, skins, oils, fruits, and valonia. The Turkish provinces, especially those in Asia, are rich in minerals, but the mines are little worked.

The leading religion is Mohammedanism, the Sultan of Turkey being the Spiritual head of all believers in

the religion of Islam, and, in theory, their temporal ruler also. The power of the Empire began to develop under Osman early in the fourteenth century. Mohammed II. overthrew the Byzantine Empire in 1453. The Empire reached the climax of its greatness in the sixteenth century through the conquest of Syria, Egypt, Rhodes, Hungary, etc. The Turks suffered loss at the hands of Austria and Russia in the latter part of the eighteenth and the beginning of the nineteenth century. Constitutions have at various times been drawn up for the government of the Empire, but have been either rejected or executed in such bad faith as to lead to their abandonment. The earliest was proclaimed in 1856, and a more liberal one was proclaimed by Abdul-Hamid II. in 1876. This provided for the security of personal liberty and property; for the administration of justice by irremovable judges; the abolition of torture; the freedom of press, and the equality of all Ottoman subjects; freedom of worship; extension of suffrage to all subjects over 25 years of age. Under this constitution a Parliament was established, consisting of a Chamber of Deputies and a Senate. Senators were to be appointed by the Sultan and the Deputies were to be elected, each to represent 50,000 male citizens. This parliament met in March, 1877, and, with war with Russia as a pretext, it was dissolved in February of the following year and the Constitution suspended. It remained suspended until 1908, when the revolution brought about by the Young Turk movement led to its restoration. The Young Turk movement had existed for years, but the beginning of the amazing developments of 1908 may be traced back to 1905, when a secret Committee of Union and Progress was formed, with headquarters at Salonica to cooperate with the Young Turk Organization in Paris, of which Ahmed Riza Bey was the leading spirit. The committee consisted chiefly of government officials, civil and military, who contrasted their own conditions with those of representatives of other European powers with whom they came in contact. A vigorous propaganda of the new ideas was carried on in the army, particularly the third corps in Macedonia. Thus, when battalions were shifted from one place to suppress an uprising in another they were found to be in full sympathy with it.

*Turkey—Continued.*

The palace spies learned of the movement and then attempts to seize the leaders resulted in the dramatic episode of July 23, 1908, when Niazi Bey proclaimed the demand for the constitution in the name of the Committee. The uprising was instantaneous and general. In Monastir the Young Turk committee dismissed the Grand Vizier and began collecting customs. One of the Sultan's immediate representatives was assassinated, another narrowly escaped by flight, and, officers of the army threatened that unless certain of their comrades who were under arrest were liberated they would kill all the generals in Macedonia, and march to Constantinople and demand the reestablishment of the constitution. July 24, 1908, Sultan Abdul-Hamid issued an irade restoring the constitution and proclaiming general amnesty. As if by magic the warring races in Macedonia became reconciled, bands of robbers dispersed and their chiefs surrendered and back taxes were paid up. The palace clique was broken up, and the hated oppressors fled the Empire. The violation of the Berlin treaty by the Annexation of Bosnia and Herzegovina to Austria-Hungary was recognized by the signatory powers and compensation for Turkey agreed upon. April 27, 1909, Abdul-Hamid was deposed and his brother Mohammed V. was made Sultan. He reorganized the Cabinet May 5, 1909. The total area over which Turkey has actual control is estimated at 1,153,300 sq. miles, with a population of 24,028,000.

Sept. 26, 1911, Italy sent an ultimatum to the Turkish government concerning her rights in Tripoli, stating the grievances of Italy against Turkish misgovernment in that province and Cyrenaica, requesting the Porte to give orders permitting the occupation of Tripoli by Italy, and declaring that if a reply were not received within twenty-four hours Italy would at once take measures to insure the occupation. The reply of the Porte was unsatisfactory and a state of war between the two countries began Friday, Sept. 29, 1911. On that day three Turkish torpedo boats were sunk off Prevesa on the coast of Epirus by the Italian squadron commanded by the Duke of the Abruzzi. A second squadron was dispatched to Tripoli and the surrender of the place demanded. This being refused, Vice-Admiral Aubrey began

a bombardment on Oct. 3, and on the 5th Italian marines took possession of the city.

The Turkish cabinet resigned, and Said Pasha, president of the Senate, was appointed Grand Vizier. He organized a new government and protested to the powers at the action of Italy.

The Italian plan of campaign was to blockade the Tripolitan coast and prevent the landing of Turkish reinforcements, and war vessels were distributed along the Albanian and Macedonian coasts to prevent naval attacks or privateering and to protect Italians and other foreigners on Ottoman territory.

Oct. 13, General Caneva, with an expeditionary force of nearly 35,000, landed at Tripoli. He issued a proclamation to the natives stating that Italy had not come to enslave the population, but to restore to them their rights and to punish the usurpers, and that the inhabitants would be governed by their native chiefs under the patronage of the King of Italy, and would be treated with justice, clemency and gentleness.

Oct. 18 a convoy of troops, escorted by eleven war ships, arrived before Bengazi and demanded its surrender. This being refused, bombardment was begun the next day, and after a determined resistance at the outset the Turks surrendered and the Italians took possession of the place. The casualties were slight.

A fanatical rising of Arabs occurred Oct. 23 in Tripoli and the oasis outside the city. It was reported to the Italian officers that the natives had been supplied with 10,000 magazine rifles and ammunition. When the outbreak occurred 3,000 of these had already been seized by the Italians, and the treachery of the tribesmen met with prompt and severe punishment. All who were caught bearing arms were shot.

Occasional fighting took place about Tripoli and along the coast during the remainder of 1911 and the first part of the following year.

By the middle of Sept., 1912, the entire Tripolitan coast of Africa was in Italy's possession, as well as the Island of Rhodes and the eleven Sporades Islands in the eastern part of the Ægean Sea.

Sept. 17 there was fought near Derna, a port on the Mediterranean coast, 140 miles northeast of Bengazi, one of the bloodiest battles of the war. The Italians lost 60 killed and

**Turkey—Continued.**

double that number wounded, and the Turks fled in disorder, leaving more than 800 dead on the field (some say a thousand), and at least as many must have been wounded. On the same day it was unofficially announced from Ouchy, Switzerland, that commissioners of the two belligerent countries meeting there had tentatively agreed to terms for ending the war. The stipulations were indefinite, but conceded possession of the Tripolitan coast to Italy. The protocol was signed Oct. 15, 1912.

Before the conclusion of the peace with Italy, Turkey's whole attention was drawn to her European possessions by the Balkan outbreak.

The Albanians, who had long been demanding autonomy and were suffering under Turkish oppression, in September 1912, began fighting against their oppressors. A massacre of Christian Bulgars in Macedonia by Turks, early in October, caused the Bulgarians to cross the Balkan mountains to the relief of their brethren. In Serbia the bitter feeling against the Turks was increased by the Turks crossing the Servian border. There was fighting on the Montenegrin border, and the firing by Turks on a Greek steamer made the latter more hostile than usual against their old enemy, while the political societies in Crete had been continually agitating for war with Turkey.

Turkey's defiance was met by a prompt advance of the four States—Bulgaria, Serbia, Montenegro, and Greece. The Montenegrins, who had never been subjugated by the Turks and were not afraid of them, took the part of their kinsmen and weaker neighbors, at the same time demanding redress of their own wrongs, since the course had been opened up by Italy. While Italy's conquests were on the Turkish outposts, the signal for the break-up of Turkish power in Europe was given when Prince Peter of Montenegro, on Oct. 9, 1912, fired the first shot of a thirty-hour battle at Podgoritz, on the Albanian border, which resulted in a complete Montenegrin victory. Montenegro had issued a declaration of war the previous day. The great powers of Europe advised against any attack on Turkey by the Balkan States and threatened intervention, if necessary, to maintain the status quo. By Oct. 1, 1912, the Balkan States had the mobilization of their armies well under way, and Turkey

was concentrating troops at Adrianople. Serbia and Greece declared war against Turkey, Oct. 17, and Turkey declared war against Serbia and Bulgaria the same day. After repeated successes by the Montenegrins, and the occupation of strategic points by the Greeks, Servians, and Bulgarians, Turkey, on Oct. 18, dismissed the last minister of the belligerent States. By the 20th an invading army of 325,000 Bulgarians and Servians had crossed the northern border in a line 300 miles long and began a march on Constantinople. After the Montenegrin successes in the west the first important battle occurred, Oct. 24, 1912, at Kirk Kilis-seh, thirty-three miles east of Adrianople. The Turks were defeated with great slaughter and the Bulgarians made an immediate advance upon Adrianople, which was completely invested and cut off from Constantinople. Swinging south from Adrianople to the plains of Thrace the Bulgarian army encountered the Turks near Lule Burgas, Oct. 29, and a four-day battle ensued, which will take its place in history as one of the bloodiest of human conflicts. The Turkish army, which was said to be completely equipped "down to the last button of the last gaiter," was found to be insufficiently officered, poorly drilled, and lacking in provisions and ammunition. Some of the soldiers had never seen a more modern firearm than a muzzle-loading musket. The Bulgarians rained upon them a constant fire from the latest improved machine guns. The onslaught was irresistible. Forty thousand of the flower of the Turkish army fell and 75 per cent of the artillery was captured.

Two London newspaper correspondents were with the Turkish army in the retreat toward Constantinople after the fight began at Lule Burgas. One of these described the rout as "the most complete military disaster since Sedan, the greatest débâcle since Napoleon's retreat from Moscow."

By the 3d of November the Turkish army had been pressed to the last line of fortifications outside of Constantinople and the Porte appealed to the powers of Europe for intervention. The allies, however, made it plain that they would brook no intervention and intended to dictate terms of peace to the Turks in Constantinople.

**Turkey—Continued.**

Meantime the Servians in the west had taken Novi Bazar and Uskub, and the Montenegrins had invested Scutari, while the Greeks completely surrounded Salonica. Nov. 2, 1912, King Peter of Servia entered Uskub, and was greeted by his son, commander of the army of occupation, as the first Servian ruler to enter the old Servian town in 500 years. The siege of Adrianople and the assault of the Tchatalja line of forts which extends across the isthmus from the Balkan Mountains to the Sea of Marmora occupied the allied armies during the whole of November. Constant firing was maintained and daily assaults and sorties took place.

On the 6th, Monastir, one of the principal strongholds in the west, held by the Sixth Turkish Army Corps, was besieged by the Servians, and on the 18th surrendered with 50,000 prisoners. Half the population of Monastir were professed Christians and the place had been the scene of many massacres. On the 9th, Salonica, the Thessalonica of ancient days, the Turkish stronghold at the head of the Gulf of Salonica, surrendered to the Greeks under Crown Prince Constantine. By a coincidence the occupation took place on Saint Demetrius Day. Demetrius was the patron saint of Salonica, and when the Sultan Murad took the city in 1430 the body of the saint was taken from its tomb and cut to pieces, and the splendid mausoleum which housed the body was used as a Turkish mosque until the Greek occupation in 1912. For 2,000 years the city of the Golden Horn, the key to three continents, has been the goal of ambitious world conquerors. Xenophon, Alexander, Constantine, Dandolo, Wallenstein, Napoleon, and the Czars ever since Peter the Great coveted possession of Constantinople, which has been called the Glory of the World.

The powers of Europe assembled a large fleet of battleships, cruisers, and destroyers in Turkish waters under command of the British Sir Archibald Berkeley Milne, senior officer of the international fleet.

During the latter part of the month the Greeks occupied the historic islands of Chios, Lemnos and Mitylene. The Servians, against the protest of Austria-Hungary, gained possession of Durazzo, a port on the Adriatic Sea.

Nov. 25, Turkish and Bulgarian plenipotentiaries met on neutral ground near the Tchatalja lines and began negotiations for an armistice. **Turkey** (see also Constantinople):

- Turtle Mountain Indians.** (See Indian Tribes.)
- Tuscaloosa, Ala.**, bill to provide for purchase of site and erection of public building at, vetoed, 5521.
- Tuscany.**—A compartimento of the Kingdom of Italy. Tuscany corresponds nearly to the ancient Etruria. It was ruled by the Romans, Goths, Byzantine Greeks, Lombards, and Franks. It became completely disintegrated about the eleventh century, but was afterwards erected into the Grand Duchy of Tuscany. After several changes in its government it was taken by France and became a part of that country about 1808, and was restored to the Hapsburg-Lorraine

line in 1814. Tuscany was annexed by Italy in 1860. Area, 9,304 square miles; population (1901), 2,548,154; estimate for 1909, 2,675,500.

**Tuscany:**

- Treaty with France, 185.
- Vessels of, discriminating duties on, suspended by proclamation, 1452.
- Tuscarora Indians.** (See Indian Tribes.)
- Tuttle, William E., Jr.**, b. Horseheads, N. Y., Dec. 10, 1870; was graduated from Elmira Free Academy in 1887, and was a student at Cornell University two years; engaged in the lumber business; was elected to the Sixty-second Congress from New Jersey.
- Tutuila Island**, agreement regarding establishment of naval station in, and protecting dominions of, discussed, 4122. (See also Samoan Islands.)
- Twenty-Cent Piece.**—A silver coin of United States of the weight of 77.16 grains. It was authorized in 1875 and designed principally for use in the Pacific States. It was a legal tender to the amount of \$5. Coinage of it was discontinued in 1878.
- Twiggs, David E.**, swords formerly property of, placed at disposal of Congress, 3346.
- Two-Cent Piece.**—A bronze coin of the United States of the weight of 96 grains. It was first issued in 1864, and was the first coin to bear the motto "In God we trust." It was legal tender to the amount of 25 cents. Coinage of the 2-cent piece was discontinued in 1872.
- Two-Penny Act.**—A law passed in 1755 by the Virginia assembly. The principal medium of exchange had up to this time been tobacco, it being considered more substantial than the paper money of the Colony. Under the provisions of the two-penny act, or option law, all debts payable in tobacco were made payable, at the debtor's option, in money of the Colony at the rate of 16s. 8d. per hundredweight of tobacco. This was equivalent to 2d. a pound. On appeal to the Crown the law was vetoed.
- Tygris, The**, satisfaction due for detention of, admitted by Great Britain, 2111.
- Tyler and Luckett** (assignees), act for relief of, vetoed, 4334.
- Tyler, John** (tenth President United States):
- John Tyler was elected Vice-President by an electoral vote of 234—equal to that received by President Harrison. He succeeded to the position of President on the death of President Harrison, which occurred

*Tyler, John—Continued.*

in a little more than one month after his inauguration. As this was the first break in the Presidential office since the organization of the Government, some dispute arose as to Tyler's title. Leading statesmen of both parties were actively discussing whether he was President or only Acting President. But Tyler settled the question for all time by signing his first message, "John Tyler, President."

*Party Affiliation.*—In the early part of his political career, Tyler was a strong supporter of President Madison's policies. In 1811 he opposed in the Virginia Assembly the recharter of the first Bank of the United States. As a member of Congress he was a strict constructionist; voted against Calhoun's internal improvement bill, the Missouri Compromise, and protective tariff. In the Senate he opposed the "tariff of abominations" (1828). In 1832 he supported Jackson as the least objectionable candidate, but this support was only temporary. His nomination to the Vice-Presidency with Harrison was an effort to secure for the ticket the assistance of the dissatisfied Democrats.

*Finance.*—The great financial event of President Tyler's administration was his famous struggle with the Whig majorities in Congress over the Fiscal Bank and Fiscal Corporation, both of which measures he vetoed. In his opening message (page 1896) he recounted the history of the United States Bank, the sub-treasury system of President Van Buren, and other financial aspects. He uttered a note of warning to Congress which passed unheeded. He said: "I shall be ready to concur with you in the adoption of such system as you may propose, reserving to myself the ultimate power of rejecting any measure which may, in my view of it, conflict with the Constitution or otherwise jeopard the prosperity of the country, a power which I could not part with, even if I would, but which I will not believe any act of yours will call into requisition." Both houses passed, and the President signed a bill to abolish Van Buren's sub-treasury plan. The fight for the national bank then came on. President Tyler had always maintained that the Federal Government had no Constitutional right to establish a national bank within a State without first having obtained the consent of

that State. Both houses passed an act incorporating a bank of the United States without providing for the consent of the States, and the President vetoed it. It failed to secure the necessary two-thirds vote and died. The "fiscal corporation" bill was then brought forward incorporating such a bank in the District of Columbia, with power to establish branches in other States. Pressure of all kinds was brought to bear upon the President to compel him to either sign this bill or to resign. But he was neither to be hoodwinked nor bullied. The bill passed both houses in September, 1841; but the President promptly vetoed it. Whereupon the majority of his Cabinet resigned, Webster alone remaining. No hope for embarrassment followed, for the President promptly filled the vacancies, and his nominations were at once confirmed. The great effect of the undoubted victory which Tyler won was the death-blow to paternal government.

*Public Debt.*—The public debt of the United States during the Tyler administration stood as follows:

January 1, 1842....	\$20,601,226.28
July 1, 1843.....	32,742,922.00
July 1, 1844.....	23,461,652.50
July 1, 1845.....	15,925,303.01

*Tariff.*—In the second year of Tyler's administration the strife between Congress and the President was renewed. Instead of the bank question, the tariff formed the matter of dispute. The importations were insufficient to supply Government with means, and the reduction of duties by the compromise tariff had been so great that there was not money enough to meet the expenses. A bill was passed restoring the high protective tariff of 1833 and providing that the surplus revenues that were sure to accrue therefrom should be divided among the States. The President vetoed this bill on the ground that the compromise tariff provided that the protective tariff should come to an end in 1842, and because of the provision for distributing the surplus. Congress then framed another bill based on a tariff for revenue plan, with an incidental provision for protection and distribution. The President gave great offence to Congress by vetoing this bill also. There were threats of impeachment for unwarrantable assumption of authority; but the Whigs were afraid to go before the people for election in the autumn without

**Tyler, John—Continued.**

settling the tariff, and they were obliged to pass a bill without the distributing clause. This the President promptly signed. Later, an attempt was made to pass the distributing clause in a separate bill, but the President vetoed that. In the next Congress, the Whig majority of 25 was replaced by a Democratic majority of 61.

*Internal Improvements.*—Congress passed two bills for river and harbor improvements, one for the eastern part of the country, and the other for the Mississippi section. The eastern bill President Tyler vetoed (page 2183); the Mississippi bill he signed. The discrimination was on the ground that the Mississippi was a great national highway, and therein differed from all other rivers, and was on that account a feature for the consideration of the Federal Government. An attempt to override the President's veto in this matter was not successful.

**Uncle Sam.**—A personification of the United States Government. Several explanations have been given as to the origin of this expression, but the most plausible is the following: During the War of 1812 Elbert Anderson, an army contractor, bought large quantities of provisions for the Army and had them shipped to himself at Troy, N. Y. The shipping mark was "E. A." above and "U. S." below. One of the inspectors at Troy was Samuel Wilson, popularly known as "Uncle Sam" Wilson. A workman was asked the meaning of the initials "U. S." which at that time were rarely used as an abbreviation for the United States. The prompt reply was "Elbert Anderson and Uncle Sam," referring to Sam Wilson. This interpretation became current among the workmen, many of whom afterwards enlisted and communicated the explanation to their comrades from all parts of the country as the mystic cipher elicited inquiry. The story went the rounds of the press and "Uncle Sam" became the popular appellation of the Government.

**Uncompahgre Forest Reserve, Col.**, proclaimed, 7246.

**Uncompahgre Reservation**, bill to change boundaries of, vetoed, 5522.

**Underground Railroad.**—A name commonly applied before the Civil War to an arrangement whereby fugitive slaves were assisted to escape to Canada. The idea originated in some one of the Northern States, and the plan consisted in harboring fugitives during the day and at night conducting them to the next "station" till they finally reached the border line. This "railroad" had many branches and the stations were a night's journey apart. The principal routes were from Kentucky, across Virginia and Ohio, and from Maryland through Pennsylvania and New York. This system of aiding escaping slaves was partially organized in 1838, but did not attain its highest activity until the passage of the fugitive-slave law, about 1850. A Quaker, Levi Coffin, the reputed president of the organization, is said to have aided in the escape of a large number of slaves annually for many years. A colored

woman named Harriet Tubman is said to have made many journeys North, conducting bands of fugitives.

**Underhill, Edwin S.**; b. Bath, N. Y., Oct. 7, 1861; graduated from Haverling High School in Bath and entered Yale, where he graduated from the academic department in 1881; entered the office of the *Steuben Farmers' Advocate* in 1899; with his father, he purchased the *Corning Daily Democrat*, since changed to the *Corning Evening Leader*; since his father's death, in 1902, he has been the publisher of the *Advocate* and the *Leader*; elected to the 62d Congress from New York.

**Underwood, Oscar W.**; b. Louisville, Jefferson Co., Ky., May 6, 1862; was educated at Rugby School, Louisville, Ky., and the University of Virginia; moved to Birmingham, Ala., and began practice of law; elected to the 54th, 55th, 56th, 57th, 58th, 59th, 60th, 61st, and 62d Congresses from Alabama.

**Union Flags**, return of Confederate and to respective States, recommended, 5163.

Proposition withdrawn, 5164.

**Union Labor Party.**—A successor of the Greenback party. It was organized at Cincinnati Feb. 23, 1887, and promulgated a platform embodying the principles of the Knights of Labor. In 1891 it united with the Farmers' Alliance and other elements to form the Populist party.

**Union Veteran Legion.**—Organized at Pittsburgh, Pa., March, 1884, and the National Organization was perfected Nov. 17, 1886. Encampments are now organized in 21 States and the District of Columbia, numbering 152 encampments. The membership is over 20,000. To become a member, the applicant must have been an officer, soldier, sailor or marine of the Union army, navy, or marine corps, during the late Civil War, who volunteered prior to July 1, 1863, for a term of three years, and was honorably discharged for any cause, after a service of at least two continuous years; or was, at any time discharged by reason of wounds received in the line of duty; also those who volunteered for a term of two years prior to July 22, 1861, and served their full term of enlistment, unless discharged for wounds received in the line of duty; but no drafted person, nor substitute, nor any one who has at any time borne arms against the United States, is eligible. A statement by the Adju-

**Union Veteran Legion—Continued.**

tant-General of the Legion says: "It is believed that those who entered the service prior to July, 1863, had but one object in view, and that was the preservation of the Union. There were no bounties prior to that date, nor were there any fears of a draft; consequently, those who shouldered a musket or wielded a sabre felt that it was a sacred duty to offer their lives in defence of their country's honor."

**United Confederate Veterans.**—An association the objects and purposes of which are set forth in the constitution as finally adopted at the Houston reunion, May 23, 1895. It is a federation of all associations of Confederate veterans, soldiers and sailors. The purposes are the cultivation of ties of friendship between those who have shared common dangers, sufferings, and privations; the encouragement of the writing, by the participants therein, of narratives, episodes, occurrences, etc., of the Civil War; the collection of authentic data for an impartial history, and the preservation of war relics and mementos, and the record, as far as possible, of every Confederate soldier who is dead; caring for the needy survivors and assisting and protecting Confederate widows and orphans; the erection of enduring monuments and marking with headstones the graves of Confederate dead, and instilling into descendants proper veneration for their fathers. Membership is by camps, and the latter are organized into departments, divisions, and brigades. There are three departments—Army of Northern Virginia, Army of the Tennessee, and Army of the Trans-Mississippi. The number of members is about 75,000.

**United Daughters of the Confederacy.**

—The United Daughters of the Confederacy was organized at Nashville, Tenn., Sept. 10, 1894. It is composed of the widows, wives, mothers, sisters, and lineal female descendants of men who served honorably in the army and navy of the Confederate States, or who served in the civil service of the Confederate States or one of the Southern States, or who gave personal services to the Confederate cause. There are local federations, governed by State divisions, which in turn are subordinate to the general organization. The objects of the United Daughters of the Confederacy, as stated in the constitution of the society, are "social, literary,

historical, monumental, benevolent, and honorable in every degree, without any political signification whatever." It will endeavor: (1) To unite in the federation all bodies of Southern women now organized or that may hereafter be formed. (2) To cultivate ties of friendship among our women whose fathers, brothers, sons, and, in numberless cases, mothers, shared common dangers, sufferings, and privations; and to perpetuate honor, integrity, valor, and other noble attributes of true Southern character. (3) To instruct and instill into the descendants of the people of the South a proper respect for the pride in the glorious war history, with a veneration and love for the deeds of their forefathers which have created such a monument of military renown, and to perpetuate a truthful record of the noble and chivalric achievements of their ancestors. All with the view of furnishing authentic information from which a conscientious historian will be enabled to write a correct and impartial history of the Confederate side during the struggle for Southern independence. The organization now has 900 chapters in the United States, North and South, with 40,000 members.

**United Labor Party.**—A local political party organized in New York City in 1886. It nominated Henry George for mayor on a platform based upon his theory that values arising from the growth of society belong to the community as a whole, and that therefore land values should bear the burden of taxation.

**United Sons of Confederate Veterans.**—The general society of this organization is composed of representatives of local camps throughout the United States.

**United States.**—A Federal Republic composed of 46 States, 2 Territories, and one Federal District, together with the outlying territory of Alaska, the island of Puerto Rico, the Hawaiian group, the Philippines, and several small islands. The extreme limits of the continental possessions, excluding Alaska, are included between the parallels of 24° 20' and 49° north latitude and 66° 48' and 124° 32' west longitude. The United States proper is bounded on the north by the British American possessions (separated in part by the St. Lawrence River and the chain of lakes—Ontario, Erie, St. Clair, Huron, and Superior—with their connecting

**United States—Continued.**

streams); on the east by the Atlantic Ocean; on the south by the Strait of Florida, Gulf of Mexico, and the Republic of Mexico, and on the west by the Pacific Ocean. Alaska, situated in the extreme northwest of the American continent, as well as the insular possessions, is treated of in separate articles. (See Alaska, Puerto Rico, Hawaii, Philippine Islands, Guam, Samoa, Tutuila, Ladrões.)

The physical characteristics may be said briefly to consist of the Appalachian Mountain system in the eastern part, the Gulf slope on the south, the basin of the Great Lakes on the north, and between them the valleys of the Mississippi, Ohio, and Missouri rivers. West of this great central system of valleys and watersheds is the Rocky Mountain system, approached in the east by extensive treeless plains or prairies. West of the Rockies many fertile valleys diversify the slope of the Pacific.

The leading agricultural products are grain, cotton, tobacco, and sugar. The mineral productions include iron, silver, copper, lead, gold, zinc, quicksilver, nickel, aluminum, platinum, antimony, coal, petroleum, natural gas, and mineral waters. It is the first country in the world in the production of steel, pig iron, cotton, wheat, and indian corn, and among the first in tobacco and sugar. A description and an epitome of the history of the Government are given in the present work.

From 1774 to the Declaration of Independence, the title of the country was the "United Colonies." Sept. 9, 1776, the Continental Congress resolved that in all Continental commissions where theretofore the words "United Colonies" had been used the style should thereafter be "United States." The name United States commonly supposed to have been first used in history in 1776, had been in fact sometimes applied to the European Dutch Republic, composed of what had been during the war for independence in the sixteenth century the United Provinces. The independence of the Government of the United States of America was first recognized by France in 1778. The area of the continental portion of the Republic is 3,025,600 square miles; including Alaska, 3,557,000 square miles. The population, exclusive of Indians and Alaskans, was, in 1890, 62,622,250; in 1900 the total popula-

tion was 76,303,387; estimate for 1909, 89,770,126.

**United States, Government of.**—The government of the United States is a republican constitutional federation. The Constitution provides that: "The United States shall guarantee to every State in this Union a republican form of government." This "republican form of government" is defined by Judge Cooley, an eminent jurist, as a "government of representatives chosen by the people, as it contrasts on one side with a democracy, in which the people or community as an organized whole wield the sovereign powers of government, and, on the other, with the rule of one man, as king, emperor, czar, or sultan, or with that of one class of men, as an aristocracy. It is to be observed, however, that it is a republican form of government that is to be guaranteed; and in the light of the undoubted fact that by the Revolution it was expected and intended to throw off monarchical and aristocratic forms there can be no question but that by a 'republican form of government' was intended a government in which not only would the people's representatives make the laws and their agents administer them, but the people would also, directly or indirectly, choose the executive. But it would by no means follow that the whole body of the people, or even the whole body of adult or competent persons would be admitted to political privileges; and in any republican State the law must determine the qualifications for admission to the elective franchise." (See Suffrage.)

The adoption of the Declaration of Independence by the Continental Congress, July 4, 1776, severed the American colonies from Great Britain and the "Articles of Confederation and Perpetual Union between the States," which by 1781 had been signed by all the States, bound them into a confederacy, or alliance, for mutual protection and aggressive warfare. (See Confederation, Articles of.) These articles were found to be defective, even before their adoption by all the States, and in May, 1787, a constitutional convention met in Philadelphia and debated the questions of the States' relations to each other until Sept. 17, when they adjourned, after framing the present Constitution. It was finally ratified by all the States. Ten amendments were added, Dec. 15, 1791; the eleventh, Jan. 8, 1798; the twelfth,

**United States, Government of—Continued.**

Sept. 25, 1804; the thirteenth, Dec. 18, 1865; the fourteenth, July 28, 1868; the fifteenth, March 30, 1870; sixteenth, ordered submitted July 26, 1909. (See Amendments.)

There are two distinct methods of organizing a Federal union of States, according to the theory of government elucidated by John Stuart Mill: The Federal authorities may represent the governments solely, and their acts may be obligatory only on the governments as such; or, they may have the power of enacting laws and issuing orders which are binding directly on individual citizens. The former was the original plan of the Swiss Confederation, and essentially that of the United States under the Articles of Confederation, and also of the German Confederation, and amounts to little more than an alliance. The latter plan has proved more effective and is embodied in the present Constitution of the United States, and has since been adopted by Switzerland. (See Constitution. Powers of Federal and State Governments.)

Under the Constitution the government of the United States is vested in three branches—the executive, the legislative, and the judicial.

*The Executive Branch* consists of the President, Vice-President and the Secretaries of the several executive departments.

*The President* is the chief executive officer of the federal government. His duties and powers under the Constitution are to approve or veto bills; to grant reprieves and pardons for offenses against the United States, except in case of impeachment; to make treaties; to nominate ambassadors and other public ministers, consuls, judges of the Federal courts, etc., and, by and with the consent of the Senate appoint such officers; to fill vacancies that may occur during the recess of the Senate by granting commissions which shall expire at the end of the next session; to convene one or both Houses of Congress, and to adjourn Congress to such a time as he may deem proper in case it cannot agree upon an adjournment. He is also commander-in-chief of the Army and Navy and of the militia of the several States when called into the service of the United States. He is required to give information to Congress from time to time regarding the state of the Union and recom-

mend to its consideration such measures as he shall judge necessary and expedient; receive ambassadors and other public ministers; see that the laws are faithfully executed, etc. (See President, electoral College, Executive.)

*The Vice-President* is *ex-officio* President of the Senate, and in the case of the death, or resignation, of the President, he becomes President. (See Vice-President, Presidential Succession.)

*Cabinet.*—The secretaries of the nine executive departments of the Government constitute the President's Cabinet or advisory council, similar to the ministry of European countries. Each is appointed by the President, with the advice and consent of the Senate. In case of the death, removal, or resignation of both the President and Vice-President, succession to the office is fixed in the following order: Secretary of State, Secretary of the Treasury, Secretary of War, Attorney-General, Postmaster-General, Secretary of the Navy, Secretary of the Interior. The Secretary of Agriculture and the Secretary of Commerce and Labor are not eligible to succeed the President. (See Cabinet; Departments, Executive; Secretaries, Tenure-of-Office Act; Veto; Salaries, Executive; Removals from Office; Vice-President, Presidential Succession.)

*The Secretary of State* is charged, under the direction of the President, with duties appertaining to correspondence with the public ministers and the consuls of the United States, and with the representatives of foreign powers accredited to the United States; and to negotiations of whatever character relating to the foreign affairs of the United States. He is also the medium of correspondence between the President and the chief executives of the several States of the United States; he has the custody of the Great Seal of the United States, and countersigns and affixes such seal to all executive proclamations, to various commissions, and to warrants for the extradition of fugitives from justice. He is regarded as the first in rank among the members of the Cabinet. He is also the custodian of the treaties made with foreign States, and of the laws of the United States. He grants and issues passports, and exequaturs to foreign consuls in the United States are issued through his office. He publishes the laws and resolutions of

**United States, Government of—Continued.**

Congress, amendments to the Constitution, and proclamations declaring the admission of new States into the Union. He has three assistant secretaries; one chief clerk; one solicitor with two assistants; and the following bureaus, each in charge of a Chief: Diplomatic bureau; Consular bureau; Bureau of Indexes and Archives; Accounts; Rolls and Library; Trade Relations; Appointments, and Citizenship. Under this department are also placed the United States Representatives on International Tribunals of Egypt, and the Bureau of American Republics. (See State, Department of.)

*The Secretary of Treasury* is charged by law with the management of the national finances. He prepares plans for the improvement of the revenue and for the support of the public credit; superintends the collection of the revenue, and directs the forms of keeping and rendering public accounts and of making returns; grants warrants for all moneys drawn from the Treasury in pursuance of appropriations made by law, and for the payment of moneys into the Treasury; and annually submits to Congress estimates of the probable revenues and disbursements of the Government. He also controls the construction of public buildings; the coinage and printing of money; the administration of the Life-Saving, Revenue-Cutter; and the Public Health and Marine-Hospital branches or the public service, and furnishes generally such information as may be required by either branch of Congress on all matters pertaining to the foregoing. He has three assistants and a chief clerk, chief of the division of appointments, controller and assistant; auditors for the Departments of State, Treasury, War, Post-office, Navy, and Interior Departments; treasurer and two assistant treasurers; register; controller of the currency and deputy; commissioner of internal revenue and two deputies; director of the mint; chief and assistant of the Secret Service; surgeon-general; supervising architect; director of the Bureau of Engraving and Printing; superintendent and assistant of life-saving service; and a board of seven general appraisers.

*The Secretary of War* is head of the War Department, and performs such duties as are required of him by law or may be enjoined upon him by the

President concerning the military service. He is charged with the supervision of all estimates of appropriations for the expenses of the department, including the military establishment; of all purchases of army supplies; of all expenditures for the support, transportation, and maintenance of the army, and of such expenditures of a civil nature as may be placed by Congress under his direction. He also has supervision of the United States Military Academy at West Point and of military education in the army, of the Board of Ordnance and Fortification, of the various battlefield commissions, and of the publication of the Official Records of the War of the Rebellion. He has charge of all matters relating to national defense and seacoast fortifications, army ordnance, river and harbor improvements, the prevention of obstruction to navigation, and the establishment of harbor lines; and all plans and locations of bridges authorized by Congress to be constructed over navigable waters of the United States require his approval. He also has charge of the establishment or abandonment of military posts, and of all matters relating to leases, revocable licenses, and all other privileges upon lands under the control of the War Department. (See War, Department of; see Army.)

*The Attorney-General* is the head of the Department of Justice and the chief law officer of the Government. He represents the United States in matters involving legal questions; he gives his advice and opinion, when they are required by the President or by the heads of the other Executive Departments, on questions of law arising in the administration of their respective Departments; he appears in the Supreme Court of the United States in cases of especial gravity and importance; he exercises a general superintendence and direction over United States attorneys and marshals in all judicial districts in the States and Territories; and he provides special counsel for the United States whenever required by any department of the Government. He has a solicitor-general, six general assistants, solicitor of internal revenues, law clerk and examiner of titles, besides special solicitors for the several other departments. (See Justice, Department of.)

*The Postmaster-General* has the direction and management of the Post-Office Department. He appoints all

**United States, Government of—Continued.**

officers and employees of the Department, except the fourth Assistant Postmaster-General and the purchasing agent, who are appointed by the President, by and with the advice and consent of the Senate; appoints all postmasters whose compensation does not exceed \$1,000; makes postal treaties with foreign Governments, by and with the advice and consent of the President; awards and executes contracts and directs the management of the domestic and foreign mail service. The Department consists of the Postmaster-General and four assistants, and superintendents of foreign mails, money order system, postal finance, registry, rural delivery, railway mail service, railway adjustment, dead letter office, classification, city delivery, salaries and allowances, a chief clerk and a chief post-office inspector. (See Post-Office Department, Postage, Postage Stamps.)

*The Secretary of the Navy*, chief clerk, and chiefs of the following bureaus, constitute the clerical force of that department. Navigation, Equipment, Ordnance, Medicine and Surgery, Supplies and Accounts, Steam Engineering, Construction and Repair, Yards and Docks, and Judge-Advocate-General. The Secretary of the Navy performs such duties as the President of the United States, who as Commander-in-Chief, may assign him, and has the general superintendence of construction, manning, armament, equipment, and employment of vessels of war. (See Navy, Department of; Navy.)

*The Secretary of the Interior* is charged with the supervision of public business relating to patents for inventions; pensions and bounty lands; the public lands and surveys; the Indians; education; the Geological Survey and Reclamation Service; the Hot Springs Reservation, Arkansas; Yellowstone National Park, Wyoming; and the Yosemite, Sequoia, and General Grant parks, California; and other national parks; distribution of appropriations for agricultural and mechanical colleges in the States and Territories; and supervision of certain hospitals and eleemosynary institutions in the District of Columbia. He also exercises certain powers and duties in relation to the Territories of the United States. The Department consists of Secretary and two assistants, a solicitor, chief clerk and Commissioners of The General Land

Office, Patent Office, Bureau of Pensions, Indian Affairs, Bureau of Education, and Directors of the Geological Survey and Reclamation Service. (See Interior Department.)

*The Department of Agriculture* consists of the Secretary and his assistant, a chief clerk and an appointing clerk, chiefs of the Weather Bureau, Bureau of Animal Industry, Plant Industry, Soils, Forestry, and the Division of Accounts, Publications, Foreign Markets, and Biological Survey, Directors of Experiment Stations and Road Inquiry, besides a chemist, entomologist, statistician and librarian.

The Secretary exercises personal supervision of public business relating to the agricultural industry. He appoints all the officers and employees of the Department with the exception of the Assistant Secretary and the Chief of the Weather Bureau, who are appointed by the President, and directs the management of all the bureaus, divisions, offices, and the Forest Service, embraced in the Department. He exercises advisory supervision over agricultural experiment stations, which receive aid from the National Treasury; has control of the quarantine stations for imported cattle, of interstate quarantine rendered necessary by sheep and cattle diseases, and of the inspection of cattle-carrying vessels; and directs the inspection of domestic and imported food products under the meat inspection and pure-food and drugs laws. He is charged with the duty of issuing rules and regulations for the protection, maintenance, and care of the National Forest Reserves. He also is charged with carrying into effect the laws prohibiting the transportation by interstate commerce of game killed in violation of local laws and excluding from importation certain noxious animals, and has authority to control the importation of other animals. (See Agriculture, Department of.)

*The Secretary of Commerce and Labor* is charged with the work of promoting the commerce of the United States, and its mining, manufacturing, shipping, fishery, transportation, and labor interests. His duties also comprise the investigation of the organization and management of corporations (excepting railroads) engaged in interstate commerce; the publication of information regarding labor interests and labor controversies in this and other countries; the

### United States, Government of—Continued.

administration of the Light-House Service, and the aid and protection to shipping thereby; the taking of the census, and the collection and publication of statistical information connected therewith; the making of coast and geodetic surveys; the collecting of statistics relating to foreign and domestic commerce; the inspection of steamboats, and the enforcement of laws relating thereto for the protection of life and property; the supervision of the fisheries as administered by the Federal Government; the supervision and control of the Alaskan fur-seal, salmon, and other fisheries; the jurisdiction over merchant vessels. (See Commerce and Labor, Department of.)

*Independent Departments.*—The Government Printing Office, the Library of Congress, the Interstate Commerce and Civil Service commissions are independent of the executive departments. (See Labor Statistics, Bureaus of; Immigration, Library of Congress, Government Printing Office.)

*The Legislative Branch* of the Government consists of the Senate and House of Representatives, together called the Congress.

*The Senate* is composed of 2 representatives from each State, chosen by the State legislature for a period of 6 years. Senators must be 30 years of age, residents of the State they represent, and must have been citizens of the United States for at least 9 years; they receive a salary of \$7,500 per annum and a small allowance for stationery and mileage. Should a vacancy occur in the Senate during a recess of the State legislature, the Governor of the State makes a temporary appointment which is valid until the next meeting of the legislature. The Constitution provides that the terms of Senators shall so overlap that one-third of the members retire every 2 years. (See Congress; Senate.)

*The House of Representatives* is composed of members elected every second year by the votes of citizens who, according to the laws of their respective states, are qualified to vote. (See Suffrage.)

A Congress officially lasts two years; thus the Sixty-first Congress came into existence at noon March 4, 1909, and will expire at noon March 4, 1911. Each of the two houses of Congress is made by the Constitution

the judge of the elections, returns, and qualifications of its own members, and each of the houses may, with the concurrence of two-thirds, expel a member. (See Apportionment, Congress, Suffrage, Speaker, Representatives, Representatives at Large, House of Representatives, and Salaries, Legislative.)

By the fifth article of the Constitution, Congress has the power to propose alterations in the Constitution. The article orders that the Congress, whenever two-thirds of both houses shall deem it necessary, shall propose amendments to the Constitution, or, on the application of the legislatures of two-thirds of the States, shall call a convention for proposing the amendments, which in either case shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the States or by conventions in three-fourths thereof, as the one or other mode of ratification may be proposed by Congress. (See Amendments, Constitution.)

*The Judicial Branch* was modeled after that of Great Britain. In the United States courts are public tribunals for the administration of justice and the interpretation of law. Their functions include the protection of private rights, the punishment of crime, and the regulation of conflicting interests of individuals and States. In accordance with the provision of the Constitution establishing a Supreme Court and conferring upon Congress power to create inferior tribunals, a regular system of courts has been formed. The system at first adopted has not been changed in any essential manner. The Supreme Court (q. v.) is the highest tribunal of the United States. It consists of a Chief Justice and eight associate justices and holds its sessions annually in the Capitol at Washington. After the Supreme Court the most important Federal courts are, beginning with the lowest: district courts, circuit courts, and circuit courts of appeals. All these exercise both law and equity jurisdiction, as prescribed by law. Final appeals are taken to the Supreme Court. United States district courts usually have jurisdiction over a single State, but some of the larger States have been divided into 2 or more districts by Congress. There are now 88 district courts in the United States. Most district courts consist of a single judge, but an additional judge has

**United States, Government of—***Continued.*

been authorized in the districts of Minnesota and southern New York. (See Courts, Justice, Department of.)

**United States, The.**—A famous frigate of the War of 1812. She was built at Philadelphia in 1797 and carried 44 guns. Oct. 25, 1812, near the island of Madeira, she met and captured the British ship *Macedonian*, also of 44 guns. Of the 300 men on the *Macedonian*, 36 were killed and 68 wounded. The loss on the *United States* was 5 killed and 6 wounded.

**United States, The:**

Combat with and capture of British frigate *Macedonian*, 506.

French seamen injured by, while firing salute, 1273.

**United States Notes:**

Act to fix amount of, and circulation of national banks vetoed, 4222.

Discussed and recommendations regarding, 6073, 6078, 6175.

**United States vs. Peters.**—A case of mandamus decided in February, 1809, by the Supreme Court of the United States, the execution of which was opposed by the State authorities of Pennsylvania, backed by the militia. In the case of *Olmstead et al. vs. Rittenhouse's Executrixes* (q. v.) Judge Peters, of the United States district court for Pennsylvania, decided in favor of the plaintiffs, but refrained, he stated, for prudential reasons, from carrying his judgment

**United States vs. Peters—Continued.**

into execution. April 2, 1803, a Pennsylvania statute was enacted forbidding the execution of the decree of the Federal court. A mandamus was then asked for against Peters. The Supreme Court granted it, Chief-Justice Marshall declaring that the legislature of a State can not annul the judgment or determine the jurisdiction of a United States court. The execution of the original judgment required the payment of £11,496 9s. 9d., Pennsylvania currency, which had been placed in the custody of the State court. The Pennsylvania officials, with the militia, resisted payment for 26 days, when the marshal assembled a *posse comitatus* of 2,000 men, and the money was paid over without actual collision.

**United States vs. Todd.**—A case not printed, there having been no reporter at the time. It was possibly the first case in which the United States Supreme Court declared a Federal statute unconstitutional. Under an act of Congress passed in 1792 the name of Yale Todd was by the circuit court of Connecticut ordered to be placed upon the pension list. It was afterwards (Feb. 17, 1794) decided by the Supreme Court of the United States that the circuit court could not constitutionally make such a decree, nor could it act in the capacity of a commission not of judicial function.

**Upshur, Abel Parker** (1790-1844); statesman and cabinet officer; b. in Northampton Co., Va.; secretary of the navy under Tyler 1841-43; secretary of state to succeed Webster, 1843; representative of the extreme States-Rights and pro-slavery school of Southern politics.

**Upshur, Abel P.**, death of, announced and honors to be paid memory of, 2132, 2186.

**Uruguay.**—A Republic of South America. It lies between lat. 30° and 35° south and long. 53° and 58° west. It is bounded on the north by Brazil, on the east by Brazil and the Atlantic Ocean, on the south by the estuary

of the Rio de la Plata, and on the west by Argentina (separated by the Uruguay River.) Uruguay is also known as the Banda Oriental. The surface consists of extensive grassy plains, over which roam vast herds of cattle, horses, and sheep that constitute the wealth of the inhabitants. The chief exports are live stock, wool, beef, hides, tallow, extracts of beef, wheat and flax.

The government is vested in a President and a parliament consisting of a Senate of 19 members and a Chamber of Representatives numbering 69. The country was first settled by Spanish Jesuits in the seventeenth century. It became an independent State in 1828. In 1900 there was under cultivation 1,383,000 acres, while about 37,000,000 acres was devoted to pasturage. According to declarations of owners in 1902, there were in the republic 7,029,078 cattle, 659,726 horses, 17,927,071 sheep, 20,689 mules, 8,830 goats, and 51,696 hogs. From Fray Bentos there was shipped in 1907, \$2,156,000 worth of animal products. The principal sheep-raising departments are Durazno, with 2,796,168 sheep, on 2,571,600 acres, and Soriano, with 1,699,736 sheep, on 1,876,700 acres. Wine, tobacco and olives are also produced. Area, 72,210 square miles; population (1908) 1,140,799.

**Uruguay:**

American citizens aggrieved by acts of, referred to, 2014.

Treaty with, 2705, 2718, 2813, 4072.

Delay in exchange of ratifications of, referred to, 2915.

**Ushur, John P.**, treaty with Indians concluded by, 3394.

**Utah.**—One of the United States, often called Deseret, "The land of the honeybee"; motto, "Industry, 1847." It extends from lat. 37° to 42° north and from long. 109° to 114° west. It is bounded on the north by Idaho and Wyoming, on the east by Colorado and Wyoming, on the south by Arizona, and on the west by Nevada. The area is 84,970 square miles. The surface is mountainous and includes part of the Great Basin and the Great Salt Lake. The region formed a part of the territory ceded by Mexico in 1848. Lead and silver mining, smelting, and agriculture are the principal industries. Flour, canned fruit, and dairy products are the chief manufactures.

The first white settlements were made by Mormons in 1847. A Territorial government was organized in

## Utah—Continued.

1850. The polygamous practices of the Mormons kept the State out of the Union in spite of persistent agitation. A Constitution in which polygamy was forbidden was finally approved by Congress and the State was admitted on Jan. 4, 1896. A large Gentile population has lately gone into the State.

With the help of irrigation agriculture is the chief occupation of the people of Utah. In 1906 there were 300 incorporated irrigation companies in the State. The Federal Government project for irrigation includes about 80,000 acres of Utah lands. Land offices are located at Salt Lake City and Vernal. Statistics of agriculture reported to the Federal Census Bureau under date of April 15, 1910, placed the number of farms in the State at 20,676, comprising 3,397,699 acres, valued, with stock and improvements, at \$150,795,201. The average value of land per acre was \$29.28 against \$9.75 in 1900. The value of domestic animals, poultry, etc., was \$28,781,691, including 412,334 cattle, valued at \$8,948,702; 115,676 horses, \$9,999,835; 2,277 mules, \$157,497; 64,286 swine, \$445,653; 1,827,180 sheep, \$8,634,735; poultry, \$327,908. The yield and value of field crops was: Corn, 8,000 acres, 280,000 bushels, \$227,000; wheat, 225,000 acres, 5,025,000 bushels, \$3,518,000; oats, 87,000 acres, 3,839,000 bushels, \$1,828,000; rye, 5,000 acres, 78,000 bushels, \$55,000; potatoes, 15,000 acres, 2,100,000 bushels, \$1,785,000; hay, 380,000 acres, 950,000 tons, \$8,550,000. The State is one of the largest producers of copper, the output in 1910 being 125,185,455 pounds, while that of 1911 will exceed these figures, owing largely to the completion of the Bingham and Garfield Railway, connecting the mines and mills. The coal production was 2,517,809 short tons. The gold mined in 1911 was 227,834 fine ounces, worth \$4,709,747, and silver, 12,679,633 fine ounces, \$6,973,798. This places Utah first among the States in the production of silver. The report of the State Treasurer for the biennial period 1908-10 shows receipts of \$6,157,126; expenditures, \$5,153,220; balance Nov. 30, 1910, \$902,739.

According to the industrial census of 1905, there were 606 manufacturing establishments, with an aggregate capital of \$26,004,011, employing 9,031 persons, and converting \$24,939,827 worth of raw material

into finished goods valued at \$38,926,464. In 1906 six smelters in the Salt Lake Valley treated ores valued at \$50,000,000. In 1907, there were 2,276 miles of steam railways in the State and 160 miles of electric lines. Population in 1910, 373,351.

## Utah:

Admission of, into Union proclaimed, 6120.

**Utrecht, Peace of.**—A series of nine treaties, concluded in 1713-14 between the States that had taken part in the War of the Spanish Succession. The treaties were signed at Utrecht, Rastatt, and Baden, and provided for a general rearrangement of domain. Much of the territory parceled out and confirmed by these treaties has been retained by the respective

States to the present day. The clauses of particular interest to Americans were those by which France ceded to Great Britain Hudsons Bay and Straits, St. Kitts, Nova Scotia, Newfoundland and the adjacent islands. Other important provisions of these treaties were: Philip V. (of Bourbon) was confirmed King of Spain; the Kingdoms of France and Spain were to remain forever separate; France recognized the Protestant succession in England, and Prussia was recognized as a Kingdom. In addition to the possessions before mentioned, Great Britain received Gibraltar and Minorca. The Spanish Netherlands, Sardinia, the Milanese, and Naples were ceded to Austria. Spain ceded Sicily to Savoy. Prussia received Neuchâtel and parts of Gelderland and renounced its claims to Orange, and Portugal was confirmed in certain South American possessions. A notable cause of the treaty between Great Britain and Spain was the granting to a company of British merchants the exclusive right to send negro slaves to Spanish America.

**Utter, George H.,** b. Plainfield, N. J., July 24, 1854; printer by trade and publisher of *Westerly Sun*; fitted for college at Alfred (N. Y.) Academy and Westerly High School; graduated from Amherst College in 1877; aid on staff of Gov. Bourn (1883-1885); member of Rhode Island House of Representatives (1885-1889), the last year being speaker; member of the Rhode Island Senate (1889-1891); Secretary of State (1891-1894); lieutenant-governor in 1904 and governor in 1905 and 1906; elected to the 62d Congress from Rhode Island. Died in Providence, R. I., Nov. 3, 1912.

**Vaca, Antonio**, private land claim of, 4694.

**Vacancies in Public Offices**, power of President to make provisional appointments to fill, discussed, 3190.

**Vallandigham, Clement Laird** (1820-1871); Democratic politician; b. New Lisbon, Ohio; member of Congress 1858-63; leader of the "Copperheads" of the North during the Civil War; arrested by United States under Burnside and banished to the Confederate lines 1863, going thence to Canada; unsuccessful candidate for governor of Ohio 1863; prominent at the national Democratic convention of 1863, and took a large part in the nomination of McClellan; in the Grant-Greeley contest of 1872 he proposed a union of all of the forces opposed to Grant.

**Vallandigham Case.**—May 5, 1863, Clement L. Vallandigham, a lawyer and politician of Ohio, was arrested in accordance with orders issued by Gen. Burnside, of the United States Army, commanding the Department of Ohio. On the day following he was taken before a military commission, and subsequently tried, convicted and imprisoned for uttering opinions disloyal to the Union. May 19 the President commuted this sentence to banishment. Vallandigham applied to the Supreme Court for a writ of certiorari to review the proceedings of the commission, by which he claimed to have been unlawfully convicted. The Supreme Court, Justice Wayne delivering the opinion, decided that it had no power to review proceedings ordered by a general officer of the United States Army. Justices Nelson, Grier and Field concurred; Chief Justice Taney and Justice Miller were not present.

**Valparaiso, Chile**; population (1895) 220,756; sailors of the *Baltimore* assaulted at. (See *Baltimore*, The.)

**Van Bokkelen, Mr.**, imprisonment and release of, by Haitien authorities, discussed, 4918.

Claim arising out of, 5369, 5545.

**Van Buren, Martin** (eighth President United States):

Martin Van Buren was elected by the Democratic party in 1836. At the Democratic National Convention, held at Baltimore, May 20, he was nominated on the first ballot. A rival faction of the party nominated Hugh L. White, of Tennessee. Several rival candidates were named by States as National Republican or Whig candidates. Among these were William Henry Harrison, Daniel Web-

ster, and Willie P. Mangum. Twenty-six States participated in the election, Arkansas and Michigan having been recently admitted. At the election held Nov. 8, the popular vote was: Van Buren, 762,678; Harrison, 548,007; White, 145,396; and Webster, 42,247. The electoral vote, counted Feb. 8, 1837, gave Van Buren, 170; Harrison, 73; White, 26; Webster, 14; and Mangum, 11—all of South Carolina.

**Party Affiliation.**—In his youth, Van Buren was a zealous adherent of Jefferson; he was elected to the State senate of New York as a Clinton Republican; but in 1813 resumed friendly connections with Madison's administration. He disentangled the political complications that prevailed during the "era of good feeling" (1819-1821) in New York and brought about the election to the Senate of Rufus King, an old-school Federalist. Later, he became a generous supporter of Jackson, but in all of his political affiliations his conduct was marked by conservatism and moderation.

**Political Complexion of Congress.**—In the Twenty-fifth Congress (1837-1839) the Senate, of 52 members, was made up of 31 Democrats, 18 Whigs, and 3 Independents; and the House, of 242 members, was made up of 117 Democrats, 115 Whigs, and 10 Independents. In the Twenty-sixth Congress (1839-1841) the Senate, of 52 members, was composed of 22 Democrats, 28 Whigs, and 2 Independents; and the House, of 242 members, was made up of 103 Democrats, 132 Whigs, 6 Independents, and 1 vacancy.

**Finance.**—The panic of 1837 so much embarrassed the Government that President Van Buren convened Congress in special session in September, 1837, to consider the situation. In his Special Message (page 1541) he analyzes in detail the financial crisis and the causes which led to it. He then unfolds his plan for the institution of an independent treasury for the keeping and disbursing of Government funds. It was the return to the system in use in Washington's time and was departed from, despite the earnest warnings of Jefferson, when the United States Bank was chartered for the deposit of Government money. Congress was unwilling to sanction the plan, but the President, with unusual insistence, succeeded, near the close of his term of office, in securing the assent

**Van Buren, Martin—Continued.**

and cooperation to his subtreasury plan. The Whig Congress of 1842 repealed the measure and deposited the funds in selected private banks until 1846, when the subtreasury system was again adopted and has persisted to the present day. In his Fourth Annual Message (page 1827) the President gives a survey of the fiscal affairs of the country and says that "It will serve to illustrate more fully the principles by which I have been guided in reference to two contested points in our public policy which were earliest in their development and have been more important in their consequences than any that have arisen under our complicated and difficult, yet admirable, system of government. I allude to a national debt and a national bank. . . . Coming into office a declared enemy of both, I have earnestly endeavored to prevent a resort to either."

**Public Debt.**—The public debt of the United States during the administration of President Van Buren stood as follows:

January 1, 1838...	\$10,434,221.14
January 1, 1839...	3,573,343.42
January 1, 1840...	5,250,875.54
January 1, 1841...	13,594,480.73

**Commerce.**—The commercial status of the United States in the year 1840 is shown by the following statistical summary: Area, 2,059,043 square miles; population, 17,069,453; population per square mile, 8.29; wealth, \$7,135,780,000; money in circulation, \$186,305,488; imports, \$98,258,706; exports, \$123,668,932; miles of railway, 2,818; vessels built, 121,203 tons; vessels in deep-sea trade, 899,765 tons; vessels in coastwise trade, 1,280,999 tons; vessels on the Great Lakes, 54,199 tons; post-offices, 13,468; immigrants arrived, 84,066.

**Foreign Policy.**—It is regarded as one of the most creditable features of the Van Buren administration that it was able, despite the popular wish in some quarters, to remain neutral during the rebellion in Canada. The burning of the *Caroline* in this connection caused the President to issue his proclamations of neutrality (pages 1698, 1699). In this case, as in all others, the President consistently followed the course laid down in his Inaugural Address (page 1537) where he said: "We have no disposition, and we disclaim all right, to meddle in disputes, whether internal or foreign, that may molest other countries, regarding them in

their actual state as social communities, and preserving a strict neutrality in all their controversies."

Referred to, 3585.

**Vanderslice, Daniel**, treaty with Indians concluded by, 3274.

**Vaughan, Charles R.**, correspondence regarding northeastern boundary. (See Northeastern Boundary.)

**Venezuela**.—A federal Republic in the northern part of South America. It extends from lat. 1° to 12° north and from long. 60° to 73° west. It is bounded on the north by the Caribbean Sea, on the east by British Guiana and Brazil, on the south by

Brazil, and on the west by Colombia. The area is about 364,000 square miles. The Venezuelan coast range, a continuation of the Andes, traverses the northern portion. South of this are the llanos of the Orinoco, while south of the Orinoco the land is broken and mountainous. Venezuela was discovered by Columbus in 1498. Coffee, cacao, and tobacco are raised in the mountainous districts, cattle and sheep on the llanos, and gold, silver and copper are mined in considerable quantities in the mountainous districts.

The constitution of the country is modeled after that of the United States, and the administration is vested in a President, elected for 4 years, and a council of 6 ministers. The Congress consists of a Senate and a Chamber of Deputies. The Republic has been the scene of frequent revolutions. There are about a dozen states and territories, but their number and limits are frequently changed. In July, 1814, independence was declared and the Republic was recognized in 1818 as a part of the Republic of Colombia. It continued to be a part of Colombia with Ecuador and New Granada until 1829. The conflicting principles of the federalist and centralist parties have led to many civil wars and several changes of the constitution. The boundary question, a source of constant friction between Great Britain and Venezuela, was finally settled by arbitration on Oct. 3, 1899, when about 60,000 square miles on the frontier of British Guiana were awarded to Great Britain.

During recent years Venezuela has been in constant conflict with various European powers on account of the difficulty experienced in collecting the payment of the debts incurred by the government. In addition to external troubles the internal peace has been disturbed by a succession of civil wars and revolutions.

The area under coffee is estimated at from 180,000 to 200,000 acres, and for the year 1906-7, 42,806 tons of coffee were shipped abroad. The coffee estates number about 33,000, and those of cocoa 5,000.

Venezuela is rich in minerals and petroleum, but the veins are not worked extensively. The population (1911) was estimated at 2,713,703.

Award in favor of, 6070.

**Venezuela, Treaty with.**—Apart from certain claims conventions, the only diplomatic relation between the United States and Venezuela which survives is the protocol of 1903, by which United States claims against Venezuela were submitted to arbitration. The commission, consisting of two members (one chosen by the President of the United States, the other by the President of Venezuela) must sit at Caracas. An umpire must be appointed to preside over the deliberations, and it was agreed that the umpire should be chosen by the queen of the Netherlands. The commissioners, acting under oath, should determine after due investigation, the justice of the claims. Should the two commissioners be unable to reach a decision, the vote of the umpire should decide the questions.

**Vera Cruz (Mexico), Siege and Capture of.**—March 9, 1847, Gen. Scott, who had been ordered to Mexico to conduct an expedition against its capital city by way of Vera Cruz, landed a force of 12,000 men on the beach in the vicinity of that port. By March 22 the attacking forces were in position and the siege guns mounted. Gen. Scott summoned the governor of

# **Vera Cruz (Mexico), Siege and Capture of—Continued.**

Vera Cruz to surrender. Upon his refusal a bombardment was begun and kept up until the morning of the 26th, when overtures for surrender were made by Gen. Landero. Articles of capitulation were signed March 27. The Mexicans lost nearly 500 pieces of artillery, besides other arms and much ammunition. Five thousand prisoners were taken and paroled, and the best port of Mexico, with its famous and almost impregnable fortress of San Juan de Ulúa, was captured. The American loss was insignificant.

**Vera Cruz, Mexico;** population (1900), 960,570; battle of, referred to, 2385.

**Vermont.**—One of the United States; nickname, "The Green Mountain State"; motto, "Freedom and Unity." It extends from lat. 42° 44' to 45° 1' north and from long. 71° 38' to 73° 25' west. It is bounded on the north by Quebec (Canada), on the east by New Hampshire (separated by the Connecticut River), on the south by Massachusetts, and on the west by New York (separated in part by Lake Champlain). It has an area of 9,565 square miles. Vermont is traversed from north to south by the Green Mountains. It is an agricultural State and has extensive quarries of marble and granite. The manufacture of wood pulp is an important industry. It was explored by Champlain in 1609. The first settlement was at Brattleboro in 1724. Vermont was early claimed by both New Hampshire and New York. It was admitted to the Union in 1791.

Statistics of agriculture reported to the Federal Census Bureau, under date of April 15, 1910, place the number of farms in the State at 32,709, comprising 4,663,577 acres, valued, with stock and improvements, at \$145,399,728. The average value of land per acre was \$12.52. The value of domestic animals, poultry, etc., was \$22,642,686, including 430,314 cattle, valued at \$11,828,892; 80,781 horses, \$8,591,357; 94,821 swine, \$974,779; 118,551 sheep, \$538,991; poultry, \$607,787. The yield and value of the field crops for 1911 was: Corn, 46,000 acres, 1,886,000 bushels, \$1,509,000; wheat, 1,000 acres, 28,000 bushels, \$28,000; oats, 76,000 acres, 2,660,000 bushels, \$1,569,000; potatoes, 26,000 acres, 2,730,000 bushels, \$2,157,000; hay, 930,000 acres, 1,209,000 tons, \$16,926,000; tobacco, 100 acres, 170,000 pounds, \$27,200. The leading mineral

product of the State is marble, of which Vermont produces half of the country's output. The value for the last twelve months reported for the census of 1910 was \$4,679,960, while the granite output was valued at \$2,451,533. Slate, lime, clay, metallic paint, soapstone, sand and gravel are also marketed. The stone production exceeds that of Pennsylvania. The manufactures include hosiery and woolen goods, wood pulp, lumber and machinery, and employ capital to the extent of \$62,658,741. The output was valued at \$63,083,611. The employees numbered 33,106, and the wages paid totalled \$15,221,059. The bonded debt of the State is \$135,000, and the tax rate \$3.50 per \$1,000. The annual receipts of the State Treasurer at last report were \$1,823,390; expenditures, \$1,871,166.

There are forty-seven national banks, holding \$7,544,364 to the credit of 21,830 depositors; and twenty-three loan and trust companies, holding \$18,878,526 to the credit of 52,135 depositors. The savings banks hold \$43,132,268 to the credit of 108,298 depositors.

In 1906 there were 1,073 miles of steam railways and 122 miles of electric lines. The population in 1910 was 355,956.

Whaling interfered with by Russian vessels, 3794.

**Veterans of Indian Wars of the United States.**

Instituted by officers of the United States Army at Philadelphia, April 23, 1896. The objects are "to perpetuate the faithful services, heroism, and privations of the officers and soldiers of the Army of the United States of America, as well as of the auxiliary forces of the several States of the Union, in their successive campaigns conducted against a savage foe on our frontiers, in the interests of civilization, and for the settlement and defense of our Territories at different periods in the history of our common country since the close of the War of the Revolution; and also to collect and preserve for publication a record of these services and other historical data relating thereto, as well as to unite in a fraternal bond of union all those who are entitled to membership therein."

**Veto.**—The act by which the executive refuses his approval of a measure of the legislative body with which he is associated. The Constitution gives the President of the United States power to veto any act of Congress by refusing to sign the bill after its passage. In the Colonies (except Rhode Island and Connecticut) the governors had power to veto acts of the colonial legislatures. Massachusetts was the first of the original States to grant the veto power to its governor. This was in 1780. In the Convention of 1787 several veto plans were discussed, one of which proposed to associate the Supreme Court with the President in the exercise of the power. The plan finally adopted resembled that in use in Massachusetts. If the President refuses to sign an act, it is returned to the House in which it originated with his reasons for refusing his signature. That House may then proceed to reconsider the act, and if it again passes both Houses with a

majority of two-thirds it becomes a law. The Constitution also provides that "if any bill shall not be returned by the President within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law in like manner as if he had signed it, unless the Congress by their adjournment prevent its return, in which case it shall not be a law" (18). The veto power was used quite sparingly by the early Presidents.

Following is the number of veto messages sent to Congress by the several Presidents. Those whose names are not mentioned sent no veto: Washington, 2; Madison, 6; Monroe, 1; Jackson, 9; Tyler, 8; Polk, 3; Pierce, 9; Buchanan, 7; Lincoln, 3; Johnson, 22; Grant, 46; Hayes, 8; Arthur, 4; Cleveland, first term, 301; Harrison, Benj., 19; Cleveland, second term, 42; McKinley, 6, and Roosevelt, 15.

**Veto Messages.** (See the several Presidents; the several subjects.)

**Veto, Pocket.**—The power of the President to prevent the enactment into law of a bill presented to him within 10 days before the adjournment of Congress, without sending in a refusal to sign or his objections in writing, is known as a pocket veto.

**Veto Power** discussed by President—Polk, 2512.

Taylor, 2561.

**Vetoes, Pension.** (See Cleveland, Grover; Grant, Ulysses S.)

**Vetoes, Pocket.** (See the several Presidents; the several subjects.)

**Vice-Admiral.**—An honorary rank in the United States Navy created by Congress Dec. 21, 1864, and conferred upon David G. Farragut. At the time of its creation it was the highest grade in the Navy. Two years later (July 25, 1866) Congress created the rank of admiral and bestowed it upon Farragut, making David G. Porter vice-admiral. Oct. 17, 1870, after the death of Admiral Farragut, Porter was promoted to the vacancy and Rear-Admiral Stephen C. Rowan was made vice-admiral. On his death in 1890 the grade became extinct. During the colonial period it was customary for the royal governor to be appointed vice-admiral, which made him head of the colonial admiralty courts. (See also Admiral.)

**Vice-Admiral**, creation of grade of, recommended, 3450, 6423.

**Vice-President of United States.**—The Constitution provides for the office of Vice-President. His duty is to pre-

**Vice-President of United States—Continued.**

side over the Senate, and in case of the removal, death, resignation, or disability of the President succeed him. His salary is \$12,000 per annum. Until the adoption of the twelfth amendment, in 1804, the candidate for President receiving next to the highest number of votes was declared Vice-President. Five Vice-Presidents have succeeded to the Presidency, by reason of the death of the President, viz.: John Tyler, who succeeded William Henry Harrison in 1841; Millard Fillmore, who succeeded Zachary Taylor in 1850; Andrew Johnson, who succeeded Abraham Lincoln in 1865; Chester A. Arthur, who succeeded James A. Garfield in 1881; and Theodore Roosevelt who succeeded William McKinley in 1901. The attempt was made in 1841 to give Tyler only the title and rights of "Acting President," but he claimed the full office of President. Six Vice-Presidents have died in office, namely: George Clinton, Elbridge Gerry, William R. King, Henry Wilson, Thomas A. Hendricks and James S. Sherman. Only one resigned, John C. Calhoun.

A list of Vice-Presidents follows: John Adams, Massachusetts; Thomas Jefferson, Virginia; Aaron Burr, New York; George Clinton, New York; Elbridge Gerry, Massachusetts; Daniel D. Thompson, New York; John C. Calhoun, South Carolina; Martin Van Buren, New York; Richard M. Johnson, Kentucky; John Tyler, Virginia; George M. Dallas, Pennsylvania; Millard Fillmore, New York; William K. King, Alabama; John C. Breckenridge, Kentucky; Hannibal Hamlin, Maine; Andrew Johnson, Tennessee; Schuyler Colfax, Indiana; Henry Wilson, Massachusetts; William A. Wheeler, New York; Chester A. Arthur, New York; Thomas A. Hendricks, Indiana; Levi P. Morton, New York; Adlai E. Stevenson, Illinois; Garret A. Hobart, New Jersey; Theodore Roosevelt, New York; Charles Warren Fairbanks, Indiana; James Schoolcraft Sherman, New York.

**Vicksburg (Miss.), Siege and Capture of.**—The night after the battle of the Big Black, May 17, 1863, McPherson's and McClernand's corps crossed the river on floating bridges made of bales of cotton covered with plank. Sherman, who carried the only pontoon train in the army, passed over at Bridgeport, a few miles above.

The whole army then moved upon Vicksburg. Sherman, still holding the right, marched toward the Yazoo River, and on the 19th rested his right on the Mississippi, within plain view of Porter's gunboats. McPherson followed Sherman with the Seventeenth Army Corps, halting where the latter had turned off. McClernand came up by the Jackson road and deployed to the left. The investment of Vicksburg was thus complete by May 19, 1863. At this time Grant's army was over 30,000 strong. The Federal force was increased to nearly 70,000 during the siege. The Confederate garrison, commanded by Gen. Pemberton, consisted of about 25,000 or 30,000 men and 102 guns. Vicksburg's fortifications were bastioned earth-works. The place was provisioned for about two months.

On the afternoon of the 19th Grant ordered a general assault, which was repulsed with a loss to the Federals of 942. Three days later he made another attack, but the assailants succeeded merely in planting their flags on the outer slopes of the bastions. The city was found to be too strong to be taken by assault. The Federal loss on the 22d was 3,199. During the skirmishing on the 18th, 20th, and 21st of May the Union army lost 241 men. Porter assisted materially in these attacks by a constant fire from his gunboats and mortar boats. Pemberton soon began to feel the effects of the siege. By the end of May his meat rations were reduced one-half, and not long thereafter the bacon supply was entirely exhausted. There were no signs of the arrival of reinforcements and 6,000 men lay sick and wounded in the hospitals and private houses. Some of his men had been in the trenches 47 days and nights. Besides, they were now constantly exposed to bursting shells and the fire of sharpshooters.

Thus despairing of aid, his resources about exhausted, the Confederate commander resolved to capitulate. July 3, 1863, Vicksburg was surrendered to Grant. Gen. Grant accorded magnanimous terms. The entire garrison was paroled and was allowed to depart with rations to last them beyond the Union lines. The results of the campaign were the defeat of the Confederates in several engagements, the occupation of the capital of Mississippi, and the capture of the important post of Vicks-

**Vicksburg (Miss.), Siege and Capture of—***Continued.*

burg with its garrison and munitions of war, a loss to the Confederates of over 30,000 prisoners and several thousand killed and wounded. Among the dead were Generals Tracy, Tilghman, and Green. Grant's losses in the campaign, from the first skirmish at Port Gibson, May 1, to the surrender of Vicksburg, were 1,511 killed, 7,396 wounded, and 453 missing—a total of 9,360.

**Vienna, Austria:**

International Exposition in, discussed, 4142, 4190.

International Patent Congress in, 4215.

**Villeré's Plantation (La.), Battle of.—**

After the battle of Lake Borgne, La. (q. v.), the British expedition pushed on toward New Orleans by way of the Bayou Bienvenue and Villeré's Canal. Dec. 23, 1814, within an hour after hearing that the British were approaching, Jackson had 1,800 of his troops on the march to meet them. Half of the invading army, some 2,500 men, had approached to within 9 miles of New Orleans without serious check. The schooner *Carolina* dropped down the river to a point opposite Villeré's and opened a terrible fire upon the invading army, killing or maiming 100 men in 10 minutes. The general engagement lasted about two hours. Both combatants retired from the field in the darkness. The loss of the Americans was 213, while that of the British was about 400 men.

**Viollier, Lewis W.,** consular clerk, removal of, from office and reasons therefor, 4067.

**Virginia.**—One of the thirteen original States. Nicknames, "Old Dominion," "Mother of States," "Mother of Presidents"; motto, "Sic semper tyrannis" ("Be it ever thus to tyrants"). Virginia is bounded on the northwest and north by West Virginia (separated by the Alleghany Mountains), on the north and northeast by Maryland and the District of Columbia (separated by the Potomac River), on the east by the Chesapeake Bay and the Atlantic Ocean, on the south by North Carolina and Tennessee and on the southwest by Kentucky. The county of Accomac lies east of the Chesapeake. The area of the State is 42,450 square miles. Virginia is traversed by the Blue Ridge Mountains from northeast to southwest. It is level toward the southeast. It is one of the foremost

States in the Union in the production of tobacco. The State also produces largely wheat, corn, vegetables, fruit, timber, coal, iron, salt, and building stone, and manufactures flour, leather, iron, and tobacco.

It was the first settled of the British American Colonies, the settlement having been made by the English at Jamestown in 1607. Virginia became a royal colony in 1624. It was the largest and most influential of the colonies. It took a conspicuous part in the events leading up to the Revolution. Virginia ceded to the United States all its territory beyond the Ohio River in 1784. It ratified the Constitution in 1788. This great State furnished 4 of the first 5 Presidents, and altogether 5 of the Presidents of the United States. It seceded from the Union April 17, 1861, and became one of the principal battle grounds of the Civil War. The State was readmitted to the Union in 1870.

Statistics of agriculture reported to the Federal Census Bureau, under date of April 15, 1910, place the number of farms in the State at 184,018, comprising 19,495,636 acres, valued, with stock and improvements, at \$635,065,383. The average value of land was \$20.24, against \$10.08 in 1908. The value of domestic animals, poultry, etc., was \$74,891,538, including 859,067 cattle, valued at \$21,124,071; 330,424 horses, \$34,857,610; 60,022 mules, \$7,595,516; 767,635 swine, \$4,165,630; 804,873 sheep, \$3,300,026; poultry, \$3,395,962. The yield and value of the field crops for 1911 was: Corn, 1,980,000 acres, 47,520,000 bushels, \$34,690,000; wheat, 750,000 acres, 9,000,000 bushels, \$8,640,000; oats, 194,000 acres, 3,880,000 bushels, \$2,095,000; rye, 48,000 acres, 552,000 bushels, \$491,000; potatoes, 95,000 acres, 4,275,000 bushels, \$4,104,000; hay, 437,000 acres, 280,000 tons, \$5,740,000; tobacco, 160,000 acres, 128,000,000 pounds, \$12,288,000. Virginia now ranks next to Kentucky (which is first) as a tobacco-growing State. There are 946 vessels engaged in fishing, employing 20,066 people. The value of the products, largely oysters, is \$4,715,744. The leading minerals are coal and iron.

The mineral output for 1907 was \$19,313,182. The Chesapeake Bay oyster fisheries are important.

In 1906 there were 4,087 miles of steam railway and 497 miles of electric line. The population in 1910 was 2,061,612.

**Virginia** (see also *Confederate States*; *Richmond*):

Alexandria County retroceded to, by proclamation, 2320.

Referred to, 3983.

War between the States, course regarding, pursued by, 3224.

Withdrawal of, from Union, discussed, 3224.

**Virginia Coupon Cases.**—A series of eight cases in which the United States Supreme Court in 1884 denied the right of a State to pass laws impairing the obligation of contracts. An act of the Virginia legislature in 1871 authorized the receipt of coupons of the State's funded debt in payment of taxes and debts due the State. An act of 1882 required payment of tax dues in "gold, silver, United States Treasury notes, national-bank currency, and nothing else." The tax collectors thereupon refused to accept the coupons in payment of taxes, as authorized by the law of 1871. The court decided the law of 1882 void, and judgment was found for the plaintiff taxpayers.

**Virginia Plan.**—At the opening of the Convention of 1787 to amend the Articles of Confederation, Edmund Randolph, of Virginia, on behalf of his delegation, set forth the defects in the old articles and submitted a series of 15 resolutions drawn up by

Madison. This was the first plan of revision presented to the convention and is sometimes called the "Randolph Plan" or the "National Plan." It provided for representation according to population in two branches of Congress—the first chosen by the people, the second by the State legislatures; Congressional control of taxation and commerce; Congressional veto of State enactments; an Executive chosen by Congress; a limited veto by the Executive and part of the judiciary upon acts of Congress. There were other and less important provisions. The Constitution as framed and ratified was based on the Virginia plan, but quite a number of its leading features were either rejected altogether or greatly modified.

**Virginia Resolutions.**—A set of nine resolutions drawn up by James Madison, then a member of the Virginia legislature, passed by that body, and signed by the governor Dec. 24, 1798. The reason for the passage of these resolutions and similar ones by Kentucky about the same time was to give expression to the feeling that had been growing since 1791 that the Federal party was endeavoring to obtain greater power than that conferred upon the Government by the Constitution. The direct cause of their adoption was the passage of the alien and sedition laws (q. v.) by Congress. The resolutions deplored the broad construction given to the Constitution, as tending toward monarchical government. They declared the Union to be a compact between the States composing it, and that when this compact was infringed each State might interpose to protect itself. The alien and sedition laws were denounced as "palpable and alarming infractions of the Constitution." (See also *Alien and Sedition Laws*; *Kentucky Resolutions*.)

**Virginius, The.**—Oct. 31, 1873, the *Virginius*, an American schooner suspected of carrying men and arms from New York to the Cuban insurgents, was captured by the Spanish gunboat *Tornado* on the high seas near Jamaica. Capt. Fry and 35 of the crew and 4 Cuban passengers were executed. The affair created much ill feeling between the United States and Spain. The latter country made such reparation as lay within her power by disclaiming any intention to insult the United States, by paying an indemnity, and by surrendering 102 remaining prisoners. It was

**Virginus, The—Continued.**

proved that the *Virginus* was not entitled to sail under our flag. She foundered at sea off Cape Fear Dec. 19, 1873, while on her way to New York.

**Vizcaya, The**, mentioned, 6317.

**Volstead, Andrew J.**; b. Goodhue Co., Minn., in 1860; mayor of Granite Falls, and for fourteen years county attorney of Yellow Medicine County; elected to the 58th, 59th, 60th, 61st, and 62d Congresses from Minnesota.

**Volunteers.**—Persons who enter the military service of their own free will for temporary duty, as distinguished from regulars of a permanent military establishment. By an act passed in 1792 the American Congress recognized the existence in a number of States of volunteer organizations not included in the militia of those States. The Government has since from time to time raised volunteers for temporary purposes. Such troops are United States rather than State forces, and their officers are to be appointed by the President. A provisional force of 25,000 volunteers was

authorized by Congress for the war with England in 1812. During the Mexican War 73,500 volunteers were enlisted. During the Civil War a number of calls were made for volunteers, aggregating nearly 2,800,000 enlistments. In the war with Spain over 200,000 volunteers were enlisted. (See also Militia; Army.)

**Von Scholten, Maj.-Gen.**, Danish minister to United States, correspondence with Secretary of State, referred to, 1094.

**Von Steuben**, presentation of replica of, to Germany, 8049.

**Votes for President, Count of.**—The electoral votes of the States are received by the President of the Senate. The two Houses meet in joint session on a day fixed by law, and the President of the Senate opens the returns and hands them to tellers, who count the votes and announce the result. In 1876 two sets of returns were received from certain States. A special electoral commission was appointed by Congress to decide which were the regular returns. In 1887 Congress passed a law providing that contests over electors should be finally decided under State laws, as far as possible.

**Vote of Thanks.** (See Thanks of Congress.)

**Vreeland, Edward Butterfield**; b. Cuba, Alleghany Co., N. Y., in 1857; admitted to the practice of law in 1881; engaged principally in the banking and oil business; elected to the 56th, 57th, 58th, 59th, 60th, 61st, and 62d Congresses from New York.

**Wabash and Erie Canal**, grant of land in aid of, to Indiana, 1725.

**Wabash Indians.** (See Indian Tribes.) Instructions to commissioners in making treaty with, 6271.

Troops must be called for, to suppress, 53, 74.

Treaty with, 127.

**Wabash River**, act for improvement of navigation on, reasons for applying pocket veto to, 1337.

**Wade, James F.**, member of military commission to Cuba, 6322.

**Wadsworth, James S.**, military governor of District of Columbia, 3311.

Executive clerks to be organized under direction of, 3323.

**Wadsworth, Jeremiah**, commissioner to treat with Indians, 190, 249.

**Wagner, Peter**, director of Bank of United States, nomination of, and reasons therefor, 1260.

**Wageworkers** (see also Labor):

Condition of, discussed by President—

Roosevelt, 7032.

Compensation for when killed or injured in discharge of duty, recommended, 7586, 7592.

**Wagner, Reinhardt**, arrest of, at Lodz, Russia, 4789, 4793.

**Wahpeton Indians.** (See Indian Tribes.)

**Wainwright, Jonathan M.**, thanks of Congress to, recommended, 3277.

**Wainwright, Richard**, thanks of Congress to, recommended, 3277.

**Waishkey, John, Jr.**, mentioned, 4665.

**Waite, Morrison Remick**; jurist; b. Lyme, Conn., Nov. 29, 1816; grad. Yale, A. B. 1837, A. M. 1840; admitted to the bar and removed to Toledo, Ohio, 1850; counsel for the United States before the arbitration board at Geneva, Switzerland, in 1872-73; appointed by President Grant chief justice U. S. Supreme Court, 1874; received honorary degrees from many colleges; died Washington, D. C., March 23, 1888.

**Waite, Morrison R.**, Chief Justice, death of, announced, and honors to be paid memory of, 5349.

**Wake and Other Islands.**—The United States flag was hoisted over Wake Island in January, 1899, by Commander Taussig, of the *Bennington*, while proceeding to Guam. It is a small island in the direct route from Hawaii to Hongkong, about 2,000 miles from the first and 3,000 miles from the second.

The United States possesses a number of scattered small islands in the Pacific Ocean, some hardly more than

rocks or coral reefs, over which the flag has been hoisted from time to time. They are of little present value and mostly uninhabited. The largest are Christmas, Gallego, Starbuck, Penrhyn, Phoenix, Palmyra, Howland, Baker, Johnston, Gardner, Midway, Morell, and Marcus islands. The Midway islands are occupied by a colony of telegraphers in charge of the relay in the cable line connecting the Philippines with the United States and a camp of United States marines, in all about forty persons.

The Santa Barbara group is a part of California and the Aleutian chain, extending from the peninsula of Kamchatka in Asiatic Russia to the promontory in North America which separates Bering Sea from the North Pacific, a part of Alaska.

**Wakefield, Va.**, appropriation for approaches to monument at, to mark birthplace of Washington, recommended, 4803.

**Walker, John G.**, chairman of Nicaragua Canal Commission, 6326.

**Walker, Robert J.:**

Correspondence with President regarding contribution to be levied upon Mexico, 2373.

Governor of Kansas, 3003.

**Walker, William**, arrest of, in Nicaragua and complaints arising therefrom, discussed, 2997.

Referred to, 3001, 3017.

**Walker vs. Jennison.**—A slave case decided by the Massachusetts Supreme Court in 1783. It placed a construction upon the State constitution which soon afterwards put an end to slavery in the State. A negro servant had been whipped and imprisoned by his master, and public indignation was aroused by the offense. The owner of the slave was prosecuted. The Supreme Court, sitting in Worcester, found the defendant guilty of assault and imposed a fine upon him. The holding of the court was that the State constitution of 1870, in declaring all men free and equal, had abolished slavery in Massachusetts. As a matter of strict fact, runaway slaves were advertised for in the Boston newspapers after the decision had been promulgated. Nevertheless, the institution of slavery very soon after 1783 came to an end in Massachusetts.

**Walker River Reservation, Nev.**, right of way for railroad through, 4736, 4776, 4953, 5178.

**Walla Walla Indians.** (See Indian Tribes.)

- Wallace, **Lewis**, member of court to try assassins of President Lincoln, etc., 3534.
- Waller, **John L.**, arrest and imprisonment of, by military authorities of France, discussed, 6060, 6098.
- Wallowa Forest Reserve, proclaimed, 7107.
- Walsh, **R. M.**, special agent to Santo Domingo, correspondence of, referred to, 2696.
- Walter, **Squire**, act granting pension to, vetoed, 5419.
- Walker, **Thomas U.**, architect for extension of Capitol, 2680.
- Walworth, **Reuben H.**, nomination of, as associate justice of Supreme Court, withdrawn, 2181.
- Wampum.—An Indian word meaning "white" and referring to strings of white beads worn for ornament and used as a medium of exchange. The beads were made of clam shells, through which holes had been drilled, and were strung upon a thread. Tradition says the Narragansets were the first Indians to use wampum. This is perhaps true as regards the beads made of the quahog or clam shell of the coasts of Rhode Island and Connecticut, though periwinkle shells were also used. Its use as money spread from the coast Indians inland. It was also used by the colonists of New England and the Middle States, having been deemed legal tender from 1627 to 1661. Beads of black or dark purple were rated at double the white wampum. Wampum was known to the Dutch settlers under the name of "sewon" or "zeewand." Payments were made by cutting off the desired number of beads. They were also used in the simple arithmetical calculations of the Indians.
- Wanderer, **The**, landing of, with cargo of slaves, 3065, 3086.
- War (see also *Algerine War*; *Indian Wars*; *Mexican War*; *Revolution*; *Revolutionary War*; *Spanish-American War*; *Tripolitan War*; *Civil War*; *War of 1812*; *Wars, Foreign*): Instant redress, conferring of authority upon President to demand, recommended, 3100.

 Payment of, referred to, 4148.
- War College, **Naval**. (See *Naval War College*.)
- War Department, **The**.—*History*.—An Executive Department of the Government established by an act of the First Congress under the Constitution, on Aug. 7, 1789. The work then taken up by the Department was begun by the Continental Congress, that body on June 15, 1775, having elected George Washington "to command all the continental forces raised or to be raised for the defense of American liberty." An Adjutant-General, Quartermaster-General, and Commissary-General were also appointed, and on Dec. 26 of the following year Congress gave General Washington power to appoint all officers below the grade of Brigadier-General and to fill vacancies in all departments of the American Army.
- In response to the recommendation of Washington, Congress, on June 13, 1776, created the Board of War (see *War and Ordnance, Board of*) which was the germ of the modern War Department. The office of Secretary of War was created in 1781 and was filled by Henry Knox from 1784. When the War Department was formally established in 1789 he was made the first Secretary under the Constitution.
- The office of Adjutant-General was formally created by an act of Congress of March 3, 1813, there having been no regular Adjutant-General from the disbanding of the Army in 1783 up to that time. An act of March 5, 1792, created the dual office of Adjutant and Inspector-General, but on the reorganization of the De-

**War Department, The—Continued.**

partment this office was changed to that of Adjutant-General. By an act of Congress approved April 23, 1904, this office was united with the Record and Pension Office to form the office of the Military Secretary. This is the Department of records, orders and correspondence of the army and militia, the Military Secretary being charged with transmitting all orders of the Secretary of War, conducting the recruiting service, etc. The Inspector-General's office was established under the Constitution by an act of March 3, 1813, although in 1777 an Inspector-General of Cavalry, and of Ordnance and Military Manufactures, had been appointed. It is the duty of the Inspector-General to inspect all military commands, stations, schools, armories, arsenals, fortifications and public works carried on by the War Department.

The office of Judge-Advocate General of the Army was created in 1775, was discontinued in 1802, and existed again from 1812 to 1821. An act of March 2, 1849, authorized the President to appoint a Judge-Advocate of the Army, but in 1862 the title was changed to that of Judge-Advocate General. This office was made head of the Bureau of Military Justice, created June 20, 1864, but by the act of July 5, 1884, the office of Judge-Advocate General and the Bureau of Military Justice were united under the designation of Judge-Advocate General's Department, of the War Department. It is the duty of the Judge-Advocate General to review the proceedings of all courts-martial, courts of inquiry and military commissions, and give opinions on legal questions arising under laws and regulations pertaining to the War Department.

The Quartermaster's office was formally organized in the War Department by an act of Congress of March 28, 1812, although provision had been made for a Quartermaster-General by the Continental Congress as early as June 16, 1775. Various enactments were also made concerning the office up to 1785, when it ceased to exist until, as stated, it was finally organized in 1812.

It is the duty of the Quartermaster's Department to furnish the army with military supplies; provide transportation for troops; construct military roads and bridges; maintain national cemeteries; and provide supplies for the militia of the various

States. The earliest legislation concerning the subsistence of the army was the resolution of the Continental Congress of June 16, 1775, creating the office of Commissary-General of Stores and Provisions. This office was succeeded on June 10, 1777, by two offices, the Commissary-General of Purchases and the Commissary-General of Issues, which acted under the direction of a committee of Congress until Nov. 25, 1779, when they were placed under the supervision of the War Board. The clothing of the troops was provided for by the ordinance of June 17, 1777, which created the office of Clothier-General, this office being placed under the direction of the War Board on April 10, 1782. An act of the Continental Congress of July 10, 1781, directed the Superintendent of Finance to procure all supplies by contract; and again on March 8, 1792, the Congress under the Constitution placed a similar duty upon the Treasury Department, which had succeeded the Superintendent of Finance. The latter act was repealed on July 16, 1798, and the Secretary of War was required to provide subsistence for the army. An act of March 16, 1802, provided for three military agents to do this work, but this system was abolished by an act of March 28, 1812, which created the office of Commissary-General of Purchases. This in turn was abolished by an act of Aug. 23, 1842, and its duties transferred to the Quartermaster's Department.

The office of Commissary-General as it exists to-day was first established by an act of April 14, 1818, the head of this office being later referred to as Commissary-General of Subsistence. He provides and issues rations, and distributes articles authorized to be kept for sale to the officers and men of the army. A hospital department for the army was created by Congress on July 27, 1775, its head being called Director-General and Chief Physician. By an act of March 3, 1813, the office of Physician and Surgeon-General was created and on April 14, 1818, the medical branch of the War Department was given a permanent head with the title of Surgeon-General. The office of Paymaster-General was provided by the resolution of Congress of June 16, 1775, but on March 23, 1787, it was merged with that of Commissioner of Army Accounts. A Paymaster of the Army was appointed by an act of May 8, 1792, and the Pay Department was

**War Department, The—Continued.**

definitely organized in the War Department under an act of April 24, 1816. The Corps of Engineers was created on March 11, 1779, disbanded in November, 1783, but restored by the acts of May 9, 1794, and March 16, 1802. As early as July 25, 1777, however, there had been a "geographer and surveyor of roads" appointed. By an act of March 3, 1818, the appointment of topographical engineers was authorized, and in August, 1818, a Topographical Bureau was established in the War Department under the direction of the Secretary of War and the Chief Engineer. On July 5, 1838, an independent corps of topographical engineers was created, but by the act of March 3, 1863, it was merged with the Corps of Engineers. Besides those duties germane to its military nature, the Corps of Engineers conducts the river and harbor improvements. To consider ways and means of supplying the continental troops with arms and ammunition, a committee was appointed by the Continental Congress on May 27, 1775; and although a Commissioner of Artillery Stores (later called Commissioner-General of Artillery Stores) was appointed, the business of providing arms and ammunition was conducted by a secret committee of the Continental Congress and the Board of War.

An act of April 2, 1794, authorized the President to appoint an officer who, under the War Department, should perform ordnance duty, and on May 14, 1812, the Ordnance Department was formally established in the War Department. By an act of March 2, 1820, it was merged with the artillery but was reorganized as an independent bureau by an act of April 5, 1832. The Signal Corps was practically created June 21, 1860, when Congress authorized the addition of a signal officer to the staff of the army. The Signal Corps, by that name, was organized by an act of March 3, 1863. The duties now performed by the Weather Bureau were added to those of the Signal Corps in 1870, but in 1890 that work was transferred to the Department of Agriculture. The Chief Signal Officer has charge of all means of military communication. A Division of Customs and Insular Affairs was established in the War Department in December, 1898, for conducting the business relating to the civil government

of Cuba, Puerto Rico, and the Philippine Islands. In 1900 the designation of this division was changed by Department orders to that of Division of Insular Affairs, and by an act of July 1, 1902, it was definitely established by law as a bureau of the War Department.

To better coordinate the various offices of the Department, the General Staff Corps was established by an act of Congress approved Feb. 14, 1903. It consists of a Chief of Staff, who took the place of the Commanding General of the Army; two general officers detailed by the President from the regular army not below the grade of brigadier-general, and forty-two officers of minor grade similarly detailed by the President. It is the duty of the General Staff Corps to prepare plans for the national defense, and for the mobilization of the military forces in time of war; to assist the Secretary of War in increasing the efficiency of the military establishment; and in case of war to act as a board of strategy. The Chief of Staff, under the direction of the President, or the Secretary of War under the direction of the President, has supervision of all troops of the line, the Adjutant-General's, Inspector-General's, Judge-Advocate General's, Quartermaster's, Subsistence, Medical, Pay, and Ordnance Departments, the Corps of Engineers, and Signal Corps. In administering the affairs of the Department, the Secretary is aided by an Assistant Secretary, as well as by the chiefs of the various officers, bureaus, divisions and corps named above, who are officers of the regular army of the United States. Two bureaus of the Department not now in existence are: The Bureau of Refugees, Freedmen and Abandoned Lands (1865-1873), which aided in the work of reconstruction after the Civil War; and the Bureau of the Provost-Marshal General (1863-1866), which had to do with the enrolling and calling out of the national forces and the arrest of deserters and spies. (See Army.)

**Official Duties.**—The Secretary of War is head of the War Department, and performs such duties as are required of him by law or may be enjoined upon him by the President concerning the military service. He is charged by law with the supervision of all estimates of appropriations for the expenses of the department, including the military establishment; of all purchases of Army

**War Department, The—Continued.**

supplies; of all expenditures for the support, transportation, and maintenance of the Army, and of such expenditures of a civil nature as may be placed by Congress under his direction. He also has supervision of the United States Military Academy at West Point and of military education in the Army, of the Board of Ordnance and Fortification, of the various battle-field commissions, and of the publication of the Official Records of the War of the Rebellion. He has charge of all matters relating to national defense and seacoast fortifications, Army ordnance, river and harbor improvements, the prevention of obstruction to navigation, and the establishment of harbor lines; and all plans and locations of bridges authorized by Congress to be constructed over the navigable waters of the United States require his approval. He also has charge of the establishment or abandonment of military posts, and of all matters relating to leases, revocable licenses, and all other privileges upon lands under the control of the War Department.

**Assistant Secretary of War.**—To the Assistant Secretary of War is assigned the general direction and supervision of all matters relating to rivers and harbors; bridges over navigable waters of the United States; leases, revocable licenses, and all other privileges upon lands under the control of the War Department; inspections relating to the military establishment; recruiting service, discharges, commutation of rations, courts-martial, and other questions relating to enlisted men, including clemency cases and matters relating to prisoners at military prisons and penitentiaries. He also has charge of all matters relating to the militia; the supervision of miscellaneous claims and accounts; matters relating to national cemeteries, boards of survey, open-market purchases, and medals of honor. The Assistant Secretary of War is also vested with authority to decide all cases which do not involve questions of policy, the establishment or reversal of precedents, or matters of special or extraordinary importance.

**Assistant and Chief Clerk.**—The Assistant and Chief Clerk of the War Department is the head of the Office of the Secretary of War. and as such has charge of the records and files, and supervision of the receipt, distribution, and transmission of the

official mail and correspondence of that office, and is charged with the administrative action required by law to be taken in connection with the settlement of disbursing officers' accounts that do not relate to the different staff corps of the Army. He has general supervision of matters relating to civilian employees in and under the War Department; printing and binding and advertising for the War Department and the Army; appropriations for contingent expenses, stationery, rent of buildings; and the department's telegraph and telephone service; and performs such other duties as may be required by the Secretary of War.

**General Staff.**—The General Staff Corps was organized under the provisions of act of Congress approved Feb. 14, 1903. Its principal duties are to prepare plans for the national defense and for the mobilization of the military forces in time of war; to investigate and report upon all questions affecting the efficiency of the Army and its state of preparation for military operations; to render professional aid and assistance to the Secretary of War and to general officers and other superior commanders and to act as their agents in informing and coordinating the action of all the different officers who are subject to the supervision of the Chief of Staff, and to perform such other military duties not otherwise assigned by law as may be from time to time prescribed by the President.

The Chief of Staff, under direction of the President, or of the Secretary of War, under the direction of the President, has supervision of all troops of the line, of the Adjutant-General's Department in matters pertaining to the command, discipline, or administration of the existing military establishment, and of the Inspector-General's, Judge-Advocate General's, Quartermaster's, Subsistence, Medical, Pay, and Ordnance Departments, the Corps of Engineers and the Signal Corps, and performs such other military duties not otherwise assigned by law as may be assigned to him by the President. For purposes of administration the office of the Chief of Staff constitutes a supervising military bureau of the War Department. Duties formerly prescribed by statute for the Commanding-General of the Army as a member of the Board of Ordnance and Fortification and of the Board

**War Department, The—Continued.**

of Commissioners of the Soldiers' Home are performed by the Chief of Staff or some other officer designated by the President.

**Division of Militia Affairs.**—The Division of Militia Affairs is vested with the transaction of business pertaining to the organized and unorganized militia of the United States, its jurisdiction embracing all administrative duties involving the armament, equipment, discipline, training, education, and organization of the militia; the conduct of camps of instruction and participation in the field exercises and maneuvers of the Regular Army; the mobilization and relations of the militia to the Regular Army in time of peace; and all matters pertaining to the militia not herein generically enumerated which do not, under existing laws, regulations, orders, or practice, come within the jurisdiction of any other division or bureau of the War Department. It is the central office of record for all matters pertaining to the militia not in the military service of the United States.

**Military Bureaus.**—The chiefs of the military bureaus of the War Department are officers of the Regular Army of the United States and a part of the military establishment, viz.:

The Adjutant-General is charged with the duty of recording, authenticating, and communicating to troops and individuals in the military service all orders, instructions, and regulations issued by the Secretary of War through the Chief of Staff; of preparing and distributing commissions; of compiling and issuing the Army Register and the Army List and Directory; of consolidating the general returns of the Army; of arranging and preserving the reports of officers detailed to visit encampments of militia; of preparing the annual returns of the militia required by law to be submitted to Congress; of managing the recruiting service; and of recording and issuing orders from the War Department remitting or mitigating sentences of general prisoners who have been discharged from the military service. The Adjutant-General is vested by law with the charge, under the Secretary of War, "of the military and hospital records of the volunteer armies and the pension and other business of the War Department connected therewith"; and of the publication and

distribution of the Official Records of the War of the Rebellion. He also has charge of the historical records and business of the permanent military establishment, including all pension, pay, bounty, and other business pertaining to or based upon the military or medical histories of former officers or enlisted men. The archives of the Adjutant-General's Office include all military records of the Revolutionary War; the records of all organizations, officers, and enlisted men that have been in the military service of the United States since the Revolutionary War; the records of the movements and operations of troops; the medical and hospital records of the Army; all reports of physical examination of recruits and all identification cards; the records of the Provost-Marshal-General's Bureau; the records of the Bureau of Refugees, Freedmen, and Abandoned Lands; the Confederate records, including those pertaining to the legislative, executive, and judicial branches of the Confederate Government.

The Inspector-General, with his assistants, inspects all military commands and stations, the schools of application, the military department of all colleges and schools at which officers of the Army are detailed, all depots, rendezvous, armories, arsenals, fortifications, and public works of every kind under charge of or carried on by officers of the Army, and also the money accounts of all disbursing officers of the Army.

The Quartermaster-General, aided by assistants, provides transportation for the Army; also clothing and equipage, horses, mules, and wagons, vessels, forage, stationery, and other miscellaneous quartermaster stores and property for the Army, and of clothing and equipage for the militia; constructs necessary buildings, wharves, roads, and bridges at military posts, and repairs the same; furnishes water, heating, and lighting apparatus; pays guides, spies, and interpreters; and is in charge of national cemeteries.

The Commissary-General of Subsistence has administrative control of the Subsistence Department; the disbursement of its appropriations; the providing of rations and their issue to the Army; the purchase and distribution of articles authorized to be kept for sale to officers and enlisted men; the administrative examination of accounts of subsistence funds preliminary to their settlement by the

**War Department, The.—Continued.**

proper accounting, officers of the Treasury; and the examination and settlement of returns of subsistence supplies.

The Surgeon-General has administrative control of the Medical Department; the disbursement of its appropriations; the designation of the stations of medical officers, and the issuing of all orders and instructions relating to their professional duties; the recruitment, instruction, and control of the Hospital Corps and of the Army Nurse Corps. He directs as to the selection, purchase, and distribution of the medical supplies of the Army. The Army Medical Museum, the library of the Surgeon-General's Office, and the general hospitals are under his direct control.

The Paymaster-General is charged with the payment of the officers and enlisted men of the Army and civil employees of the department; with furnishing funds to his officers and seeing that they duly account for the same, and with a preliminary examination of their accounts; also with the payment of allotments made by enlisted men of the Army for the benefit of their families.

The Chief of Engineers commands the Corps of Engineers, which is charged with all duties relating to construction and repair of fortifications, whether permanent or temporary; with all works of defense; with all military roads and bridges, and with such surveys as may be required for these objects, or the movement of armies in the field. It is also charged with the river and harbor improvements, with military and geographical explorations and surveys, with the survey of the lakes, and with any other engineer work specially assigned to the corps by acts of Congress or orders of the Secretary of War.

The Chief of Ordnance commands the Ordnance Department, the duties of which consist in providing, preserving, distributing, and accounting for every description of artillery, small arms, and all the munitions of war which may be required for the fortresses of the country, the armies in the field, and for the whole body of the militia of the Union. In these duties are comprised that of determining the general principles of construction and of prescribing in detail the models and forms of all military weapons employed in war. They

comprise also the duty of prescribing the regulations for the proof and inspection of all these weapons, for maintaining uniformity and economy in their fabrication, for insuring their good quality, and for their preservation and distribution.

The Judge-Advocate General is directed by law to "receive, review, and cause to be recorded the proceedings of all courts-martial, courts of inquiry, and military commissions." He also furnishes the Secretary of War information and advice relating to lands under control of the War Department, and reports and opinions upon legal questions arising under the laws, regulations, and customs pertaining to the Army, and upon questions arising under the civil law; reports upon applications for clemency in the cases of military prisoners; examines and prepares legal papers relating to the erection of bridges over navigable waters; drafts bonds, and examines those given to the United States by disbursing officers, colleges, and others; examines, revises, and drafts charges and specifications against officers and soldiers; and also drafts and examines deeds, contracts, licenses, leases, and legal papers generally.

The Chief Signal Officer is charged with the supervision of all military signal duties, and of books, papers, and devices connected therewith, including telegraph and telephone apparatus and the necessary meteorological instruments for use on target ranges and other military uses; the construction, repair, and operation of military telegraph lines and cables, and the duty of collecting and transmitting information for the Army by telegraph or otherwise, and all other duties usually pertaining to military signaling.

To the Bureau of Insular Affairs, under the immediate direction of the Secretary of War, is assigned all matters pertaining to civil government in the island possessions of the United States subject to the jurisdiction of the War Department, the Philippine Islands and Porto Rico being the only ones so subject at the present time. The bureau is also the repository of the civil records of the government of occupation of Cuba (Jan. 1, 1899, to May 20, 1902) and had assigned to it matters pertaining to the provisional government of Cuba (Sept. 29, 1906, to Jan. 28, 1909). It prepares for publication executive documents relating to the

**War Department, The—Continued.**

Philippines and Porto Rico; makes a comptroller's review of the receipts and expenditures of the Philippine Government, attends to the purchase in the United States of supplies for that Government and arranges their shipment to Manila. It has charge of appointments of persons in the United States to the Philippine civil service and their transportation. It gathers statistics of insular imports and exports, shipping and immigration, and issues quarterly summaries of the same.

**Board of Engineers for Rivers and Harbors.**—The Board of Engineers for Rivers and Harbors is a permanent body created by the river and harbor act of June 13, 1902. To it are referred for consideration and recommendation all reports upon examinations and surveys provided for by Congress, and all projects or changes in projects for works of river and harbor improvement upon which report is desired by the Chief of Engineers, United States Army. It is further the duty of the board, upon request by the Committee on Commerce of the Senate, or by the Committee on Rivers and Harbors of the House of Representatives in the same manner to examine and report through the Chief of Engineers upon any examinations, surveys, or projects for the improvement of rivers and harbors. In its investigations the board gives consideration to all engineering, commercial, navigation, and economic questions involved in determining the advisability of undertaking such improvements at the expense of the United States.

The following is a list of the Secretaries of War since the adoption of the Constitution, in 1789: Henry Knox, Massachusetts; Timothy Pickens, Pennsylvania; James McHenry, Maryland; Samuel Dexter, Massachusetts; Roger Griswold, Connecticut; Henry Dearborn, Massachusetts; William Eustis, Massachusetts; John Armstrong, New York; James Monroe, Virginia; Alexander J. Dallas (acting), Pennsylvania; William H. Crawford, Georgia; George Graham, Virginia; John C. Calhoun, South Carolina; James Barbour, Virginia; Peter B. Porter, New York; John H. Eaton, Tennessee; Lewis Cass, Michigan; Benjamin F. Butler (acting), New York; Joel R. Poinsett, South Carolina; John Bell, Tennessee; John McLean, Ohio; John C. Spencer, New York; James M. Porter, Pennsylv-

nia; William Wilkins, Pennsylvania; William L. Marcy, New York; Reverdy Johnson (acting), Maryland; George W. Crawford, Georgia; Winfield Scott, Virginia; Charles M. Conrad, Louisiana; Jefferson Davis, Mississippi; John B. Floyd, Virginia; Joseph Holt, Kentucky; Simon Cameron, Pennsylvania; Edwin M. Stanton, Pennsylvania; Ulysses S. Grant, Illinois; Lorenzo Thomas, Delaware; John M. Schofield, New York; John A. Rawlins, Illinois; William T. Sherman, Ohio; William W. Belknap, Iowa; George M. Robeson (acting), New Jersey; Alphonso Taft, Ohio; J. Donald Cameron, Pennsylvania; George W. McCrary, Iowa; Alexander Ramsey, Minnesota; Robert T. Lincoln, Illinois; William C. Endicott, Massachusetts; Redfield Proctor, Vermont; Stephen B. Elkins, West Virginia; Daniel S. Lamont, New York; Russell A. Alger, Michigan; Elihu Root, New York; William H. Taft, Ohio; Luke E. Wright, Tennessee; Jacob McG. Dickinson, Tennessee; Henry L. Stimson, New York.

- Transfer of Weather Bureau from, to Agricultural Department, recommended, 5486.
- War of 1812.**—In June, 1812, war was declared by the United States against Great Britain. This war grew out of the British orders in council made to destroy the commerce of France and of nations trading with France, the arbitrary impressment of American seamen, and the exercise of the right of search. These orders in council and the Berlin and Milan decrees of Napoleon subjected to capture vessels trading with England and France. Congress passed acts known as the Embargo Act, the Nonintercourse Act, and the Nonimportation Act in an effort to check British aggressions on the commerce of the United States, but they failed of their purpose, and war ensued. The war at first was waged along the Canadian frontier. The Americans suffered some serious reverses the first year in the Northwest. Detroit was surrendered by Hull, and Fort Dearborn, on Lake Michigan, the present site of the City of Chicago, was captured by the British. Detroit was recovered by Perry's splendid victory on Lake Erie in 1813. The military and naval forces of Great Britain were greatly superior to those of the United States. Nevertheless some notable victories were won by the Americans as the war progressed.
- The Navy especially distinguished itself in a remarkable series of engagements with the enemy's ships. In 1814 the British attacked and captured Washington City and burned the public buildings. The most famous victory won by the Americans in the war was that of Gen. Jackson over the British commanded by Sir Edward M. Pakenham, Jan. 8,

1815, at New Orleans. This battle was fought 15 days after peace had been declared, but before the news had reached New Orleans. Dec. 24, 1814, by the treaty of Ghent (q. v.), peace was restored. By this treaty several questions pending between the two countries were settled, but the three principal ones, out of which the war grew, were not mentioned. The total number of enlistments in the regular service was 38,187, and in the militia 471,000. The total cost of the War of 1812 was \$107,159,003. The cost of the Revolutionary War was \$135,193,703; of the Mexican War, \$66,000,000.

- Warrington, Lewis, British ship captured by vessel in command of, 534.
- Wasp-Frolic* naval engagement, discussed, 506.
- York, Canada, reduction of, by American forces, referred to, 524.
- War of Rebellion.** (See Civil War.)
- War of Rebellion, Official Records of:**  
Compilation of, appropriation for, recommended, 4304.
- Publication of, plan for, recommended, 4451.
- War, Secretary of.**—An act of the Continental Congress of Feb. 7, 1781, created the office of Secretary of War to take the place of the Board of War. Benjamin Lincoln was the first Secretary, serving from 1781 to 1785, when he was succeeded by Henry Knox. Under Knox the present War Department was established. (See also War Department.)
- War, Secretary of:**  
Adjutant-General of Army designated to act as, *interim*, 3819, 3861.
- Clerks of, taking advantage of insolvent-debtors act, dismissed, 107.
- Correspondence of, referred to, 2427.
- Report of, transmitted and referred to, 291, 333, 335, 455, 622, 909, 954, 981, 995, 1018, 1036, 1089, 1097, 1128, 1131, 1444, 2055, 6345. (See also War Department.)

Suspension and removal of Secretary Stanton. (See Stanton, Edwin M.)

**War Steamers:**

- Construction of, recommended, 2990, 3055.
- Introduction of, into navies of world, referred to, 2262.
- Ward, Frederick T.**, death of, while in military service of China, 3353.
- Ward, John Elliot**; diplomat; b. Sunbury, Ga., Oct. 2, 1814; admitted to the bar in 1835; solicitor-general of Georgia, 1836-38; member of legislature, 1839, 1845, and 1853; appointed minister to China, 1858, and resigned in 1861 because of his secession views.

**Ward, John E.**, minister to China:

- Appointment of, 3089.
- Refusal of, to submit to humiliating ceremonies in approaching sovereign, 3090.

**Ward, Samuel**, special agent to Mexico, mentioned, 2770.

**Ward Claim**, referred to, 4436, 4801.

**Ware vs. Hylton.**—A Supreme Court case denying the right of any State or citizen to repudiate debts contracted with British subjects before the Revolutionary War. In 1796 Ware, a citizen of Great Britain, administrator of William Jones, surviving partner of Farrell & Jones, brought suit against Hylton, of Virginia, for the recovery of a debt. Hylton refused payment on the ground that the Virginia legislature of 1777 had passed an act to sequester British property and enable debtors of British subjects to pay such debts to the State loan office. The act was signed by Governor Jefferson. Hylton claimed to have complied with this statute. The United States circuit court for Virginia rendered a decree in favor of the defendant. The United States Supreme Court, however, reversed this decision on the ground that the legislature had not the power to extinguish the debt, when payment of such debts had been stipulated in the treaty of 1783. The justices rendered separate opinions to this effect. At the close of the Revolution and for a number of years afterwards there was a great deal of feeling aroused in Virginia and other States over efforts to collect British debts contracted in colonial times.

**Warehousing System** discussed by President—

- Jackson, 1015.
- Polk, 2405.
- Tyler, 2053, 2119.

**Warner Mountains Forest Reserve**, proclaimed, 7007.

**Warner, William**; b. Lafayette Co., Wis., June 11, 1840; enlisted in 1862 in the Civil War, and was promoted to major; located in Kansas City, Mo., in 1865 and engaged in the practice of law; elected to Congress in 1884, and reelected in 1886; elected commander-in-chief of the Grand Army of the Republic in 1888; appointed United States district attorney for the western district of Missouri in 1870, 1882, 1898, and in 1902; recipient of degree of LL. D. from the University of Michigan; elected to the United States Senate from Missouri, March 18, 1905.

**Warner, William**, member of Sioux Commission, 5480.

**Warren, Francis Emroy**, b. Hinsdale, Mass., June 20, 1844; served as private and noncommissioned officer in Civil War; received the Congressional medal of honor for gallantry on battlefield at the siege of Port Hudson; president of the senate of Wyoming legislature in 1873-74, and member of the senate in 1884-85; Mayor of the city of Cheyenne, and served three terms as treasurer of Wyoming; appointed governor of Wyoming by President Arthur in 1885, and removed by President Cleveland in 1886; again appointed governor of Wyoming by President Harrison in 1889, and served until the Territory was admitted as a State, when he was elected the first governor; elected to the United States Senate Nov. 18, 1890; re-elected in 1895, 1901, and 1907.

**Warren, John**, arrest and trial of, in Great Britain, 3827.

Convicted and sentenced to imprisonment, 3834.

Referred to, 3897.

Released, 3902.

**Warrington, Lewis**; naval officer; b. Williamsburg, Va., Nov. 3, 1782; entered navy as midshipman, 1800; attached to *Chesapeake*; served in the Mediterranean, 1803-06; earned a gold medal and the thanks of Congress for his gallant achievements in War of 1812; died Washington, D. C., Oct. 12, 1851.

**Warrington, Lewis**:

British ship captured by vessel in command of, 534.

Energy displayed by, in suppressing piracies, 876.

**Warrior, The**, illegal detention of, 2051.

### Wars, Foreign:

Acheen with Netherlands, neutrality preserved by United States in, 4192.

Austria with Hungary, sympathy of American Government with latter, 2550, 2579.

Brazil with Buenos Ayres—  
Peace concluded, 977.

Questions between United States and Brazil growing out of, 929, 951.

Brazil with Paraguay—

Good offices of United States tendered, 3776, 3883.

Referred to, 4078.

Canada, civil war in, neutrality of United States in, 1702, 1748.

Proclaimed, 1698, 1699.

Central America, republics in, at war with each other, 977.

Chile with Peru and Bolivia, 4522.  
4563, 4628, 4717.

Claims of United States arising out of, 4913, 5083, 5369, 5544.

Conditions of peace presented by Chile, discussed, 4662, 4717, 4760.

Efforts of United States to bring about peace, discussed, 4522.  
4563, 4582, 4662, 4717.

Negotiations for restoration of peace, referred to, 4676.

Terminated, 4822.

Treaty of peace discussed, 4760.

China with Japan—

Action taken by United States regarding, 5957, 6059.

Agents of United States requested to protect subjects of contestants, 5957, 6059.

Discussed by President—

Adams, John, 238.

Jefferson, 314, 349, 357.

France with China, 4823.

France with Germany—

Correspondence regarding, referred to, 4068, 4434.

Diplomatic relations resumed, 4096.

Neutrality of United States in, 4050.

Proclaimed, 4040, 4043, 4045.

Suspension of hostilities recommended by President Grant, 4055.

France with Spain—

Attempted recruiting, 2864.

Privateers, commissions not granted to, 779.

Referred to, 821.

## Vars, Foreign—Continued.

- Great Britain and France with China, neutrality preserved by United States in, 3037, 3089, 3174.
- Great Britain with France, neutrality of United States proclaimed, 148.
- Great Britain with Russia—
- Attempts of Great Britain to draw recruits from United States, discussed, 2864.
  - Neutrality maintained by United States during, 2864.

**Wasco Indians.** (See Indian Tribes.)

**Washburn, Charles A.,** minister to Paraguay, controversy with President of Paraguay, discussed, 3883.

**Washburne, Elihu Benjamin** (1816-1887); politician; b. Livermore, Me.; admitted to the bar, 1840; settled in Galena, Ill.; member of Congress, 1853-69; chairman of the committee of commerce, 1855-65; called the "Watch Dog of the Treasury" on account of his rigid economy in handling public funds; secretary of state under Grant, 1869; resigned on account of ill-health; minister to France, where he remained during the siege of Paris.

**Washburne, Elihu B.:**

Death of, announced, and honors to be paid memory of, 5165.

Minister to France, metric convention signed by, 4312.

**Washington, Bushrod,** commissioner to treat with Indians, nomination of, 250.

**Washington Forest Reserve,** proclaimed, 7224.

**Washington, George** (first President United States):

It was by perfectly natural and logical steps that Washington passed from the military leadership of the people in their struggle for independence, through the Presidency of the National Convention at Philadelphia, where months of the year 1787 were spent in framing a Constitution, to the position of first President of the United States. Speaking of Washington's eminent fitness for the office, Bancroft, in his "History of the Constitution," says: "But for him the country could not have achieved its independence; but for him it could not have formed its Union; and now but for him it could not set the Government in successful motion." The election should have been held in November, 1788; but it did not take place until the first Wednesday in January, 1789. The Constitution required that to become operative it should be ratified by nine of the thirteen States. It was not until June 21, 1788, that New Hampshire, the requisite ninth State, gave its approval; Vermont followed on the 26th of June, and New York on July 26. It was Sept. 13, 1788, before Congress passed the resolution declaring the Constitution ratified, and ordered the appointment of the electors. The interval between this date and that set for the election allowed no time for the participation of the people in the election. The electors were appointed by the legislatures of all States except that of New York, where a bitter struggle over the Constitution between the House and the Senate prevented the necessary compliance with the order, and those of North Carolina and Rhode Island, whose legislatures had not yet ratified the Constitution. There was no nomination or preparation of platform, yet when on April 6, 1789, the votes of the electors were counted in the presence of the two houses, it was found that Washington had received every vote of the ten States that had participated in the election, and that John Adams had received 34. The third highest vote was that of John Jay, who received nine.

**Party Affiliation.**—At no time did Washington make an avowal of party. He entered upon the duties of office with a profound veneration for the Constitution, a determination to adhere to its every pro-

*Washington, George—Continued.*

vision, and with a fixed purpose of promoting the unity of the nation. Before his election he said in a letter: "I have ever been a friend to adequate powers in Congress, without which we shall never establish a national character. . . . We are either a united people under one head and for federal purposes, or we are thirteen independent sovereignties, eternally counteracting each other." When he was consulted about the choice of a Vice-President, he expressed no preference save that he hoped it would be "a true Federalist." Even at the end of his eight years as President, after the installation of the machinery of the Government, the formulation of the policies of the country, and the application of the provisions of the Constitution to the practical duties of the administration had erected the party of which he was the head, hereafter to be known as Federalists, and that of his opponents, known for a time as Anti-Federalists—even then in his memorable Farewell Address (see page 205) he denounced party filiation and cautioned his countrymen against its, to him, baneful effects. While he, therefore, must be regarded as the founder of a party, he, nevertheless, says: "The alternate domination of one faction over another, sharpened by the spirit of revenge natural to party dissension, which in different ages and countries has perpetrated the most horrid enormities, is itself a frightful despotism." . . . "It opens the door to foreign influence and corruption, which find a facilitated access to the Government itself through the channels of party passion."

*Political Complexion of Congress.*—In the First Congress, the Senate was composed of 26 members, all of whom were Federalists; the House of 65 members was composed of 53 Federalists and 12 Democrats. In the Second Congress, the Senate was composed of 17 Federalists and 13 Democrats; and the House of 69 members as made up of 55 Federalists and 14 Democrats. In the second term of Washington's administration, the third Congress was composed of a Senate of 31 members, of whom 18 were Federalists and 13 Democrats; the House of 105 members was made up of 51 Federalists and 54 Democrats. The Fourth Congress consisted of a Senate of 32 members, of whom

19 were Federalists and 13 Democrats; and a House of 105 members, composed of 46 Federalists and 59 Democrats.

*Constitution.*—The failure of the confederation to secure for his country that unity of government which he most desired, caused Washington great anxiety; and Shays's rebellion added greatly to his disquiet. He said in a letter to Madison, in November, 1786: "It was but the other day that we were shedding our blood to obtain the constitutions under which we now live—constitutions of our own choice and making—and now we are unsheathing the sword to overturn them." He was persuaded by his friends to head the delegation from Virginia to the convention at Philadelphia in May, 1787, and there he was unanimously elected president of the convention that passed the Constitution, on Sept. 17, 1787. He immediately announced the fact to Congress by letter, in which he said: "In all our deliberations on this subject we kept steadily in our view that which appears to us the greatest interest of every true American—the consolidation of our Union—in which is involved our prosperity, felicity, safety, and, perhaps, our national existence." His firm adherence to the Constitution and his influence in interpreting it were remarked by his contemporaries. In his appointments to the several offices he acted as he himself said: "With the best intentions and fullest determination to nominate to office those persons only who, upon every consideration, were the most deserving, and who would probably execute their several functions to the interest and credit of the American Union, if such characters could be found by my exploring every avenue of information respecting their merit and pretensions that it was in my power to obtain." His regard for the Constitution seems to be epitomized in his statement in his Farewell Address (page 209): "The basis of our political system is the right of the people to make and to alter their constitutions of government. But the Constitution which at any time exists till changed by an explicit and authentic act of the whole people is sacredly obligatory on all."

*Finances.*—When Washington took office the finances of the country were in a deplorable state. He appointed Alexander Hamilton, of New York,

**Washington, George—Continued.**

Secretary of the Treasury. A loan of 3,000,000 florins (about \$1,200,000) was negotiated from Holland in 1790 (see page 73), after which came Hamilton's plan for providing revenues. The first step toward the revenue was taken in the tariff bill of July 4, 1789, the preamble of which reads: "Whereas, it is necessary for the support of government, for the discharge of the debts of the United States, and the encouragement and protection of manufacturers, that duties be laid on goods, wares, and merchandise imported. Be it enacted," etc. Hamilton's plans for financing the nation and of restoring public credit involved the funding system, of which Hamilton was the originator in America, and the establishment of the Bank of the United States, the subscriptions of which were made in a single day (see page 96). Three other loans from Holland were made and are referred to by Washington with much satisfaction in his Fourth Annual Address (see page 120). The establishment of public credit was very dear to Washington. In his Second Annual Address (page 75) he expresses satisfaction at the sufficiency of the revenue provisions and adds the hope "that it will be the favorite policy with you, not merely to secure a payment of the interest of the debt funded, but as far and as fast as the growing resources of the country will permit to exonerate it of the principal itself." In his Fifth Annual Address (page 134) he says: "No pecuniary consideration is more urgent than the regular redemption and discharge of the public debt. On none can delay be more injurious or an economy of time more valuable." In his Sixth Annual Address (page 158) he again refers to this subject: "Indeed, whatsoever is unfinished in our system of public credit cannot be benefited by procrastination; and as far as may be practicable we ought to place that credit on grounds which cannot be disturbed, and to prevent that progressive accumulation of debt which must ultimately endanger all governments." His last official word on this subject is given in his Seventh Annual Address (page 177): "Congress have demonstrated their sense to be, and it were superfluous to repeat mine, that whatsoever will tend to accelerate the honorable extinction of our public debt accords as much with

the true interest of our country as with the general sense of our constituents."

The attention of Congress was repeatedly called to the necessity of producing uniformity in the coins, weights, and measures of the country, to overcome the confusion resulting from the several standards in use. By the power vested in him, Washington reduced the weight of the copper cent to one pennyweight and sixteen grains, and that of the half-cent proportionately.

*Public Debt.*—The public debt of the United States during the years of Washington's administration stood as follows:

Jan. 1, 1791.....	\$75,463,476.52
Jan. 1, 1792.....	77,227,924.66
Jan. 1, 1793.....	80,352,634.04
Jan. 1, 1794.....	78,427,404.77
Jan. 1, 1795.....	80,747,587.39
Jan. 1, 1796.....	83,762,172.07
Jan. 1, 1797.....	82,064,479.33

*Tariff.*—The tariff act of July 4, 1789, imposed duties varying from 5 per cent to 10 per cent upon iron, steel, wool, carpets, and glass; and duties of from 5 to 20 cents per gallon on certain liquors. An act, passed on Aug. 10, 1790, "making further provision for the payment of the debts of the United States," increased the duties upon some of the dutiable imports; and both increased and added to the duties imposed on liquors. The first case of indirect taxation in the country, other than duties on imports, was the act of March 3, 1791, "repealing after the last day of June next the duties heretofore laid upon distilled spirits imported from abroad, and laying others in their stead; and also upon spirits distilled within the United States, and for appropriating the same." The duty varied from nine to twenty-five cents a gallon according to strength; with a yearly duty of sixty cents per gallon of capacity on all stills employed. Duties in nearly all dutiable goods were slightly increased by the act of May 2, 1792, "for raising a further sum of money for the protection of the frontier, and for other purposes therein mentioned." The act of June 5, 1794, "laying certain duties upon snuff and refined sugar; also upon carriages; and retail dealers of wines, etc., were required to pay five dollars a year for license." The duty on snuff made in the country was laid at eight cents a pound; and refined sugar, two cents a pound. The act of June 7, 1794, laid additional duties

**Washington, George—Continued.**

on goods imported and imposed a duty upon auction sales. On March 3, 1797, an act was signed imposing stamp duties on some kinds of certificates, bills of exchange, letters patent, insurance policies, promissory notes, etc.

**Commerce.**—The regulation of commerce in the young republic was a task of extreme difficulty, but Washington addressed himself to the development of trade and industry with such ardor that in his Seventh Annual Address (page 176) he was able to say: "Every part of the Union displays indications of rapid and various improvement; and with burthens so light as to be scarcely perceived, with resources fully adequate to our present exigencies, with governments founded upon the general principles of rational liberty, and with mild and wholesome laws, is it too much to say that our country exhibits a spectacle of national happiness never surpassed, if ever equalled?" In Hamilton's plan for raising revenue there was included a tax on spirits. This was opposed as being a tax on a necessity, but especially because suits arising out of its imposition were triable only in Pennsylvania, thus involving great trouble and expense. The protest against the tax is known as the Whisky Rebellion. Washington bore the defiance against that law with admirable patience and issued no fewer than three placating proclamations on the subject before resorting to force. An army of 15,000 men was called out, but order was restored without their aid.

In the Second Annual Message (page 73) a warning is sounded for the need of better protection of American commerce by building a merchant marine, that the country be not dependent upon foreign bottoms for carrying its produce to other countries. Especial attention was called to the Mediterranean trade which was then interfered with by African pirates.

**Slavery.**—Washington inherited a great many slaves, and used them in his successful operations as a planter. He was, while President, the richest man in the United States. The slavery question assumed no political status in his time; but in 1786, in a letter to Mr. Morris, he said: "There is no man living who wishes more sincerely than I do to see a plan adopted for the abolition of slav-

ery." In proof of the sincerity of this statement, all of his slaves were emancipated by his will.

**Foreign Policy.**—In his First Annual Message Washington (page 65) asked for provision to be made by Congress to enable him to conduct intercourse with foreign nations in a manner most conducive to public good. He adopted a firm policy of neutrality, and greatly embittered the Anti-Federalists by his refusal to aid the French revolutionists in their war against Great Britain; but consummated with the latter country the famous Jay Treaty. This spirit he embodied in his counsels that "nothing is more essential than that permanent, inveterate antipathies should be excluded and that in place of them just and amicable feelings towards all should be cultivated." His every act was regulated by the principle "that the great rule of conduct for us in regard to foreign nations is, to have in extending our commercial relations with them as little political connection as possible. Why by interweaving our destiny with that of any part of Europe entangle our peace and prosperity in the toils of European ambition, rivalry, interest, humor, or caprice?" So determined was the opposition against this policy that his famous proclamation of neutrality of April, 1793 (page 156), was denounced as "a royal edict and a daring assumption of power." Still Washington maintained this attitude even to the length of insisting upon the recall of M. Genet from America while using this country as a base and a means of making war upon Great Britain in that year. The seizure of American vessels by British cruisers fomented this opposition and Washington's act in closing the Jay Treaty exposed him to the severest censure.

**Army.**—Washington in his First Annual Address (page 57) urged attention to Army organization with the statement: "To be prepared for war is one of the most effectual means of preserving peace." He advocated the arming and disciplining of the people, the manufacture of military supplies, and the establishment of troops. In a special message (page 52) he had already advised that the experience and training of the "well-instructed officers and soldiers of the late Army" be utilized in the development of an efficient militia. This experience he speaks

**Washington, George—Continued.**

of as a "resource which is daily diminishing by death and other causes. To suffer this peculiar advantage to pass away unimproved would be to neglect an opportunity which will never again occur, unless, unfortunately, we should again be involved in a long and arduous war." In his Eighth Annual Address (page 194) he urges the institution of a military academy, and adds: "However pacific the general policy of a nation may be, it ought never to be without an adequate stock of military knowledge for emergencies. The art of war is at once comprehensive and complicated, it demands much previous study, and the possession of it in its most improved and perfect state is always of great moment to the security of a nation."

*Education.*—In his First Annual Address (page 58) Washington urges upon Congress the necessity of making provision for the promotion of science and literature. "Knowledge," he says, "is in every country the surest basis of public happiness." He suggests efficient patronage either by aiding seminaries already established or by the institution of a national university. In his Eighth Annual Address (page 194) he says: "True it is that our country, much to its honor, contains many seminaries of learning highly respectable and useful; but the funds upon which they rest are too narrow to command the ablest professors in the different departments of liberal knowledge for the institution contemplated, though they would be excellent auxiliaries." He lays particular stress upon the "education of youth in the science of government."

*Veto Messages.*—In the eight years of his administration Washington issued only two veto messages. The first on April 5, 1792 (page 124), refused sanction to an act regulating the apportionment of Representatives in the several States because it was contrary to the provisions of the Constitution. The second veto message was the last message sent by Washington to Congress. It refused sanction to an act amending the military establishment because of its unfairness and injustice to the bodies of troops which it might affect (page 203).

*Indian Affairs.*—Washington's remarkable patience and good judgment were fully displayed in his treatment of the Indians in the up-

risings that occurred among the Creeks, Wabash, Five Nations, Senecas, and Six Nations. In a special message upon treaties with the Indians (page 59) he maintains that a "due regard should be extended to these Indians whose happiness in the course of events so materially depends upon the national justice and humanity of the United States." Again (page 61), he declares that it is "important that all treaties and compacts formed by the United States with other nations, whether civilized or not, should be made with caution and executed with fidelity."

**Washington, George:**

Anniversary of birth of, proclamation regarding celebration of, 3289.

Annual addresses of, 57, 73, 95, 117, 130, 154, 174, 191.

**Washington.**—One of the United States. It extends from lat. 45° 40' to 49° north, and from long. 117° to 124° 44' west. It is bounded on the north by the Strait of San Juan de Fuca and British Columbia, on the east by Idaho, on the south by Oregon (partly separated by the Columbia River), and on the west by the Pacific Ocean. Area, 69,180 square miles. The Cascade Range traverses the State from north to south, west of the center. There are extensive forests, particularly in the western part, and the eastern portion produces large quantities of wheat. Gold and silver are also found in paying quantities. Salmon fishing and shipbuilding are important industries. The country was visited as early as 1592. The mouth of the Columbia River was explored in 1792 by Capt. Gray, and further explorations were conducted by Lewis and Clark in 1805. John Jacob Astor founded a trading post at the mouth of the Columbia River in 1811. The State was formed from part of the Oregon region, which was claimed by both England and America for many years. It was organized as a Territory by an act of Congress passed March 2, 1853, and admitted to the Union Nov. 11, 1889 (5460).

The crop report for 1908 showed a yield of 27,162,000 bushels of wheat, 5,185,000 bushels of barley, 10,545,000 bushels of oats. The farm animals were 311,000 horses, 4,000 mules, 184,000 milch cows, and 389,000 other cattle; 824,000 sheep, and 182,000 hogs. The wool clip for 1907 was 1,472,000 pounds, scoured, valued at \$956,800. There are 86,000 acres of fruit trees, and the area is being rapidly increased.

The arid region east of the Cascade Mountains requires irrigation for the production of full crops. During 1904,

178,000 were included in irrigation systems, and the Federal reclamation act (q. v.) provides for further irrigation as the lands are sold.

The Mount Rainier, Olympic, Washington, Wenala, and Priest Forest Reserves have a combined area of 12,162 square miles. The total timber area is put at 34,000 square miles. The cut of the Washington lumber mills in one year was more than four billion feet, and the shipments by sea more than a billion feet. The trees are mostly fir, cedar and spruce.

There are 4,635,000 acres of public land in the State unappropriated and unreserved. United States land offices are located at North Yakima, Olympia, Seattle, Spokane, Vancouver, Walla Walla and Waterville. (See Lands, Public.)

Statistics of agriculture reported to the Federal Census Bureau, under date of April 15, 1910, place the number of farms in the State at 56,192, comprising 11,712,235 acres, valued, with stock and improvements, at \$637,543,411. The average value of land per acre was \$44.13, against \$11.68 in 1900. The value of domestic animals, poultry, etc., was \$48,865,110, including 402,120 cattle, valued at \$12,193,465; 280,572 horses, \$29,680,849; 12,185 mules, \$1,776,297; 266,135 swine, \$1,674,927; 475,555 sheep, \$1,931,170; poultry, \$1,367,440. The yield and value of the field crops for 1911 was: Corn, 30,000 acres, 855,000 bushels, \$675,000; wheat, 2,230,000 acres, 50,661,000 bushels, \$35,969,000; oats, 281,000 acres, 14,528,000 bushels, \$6,538,000; rye, 8,000 acres, 176,000 bushels, \$141,000; potatoes, 59,000 acres, 9,440,000 bushels, \$6,419,000; hay, 400,000 acres, 960,000 tons, \$11,520,000. The principal industry of the State is lumber and timber, with a capital of \$40,953,816, employing 28,023 wage-earners, and turning out \$49,572,512 worth of finished product from \$16,325,594 raw material. The flour and feed industry is next in importance, with a capital of \$6,490,492, using \$12,771,390 worth of raw material, which 613 wage-earners convert into finished product valued at \$14,663,612. The fisheries of the State employ nearly 3,000 boats and 4,954 persons. The value of the annual catch is \$1,161,669. The State revenues for the biennial period ending Sept 30, 1910, were \$13,381,687; expenditures, \$12,944,263. The bonded debt is \$1,006,024. The tax rate is \$31 per \$1,000, and the assessed valuation is \$789,912,979.

**Washington—Continued.**

The State oyster bed reserves cover 13,683,000 acres, and salmon and many other fish are abundant.

Coal worth \$7,679,801 was mined in 1907, of gold 12,689 fine ounces, silver 84,000 fine ounces, and 122,263 pounds of copper.

The industrial census of 1905 returned 2,751 manufacturing establishments, with a capital of \$96,952,621, employing 48,858 persons in converting \$69,166,165 worth of raw material into finished goods to the value of \$128,821,667, consisting of lumber, flour, meats, fish, machinery and dairy products. There were in 1907 2,950 miles of steam railway and 330 miles of electric line. The population in 1910 was 1,141,990. (See also "Fifty-four Forty or Fight"; North-western Boundary; Oregon.)

**Washington, The,** seizure of, by British authorities, referred to, 4114.

**Washington City.**—The capital of the United States. It is situated in the District of Columbia, on the Potomac River, at the head of navigation, in lat. 38° 53' north and long. 77° 1' west. The site for the capital was chosen in 1790 and the seat of government was established at Washington in 1800. Washington is one of the best planned cities in the world; in addition to the usual rectangular arrangements of streets it has a num-

ber of fine wide avenues radiating in all directions from both the Capitol and the White House. At their intersections are circles laid out as small parks and most are lined with pleasant shade trees. It contains the principal public buildings in which the business of the Government is transacted.

Besides the Capitol (q. v.) the city contains the official residence of the President, buildings devoted to the various Departments of Government, the Congressional Library, the Smithsonian Institution, National Museum, Naval Observatory, Corcoran Art Gallery, National Soldiers' Home, Washington Monument, and many other objects of national interest. The White House, or Presidential residence, was first occupied by John Adams in 1800. The public buildings were burned by the British in 1814, and more imposing ones erected subsequently. (See also District of Columbia and Capital of United States.) Population (1910), 278,718, of which 191,532 were white and the residue colored people.

- Washington City (D. C.), Capture of.**—After the flight of the Americans from the field of Bladensburg, Aug. 24, 1814, the British army advanced to the plain between the present Congressional Cemetery and the Capitol. Cockburn and Ross, with 200 men, rode into the city in the evening to destroy the public buildings. The unfinished Capitol, containing the Library of Congress, was fired. The President's house, the Treasury building, the arsenal, and barracks for 3,000 men were next burned. In a few hours nothing but the blackened walls remained of the public buildings, the Patent Office alone having been spared. Only such private property as was owned or occupied by persons offensive to the British was destroyed. The President and his chief advisers fled to different points in Virginia and Maryland.
- Mrs. Madison, the wife of the President, when advised of the defeat at Bladensburg, sent away the silver plate and other valuables from the Presidential mansion and at great personal risk saved from destruction the full-length portrait of Gen. Washington by Gilbert Stuart, which now adorns the Blue Room of the White House. With her sister and brother-in-law she was then conveyed to a place of safety beyond the Potomac. Commodore Tingey, in command of the navy-yard, burned the property under his control to pre-

vent its falling into the hands of the British. The bridge over the Potomac was also destroyed. The total value of property destroyed by British and Americans in Washington was estimated at \$2,000,000. On the night of the 25th Ross and Cockburn withdrew from Washington.

**Washington Monument.**—An obelisk-shaped tower of white marble erected at Washington, D. C., in honor of George Washington. The cornerstone was laid July 4, 1848, but soon the work languished and then stopped entirely. Work was resumed in 1876, and the monument was finally completed Dec. 6, 1884. It is 555 feet high and 55 feet square at its base. The interior walls are built of granite and contain many memorial stones from foreign nations. The entire cost of the monument was \$1,187,710.

**Washington Monument:**

 Report regarding, 4086.  
 Referred to, 3588.

**Washington, Treaty of.**—Many treaties have been negotiated at Washington, but the one usually referred to as the treaty of Washington was negotiated between the United States and Great Britain at that city in 1871. After 34 meetings, commissioners of the United States and England concluded a treaty between the two countries to settle pending questions. It was ratified June 17, 1871, and proclaimed to be in force July 4. To adjust the Alabama claims it was agreed to submit them to a tribunal of arbitration, to meet at Geneva, Switzerland, and to consist of members appointed by each of the parties and by three neutral nations. Concerning the difficulties with regard to the fishing privileges of the United States vessels on the coast of British America, the treaty adjusted the differences on the basis of the reciprocity treaty of 1854, giving to persons of each nation the right of fishing on the coasts of the other. There was a mutual concession of privileges, such as that

**Washington, Treaty of—Continued.**

of transportation from one place to another in one country across the territory of the other without the payment of duties. Lake Michigan, the lower course of the St. Lawrence, and certain rivers in Alaska were opened to the people of both nations. It was also agreed to submit the disputed boundary line between the British possessions and the State of Washington to the arbitration of the German Emperor, who, on Oct. 21, 1872, rendered a decision awarding the island of San Juan and the group of which it forms a part to the United States. (See also Alabama Claims; Geneva Tribunal.)

**Washita River**, exploration of, 387.

**Wasp, The**.—An American warship of 18 guns, built at Washington in 1806. Oct. 13, 1812, the *Wasp* left the Delaware for the West Indies, under Capt. Jacob Jones, with 137 men. Five days later she fell in with 6 merchantmen under convoy of the British brig *Frolic*, 18 guns and 110 men. The *Wasp* attacked, and in less than an hour the *Frolic* struck her colors after a loss of 90 men. The fight was in a heavy sea. Within 2 hours the *Wasp* and its prize were captured by the British frigate *Poictiers*, 74 guns, and the Americans were sent to Bermuda as prisoners. In 1814 the United States built a naval vessel at Newburyport and christened it the *Wasp*. It was a ship-rigged sloop of war and carried 22 guns and 160 men. Leaving Portsmouth May 1, 1814, under Capt. Johnston Blakely, she ran into the English Channel to look for British merchantmen. June 28 she encountered the British sloop *Reindeer*, 18 guns and 118 men. In less than half an hour of fierce fighting the *Reindeer* struck her colors, having sustained a loss of 25 killed and 42 wounded. The American loss was 27 in all. Sept. 1, after a fight of about 2 hours, the *Wasp* captured the British brig *Avon*, 18 guns. Oct. 9, in lat. 18° 35' north, long. 30° 10' west, she spoke and boarded the Swedish brig *Adams* and took off Lieut. McKnight and a master's mate of the United States ship *Essex*, on their way from Brazil to England. The *Wasp* was never heard from again.

**Wasp, The:**

Engagement of, with the *Frolic*, 506.  
Mentioned, 6318.

Refused permission to enter ports of Paraguay by Brazilian blockade commander, 3883.

**Water Power Sites**, control of, 8103.

**Water Rights**, policy of the Federal Government in imposing conditions in granting.

**Water Supply**. (See Irrigation.)

**Water Witch, The**, fired upon by Paraguayan fort, 2980.

Commissioner sent to demand compensation, 3050.

Demands of, acceded to, 3091.

Discussed, 3195.

Naval force sent to Paraguay, 3050.

**Watervliet Arsenal, N. Y.**, gun factory to be established at, 5374.

**Watkins, John Thomas**; b. Minden, La., Jan. 15, 1854; studied law and was admitted to the bar, 1878; elected to the 59th, 60th, 61st, and 62d Congresses from Louisiana.

**Watson, Clarence W.**; b. May 8, 1864; educated in the public schools of Marion County, leaving school when young to engage in the coal-mining industry, in which his father, the late James Otis Watson, was the pioneer in the State of West Virginia; elected United States Senator by the West Virginia legislature on Jan. 25, 1911; elected president of the Consolidation Coal Co., in January, 1911, but resigned when elected to the Senate.

**Wautauga Association**.—June 2, 1769, a company of North Carolina hunters formed an organization to settle the territory to the west of the Cumberland Mountains, which had been opened by the treaty of Fort Stanwix in the previous year. Their settlements were on the Wautauga, one of the tributaries of the Tennessee River, within the limits of what is now the State of Tennessee. The settlers framed a code of laws, which was signed by each of them, and the body politic thus formed was called the Wautauga Association. The tyranny of Governor Tryon, of North Carolina, caused many of the independent-spirited settlers of that Colony to cast their lot with the Wautauga Association. In 1784, at a convention held in Jonesboro, a separate State government was organized under the name of Franklin. (See also Franklin.)

**Wayne, Anthony**, treaty with Indians concluded by, 181.

**Waxhaw (S. C.) Massacre**.—After the capture of Charleston, Sir Henry Clin-

**Waxhaw (S. C.) Massacre—Continued.**

ton sent a detachment of 300 men under Col. Tarleton to disperse Col. Buford's command of 380 men, who, hearing of the fall of Charleston, had retired to a point near the North Carolina line. May 29, 1780, Tarleton, having overtaken Buford at the Waxhaw River, made a furious charge, while the Americans were awaiting flags of conference, believing hostilities suspended. Many of the Americans threw down their arms and begged for quarter; 113 were killed on the spot, 150 so badly wounded that it was impossible to move them, and only 53 were taken prisoners. Col. Buford and about 100 infantry and a few horses escaped. The British lost but 5 killed and 15 wounded.

**Wea Indians.** (See Indian Tribes.)

**Weakley, Robert,** commissioner to treat with Indians, nomination of, 620.

**Weather Bureau.**—This was first suggested in 1817. In 1819 a cooperative movement was begun and the officers at the various military posts were required to make monthly reports of the weather. In 1870 Congress made an appropriation to establish a weather bureau at Washington and pay for telegraphic communication between posts of observation in different parts of the country. Until 1891 the Bureau remained under the War Department. In July of that year it was transferred to the newly created Department of Agriculture. This Bureau forecasts storms, floods, and all changes in the weather conditions, and publishes such climatic and meteorological data as the public interest seems to demand. It has more than 600 paid employees, who devote their entire time to its service. Its annual cost is more than \$800,000. The annual saving to the agricultural and shipping interests of the country due to the forecasts of the Bureau is believed to be incalculable. The percentage of correct forecasts is about 4 out of 5. In hurricanes from the West Indies, it reaches 5 out of 5, or 100 per cent. The headquarters of the Bureau are located in a special building at the National Capital; there are branches at Chicago, Boston, Galveston, Denver, Portland, Ore., and San Francisco, and its officials are stationed at various points throughout the country and in the West Indies. (See also Agriculture, Department of.)

**Weather Bureau:**

Discussed, 5979, 6171, 6347.

Establishment of, in Department of Agriculture, recommended, 5487.

**Weaver, James B.;** soldier and politician; b. Dayton, Ohio, 1833; attained the rank of brigadier-general in the Civil War; sat in Congress from Iowa, 1879-81; nominee of the Greenback-Labor party for president, 1880, and of the People's party in 1892; from 1885 until 1889 he sat as a Greenback-Labor and Democratic member of Congress from Iowa.

**Weaver, William A.,** court-martial of, 853.

**Webb, Edwin Yates;** b. Shelby, N. C., May 23, 1872; graduated Wake Forest College, 1893; studied law at University of North Carolina, and at University of Virginia; began practice of law, 1894; elected State senator in 1900; elected to the 58th, 59th, 60th, 61st, and 62d Congresses from North Carolina.

**Weber, Charles,** arrest and imprisonment of, in Mexico, 4678, 4692.

**Webster, Daniel** (1782-1852); lawyer, statesman, and orator; b. Salisbury or Franklin, N. H.; prior to his removal to Boston in 1816, he was member of Congress, 1813-17; made a national reputation as a lawyer by winning the Dartmouth College case, 1818; member of Congress, 1823-27; United States senator, 1827-41; his famous reply to Hayne was made in 1830; opposed Calhoun, 1833; and Jackson on the Bank question; in 1836 he received the 14 electoral votes of Massachusetts for president; while Secretary of State, 1841-1843, he negotiated the Ashburton treaty; from 1845 to 1850 he was United States senator for Massachusetts; opposed the Mexican War and the annexation of Texas; supported Clay in his compromise, 1850; Secretary of State again, 1850-52; and sought without success the Whig nomination for president in 1852; his famous orations include: the Plymouth anniversary, 1820; laying of the corner-stone of Bunker Hill monument, 1825; on the death of Jefferson and of Adams, 1826; on the dedication of Bunker Hill, 1843, and at the laying of the corner-stone of the addition to the Capitol in 1851.

**Webster, Daniel:**

Correspondence regarding Dorr's Rebellion, 2153.

Member of notification committee to wait on President-elect J. Q. Adams, 858.

Mentioned, 2281.

Secretary of State, 1876, 2646.

**Webster, Daniel**—*Continued.*

Death of, announced and referred to, 2698, 2699.

Instructions issued to, to treat with Lord Ashburton, 2081.

**Webster, Joseph D.**, report and map of survey of Gulf coast by, transmitted, 2601, 2610.

**Weiser Forest Reserve**, proclaimed, 7171.

**Weldon Railroad (Va.)**, Seizure and Destruction of.—June 21, 1864, during Grant's operations against Petersburg and Richmond, an attempt was made to capture the Petersburg and Weldon Railroad, an important supply line for the Confederate army. The Second and Sixth Corps, under Generals Birney and Wright, cut the telegraph wires 3 miles south of Petersburg, but were repulsed with a loss of 7 guns and many prisoners. Another and successful effort was made on Aug. 18, 1864. Lee had drawn heavily from his forces in Petersburg to resist a threatened attack on the north side of Richmond. The Fifth Army Corps, under Gen. Warren, moved from its position at the extreme left of Grant's army and struck the railroad 4 miles below Petersburg. Mahone's division of Lee's army tried to force Warren back, but he held his position, with a loss, after 3 days' fighting, of 4,543 men. By the 24th 7 miles of railroad were destroyed. Aug. 25 the Second Army Corps and Gregg's cavalry, while at Reams Station destroying the railroad, were assailed. The fighting was desperate and a part of the Union line gave way after losing 5 guns and 2,400 men, three-fourths of whom were missing.

**Welland Canal**, controversy with Canada respecting tolls upon, discussed, 5211, 5213, 5675, 5678, 5749.

Retaliatory measures proclaimed by President Benj. Harrison, 5725.

Referred to, 5749.

Revoked by proclamation, 5812.

Settlement of, referred to, 5869.

**Wells, Gideon**; lawyer, editor, statesman; b. Glastonbury, Conn., July 1, 1802; educated Norwich (Vt.) Univ. and studied law; became editor and proprietor of the *Hartford Times*, 1826-36, and continued to contribute articles up to 1854; member State legislature, 1827-35; appointed chief of a bureau in the navy department, 1846; actively supported Lincoln's

**West India Company.**—In 1621 the States-General of the United Netherlands chartered the Dutch West India Company. Among other important grants it received from the Government the exclusive right of trading with a large part of the coasts of America and Africa, planting colonies, building forts, employing soldiers and fleets, making treaties, and attacking the colonies and commerce of Spain and Portugal. This company planted the colony of New Netherlands in the United States, as well as the Dutch settlements in Brazil, Guiana, the West Indies, and on the Gold Coast of Africa. In 1674 the company relinquished New Netherlands to the English. Its powerful fleets took many rich prizes on the coasts of Spanish and Portuguese America. In 1624 the projector of the Dutch West India Company obtained a charter from Gustavus Adolphus, of Sweden, granting special trading privileges in America. Under its auspices settlements were made along the Delaware River.

**West Virginia.**—One of the United States. Nickname, "The Pan Handle State"; motto, "Montani semper liberi" ("Mountaineers are always freemen"). It extends from lat. 37° 12' to 40° 38' north, and from long. 77° 40' to 82° 35' west. West Virginia is bounded on the northwest by Ohio (separated by the Ohio River), on the north by Maryland and Pennsylvania (separated from the former by the Potomac), on the east and south by Virginia, and on the west by Kentucky (separated by the Big Sandy River). The State is hilly or mountainous and contains abundance of timber and coal, being, in fact, one of the leading States in the production of the latter. Of the manufacturing interests the iron and steel industry, confined almost entirely to Wheeling, is the most important.

It was originally a part of Virginia. When that State adopted the ordinance of secession, April 17, 1861, many of the people of the western and northwestern parts of the State claimed that they were not to be bound by that action. A convention was called in 1861, which resolved not to recognize the State officers who were in opposition to the National Government. This convention elected Francis H. Pierpoint governor of Virginia and called a legislature to meet at Wheeling. It also voted to erect a new State, called Kanawha, and the legislature which was called by the convention voted to recognize the new State. It was admitted to the Union as the State of West Virginia June 19, 1863 (3368).

The forest area of West Virginia, estimated at 18,400 square miles, covers 73 per cent. of its surface.

Statistics of agriculture reported to the Federal Census Bureau, under date of April 15, 1910, place the num-

**West Virginia—Continued.**

ber of farms in the State at 96,685, comprising 10,026,442 acres, valued, with stock and improvements, at \$314,738,540. The average value of land per acre was \$20.65, against \$12.60 in 1900. The value of domestic animals, poultry, etc., was \$43,336,073, including 620,288 cattle, valued at \$15,860,764; 179,991 horses, \$18,583,381; 11,717 mules, \$1,339,760; 328,188 swine, \$2,087,392; 910,360 sheep, \$3,400,901, and poultry, \$1,628,700. The yield and value of the field crops of 1911 was: Corn, 707,000 acres, 18,170,000 bushels, \$13,991,000; wheat, 238,000 acres, 2,737,000 bushels, \$2,792,000; oats, 110,000 acres, 2,420,000 bushels, \$1,355,000; rye, 17,000 acres, 187,000 bushels, \$168,000; potatoes, 44,000 acres, 1,980,000 bushels, \$2,059,000; hay, 648,000 acres, 428,000 tons, \$8,560,000; tobacco, 15,000 acres, 11,250,000 pounds, \$900,000. In 1910 the State ranked second in the amount of coal produced, taking this position away from Illinois on account of the strike among the mine-workers in the latter State. Pennsylvania is the only State producing more coal than West Virginia. The output of 1910 was 61,671,000 short tons, valued at \$56,665,061. The output of 1911 fell back to 60,500,000 short tons. The State revenues for the fiscal year 1910-1911 were \$5,379,699; expenditures, \$5,183,416; balance on hand Sept. 30, 1911, \$1,611,620. The property valuation was \$1,119,828,173, and the tax rate 84 cents per \$100. The State has no bonded debt.

According to the industrial census of 1905, there were in West Virginia 2,109 manufacturing establishments, with a capital of \$86,820,823, employing 46,650 persons in converting \$54,419,206 worth of raw material into finished goods to the value of \$99,040,676. There were 3,209 miles of steam railway in the State in 1907 and 188 miles of electric line. The population in 1910 was 1,221,119.

**West Virginia** (see also Clarksburg):

**Westcott, Hampton**, lieutenant in Navy, nomination of, and reasons therefor, 1126.

**Western Reserve.**—The charters of most of the original Colonies granted territory extending from the Atlantic to the Pacific Ocean. After the Revolu-

tion the unsettled western portions were ceded to the General Government. When Connecticut made her cession the State reserved a tract of land between the forty-first parallel of latitude and Lake Erie as a foundation for her school fund. It extended 120 miles westward from the Pennsylvania boundary line, and contained 3,666,291 acres, afterwards included in Ohio. An act of Congress in 1800 authorized the President to deed to Connecticut the title to this Western Reserve, to quiet titles of settlers, on condition that the State surrender all claims to its jurisdiction. On the admission of Ohio as a State, Connecticut lost all interest in the territory. The tract was settled largely by Connecticut people.

**Western Territory**, instructions to governor of, regarding employment of militia against Indians, 6306.

**Wetmore, George Peabody**; b. during a visit of his parents abroad, at London, England, Aug. 2, 1846; graduated from Yale College in 1867, receiving the degree of A. B. and that of A. M. in 1871; studied law at Columbia Law School, and was graduated in 1869, receiving the degree of LL. B.; was admitted to the bar of Rhode Island and of New York in 1869; governor of Rhode Island, 1885-1887; elected to the United States Senate from Rhode Island, June 13, 1894; reelected in 1900, and again for the term ending March 3, 1913.

torney of Franklin Co., N. Y., 1846-49; Whig representative to the State assembly 1848-59; State senator, 1858-59; Republican member of Congress, 1861-63 and 1869-77; by the "Wheeler Compromise" in 1874 he adjusted the difficulty with Louisiana; Republican candidate for Vice-President with Hayes, 1876, and declared elected, 1877; served from 1877-1881.

**Wheelock, John E.**, arrest and imprisonment of, in Venezuela, 4789, 4803.

**Whig.**—A name taken by the political party in the American Colonies which favored the Revolution, as opposed to the Tories, who advocated adherence to the mother country. The name was first used in Great Britain to designate those Scotch Covenanters whose rebellion in 1699 led to the fixing the name upon any opponents of the court. The term as generally used in America, however, refers to the political party in the United States which began to develop toward the end of John Quincy Adams's administration, favoring a national bank, a protective tariff, a system of internal improvements, and in general holding to a latitudinarian construction of the Constitution. They were at first called National Republicans, and those who opposed them were known as Democratic Republicans. After the defeat of Adams, in 1828, Henry Clay became the leader of the National Republicans.

The party took the name of Whig in 1834, and in 1836, failing to unite on any candidate of their own for the Presidency, Martin Van Buren was elected by the opposition. In 1840 the Whigs elected William Henry Harrison. After the death of Harrison they quarreled with Vice-President Tyler, who had succeeded Harrison as President and had vetoed the fiscal measures passed by the Whig Congress. In 1844 they nominated Henry Clay for the Presidency, but he was defeated by James K. Polk. The annexation of Texas, the Mexican War, the Wilmot Proviso, and other phases of the slavery question caused serious dissensions in the Whig party, but they preserved their power for another term by nominating a military candidate in the person of Zachary Taylor. He was elected, but the disintegration of the Whig party had begun.

Many of the Northern Whigs became Free Soilers, and by 1856 Republicans, while many temporarily

joined the American or Know-Nothing party. Large numbers of the Southern Whigs became Democrats. The factions of the old party united and nominated Winfield Scott for President in 1852, but he was defeated by Franklin Pierce. A small number of Whigs formed the Constitutional Union party and nominated Bell and Everett in 1860. Besides those already mentioned, the chief leaders of the party in the North were Webster, Winthrop, Choate, Seward, Greeley, and Weed; in the South, Mangum, Badger, Bell, Berrien, Forsyth, Stephens, Toombs, Prentiss, and Crittenden, and in the West, Giddings, Ewing and Corwin.

**Whipple, John**, correspondence regarding Dorr's Rebellion, 2140, 2141.

**Whisky Insurrection.**—A revolt against the enforcement of a Federal excise law by the people of 4 counties of western Pennsylvania. The Constitution gives Congress power to lay and collect excise taxes. The first bill for an excise law was defeated in Congress June 21, 1790. The project was revived the following year, and the first excise law was passed March 3, 1791. The Senators from Pennsylvania were instructed by their legislature to oppose the law, "established on principles subversive of peace, liberty, and the rights of citizens." In Pennsylvania the law was violently opposed by one Bradford and his followers and condemned by more peaceable and reflecting citizens, following the lead of Albert Gallatin, afterwards Secretary of the Treasury, minister to France, envoy extraordinary to England, etc., and William Findley and John Smiley, members of Congress. Numerous meetings were held to protest against this law, which bore with particular force upon the settlers of western Pennsylvania because of their isolated position, distance from the seaboard, and the scarcity of money in that region. In response to repeated protests Congress on May 8, 1792, passed an act reducing the duties on whisky, but, on account of the threatening attitude of some of the settlers, empowering the President to use militia in suppressing disturbances within a State. The agents of the Government sent to collect the excise having been maltreated and driven from the country and the marshals refused office room and assistance in serving writs, President Washington, by a proclamation of Sept. 15, 1792

**Whisky Insurrection—Continued.**

(116), called upon the citizens to abandon their unlawful proceedings. Instead of complying, resistance to the service of writs continued and the officers were tarred and feathered. Aug. 1, 1794, a mass meeting of 7,000 armed insurgents was held on Braddock's Field, a county judge presiding, with Albert Gallatin as secretary and Bradford as the leading spirit. An emergency had now arisen. Governor Mifflin, of Pennsylvania, having declined to take the initiative, a certificate of the existence of an insurrection was obtained from a Federal judge, and on Aug. 7, 1794, President Washington again called upon the insurgents to disperse and retire peaceably to their homes on or before Sept. 1, 1794 (150). This warning was unheeded and was followed by a third proclamation on Sept. 25, 1794 (153). A requisition for 15,000 militia was issued to the governors of Pennsylvania, Virginia, Maryland, and New Jersey. A Federal commission of 3 and a State commission of 2 preceded the troops with offers of amnesty on full submission. Bradford urged armed resistance, Gallatin counseled submission. Washington accompanied the troops, which were in command of Governor Lee, of Virginia, as far as Carlisle. Alexander Hamilton, then Secretary of the Treasury, accompanied the expedition to the scene of disorder. The troops arrived in the rebellious district early in November. After giving the people time to obey the President's proclamation, Lee's force arrested many of those who failed to accept the proffered amnesty. Bradford and the more violent leaders escaped. Those captured were tried, convicted, and later pardoned by the President. The first show of Federal force had suppressed the insurrection.

**Whisky Insurrection** (see also Pennsylvania, insurrections in):

Discussed, 154, 160, 162.

Pardon granted insurgents, 173.

Referred to, 176.

Proclamations against, 116, 150, 153.

**Whisky Ring.**—A conspiracy of distillers and United States officials formed in St. Louis, Mo., in 1872 to defraud the Government of internal-revenue taxes. By 1874 the ring had attained national proportions, with branches in Milwaukee, Chicago, Peoria, St. Louis, Cincinnati, New Orleans, San Francisco, and Washington. Distillers who refused to enter

the combination were trapped into technical violations of the revenue laws, and when made liable to seizure they were given their choice between ruin and surrender to the ring. The combination became so powerful that when Secretary Bristow ordered a transfer of supervisors, which would have thrown the ring into confusion, their agents at Washington procured a countermand of the order from President Grant. After diligent effort evidence was obtained against the distillers and revenue agents. Upon this evidence the Government seized \$3,500,000 worth of property and procured indictments against 238 persons. It was shown that the Treasury had been defrauded of \$1,650,000 between July 1, 1874, and May 1, 1875. When the papers were laid before President Grant he indorsed them with orders to "let no guilty man escape." The most important convictions were those of John A. Joyce, special revenue agent; John McDonald, supervisor, and William O. Avery, chief clerk in the Treasury Department.

**Whitacre, John J.**; b. Dec. 28, 1860; elected to the 62d Congress from Ohio, Nov. 8, 1910.

**Whitby, Henry**, British officer, proclamation for arrest of, for murder of American citizen, 390.

**White, Alexander**, commissioner of Washington City, 302.

**White, George**; b. Elmira, N. Y., Aug. 21, 1872; attended the common schools of Titusville, Pa., and graduated from the High School in 1891, and in that year entered Princeton University, graduating in the class of 1895 with the degree of B. A.; entered the oil business; mined in the Klondike, 1898-1901; elected to the legislature and represented Washington County, Ohio, from 1905 to 1908; elected to the 62d Congress from Ohio.

**White, Joseph L.**, counsel of ship canal company, 2676.

**White, Joseph M.**, employment of, to compile land laws in Florida, 994.

**White, William**, imprisonment of, in Buenos Ayres, 632.

**White House.** (See Executive Mansion.)

**White Leagues** referred to, 4251. (See also Klu-Klux-Klan.)

**White Plains (N. Y.), Battle of.**—After the battle of Harlem Heights, in which Washington was enabled to maintain his ground in the face of the British attack, Gen. Howe's war ships advanced up the East River

**White Plains (N. Y.), Battle of—**  
*Continued.*  
 and landed troops at Frogs Point (now Throggs Neck). His purpose was to gain a position in Washington's rear and thus cut him off from communication with his army outside of New York. About 4,000 British were sent to dislodge some 1,400 Americans who were intrenched on Chatterton Hill. After a short and sharp skirmish the Americans fell back in good order to the main body of the army, having lost but little more than half as many as their opponents. The American loss is variously stated at from 125 to 200, while the lowest official estimate of the British loss places it at 231. The following night Washington retired to a much stronger position about 5 miles north and Howe withdrew to Dobbs Ferry.

**White River Forest Reserve,** proclaimed, 6989.

**Whitehall, N. Y.,** proclamation granting privileges of other ports to, 2540.

**Whitely, Simeon,** treaty with Indians concluded by, 3393.

**Whiting, Joseph B.,** member of Chipewewa Commission, 5500.

**Whitney, William Collins** (1841-1904); financier and politician; b. Conway, Mass.; in 1871, he took an active part against the "Tweed Ring" in New York; was corporation counsel of New York City, 1875-82; Secretary of the Navy, 1885-89; a strong supporter of Cleveland, whose Presidential campaign he managed in 1892; it was his masterly management that secured both nomination and election of Cleveland under peculiarly adverse conditions; his great work as financier was the consolidation of the traction lines in New York City.

**Whittlesey, Elisha,** commissioner to adjudicate claims of David Taylor, 2678.

**Wichita Indians.** (See Indian Tribes.)

**Wickersham, George Woodward,** of New York City; Attorney-General in President Taft's Cabinet; b. Pittsburgh, Pa., Sept. 19, 1858; graduated law department of the University of Pennsylvania, 1880; admitted to the Philadelphia bar and practiced there until 1882, when he removed to New York City.

**Wickersham, James;** lawyer; b. Aug. 24, 1857; appointed United States district judge of Alaska, 1900, and resigned to take effect Jan. 1, 1908; elected delegate to the 61st and 62d Congresses from Alaska.

**Wickliffe, Robert C.;** b. Bardtown, Ky., May 1, 1874, while his parents were there on a visit; grew to manhood at West Feliciana, La.; admitted to the bar; served in the Spanish-American War, and later resumed practice of law; in 1908 he became a candidate in the Democratic primaries for the nomination for Congress from the Sixth District of Louisiana, held under the new primary election law of Louisiana, and received the nomination in the second run-off, and was elected to the 61st Congress.

**Wilder, W. C.,** member of commission concluding treaty of annexation of Hawaiian Islands, 5783.

**Wilder, William H.,** b. May 14, 1855, in Belfast, Me.; moved to Massachusetts; worked on a farm, attending school in the winter, until his seventeenth year, when he engaged in business; studied law at the age of 45 years and admitted to the bar, making a special study of monetary affairs, visiting Europe for this purpose in 1909 and again in 1911; is a thirty-second degree Mason; member of Ivanhoe Commandery, Knights Templar, Nobles of the Mystic Shrine, Boston; honorary member of D. G. Farragut Post No. 116, Grand Army of the Republic; elected to the 62d Congress from Massachusetts.

**Wilderness (Va.), Battle of.—**The rank of lieutenant-general was revived on March 2, 1864, and on the 9th of that month it was conferred upon Gen. Grant, who was given the command, under the President, of all the armies of the United States. The plan of campaign agreed upon between Grant and Sherman was to make a simultaneous advance against Lee's army in Virginia and that of Johnston in Georgia. Meade was left in control of the army of the Potomac and Sheridan placed in command of the cavalry in Virginia. Gen. B. F. Butler was made commander of the Army of the James, consisting of 38,648 men and 90 guns. May 4, 1864, Grant crossed the Rapidan with the Army of the Potomac, aggregating on May 1, according to the report of the Secretary of War, 120,380 in men and 316 guns. The Ninth Corps, 20,780 in number, was subsequently added. Lee lay on the south bank of the Rapidan with 63,984 men. The Confederate position was in the midst of a wilderness of scraggy oak, sassafras, hazel, and pine. It is a region of worn-out tobacco fields, and lies directly west of the battlefield of Chancellorsville. It was not Grant's

**Wilderness (Va.), Battle of—Continued.** intention to fight Lee there, but the Confederate attack early on the 5th compelled it. Lee gained ground in the two days' fighting. The battle was a bloody bush fight. More than 200,000 men fought in a vast jungle. Grant's loss amounted to over 20,000, of whom 5,000 were made prisoners. The Confederate loss was about 10,000. Grant now resolved to turn Lee's left flank and put his army between the latter and Richmond. On the night of the 7th the Federal army took up the march toward Spottsylvania Court-House. On the morning of the 8th of May the men of the opposing forces arrived almost at the same moment at the Court-House. Then occurred the great battle of Spottsylvania (q. v.).

**Wildfire, The,** capture of, by the *Mohawk*, 3124.

**Wilkes, Charles;** naval officer; b. New York, April 3, 1798; joined the navy as midshipman Jan. 1, 1818; conducted an expedition to explore the southern Pacific Ocean, 1838-42; in 1861, while cruising in the *San Jacinto*, he intercepted the British steamer *Trent* and took from her two confederate commissioners who were on their way to England, and placed them under the custody of Federal authorities at Fort Warren; between 1862 and 1866 he was employed chiefly in blockade duty on the South-Atlantic coast; made rear-admiral, 1866, and soon after retired; died Washington, D. C., Feb. 8, 1877.

**Wilkes, Charles:**

Commander of exploring expedition, report of, on Oregon Territory referred to, 2013.

Removal of Mason and Slidell from British vessel. (See Mason and Slidell.)

**Wilkes's Exploring Expedition,** expenditures of publication of, referred to, 3068.

**Wilkinson, James;** soldier; b. Maryland, 1757, and joined the Revolutionary Army, 1778; appointed secretary of the board of war, of which Gen. Gates was president; settled in Kentucky after the war, and engaged in expeditions against the Indians; governor of Louisiana Territory, 1805-06; appointed major-general in 1813 and made unsuccessful efforts to occupy Canada; on the reorganization of the army in 1815 he was discharged and migrated to Mexico, where he died Dec. 28, 1825.

**Wilkinson, James:**

Aaron Burr's insurrection, troops

sent to suppress, commanded by, 401.

Conduct and commercial transactions of, investigated, 423.

No intimation found of corrupt receipt of money by, 427.

Expeditions against Wabash Indians commanded by, 104.

Mentioned, 405.

**Willamette Valley, etc., Wagon Road Co.,** lands granted to Oregon for, referred to, 4665.

**Willcox, Orlando B.,** negotiations for and correspondence regarding restoration of peace, 3463.

**William I.,** Emperor of Germany, death of, referred to, 5367.

**William, The,** captured with African negroes on board, 3126.

**William and Francis, The,** satisfaction to be allowed by Great Britain for detention of, 2111.

**Williams, Eli,** commissioner for Cumberland road, 406.

**Williams, George H.,** member of commission to settle questions with Great Britain, 4075.

**Williams, John Sharp;** b. July 30, 1854, at Memphis, Tenn.; received a fair education at private schools, the Kentucky Military Institute, near Frankfort, Ky., the University of the South, Sewanee, Tenn., the University of Virginia, and the University of Heidelberg, in Baden, Germany; subsequently studied law under Profs. Minor and Southall at the University of Virginia; in December, 1878, moved to Yazoo City, Miss., where he engaged in the practice of his profession and the varied pursuits of a cotton planter; delegate to the Chicago convention which nominated Cleveland and Stevenson; served as temporary chairman of the Democratic national convention in 1904; was elected to the 53d, 54th, 55th, 56th, 57th, 58th, and 59th Congresses, and reelected to the 60th Congress, receiving all the votes cast. He had no opposition either for renomination or election; was the candidate of his party for the office of Speaker in the 58th, 59th, and 60th Congresses. On Aug. 1, 1907, Mr. Williams was chosen at a primary election to be the candidate of the Democratic party for the United States Senate from Mississippi, and on Jan. 23, 1908, elected by the legislature to succeed Hon. H. D. Money.

**Williams, Jonathan,** death of Gen. Washington announced and honors to be paid memory of, were signed by, as Aid-de-Camp.

**Williams, Robert**, bureau of military information under supervision of, discussed, 5879.

**Williams, S. W.**, decree of, prohibiting steamers sailing under American flag from using channel on Yangtse River discussed, 3896, 3902.

**Williamsburg (Va.), Battle of.**—As soon as it was discovered that the Confederates had withdrawn from Yorktown (May 5, 1862), a column was sent in pursuit. It came up with the retreating rear guard at Williamsburg. The Confederates had been reinforced from Johnston's army at Richmond. Longstreet's division, having passed beyond the town, retraced its steps to resist the attack. Hooker, of Heintzelman's division, and Smith, of Keyes's, bore the brunt of the assault, fighting from morning till late in the afternoon, vainly calling for reinforcements. The arrival of Kearny's division about 4 P. M. caused the Confederates to retire toward Richmond. The Federal loss was 2,228 men, of whom 456 were killed. The Confederate loss was 1,560, of whom 288 were killed.

**Williamson's Farm (S. C.), Battle of.**—One of the minor skirmishes of the Revolutionary War in the South and the first disaster to the British arms after the capture of Charleston. July 12, 1780, Capt. Houk, with 115 British and Tories, was sent from the garrison at Rocky Mount to collect militia and drive back the Americans. Thomas Sumter, with 75 men, surprised and captured them. Capt. Houk was killed in the fight.

**Willis, Albert S.**, minister to Hawaiian Islands. (See Hawaiian Islands, minister to.)

**Willis, Jesse H.**, collector of customs, nomination of, 992.

**Wilmington, The**, attempts of, to silence batteries at Cardenas, Cuba, 6302, 6316.

**Wilmot, David** (1814-1868); politician and jurist; b. Bethany, Pa.; admitted to bar, 1834; member of Congress from Pennsylvania, 1844-51; promoted the famous "Wilmot Proviso" (1846); joined the Republican party and supported Fremont in 1856; United States senator, 1861-63; judge of the United States Court of Claims.

**Wilmot Proviso.**—President Polk, in a special message Aug. 8, 1846 (2309), made a request of Congress for money to adjust the boundary between Mexico and the United States by the purchase of certain Mexican territory outside of Texas. In accordance with this request a bill was intro-

duced into the House appropriating \$2,000,000 for the purpose. David Wilmot, a Democrat from Pennsylvania, offered an amendment which provided "that neither slavery nor involuntary servitude shall ever exist in any part of said territory, except for crime, whereof the party shall first be duly convicted." This was the Wilmot Proviso. The bill as amended passed the House, but failed in the Senate. Early the next year another bill passed the House, appropriating \$3,000,000 for the same purpose, with the Wilmot amendment attached, but the amendment was omitted in the Senate.

**Wilson, Alfred M.**, member of Cherokee Commission, 5481.

**Wilson, Frank E., M. D.;** b. 1857, at Roxbury, Delaware County, N. Y.; graduated from the Jefferson Medical College at Philadelphia in 1882; elected to the 56th, 57th and 58th Congresses, and reelected to the 62d Congress from New York.

**Wilson, Henry** (1812-1875); statesman and eighteenth Vice-President of the United States; b. Farmington, N. H., under the original name of Jeremiah Jones Colbath; removed 1832 to Natick, Mass., and learned shoemaking, whence he was called "the Natick Cobbler"; member in the House of Representatives, 1832; State senator for four years, and twice president of the senate; an ardent opponent of slavery; prominent in the organization of the Free-Soil party, 1842; president of its convention at Pittsburgh, 1852; member of the Constitution Convention, 1853; defeated for Governor of Massachusetts, 1853 and 1854; succeeded Edward Everett as United States senator, 1855; supported the repeal of the Fugitive Slave Law; advocated abolition of slavery in the District of Columbia; a leader of the Republican party, 1855; chairman of the committee on military affairs during the Civil War; Vice-President, 1873-75.

**Wilson, Henry**, Vice-President, death of, announced and honors to be paid memory of, 4285.

**Wilson, H. B.** (administrator), act for relief of, vetoed, 5236.

**Wilson, James**, of Traer, Tama Co., Iowa, Secretary of Agriculture in President Taft's Cabinet; b. Ayrshire, Scotland, Aug. 16, 1835; in 1852 he came to the United States, locating in Tama Co., Iowa, where he engaged in farming; served in State legislature, and elected to Congress in 1872, and served in the 43d, 44th,

**Wilson, James—Continued.**

and 48th Congresses; in the interim between the 44th and 48th Congresses, member of Railway Commission; 1870 to 1874, regent of State University; director of the agricultural experiment station and professor of agriculture at the Iowa Agricultural College at Ames, 1890-1896; appointed Secretary of Agriculture by President McKinley in 1897 and 1901; by President Roosevelt in 1905; and by President Taft in 1909.

**Wilson, John M.**, Puerto Rican expedition reinforced by division of, 6318.**Wilson, William Bauchop**; b. Blantyre, Scotland, April 2, 1862; came to this country with his parents in 1870, and settled at Arnot, Tioga Co., Pa.; began working in the coal mines; in 1873 took an active part in trade-union affairs; international secretary-treasurer of the United Mine Workers of America; 1900-1907 engaged in farming at Blossburg; elected to the 60th, 61st and 62d Congresses from Pennsylvania.**Wilson, William Lyne** (1843-1900); statesman and cabinet officer; b. Jefferson Co., Va.; served in the Confederate Army during the Civil War; president of the University of Virginia, 1882-1883; Democratic member of Congress from West Virginia, 1883-95; while chairman of the Ways and Means committee he brought about the repeal of the Sherman Silver Purchase Bill, 1893; and framed the tariff bill known by his name, 1894; postmaster-general under Cleveland, 1895-1897; president of Washington and Lee University, 1897.**Wilson, William Warfield**; b. March 2, 1868, at Ohio, Bureau Co., Ill.; admitted to the bar in 1893; elected to the 58th, 59th, 60th, 61st and 62d Congresses from Illinois.**Wilson, Woodrow**, lawyer, author, educator, governor, president; b. Staunton, Va., Dec. 28, 1856; son of a Presbyterian minister, graduated from Princeton University in 1879; studied law in University of Virginia and practised law in Atlanta, Ga., in 1882 and 1883; married, June 24, 1885, Helen Louise Axson, of Savannah, Ga., and the same year became professor of history and political economy in Bryn Mawr College, Pennsylvania, whence he went to Wesleyan University to fill the same position; from there he went to Princeton (N. J.), University as professor of jurisprudence and politics, and in 1902 became president of that institution, which position he held

until 1910, when he was elected Governor of New Jersey. Before the expiration of his term he was elected president of the United States on the Democratic ticket in 1912. He has been honored by many scholastic degrees and is the author of several historical and political works.

**Wilson's Creek (Mo.), Battle of.**—During the summer of 1861 Confederate troops in large numbers were sent into Missouri from Arkansas, Louisiana, and Texas. Gen. Lyon was stationed at Springfield with 5,500 Federal troops. The Confederates, 20,000 strong, advanced in 2 columns under McCulloch and Price. During the night of Aug. 9, 1861, Sigel was sent with 1,500 men to attack the Confederate rear, 9 miles distant, at Wilson's Creek, while Lyon attacked the front. Both attacks were repulsed. Sigel lost 5 of his 6 guns and more than half of his men. Lyon was killed while leading a charge. The Federal loss was 1,246 in killed, wounded, and missing. The Confederate loss was about the same.**Winchester (Va.), Battle at.**—Winchester and its vicinity was the scene of several engagements during the War between the States. It is located in the Shenandoah Valley, and was on the line of the two armies as they marched and countermarched through the valley. An engagement occurred at Kernstown, near Winchester, March 23, 1862, the Federals under the command of Shields and Kimball, and the Confederates under Jackson. In killed, wounded, and missing the Federals lost 590 and the Confederates 718. Jackson retreated to his main force.

In May, 1862, the Federals under Banks were posted at Harrisonburg, in the valley. Banks was about to be attacked by the Confederates under Jackson, when he retired down the valley to the heights of Winchester, where on May 24 he gave battle. Being assailed on both flanks, he retreated rapidly on the 25th to the north bank of the Potomac, making the distance, about 50 miles, in 43 hours. He was pursued by Jackson to near Harper's Ferry. Again, June 15, 1863, the Federals under Milroy were encamped near Winchester, numbering about 7,000, which force was deemed sufficient to hold the place against all the Confederates known to be in the valley. On that day Milroy found himself almost surrounded by the combined corps of Longstreet and Ewell. An artillery fight was main-

**Winchester (Va.), Battle at—Continued.** tained all day and at night the divided and scattered troops of Milroy retreated to the Potomac River, having lost 4,000 men, 28 guns, about 300 horses, and a large number of wagons. The Confederate loss was insignificant.

A small force of Federals under Averell was attacked by the Confederates under Early near Winchester July 12, 1864. The Confederates defeated the Federals, who lost 3 guns and about 400 men. Early then marched on Chambersburg, Pa.

In August, 1864, Sheridan took command of the Federal army in the valley, known as the Army of the Shenandoah. The Confederates under Early were encamped on the west bank of Opequan Creek, covering Winchester. They were attacked on Sept. 19 by Sheridan. The battle began about 10 A. M., and was maintained till nearly 3 P. M., when the Confederates retreated to and beyond Winchester. Sheridan took 2,500 prisoners and found 2,000 wounded in the hospitals at Winchester. The Confederate loss in all reached 5,500, while the Federal loss was 653 killed, 3,719 wounded, and 618 missing—a total of 4,990. This is also called the battle of Opequan.

**Wind Cave, National Park.** (See Parks, National.)

**Wind River Reservation.** (See Shoshone Reservation.)

**Windom, William** (1827-1891); statesman and cabinet officer; b. Waterford, Ohio; member of Congress from Minnesota, 1859-69; United States senator, 1870-81; Secretary of the Treasury (1881 in Garfield's cabinet, and 1889-1891 in Harrison's cabinet); a decided advocate of reciprocity and of the gold standard.

**Windom, William,** Secretary of Treasury, death of, announced and honors to be paid memory of, 5599.

Referred to, 5568.

**Wines, E. C.,** commissioner to International Congress on Prevention of Crimes, report of, referred to, 4115.

**Wines,** duty on, discussed, 1131, 1321, 2127, 2250.

**Winnebago Indians.** (See Indian Tribes.)

**Winslow, Ezra D.,** refusal of Great Britain to surrender other fugitives and, 4325, 4369.

**Winslow, John A.,** thanks of Congress to, recommended, 3457.

**Winslow, The,** disabled in conflict in Cardenas Bay, Cuba, 6302, 6316.

Rescued by the *Hudson*, 6302.

Thanks of Congress to officers and men of, recommended, 6302.

**Winthrop, Robert C.,** correspondence respecting presentation to United States of desk upon which Declaration of Independence was written, 4540.

**Wisconsin.**—One of the United States. Nickname, "The Badger State"; motto, "Forward." It lies in the northern part of the country, between lat. 42° 27' and 47° north and long. 86° 53' and 92° 54' west, not including islands in Lake Superior and Michigan. It is bounded on the north by Lake Superior and the upper peninsula of Michigan, on the northeast and east by the upper peninsula of Michigan and Lake Michigan, on the south by Illinois, and on the west by Iowa and Minnesota (separated mostly by the Mississippi and St. Croix rivers). The area is 56,040 square miles. Wisconsin is hilly in the north and southwest, but elsewhere is generally level. It has important agricultural, mining, and lumbering interests and extensive manufactures of flour, machinery, and beer. It was visited as early as 1634 by Nicollet, La Salle, and French fur traders, who established a settlement at Green Bay in 1639. It was included in the Northwest Territory till 1800, when it became a part of the Indian Territory. In 1809 it was included in Illinois Territory, in 1818 in Michigan Territory, and in 1836 it was organized as Wisconsin Territory, and included, besides its present area, the territory now embraced in the States of Iowa and Minnesota and part of the Dakotas. It was admitted to the Union May 29, 1848.

Statistics of agriculture reported to the Federal Census Bureau under date of April 15, 1910, place the number of farms in the State at 177,127, comprising 21,060,466 acres, valued, with stock and improvements, at \$1,413,043,000. The average value of land per acre was \$43.30. The domestic animals, poultry, etc., were valued at \$158,454,043, including 2,678,000 cattle, valued at \$67,399,858; 614,654 horses, \$68,585,573; 2,872 mules, \$316,066; 1,809,331 swine, \$13,620,741; 929,783 sheep, \$3,669,572, and poultry, \$4,468,703. The yield and value of the field crops for 1911 was: Corn, 1,600,000 acres, 58,080,000 bushels, \$34,848,000; wheat, 195,000 acres, 3,097,000 bushels, \$2,788,000; oats, 2,250,000 acres, 67,050,000 bushels, \$30,172,000; rye, 355,000 acres, 6,035,000 bushels, \$5,069,000; potatoes, 280,-

**Wisconsin—Continued.**

000 acres, 32,480,000 bushels, \$20,138,000; hay, 2,079,000 acres, 2,495,000 tons, \$38,922,000; tobacco, 41,000 acres, 51,250,000 pounds, \$5,125,000.

The State ranks fifth in the production of iron ore. The output in 1910 was 1,149,551 long tons, valued at \$2,727,406. The amount of capital invested in manufacture is \$412,647,051, and \$71,471,805 is paid annually to 151,391 wage-earners. Lumber is the leading industry, with 725 establishments, capitalized at \$46,543,787. Dairying is another large industry, with 2,360 establishments, capitalized at \$5,897,418, producing goods worth \$29,994,791.

The industrial census of 1905 disclosed 8,558 manufacturing establishments with a capital of \$416,447,051, employing 151,391 persons, and turning out \$411,139,681 worth of finished goods, consisting of machinery, lumber, dairy products, flour, beer, and leather.

There were in 1907, 7,292 miles of steam railway, and 776 miles of electric lines. The population in 1910 was 2,343,860.

**Wisconsin:**

Act for continuing certain works in, reasons for applying pocket veto to, 2460.

Boundary line with Michigan, referred to, 1846.

Constitution adopted by, transmitted, 2359, 2427.

Volunteers from, thanks of President tendered, 3442.

**Wisconsin River**, act regarding improvement of, vetoed, 4236.

**Wise, Henry Augustus**, naval officer; b. Brooklyn, N. Y., May 12, 1819; entered the navy as midshipman, 1834; served in the Seminole War and on the Pacific coast during the Mexican War; flag-lieutenant of Mediterranean squadron, 1852-54; conveyed the Japanese ambassadors home in frigate *Niagara*, 1861; promoted to captain and chief of naval ordnance bureau with rank of commander in December, 1866; died at Naples, Italy, April 2, 1869.

**Wise, Henry A.**, minister to—  
Brazil—

Correspondence of, referred to, 2426, 2428, 2538.

France, nomination of, and reasons therefor, 2086.

**Witherspoon, Samuel A.**; b. May 4, 1855, in Lowndes County, Miss.; educated at the University of Mississippi and

was graduated in 1876; for three years a tutor of Latin in the State University, and that institution has conferred upon him the degree of A. B., A. M., and LL. D.; was married on the 17th day of June, 1880, to Miss Sue E. May, of Versailles, Ky. In the election to the Sixty-second Congress from Mississippi was the nominee of the Democratic party and had no opponent.

**Witnesses:**

Fees of, referred to, 4730, 4770, 4836.  
Protection of, from injury, recommended, 5477.

**Wolcott, Oliver**, commissioner of United States, nomination of, 290.

**Wolford, Frank**, Presidential elector of Kentucky, arrest and imprisonment of, 3460.

**Woman Suffrage.**—The claims for woman suffrage rest largely upon a dogma that suffrage is a natural right. The constitution of New Jersey, framed in 1776, and a statute passed in 1793 to regulate elections, permitted all inhabitants with certain qualifications to vote and stipulated how each should deposit "his or her ballot." This act was repealed in 1807. Advocates of woman suffrage argue that it is a natural right and that "the consent of the governed" is not the consent of the governed property holders, nor the governed voting men, but all the governed, men and women; that the voting of males is no longer conditioned upon military service, and that woman needs a vote to adequately protect and advance her interests.

In reply to these claims it is held that "suffrage is not a natural right; that in all ages and countries it has been conditioned upon qualifications of expediency; that representation of taxpaying women practically exists; that the interests of the family and of the State will be best preserved by continuing the division of labor which hitherto has exempted women from military and political duty; that the interests of women are not so distinct from those of men as to make their representation as a class necessary, and that their interests can be adequately protected without their voting." The agitation has resulted in a partial enfranchisement of women, in elections involving property taxes and schools, in about half of the States and Territories.

Women possess suffrage upon equal terms with men at all elections in ten States: In Wyoming, established in 1869; in Colorado, in 1893; in Utah,

**Woman Suffrage—Continued.**

and Idaho, in 1896; in Washington, 1910, in California, 1911; and in Arizona, Kansas, Michigan and Oregon in 1912.

In Kansas women possessed school suffrage established in 1861, municipal suffrage established in 1887, and bond suffrage in 1903. In 1911 the Legislature adopted an amendment to the Constitution for full woman suffrage, except for President, to be submitted to popular vote, which resulted favorably to the women at the election in 1912.

The Oregon, Nevada, and Wisconsin legislatures in 1911 adopted woman-suffrage amendments for submission to the vote of the people, the Wisconsin amendment to go into effect, if adopted, in 1913; in Wisconsin and Nevada the amendments were defeated, but carried in Oregon.

Woman-suffrage measures were defeated in the legislatures of New York, Massachusetts, Indiana, Michigan, Minnesota, Iowa, and Connecticut in 1911; but the proposition was successful in Michigan the following year.

The California State Republican convention of 1910 adopted a resolution favoring submission to the voters of a constitutional amendment providing for woman suffrage on Oct. 10, 1911. Woman suffrage won.

School suffrage for women has prevailed some time in the following States: Arizona, California, Colorado, Connecticut, Delaware, Florida, Iowa, Illinois, Indiana, Idaho, Kansas, Michigan, Massachusetts, Minnesota, Mississippi, Montana, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Oklahoma, Oregon, Ohio, South Dakota, Utah, Vermont, Washington, Wyoming, and Wisconsin.

In 1887 Montana gave taxpaying women the right to vote on questions submitted to taxpayers; in 1894 bond suffrage was given to women in Iowa; in 1898 the women of Minnesota were given the right to vote for library trustees, and in the same year Louisiana gave woman taxpayers the right to vote in person or by proxy on all questions of taxation. In 1908 Michigan adopted a constitutional amendment providing for taxpaying suffrage for women taxpayers.

In 1901 the New York Legislature passed a law providing that "a woman who possesses the qualifications to vote for village or for town officers, except the qualification of sex, who

is the owner of property in the village assessed upon the last preceding assessment roll thereof, is entitled to vote upon a proposition to raise money by tax or assessment."

In Great Britain women can vote for all officers except members of Parliament.

In Australia and New Zealand women have full suffrage; also in the Isle of Man and Iceland. They have taxpaying parliamentary suffrage in Norway.

Women have municipal suffrage in Ontario, Nova Scotia, Manitoba, Quebec, British Columbia, and the Northwest Territory, in Iceland, Denmark, and Sweden. In France women engaged in commerce have the right to vote for Judges of the Tribunal of Commerce. Women have some voting privileges in Cape Colony.

The International Woman Suffrage Alliance is composed of National Woman Suffrage Associations composed of twenty-two nations. Its officers are: President, Carrie Chapman Catt, New York; vice-president, Millicent Garrett Fawcett, London; second vice-president, Annie Fuhjelm, Finland; treasurer, Mrs. Stanton Coit, London; secretaries—First, Miss Martina Kramers, Holland; Mrs. Anna Lindemann, Germany; Miss Singe Bergman, Sweden.

The officers of the National American Woman Suffrage Association are: Rev. Anna Howard Shaw, Moylan, Pa., president; Jane Addams, Hull House, Chicago, Ill., first vice-president; Sophonisba Breckenridge, Green Hall, Chicago University, Chicago, Ill., second vice-president; Mary W. Dennett, 505 Fifth Ave., New York City, corresponding secretary; Mrs. Susan W. Fitzgerald, 585 Boylston St., Boston, Mass., recording secretary; Jessie Ashley, 505 Fifth Ave., New York City, treasurer; Mrs. Robert M. La Follette, Madison, Wis., first auditor; Mrs. James Lees Laidlaw, 1 Madison Ave., New York City, second auditor. National Headquarters, 505 Fifth Ave., New York City.

The New York State Association Opposed to Woman Suffrage has its central office in New York City. Its officers are as follows: Mrs. Arthur U. Dodge, president; Mrs. Fritz Achelis, first vice-president; Mrs. Elihu Root, Mrs. Richard Watson Gilder, Mrs. William A. Putnam, Mrs. Robert MeVickar, Mrs. George D. Miller, and Mrs. William P. Northrup, vice-presidents; Mrs. Francis S. Bangs, treasurer; Mrs. George Phillips, secretary,

**Woman Suffrage—Continued.**

Room 819, Engineering Societies Building, 29 West 39th St., New York City. There are also organizations in Massachusetts, Illinois, Oregon, Iowa, Washington, California, Pennsylvania and Maryland. These are founded with the object of testifying to legislative committees and through the medium of the public press that the opposition to woman suffrage is based upon what is claimed to be "the intelligent conviction of the majority of representative women in all lines of social, industrial, and domestic progress." Pamphlets with information as to the objects of the association may be had from the secretary. (See Suffrage.)

**Woman's Relief Corps—**Auxiliary to the Grand Army of the Republic.—This organization was created by the mothers, wives, daughters, and sisters of Union soldiers of the Civil War of 1861-65 for the purpose of aiding and assisting the Grand Army of the Republic, and to "perpetuate the memory of their heroic dead," to "extend needful aid to the widows and orphans," to "cherish and emulate the deeds of our army nurses," and to "inculcate lessons of patriotism and love of country among our children and in the communities in which we live." The organization is composed of 35 departments which are subdivided into corps, as well as detached corps in several States where no departments exist. The year ending June 30, 1907, there were 131,023 corps and 155,536 members.

**Woman's Rights.**—The first woman's rights convention was held at Seneca Falls, N. Y., July 19, 1848. It demanded for women equal rights with men. The women based their claims on the Declaration of Independence. The first national woman's rights convention was held at Worcester, Mass., Oct. 23, 1850. In 1866 the American Equal Rights Association presented the first petition ever laid before Congress for woman suffrage. The New England Woman's Suffrage Association was formed in 1868, and the first systematic effort was then begun for memorializing legislatures and Congress. The Massachusetts Republican convention of 1868 admitted Lucy Stone and Mary A. Livermore as delegates. The following year the convention of the party in that State indorsed woman suffrage. In 1872 and again in 1876 the Republican National Con-

vention resolved "that the matter of woman's rights should have respectful consideration." Besides the women mentioned above some of the more prominent leaders in the woman's rights movement have been Susan B. Anthony, Elizabeth Cady Stanton, Virginia L. Minor, Matilda Jocelyn Gage, Julia Ward Howe, Carrie C. Catt, and Anna H. Shaw. (See also Woman Suffrage.)

**Wood, Ira W.;** b. in Wilkes-Barre, Pa.; member of the New Jersey bar; elected to the New Jersey legislature in 1899 and 1900; elected to the 58th Congress to fill a vacancy, and also to 59th, 60th, 61st, and 62d Congresses from New Jersey.

**Wood, John E.,** correspondence of, referred to, 3014.

**Wool Taps and Yarn**, low tariff on, would disrupt industry, 8127.

**Woolen Goods**, low tariff on, would destroy fine goods industry, 8127.

**Wooster, David**, monument to memory of, information regarding, 801.

**Worcester, Dean C.**, member of commission to Philippine Islands, 6584.

**Worcester vs. Georgia.**—An important Supreme Court case involving the right of individual States to make laws at variance with treaties made by the Government of the United States. Samuel A. Worcester was a missionary among the Cherokees. In 1831 he was arrested by officers of the State of Georgia, tried, and sentenced to 4 years' imprisonment for living among the Indians in violation of an act of the State legislature which forbade any white person to reside among the Indians without a license from the governor of the State or some one else authorized to issue it. Worcester pleaded authorization by the President and by the Cherokees, also the unconstitutionality of the act itself. By a writ of error the case was brought before the United States Supreme Court. That tribunal reversed the decision of the State court and rendered judgment in favor of Worcester on the ground that the Georgia act, being repugnant to the Constitution, to the treaties made by the United States with the Cherokees, and to the laws of Congress in execution thereof, was unconstitutional and void. It was held that the treaties and laws of the United States contemplate the Indian territory as completely separated from that of the

States, and provide that all intercourse with the Indians shall be carried on by the Government of the Union.

**Worden, John Lorimer**; naval officer; b. Westchester Co., N. Y., March 12, 1818; entered navy as midshipman Jan. 10, 1834; commanded the iron-clad *Monitor* in her fight with the *Merrimac* off Hampton Roads, March 9, 1862; promoted Captain, 1863, and did duty at New York in connection with the iron-clads; commissioned rear-admiral Nov. 20, 1872; retired Dec. 23, 1886; died Oct. 18, 1897.

**Worden, John L.:**

Captain in Navy, nomination of, 3352.

Imprisonment of, 3235.

Thanks of Congress to, recommended,

3344.

Thanks of President tendered, 3313.

5247.

Consideration and return of, discussed, 5249.

**Works, John D.**; b. Ohio County, Ind., March 29, 1847; was reared on a farm until sixteen and a half years of age, when he enlisted in the Army, serving 18 months, until the close of the Civil War; educated in the common schools of Indiana; is a lawyer and practiced his profession for 15 years at Vevay, Ind.; in 1883 moved to California; served one term as a member of the Legislature of Indiana in 1879; was judge of the Superior Court of San Diego County, Cal., and a justice of the Supreme Court of that State; for a short time, in 1910, a member of the City Council of the city of Los Angeles, Cal., and its president; member of the American Bar Association more than 20 years; elected United States Senator for California by the legislature of that State.

**World's Columbian Commission:**

Reports of, deposited in State Department, 6181.

Reports of, transmitted, 5567, 5669, 5769.

**World's Columbian Exposition.**—The idea of celebrating by an exposition the fourth centenary of the discovery of America by Columbus was conceived during the progress of the Centennial Exposition at Philadelphia in 1876. The project was widely discussed and met with general favor, New York, Washington, St. Louis, and Chicago competing for the site. In February, 1890, Congress authorized the holding of the exposition and designated Chicago as the place. A company had already been organized,

**World's Columbian Exposition — Continued.**

with a capital of \$5,000,000, for holding the fair.

The buildings were dedicated Oct. 21, 1892, just 400 years after the landing of Columbus. Owing to the magnitude of the enterprise the exposition did not open until May 1 following, remaining open till the 30th of the following October. It surpassed all previous world's fairs in every respect except in point of attendance, in which it fell below that of the Paris Exposition of 1889 only. Jackson Park and the Midway Plaisance, the site of the exposition, covered 633 acres of land on the shore of Lake Michigan, and of this about 190 acres were under roof. The 28 main exposition buildings occupied 142½ acres, the remainder being covered by State and foreign buildings and concessions. The building devoted to the exhibition of manufactures and liberal arts was the largest in the world. It measured 1,687 by 787 feet and covered 30½ acres. The central hall, 1,280 by 380 feet, was open to the roof, a distance of 237.6 feet, without a supporting column. There were 11 acres of skylight and 40 car-loads of glass in the roof, and it required 7,000,000 feet of lumber and 5 car-loads of nails to lay the floor. The buildings were painted by spraying machines and covered with a composition resembling marble, which gave the fair the name of the "White City." Fifty-two foreign powers officially participated in the exposition in response to President Harrison's proclamation of Dec. 24, 1890, inviting "all the nations of the earth to take part in the commemoration of an event that is pre-eminent in human history and of lasting interest to mankind." (5585.) The United States Government appropriations amounted to \$6,000,000. There were in all 65,422 exhibitors, 27,529,400 admissions, and the receipts amounted to \$14,117,332, exceeding the expenditures by nearly \$2,000,000.

**World's Columbian Exposition at Chicago:**

Board of management of Government exhibit designated, 5833.

**Wright, Obed**, arrest and prosecution of, for murder of friendly Indians, 618.

**Wright, Silas** (1795-1847); statesman; b. Amherst, Mass.; began the practice of law at Canton, N. Y., in 1819; State senator, 1823-27, where he opposed De Witt Clinton; elected member of Congress, 1827-29; comptroller of New York, 1829-33; United States senator, 1833-34 and 1837-43, where he opposed the United States Bank and supported Clay's Compromise; declined the nomination for Vice-President, 1844; governor of New York, 1844-47; several cabinet and diplomatic offices were tendered him, but he refused all.

**Württemberg.**—A Kingdom of the German Empire, lying between Bavaria on the east and Baden on the west, while to the south reaches Lake Constance and the borders of the Tyrol.

**Württemberg—Continued.**

Though primarily an agricultural State, yielding considerable quantities of grain, beets, hops, flax, and hemp, Württemberg has numerous flourishing industries. Stuttgart is the center of the publishing trade of southern Germany, and gold and silverware, clocks, pianos, surgical instruments, paper, beer and sparkling wine are largely produced both in the capital and other cities of the Kingdom. The government is a limited monarchy administered by the King and two legislative chambers. Württemberg sends 4 representatives to the Bundesrat and 17 to the Reichstag. Education is compulsory, the standard of illiteracy is very low and there is an excellent university at Tübingen, founded in 1477. The King is the head of the Evangelical Church to which 69 per cent of his subjects belong; Catholics and Jews form the rest of the population. The former Duchy and Electorate of Württemberg became a Kingdom by the peace of Pressburg in 1805 and became a State in the German Empire in 1871. Area, 7,534 sq. miles; population (1900), 2,169,480.

**Württemberg:**

**Wyandotte Constitution.**—The final constitution of the State of Kansas, adopted Oct. 4, 1859. It was ratified by a vote of 10,421 to 5,530. It prohibited slavery. The governor was to be elected for two years, and Topeka was made the capital. This constitution was adopted at Wyandotte, now a part of Kansas City, Kans. (See also Lecompton Constitution; Topeka Constitution.)

**Wyandotte Indians.** (See Indian Tribes.)

**Wyoming.**—One of the United States; motto, "Equal rights." It lies between lat. 41° and 45° north and long. 104° and 111° west. It is bounded on the north by Montana, on the east by South Dakota and Nebraska, on the south by Colorado and Utah, and on the west by Utah and Idaho. Area, 97,890 sq. miles. The surface being mountainous, the leading industries are stock raising and mining. Gold, coal, iron, and petroleum are the chief minerals. Most of the present State was included in the Louisiana Purchase. It was organized as a Territory in 1868 from areas previously in Dakota, Idaho, and Utah,

but derived more remotely from the original Territories of Nebraska, Utah, and Oregon, a portion having at one time also belonged to Washington. Wyoming was admitted to the Union in 1890.

About 10,000,000 acres of Wyoming are covered with forests, and the prosperity of the State depends largely on its mineral resources and grazing lands. About 3,300 sq. miles are inclosed in the Yellowstone National Park (q.v.), and 2,742 reserved for the use of Indians. Most of the land is arid and unsuited to agriculture without the aid of irrigation. Under the Federal reclamation act \$3,250,000 will be expended in irrigation in the valleys of the Shoshone and North Platte rivers. Many private companies are also at work. About half the State is well fitted for cattle and sheep grazing. In July, 1911, there were 33,629,605 acres of public land unreserved and unappropriated. United States land offices are located at Buffalo, Cheyenne, Douglas, Evanston, Lander, and Sundance. (See Lands, Public.)

Statistics of agriculture reported to the Federal Census Bureau under date of April 15, 1910, place the number of farms in the State at 10,987, comprising 8,543,010 acres; valued, with stock and improvements, at \$167,189,081. The value of domestic animals, poultry, etc., was \$65,605,510, including 767,427 cattle, valued at \$22,697,387; 156,062 horses, \$12,426,838; 2,045 mules, \$248,572; 33,947 swine, \$301,716; 5,397,161 sheep, \$29,666,228, and poultry, \$194,078. The yield and value of field crops for 1911 was: Corn, 13,000 acres, 195,000 bushels, \$148,000; wheat, 69,000 acres, 1,794,000 bushels, \$1,687,000; oats, 190,000 acres, 6,555,000 bushels, \$3,278,000; rye, 2,000 acres, 40,000 bushels, \$36,000; potatoes, 10,000 acres, 420,000 bushels, \$588,000; hay, 330,000 acres, 693,000 tons, \$7,138,000. The coal production in 1910 exceeded all past records. The output was 7,533,088 short tons, valued at \$11,706,187. During 1910 and 1911 there has been great development of the oil industry. Many new fields are being opened. The total mineral output for 1910 was \$12,110,286.

The report of the State Treasurer for the fiscal year 1911 shows total receipts of \$1,069,970; total expenditures, \$967,568. The bonded debt is \$120,000. The suffrage extends to all citizens, male and female, who can read, and who are registered as voters

**Wyoming—Continued.**

and have resided in the State one year and in the county sixty days next preceding the election.

About half the State is adapted for sheep-raising. The wool clip for 1910 was 36,037,500 pounds, valued at \$6,342,000, a record exceeded only by Montana. The population in 1911 was 145,965.

Unlawful combinations in, proclamations against, 5725, 5932.

**Wyoming Controversy.**—In the original charter granted by Charles I. to William Penn the northern boundary of Pennsylvania was fixed at lat. 43° north. However, the proprietors of the colony accepted 42° as the northern boundary and extended the southern boundary to include the Chesapeake and Delaware bays. Connecticut claimed all the territory north of 41° in Pennsylvania, and asserted her rights by chartering the Susquehanna Company, organized in 1753, to form settlements in the disputed territory. In 1762 the company sent its first party of settlers, 200 in number, into the region, but they were driven out by the Indians, who repudiated a previous sale of their rights to Connecticut and made a sale to Pennsylvania. In 1769 the Susquehanna Company sent more

colonists into the disputed country, and a desultory warfare began between them and the Pennsylvania settlers, to whom the territory had been leased. The former were several times driven out of the disputed district by the Pennsylvanians, but they finally obtained a permanent lodgment, as the Pennsylvania contestants were only lessees, while their opponents fought for their property rights. Hostilities with the mother country caused a suspension of civil strife for a time.

In 1779 an act of the Pennsylvania legislature transferred all the proprietary lands to the State. Pennsylvania brought suit against Connecticut to decide the jurisdiction over Wyoming. The case was heard by 5 judges at Trenton. In November, 1782, their unanimous decision, afterwards confirmed by Congress, was in favor of Pennsylvania.

**Wyoming Massacre.**—July 3, 1778, Col. Zebulon Butler, of the Continental army, with a force of about 300 militiamen, mostly old men and boys, marched out of Fort Mifflin, in the Wyoming Valley, about three miles above Wilkesbarre, Pa., to drive off an invading party of some 800 Indians and Tories under Chief Joseph Brant and the British Colonel Walter Butler. The Indians burned the forts in the upper part of the valley and forced the American militiamen to retreat in disorder. Of the 300 who left the fort in the morning the names of 162 officers and men are recorded as killed in action and the massacre which followed. Butler, the British officer in command, reported the taking of 227 scalps and only 5 prisoners. Col. Zebulon Butler with 14 men escaped from the valley.

# X

**X. Y. Z. Mission.**—An American embassy to France in 1797, consisting of Charles C. Pinckney, John Marshall, and Elbridge Gerry. Francis Dana declined appointment to this mission because of ill health. During the strained relations between the United States and the French Republic it became necessary to ask for the recall of Genêt, the French minister. In return France asked that Gouverneur Morris be recalled. Wishing to avoid rupture between the two Republics, President John Adams called a special session of Congress and announced his intention of sending a special mission to France to conciliate that country if possible (235). In October the commission met at Paris and endeavored to open negotiations with Talleyrand, the minister of foreign affairs. Talleyrand deputed three special agents to treat with the Americans, and these

were designated in dispatches to the United States Government as X., Y., and Z., respectively. They suggested that the American commissioners submit to Talleyrand a proposal from the United States to lend to France a large sum of money, or that the United States accept from France the assignment of a loan extorted from the Dutch, and that one of the envoys return to America to arrange the details of the business. The commissioners flatly refused the proposals, and their mission, which was fruitless, terminated. The correspondence was disclosed upon their return and aroused much indignation against France. While on this mission Charles Cotesworth Pinckney made the famous reply to an intimation that peace might be assured by a payment of money: "Millions for defense, but not a cent for tribute."

**Yakama Indians.** (See Indian Tribes.)  
**Yakima Reservation, Wash.,** lands on, to be used by Northern Pacific Railway, 4864, 4954, 5178.

**Yale, The,** mentioned, 5318.

**Yancton Indians.** (See Indian Tribes.)

**Yanctoni Indians.** (See Indian Tribes.)

**Yantse River,** steamers sailing under American flag prohibited from passing through Straw Shoe Channel on, 3896, 3902.

**Yankee, The,** mentioned, 6317.

**Yankee Doodle.**—A popular national air of the United States. The words are said to have been written in derision of the ill-assorted Continental troops, about 1755, by Dr. Schuckburgh, a surgeon under Gen. Amherst in the French and Indian War. The original title was "The Yankee's Return from Camp," and there are several versions. The tune has undergone various changes.

**Yankees.**—A word of uncertain origin, first applied to the early English colonists, later by the English to Americans generally, and still later to Northerners by people of the South. According to common legend, Yankees is a corruption of Yengees, Yaunghees, or Yanghies, a name said to have been given by the Massachusetts Indians to the English colonists in their efforts to pronounce the word "English" or the French word "Anglais." It was first applied to the New Englanders as a term of reproach by British soldiers.

**Yard, James,** consul to Santa Cruz, nomination of, 90.

**Yazoo Frauds.**—A term applied to the sale by the State of Georgia in 1795 of her western territory, now included in Alabama and Mississippi, to four land companies, known generally as the Yazoo companies, from the district in which they operated. The land extended from the Alabama and Coosa rivers to the Mississippi, and from the thirty-first to the thirty-fifth parallel, and the price paid to the State was \$500,000, or about 1½ cents per acre. It was charged that many members of the legislature who voted for the sale had been bribed. President Washington made the alleged frauds the subject of a special message (167). The people of the State were indignant and a party was formed to repeal the sale. In 1796 the records of the transaction were burned in the presence of the governor and legislature. Immediately numerous claims sprang up, which had to be decided by Congress.

The territory was ceded to the

United States in 1802. The next year President Jefferson appointed a commission to investigate the claims, and James Madison, chairman of the commission, recommended a compromise, but Georgia refused to compensate the claimants. Their claim was sustained by the Supreme Court, however, Chief Justice Marshall holding that allegations of bribery of the legislature could not be entertained, and that purchasers from the land companies were innocent holders; that the act of the Georgia legislature in 1796 repealing the sale of 1795 was an abrogation of contract, and therefore void. Finally an act was passed in 1814 appropriating \$8,000,000 payable out of the proceeds of the sale of Mississippi lands to satisfy the Yazoo claimants.

**Yellow Fever** (see also Contagious Diseases; International Sanitary Conference; Quarantine Regulations): Commission to investigate causes, etc., of, recommended, 6341.

In Southern States, discussed, 4444.

Act legalizing issue of provisions to sufferers, recommended, 4452.

**Yellowstone Forest Reserve,** proclaimed, 6704; adding to, 6709, 6819, 6966, 7164.

**Yellowstone National Park.** (See Parks, National.)

**Yellowstone National Park,** compensation to superintendent of, referred to, 4036.

**Yokum, William,** report in case of, transmitted, 3412.

**York (Canada), Capture of.**—The plans for the prosecution of the war with Great Britain in 1813 contemplated an invasion of Canada from both the east and the west. Gen. Harrison successfully carried out the programme in the west, routed Proctor's army, and was in possession of the territory. April 27, Gen. Dearborn, with about 1,700 men under the immediate command of Gen. Zebulon Pike, crossed Lake Ontario on Commodore Chauncey's transports and marched upon the British garrison at York (now Toronto), where Maj.-Gen. Sheaffe was in command of 800 regulars and a body of Indians. A sharp conflict ensued. The British and Indians were routed. By the explosion of a magazine Gen. Pike was killed, together with 51 other Americans and 40 British; 180 Americans were wounded by the explosion. The American loss in the battle was 269 on land and 17 on water. The British lost, besides the prisoners, 60 killed and 89 wounded.

**York, Canada, reduction of, by American forces, 524.**

**Yorktown, The.** (See *Baltimore, The.*)

**Yorktown, Va., monument at, completed and recommendations regarding, 4850.**

**Yorktown Centennial Celebration:**

British flag to be saluted by American army and navy forces at, 4624.  
Referred to, 4625.

Descendants of Baron von Steuben present at, 4626.

Representatives of French Republic and descendants of Lafayette present at, 4625.

**Yorktown (Va.), Siege of, in 1781.—**

After the battle of Green Springs, or Jamestown, Lafayette withdrew the American army to Malvern Hill. Cornwallis hurried on toward Yorktown, which place Sir Henry Clinton designed to be held as a British post in the absence of sufficient force to hold the entire State of Virginia. By Aug. 27, 1781, the British army in Virginia, consisting of 9,433 men, was concentrated at Yorktown and Gloucester Point, just across the York River. Aug. 30 Count De Grasse arrived in Chesapeake Bay with 26 French ships of the line besides frigates and transports. Sept. 3 Count De St. Simon landed at Jamestown with 3,200 French troops, and the allied armies, numbering 12,000 regular troops and 4,000 militia, under Washington and Lafayette, occupied Williamsburg, about 15 miles from Yorktown. Washington had eluded Clinton by a feint. Sept. 28 the army advanced and took a position about two miles from the British works, and on the 29th a general movement was begun to encircle the town and close in upon its defenders.

On the Gloucester side the siege was maintained by the Duke de Lauzun with his legion of French cavalry and 800 marines from De Grasse's squadron, besides a body of Virginia militia under Gen. Weedon. Oct. 6 the first parallel was opened under Gen. Lincoln within 600 yards of the enemy, and heavy guns were placed in position, with the loss of 1 French officer and 16 privates. On the 11th a second parallel was established with slight loss. On the 14th the two advanced redoubts of the British were taken by storm by the American light infantry under direction of Lafayette, and the French, under Baron Vioménil. The American loss was 9 killed and 32 wounded. Three French officers were wounded. The British lost 8 killed and 17 prisoners. On the morning of the 16th an unsuccessful

sortie was made on the advanced American redouts, by about 350 British under Lieut.-Col. Abercrombie, 100 French troops being killed or wounded, with little loss and no advantage to the British.

An attempt made by Cornwallis's army to escape in boats that night was frustrated by a storm, and on the morning of Oct. 17, 1781, a flag of truce was sent to Washington, making overtures for surrender. On the 19th articles of capitulation were signed by Washington and Cornwallis. The land forces became prisoners to the Americans and the marine force to the French. The total number of British officers and men surrendered was 7,073 from the army and 900 from the navy, besides 144 guns and 6 British and 18 regimental standards. The military chest contained £2,113. The *Guadaloupe, Forcey, Benetta*, and *Vulcan*, together with 30 transports, 15 galleys, and many smaller vessels, fell into the hands of the French. The total casualties of the siege were: British, 156 killed, 326 wounded, and 70 missing; American, 23 killed, 65 wounded; French, 52 killed, 134 wounded.

**Yorktown (Va.), Siege of, in 1862.—**

Nov. 1, 1861, McClellan was appointed to the chief command of the armies of the United States. He set about improving the organization and efficiency of the men, and by March 1, 1862, the forces about Washington numbered 221,987. The country was growing impatient at the inactivity of the Army, and the cry "On to Richmond" was almost universal in the North. The President directed that a move of some kind be made. The knowledge that McClellan contemplated a forward movement caused the Confederates to evacuate Manassas, Johnston withdrawing his forces to the defense of Richmond March 9, 1862. March 11 the President relieved McClellan of the command of all military departments except that of the Potomac, which had been divided into 5 corps, under command of Generals McDowell, Sumner, Heintzelman, Keyes, and Banks. It was decided that this army, except so much as was necessary for the protection of Washington, should move upon Richmond by way of the Virginia peninsula, lying between the James and York rivers. Fort Monroe occupies the extremity of the peninsula. Heintzelman's corps embarked March 17, and April 1 the headquarters of the Army of the Potomac was trans-

**Yorktown (Va.), Siege of, in 1862—**  
*Continued.*

ferred to the vicinity of Fort Monroe. Yorktown was defended by Gen. Magruder with less than 8,000 Confederates. April 4 occurred the principal skirmish of the siege, in which 35 men were killed and 120 wounded on the Union side, while the Confederates lost more than 100 killed. The next month was consumed by McClellan in building fortifications and roads to take Magruder's army. May 5 the last of the Confederates retired up the peninsula.

**Yosemite National Park.** (See Parks, National.)

**Young, Brigham;** Mormon apostle; b. Whitingham, Vt., June 1, 1801; joined the Mormon church at Kirtland, Ohio, 1832, and started in 1835 what became a successful missionary journey; possessed of a peculiar and impressive eloquence, he gained great influence in the church and succeeded Joseph Smith who died 1844, as leader of the sect; in 1846 led the Mormon hosts from Nauvoo, Ill., across the plains to the Great Salt Lake, where he founded the city of Salt Lake; March 1849, the State of Deseret was established, but Congress refused to recognize the government and organized the state of Utah and appointed Young governor; the federal officials were expelled and Young continued to wield almost unlimited power in spite of the government's efforts; introduced polygamy into the church; indicted in 1871, but never convicted; died Salt Lake City, Aug. 29, 1877.

**Young, Brigham, governor of Utah:**

Despotic power of, discussed, 2985.

Governor Cummings appointed in place of, 2986, 3034.

Rebellion under leadership of, discussed, 2986, 3034.

Referred to, 3013.

**Young, H. Olin;** b. Aug. 4, 1850, at New Albion, Cattaraugus Co., N. Y.; member of the Michigan State legislature in 1870; elected to the 58th, 59th, 60th, 61st, and 62d Congresses from Michigan.

**Young, D.;** b. Pleasantville, Marion County, Iowa, and at the age of 6 years, with his father's family, settled upon a farm in Adams County, Iowa; educated there in the common and high schools of the county; began teaching at the age of 15 and continued in that profession for 10 years; moved to Mitchell County, Kans., where he homesteaded

in 1874; farmed the same for more than 12 years; studied law while on the farm, and in 1888 moved from there to Beloit, where he began the practice of law; elected for a four-year term to the Kansas State Senate, being one of the youngest members of that body; was again elected to the senate in 1904; and was elected to the Sixty-second Congress from Kansas.

**Young, James,** b. July 18, 1866, at Henderson, Tex.; educated at the State University, Austin, Tex., graduating in June, 1891, with the degree of LL. B.; engaged in the practice of law when nominated for Congress, never having held public office; elected to the Sixty-second Congress from Texas.

**Young, John J.,** captain in Navy, nomination of, 3478.

**Young, Jonathan,** commander in Navy, nomination of, to be restored to original position, and reasons therefor, 4002.

**Young, Samuel B. M.,** operations of brigade under, around Santiago, Cuba, discussed, 6395.

**Youngstown, Ohio,** act for erection of public building at, vetoed, 5254.

**Yuba Forest Reserve,** proclaimed, 7349.

**Yucatan.**—A peninsula of Mexico. It comprises the States of Yucatan and Campeche and the territory of Quintana. It is bounded on the north by the Gulf of Mexico, on the east by the Channel of Yucatan (which separates it from Cuba) and the Caribbean Sea, on the south by British Honduras and Guatemala, and on the west by the Gulf of Campeche. The surface is low. Its chief product is sisal hemp. Yucatan was discovered in 1517; was conquered by Spain 1527-1547; became independent 1821; was annexed to Mexico 1822. In April, 1848, President Polk reiterated the "Monroe doctrine" while discussing the relations of the United States and Yucatan (2431).

**Yucatan:**

Acquisition of, by United States, discussed, 2431.

Aid of United States asked for, by, to suppress Indian hostilities, 2431.

Foreign powers must not take possession of, 2431.

Monroe doctrine reasserted, 2432.

Referred to, 2433, 2434, 2436.

**Yukon, The,** mineral wealth in, value of, 6063.

**Yulee, David L.,** imprisonment of, report on, transmitted, 3576.

# Z

**Zanesville, Ohio**, act for erection of public building at, vetoed, 5016.

**Zantzinger, William P.**, purser in Navy, nomination of, and reasons therefor, 6003.

**Zantzinger, John P.**, captain in Navy, nomination of, and reasons therefor, 1745.

**Zanzibar**, treaty with, 5195.

**Zenger's Case**.—One of the most important struggles for the freedom of the press in America. John Peter Zenger was editor and publisher of the *New York Weekly Journal*, which was founded by him in 1726. His newspaper openly denounced the administration of the colonial government. For this he was brought to trial in 1735, charged with the publication of "false, scandalous, malicious, seditious libels" against the royal government of the Colony of New York. Strenuous efforts were made to secure Zenger's conviction, but no jury could be found to convict him.

**Zepeda, Señor**, treaty between United States and Nicaragua concluded by, 2572.

**Zollverein**.—A union of German States for the maintenance of uniform rates of duty on imports from other countries and of free trade among themselves. It began in 1828 in an agreement between Prussia and the Grand Duchy of Hesse, and gradually developed until now it is coextensive with the German Empire, and also includes the Grand Duchy of Luxemburg.

**Zollverein, The**. (See Germany.)

**Zona Libre**.—A narrow strip of territory along the northern border of Mexico, so called because certain articles imported for consumption in it were formerly exempted from customs duties. It was first established in 1858. Imports into the zone latterly paid 10 per cent of the ordinary duties, except cattle, which paid full duty. The zone was suppressed July 1, 1905.

**Zona Libre**:

Discussed, 4055, 4100, 4295, 4806, 6334.  
Referred to, 5195.

**Zuloaga, Félix**, supreme power in Mexico assigned to, 3094, 3175.
